   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

4. Has the patient achieved or maintained at least a 5% weight loss of baseline body weight after 3 months of treatment?

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

PHENTERMINE - TOPIRAMATE

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PHENTERMINE - TOPIRAMATE (Qsymia)** requires the following rule(s) be met for renewal:

A. The request is for weight loss or weight management

B. If you are 12 to 17 years of age, approval also requires:

1. You have achieved or maintained at least a 3% to 5% weight loss of baseline body mass index (BMI: a tool for evaluating body fat) after 3 months of treatment

C. If you are 18 years of age or older, approval also requires:

1. You meet ONE of the following before starting weight loss therapy:
   a. You have a body mass index (BMI: a tool for evaluating body fat) of at least 30 kg/m(2)
   b. You are Asian and have a body mass index (BMI: a tool for evaluating body fat) of at least 27.5 kg/m(2)
   c. You have a body mass index (BMI: a tool for evaluating body fat) of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], or hyperlipidemia [high cholesterol])
   d. You are Asian, have a body mass index (BMI: a tool for evaluating body fat) of at least 25 kg/m(2), AND have at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], or hyperlipidemia [high cholesterol])
2. You have achieved or maintained at least a 5% weight loss of baseline body weight after 3 months of treatment

---

PRIOR AUTHORIZATION GUIDELINES

PIMAVANSERIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PIMAVANSERIN TARTRATE	NUPLAZID	43373		GPI-10 (5940002820)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of psychosis (ICD-10 F02.82, F02.A2, F02.B2, F02.C2) associated with Parkinson's disease (ICD-10 Group G20) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, geriatrician, or behavioral health specialist (e.g., psychiatrist)

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **34mg: #1 per day.**
   - **17mg: #2 per day.**
   - **10mg: #1 per day.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PIMAVANSERIN (Nuplazid)** requires you to meet the following rule(s) for approval:
   A. You have psychosis (a type of mental health disorder) associated with Parkinson's disease (PD: a type of movement disorder)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), geriatrician (a doctor who specializes in the health care of older adults), or behavioral health specialist (such as a psychiatrist [a type of mental health doctor])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

PIRFENIDONE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PIRFENIDONE	ESBRIET, PIRFENIDONE	40237		GPI-10 (4555006000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of idiopathic pulmonary fibrosis (IPF) (ICD-10 J84.112) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a pulmonologist
   - The patient does NOT have other known causes of interstitial lung disease (ILD) (e.g., connective tissue disease, drug toxicity, asbestos or beryllium exposure, hypersensitivity pneumonitis, systemic sclerosis, rheumatoid arthritis, radiation, sarcoidosis, bronchiolitis obliterans organizing pneumonia, human immunodeficiency virus [HIV] infection, viral hepatitis, cancer)
   - The patient has a usual interstitial pneumonia (UIP) pattern as evidenced by high-resolution computed tomography (HRCT) alone or via a combination of surgical lung biopsy and HRCT
   - The patient does NOT currently smoke cigarettes
   - Esbriet will NOT be used concurrently with Ofev

   If yes, **enter TWO authorizations for a total of 12 months as follows:**
   <u>FIRST APPROVAL:</u> Approve all strengths for 1 month by GPID or GPI-14 with the following quantity limits:
   - **267mg: #9 per day.**
   - **534mg: #3 per day.**
   - **801mg: #3 per day.**

   <u>SECOND APPROVAL:</u> Approve for 11 months by HICL or GPI-10 with a quantity limit of #3 per day (enter a start date of 2 days BEFORE the end of the first approval).

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

PIRFENIDONE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PIRFENIDONE (Esbriet)** requires the following rule(s) be met for approval:

A. You have idiopathic pulmonary fibrosis (IPF: a type of lung condition)
B. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor)
C. You do NOT have other known causes of interstitial lung disease (ILD: a type of lung condition) (such as connective tissue disease [a type of autoimmune disorder], drug toxicity, asbestos [a type of mineral that can be toxic] or beryllium [a type of metal that can be toxic] exposure, hypersensitivity pneumonitis [a type of lung condition], systemic sclerosis [a type of autoimmune disorder], rheumatoid arthritis [a type of joint condition], radiation, sarcoidosis [a type of inflammatory disorder], bronchiolitis obliterans organizing pneumonia [a type of lung condition], human immunodeficiency virus [HIV: an immune system disease caused by a virus] infection, viral hepatitis [type of liver inflammation], cancer)
D. You have a usual interstitial pneumonia pattern (UIP: a specific type of lung scarring) as shown by high-resolution computed tomography (HRCT: type of imaging test) alone or by a combination of surgical lung biopsy (removal of cells or tissue from the body for examination) and HRCT
E. You do NOT currently smoke cigarettes
F. You will NOT use Esbriet concurrently (at the same time) with Ofev

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

PIRTOBRUTINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PIRTOBRUTINIB	JAYPIRCA	48657		GPI-10 (2153216500)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory mantle cell lymphoma (MCL) (ICD-10 Group C83.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received at least TWO lines of systemic therapy including a Bruton tyrosine kinase (BTK) inhibitor (e.g., Imbruvica [ibrutinib], Calquence [acalabrutinib], Brukinsa [zanubrutinib])

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **50 mg: #3 per day.**
   - **100 mg: #2 per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of relapsed or refractory chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) or small lymphocytic lymphoma (SLL) (ICD-10 Group C83.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received a covalent Bruton's tyrosine kinase (BTK) inhibitor (e.g., Imbruvica [ibrutinib], Calquence [acalabrutinib], Brukinsa [zanubrutinib])

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **50 mg: #3 per day.**
   - **100 mg: #2 per day.**

   If no, do not approve.

PIRTOBRUTINIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PIRTOBRUTINIB (Jaypirca)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Relapsed or refractory mantle cell lymphoma (MCL) (a type of blood cancer that has returned or did not respond to treatment)
   2. Relapsed or refractory chronic lymphocytic leukemia (CLL) (a type of blood cancer that has returned or did not respond to treatment)
   3. Relapsed or refractory small lymphocytic lymphoma (SLL) (a type of blood cancer that has returned or did not respond to treatment)

B. If you have relapsed or refractory mantle cell lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have previously received at least TWO lines of systemic therapy (treatment that targets the entire body), including a BTK inhibitor (Bruton tyrosine kinase inhibitor such as Imbruvica [ibrutinib], Calquence [acalabrutinib], Brukinsa [zanubrutinib])

C. If you have relapsed or refractory chronic lymphocytic leukemia or small lymphocytic lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have previously received a covalent BTK inhibitor (Bruton's tyrosine kinase inhibitor such as Imbruvica [ibrutinib], Calquence [acalabrutinib], Brukinsa [zanubrutinib])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PITOLISANT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PITOLISANT HCL	WAKIX	45575		GPI-10 (6145007010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of excessive daytime sleepiness (EDS) with narcolepsy (ICD-10 G47.419) and narcolepsy is confirmed by **ONE** of the following criteria?
   - The patient has a Multiple Sleep Latency Test (MSLT) showing both a mean sleep latency of 8 minutes or less AND 2 or more early-onset rapid eye movement (REM) sleep test periods (SOREMPs)
   - The patient has a Multiple Sleep Latency Test (MSLT) showing both a mean sleep latency of 8 minutes or less AND one early-onset rapid eye movement (REM) sleep test period (SOREMP) AND additionally one SOREMP (within approximately 15 minutes) on a polysomnography the night preceding the MSLT, with the polysomnography ruling out non-narcolepsy causes of excessive daytime sleepiness (EDS)
   - The patient has normal orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay

   If yes, continue to #2.
   If no, continue to #5.

2. Does the patient meet **ALL** of the following criteria?
   - The patient has excessive daytime sleepiness (EDS) persisting for at least 3 months and an Epworth Sleepiness Scale (ESS) score of more than 10
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - Wakix will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the patient 6 to 17 years of age **AND** meets the following criterion?
   - The patient had a trial of or contraindication to ONE preferred generic typical stimulant (e.g., amphetamine sulfate [Evekeo], methylphenidate [Ritalin])

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, continue to #4.

PITOLISANT

INITIAL CRITERIA (CONTINUED)

4. Is the patient 18 years of age or older **AND** meets the following criterion?
   - The patient had a trial of or contraindication to one preferred generic typical stimulant (e.g., amphetamine sulfate [Evekeo], methylphenidate [Ritalin]) AND solriamfetol (Sunosi), armodafinil (Nuvigil), or modafinil (Provigil)

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Does the patient have a diagnosis of cataplexy with narcolepsy (ICD-10 G47.411) and the narcolepsy diagnosis is confirmed by **ONE** of the following criteria?
   - The patient has a Multiple Sleep Latency Test (MSLT) showing both a mean sleep latency of 8 minutes or less AND two or more sleep-onset rapid eye movement periods (SOREMPs)
   - The patient has a SOREMP within 15 minutes of sleep onset
   - The patient has low orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

6. Does the patient meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - The patient has an Epworth Sleepiness Scale (ESS) score greater than 10
   - Wakix will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
   - The patient has tried TWO of the following preferred agents: venlafaxine, fluoxetine, a TCA (e.g., clomipramine, imipramine)

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

PITOLISANT

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PITOLISANT (Wakix)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)
   2. Cataplexy with narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)

B. If you have excessive daytime sleepiness with narcolepsy, approval also requires:
   1. You have narcolepsy (a type of sleep condition) that is confirmed by ONE of the following:
      a. You have a Multiple Sleep Latency Test (MSLT: a type of sleep study) showing both an average sleep latency of 8 minutes or less AND 2 or more early-onset rapid eye movement (REM) sleep test periods (SOREMPs: time it takes to enter dream sleep)
      b. You have a Multiple Sleep Latency Test (MSLT: a type of sleep study) showing both an average sleep latency of 8 minutes or less AND one early-onset rapid eye movement (REM) sleep test period (SOREMP: time it takes to enter dream sleep) AND additionally one SOREMP (within approximately 15 minutes) on a polysomnography (type of sleep test) the night preceding the MSLT, with the polysomnography ruling out non-narcolepsy causes of excessive daytime sleepiness (EDS)
      c. You have normal orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay (test showing you have normal levels of a chemical that helps with staying awake)
   2. You have EDS lasting for at least 3 months and an Epworth Sleepiness Scale (ESS: tool to measure your sleepiness) score of more than 10
   3. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
   4. You will NOT use Wakix concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta (eszopiclone), Ambien (zolpidem), Sonata (zaleplon), estazolam, Restoril (temazepam), Halcion (triazolam), flurazepam, quazepam, Belsomra (suvorexant)

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

INITIAL CRITERIA (CONTINUED)

5. You meet ONE of the following:
   a. You are 6 to 17 years old AND have tried or have a contraindication to (harmful for you to use) ONE preferred generic typical stimulant (such as amphetamine sulfate [Evekeo], methylphenidate [Ritalin])
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) one preferred generic typical stimulant (such as amphetamine sulfate [Evekeo], methylphenidate [Ritalin]) AND solriamfetol (Sunosi), armodafinil (Nuvigil), or modafinil (Provigil)

C. If you have cataplexy with narcolepsy, approval also requires:

1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
3. You have an Epworth Sleepiness Scale (tool to measure your sleepiness) score of more than 10
4. Your narcolepsy (a type of sleep condition) is confirmed by ONE of the following:
   a. A Multiple Sleep Latency Test (MSLT: a type of sleep study) showing both a mean sleep latency of 8 minutes or less AND two or more sleep-onset rapid eye movement periods (SOREMPs: time it takes to enter dream sleep)
   b. You have a sleep-onset rapid eye movement period (SOREMP: time it takes to enter dream sleep) within 15 minutes of sleep onset
   c. You have low orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay (test showing you have low levels of a chemical that helps with staying awake)
5. You will NOT use Wakix concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta (eszopiclone), Ambien (zolpidem), Sonata (zaleplon), estazolam, Restoril (temazepam), Halcion (triazolam), flurazepam, quazepam, Belsomra (suvorexant)
6. You have tried TWO of the following preferred medications: venlafaxine, fluoxetine, a TCA (tricyclic antidepressant such as clomipramine, imipramine)

PITOLISANT

RENEWAL CRITERIA

1. Does the patient have a diagnosis of excessive daytime sleepiness (EDS) with narcolepsy (ICD-10 G47.419) or cataplexy with narcolepsy (ICD-10 G47.411) **AND** meet the following criterion?
   - Wakix will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has demonstrated at least a 25% improvement in Epworth Sleepiness Scale (ESS) scores compared to baseline
   - The patient has shown improvement in cataplexy symptoms compared to baseline
   - The patient has demonstrated improvement in sleep latency from baseline

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PITOLISANT (Wakix)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)
      2. Cataplexy with narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)
   B. You will NOT use Wakix concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant]
   C. You meet ONE of the following:
      1. You have demonstrated at least a 25% improvement in Epworth Sleepiness Scale (ESS: tool to measure your sleepiness) scores compared to baseline
      2. You have shown improvement in cataplexy (sudden and uncontrollable muscle weakness) symptoms compared to baseline
      3. You have demonstrated improvement in sleep latency (the amount of time it takes to fall asleep) from baseline

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - Therapy is prescribed by or in consultation with an Infectious Disease (ID) specialist
   - Therapy is a continuation of care from an inpatient setting

   If yes, **approve for 1 month by HICL or GPI-10 with a quantity limit of #21 for #1 fill.**
   If no, continue to #3.

3. Does the patient meet **ALL** of the following criteria?
   - The culture shows that the patient's infection is caused by a multidrug-resistant bacteria
   - The organism from the culture is sensitive to Pivya
   - The organism from the culture is resistant OR the patient has a contraindication to other beta- lactams (e.g., cefdinir, cefaclor), fluoroquinolones (e.g., ciprofloxacin, levofloxacin), cephalosporins, penicillins, nitrofurantoin, and TMP-SMX

   If yes, **approve for 1 month by HICL or GPI-10 with a quantity limit of #21 for #1 fill.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PIVMECILLINAM

GUIDELINE FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PIVMECILLINAM (Pivya)** requires the following rule(s) be met for approval:

A. You have uncomplicated urinary tract infection (uUTI: a type of bacterial infection)
B. You are 18 years of age or older
C. You are a female
D. You meet ONE of the following:
    1. Therapy is prescribed by or in consultation with an Infectious Disease (ID) specialist (a doctor who specializes in the treatment of infections)
    2. Therapy is a continuation of care from an inpatient setting
    3. You meet ALL of the following:
        a. There is a culture (a type of laboratory test) that shows your infection is caused by a multidrug-resistant (other medications did not work well) bacteria
        b. Pivya will work against the bacteria from the culture
        c. The bacteria is resistant (other medication did not work well), or you have a contraindication to (harmful for you to use) other beta-lactams medications (such as cefdinir, cefaclor), fluoroquinolone medications (such as ciprofloxacin, levofloxacin), cephalosporins, penicillins, nitrofurantoin, and sulfamethoxazole/trimethoprim medications

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Pivya.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PLERIXAFOR (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PLERIXAFOR	MOZOBIL, PLERIXAFOR	36021		GPI-10 (8250206000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of non-Hodgkin's lymphoma (NHL) and meet **ALL** of the following criteria?
   - The requested medication will be used in combination with filgrastim or its biosimilars (e.g., Neupogen, Nivestym)
   - The requested medication will be used to mobilize hematopoietic stem cells to the peripheral blood for collection and subsequent autologous transplantation

   If yes, **approve for 1 month by HICL or GPI-10 with a quantity limit of #9.6mL for one fill.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient have a diagnosis of multiple myeloma (MM) and meet **ALL** of the following criteria?
   - The requested medication will be used in combination with filgrastim or its biosimilars (e.g., Neupogen, Nivestym)
   - The requested medication will be used to mobilize hematopoietic stem cells to the peripheral blood for collection and subsequent autologous transplantation

   If yes, **approve for 1 month by HICL or GPI-10 with a quantity limit of #9.6mL for one fill.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PLERIXAFOR (Mozobil)** requires you meet the following rule(s) for approval:
   A. You have ONE of the following:
      1. Non-Hodgkin's lymphoma (NHL: a type of blood cancer)
      2. Multiple myeloma (MM: a type of blood cancer)
   B. The requested medication will be used in combination with filgrastim or its biosimilars (such as Neupogen, Nivestym)
   C. The requested medication will be used to mobilize hematopoietic stem cells to the peripheral blood for collection (a type of blood cell is stimulated to be collected from your blood) followed by autologous stem cell transplantation (a type of procedure to replace damaged bone marrow with your own healthy blood-forming cells)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PLOZASIRAN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PLOZASIRAN SODIUM	REDEMPLO	51006		GPI-10 (3090627030)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of familial chylomicronemia syndrome (FCS) (ICD-10 E78.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Redemplo will be used as an adjunct therapy to diet
   - Redemplo will NOT be used concurrently with another agent (e.g., Tryngolza [olezarsen]) for the treatment of FCS

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Has the patient's FCS diagnosis been confirmed with **ONE** of the following criteria?
   - Genetic testing
   - History of fasting triglycerides of at least 1000 mg/dL on repeated testing (for at least 3 prior occasions) AND a history of recurrent acute pancreatitis that is not caused by alcohol or cholelithiasis, a history of hospitalization for severe abdominal pain without other explainable cause, or a family history of hypertriglyceridemia-induced pancreatitis

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PLOZASIRAN (Redemplo)** requires the following rule(s) be met for approval:
   A. You have familial chylomicronemia syndrome (FCS: a type of rare genetic condition)
   B. You are 18 years of age or older
   C. You will use Redemplo as an adjunct (add-on) therapy to diet
   D. You will NOT use Redemplo concurrently (at the same time) with another medication (such as Tryngolza [olezarsen]) for the treatment of familial chylomicronemia syndrome (FCS: a type of rare genetic condition)

   (Initial denial text continued on next page)

PLOZASIRAN

INITIAL CRITERIA (CONTINUED)

E. Your familial chylomicronemia syndrome (FCS: a type of rare genetic condition) has been confirmed with ONE of the following:
   1. Genetic testing (a type of lab test)
   2. History of fasting triglycerides (a type of fat) of at least 1000 mg/dL on repeated testing (for at least 3 prior occasions) AND a history of recurrent acute pancreatitis (short-term inflammation of the pancreas) that is not caused by alcohol or cholelithiasis (hard, pebble-like stones that form inside gallbladder), a history of hospitalization for severe abdominal pain without other explainable cause, or a family history of hypertriglyceridemia-induced pancreatitis (high levels of fat in the blood due to pancreas inflammation)

PLOZASIRAN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of familial chylomicronemia syndrome (FCS) (ICD-10 E78.3) and meet **ALL** of the following criteria?
   - The patient has experienced a clinical benefit as demonstrated by a reduction in triglyceride levels
   - Redemplo will NOT be used concurrently with another agent (e.g., Tryngolza [olezarsen]) for the treatment of FCS

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PLOZASIRAN (Redemplo)** requires the following rule(s) be met for renewal:
   A. You have familial chylomicronemia syndrome (FCS: a type of rare genetic condition)
   B. You have experienced a clinical benefit as shown by a reduction (decrease) in triglyceride (a type of fat) levels
   C. You will NOT use Redemplo concurrently (at the same time) with another medication (such as Tryngolza [olezarsen]) for the treatment of familial chylomicronemia syndrome (FCS: a type of rare genetic condition)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Redemplo.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

POLATUZUMAB VEDOTIN-PIIQ (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
POLATUZUMAB VEDOTIN-PIIQ	POLIVY	45781		GPI-10 (2135486030)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory diffuse large B-cell lymphoma (DLBCL), not otherwise specified, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The requested medication will be used in combination with bendamustine and a rituximab product
   - The patient has had at least two prior therapies (e.g., R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine and prednisone], tafasitamab with lenalidomide)
   - The patient is not a candidate for autologous hematopoietic stem cell transplant

   If yes, **approve for 6 months by HICL or GPI-10 for #1 fill per 21 days with a maximum of #6 fills.**

   If no, continue to #2.

2. Does that patient have a diagnosis of previously untreated diffuse large B-cell lymphoma (DLBCL), not otherwise specified, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The requested medication will be used in combination with a rituximab product, cyclophosphamide, doxorubicin, and prednisone (R-CHP)

   If yes, **approve for 6 months by HICL or GPI-10 for #1 fill per 21 days with a maximum of #6 fills.**
   If no, continue to #3.

3. Does that patient have a diagnosis of previously untreated high-grade B-cell lymphoma (HGBL) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has an International Prognostic Index score of 2 or greater
   - The requested medication will be used in combination with a rituximab product, cyclophosphamide, doxorubicin, and prednisone (R-CHP)

   If yes, **approve for 6 months by HICL or GPI-10 for #1 fill per 21 days with a maximum of #6 fills.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

POLATUZUMAB VEDOTIN-PIIQ (NSA)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **POLATUZUMAB VEDOTIN-PIIQ (Polivy)** requires the following rule(s) be met for approval:

A. You have ONE of the following diagnoses:
   1. Relapsed (returned) or refractory (resistant to treatment) diffuse large B-cell lymphoma (DLBCL: a type of blood cancer), not otherwise specified
   2. Previously untreated diffuse large B-cell lymphoma (DLBCL: a type of blood cancer), not otherwise specified
   3. Previously untreated high-grade B-cell lymphoma (HGBL: an aggressive type of blood cancer)

B. If you have relapsed or refractory diffuse large B-cell lymphoma (DLBCL), not otherwise specified, approval also requires:
   1. You are 18 years of age or older
   2. The requested drug will be used in combination with bendamustine and a rituximab product (type of cancer drug)
   3. You have had at least two prior therapies (such as R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine, prednisone], tafasitamab with lenalidomide)
   4. You are not a candidate for an autologous hematopoietic stem cell transplant (cells transferred from your own body)

C. If you have previously untreated diffuse large B-cell lymphoma (DLBCL), not otherwise specified, approval also requires:
   1. You are 18 years of age or older
   2. The requested drug will be used in combination with a rituximab product (type of cancer drug), cyclophosphamide, doxorubicin, and prednisone (R-CHP)

D. If you have previously untreated high-grade B-cell lymphoma (HGBL), approval also requires:
   1. You are 18 years of age or older
   2. You have International Prognostic Index (a tool used to determine the likely cause of a disease) score of 2 or greater
   3. The requested drug will be used in combination with a rituximab product (type of cancer drug), cyclophosphamide, doxorubicin, and prednisone (R-CHP)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

POMALIDOMIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
POMALIDOMIDE	POMALYST, POMALIDOMIDE	39996		GPI-10 (2145008000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of multiple myeloma (MM) (ICD-10 Group C90.0) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The requested medication will be used in combination with dexamethasone
- The patient has received at least two prior therapies including Revlimid (lenalidomide) and a proteasome inhibitor (e.g., Velcade [bortezomib], Kyprolis [carfilzomib], Ninlaro [ixazomib])

If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #21 per 28 days.**
If no, continue to #2.

2. Does the patient have a diagnosis of Kaposi sarcoma (KS) (ICD-10 Group C46) **AND** meet the following criterion?
- The patient is 18 years of age or older

If yes, continue to #3.
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
- The patient has AIDS-related Kaposi sarcoma after failing highly active antiretroviral therapy (HAART)
- The patient is HIV-negative

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **POMALIDOMIDE (Pomalyst)** requires the following rule(s) be met for approval:
A. You have ONE of the following:
   1. Multiple myeloma (MM: a type of blood cancer)
   2. Kaposi sarcoma (KS: a type of cancer in the lining of blood and lymph vessels)

(Denial text continued on next page)

PRIOR AUTHORIZATION GUIDELINES

PONATINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PONATINIB HCL	ICLUSIG	39859		GPI-10 (2153187510)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chronic myeloid leukemia (CML) (ICD-10 Groups C92.1, C92.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a mutational analysis prior to initiation AND Iclusig is appropriate per the NCCN guideline table for treatment recommendations based on BCR-ABL1 mutation profile *(Please see header CML-5 of the current NCCN guidelines)*

   If yes, continue to #2.
   If no, continue to #5.

2. Does the patient have T315I-positive CML (chronic phase, accelerated phase, or blast phase)?

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #3.

3. Does the patient have chronic phase (CP) chronic myeloid leukemia (CML) **AND** meet the following criterion?
   - The patient has a resistance or intolerance to at least TWO prior kinase inhibitors [e.g., Tasigna (nilotinib), Sprycel (dasatinib), Bosulif (bosutinib), Gleevec (imatinib)]

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #4.

4. Does the patient have accelerated phase (AP) or blast phase (BP) chronic myeloid leukemia (CML) **AND** meet the following criterion?
   - There are no other kinase inhibitors [e.g., Tasigna (nilotinib), Sprycel (dasatinib), Bosulif (bosutinib), Gleevec (imatinib)] indicated for the patient

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PONATINIB

GUIDELINES FOR USE (CONTINUED)

5. Does the patient have a diagnosis of Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL) (ICD-10 Group C91.0) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Does the patient meet **ONE** of the following criteria?
   - The patient's cancer is positive for the T315I mutation
   - There are no other kinase inhibitors [e.g., Tasigna (nilotinib), Sprycel (dasatinib), Bosulif (bosutinib), Gleevec (imatinib)] indicated for the patient
   - The patient is newly diagnosed (e.g., starting or previously started Iclusig treatment at the time of diagnosis) AND Iclusig will be used in combination with chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PONATINIB (Iclusig)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Chronic myeloid leukemia (CML: type of blood cell cancer)
      2. Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL: a type of blood cell cancer)

   B. If you have chronic myeloid leukemia, approval also requires:
      1. You are 18 years of age or older
      2. You had a mutational analysis (a type of test) before starting therapy AND Iclusig is appropriate per the National Comprehensive Cancer Network (NCCN) guideline table for treatment recommendations based on BCR-ABL1 mutation (breakpoint cluster region- Abelson murine leukemia 1; a type of abnormal gene) profile
      3. You meet ONE of the following:
         a. You have T315I-positive (a genetic mutation) CML (chronic phase, accelerated phase, or blast phase)
         b. You have chronic phase CML AND have a resistance to or are not able to safely use at least TWO prior kinase inhibitor treatments [such as Tasigna (nilotinib), Sprycel (dasatinib), Bosulif (bosutinib), Gleevec (imatinib)]
         c. You have accelerated phase or blast phase CML AND there are no other kinase inhibitors [such as Tasigna (nilotinib), Sprycel (dasatinib), Bosulif (bosutinib),
         Gleevec (imatinib)] that can be used for your disease

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PONESIMOD

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PONESIMOD	PONVORY	47221		GPI-10 (6240706000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Zeposia (ozanimod), fingolimod (Gilenya), dimethyl fumarate (Tecfidera), Vumerity (diroximel fumarate), Mayzent (siponimod)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient have **ANY** of the following contraindications to Ponvory?
   - Within the past 6 months, experienced a myocardial infarction, unstable angina, stroke, transient ischemic attack (TIA), decompensated heart failure requiring hospitalization, or Class III/IV heart failure
   - A presence of Mobitz Type II 2nd degree or 3rd degree AV block, sick sinus syndrome, or sino- atrial block, unless the patient has a functioning pacemaker

   If yes, do not approve.
   If no, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PONESIMOD (Ponvory)** requires the following rule(s) be met for approval:
   A. You have a relapsing form of multiple sclerosis (MS: a type of nerve disorder), to include clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms go away and return), or active secondary progressive disease (advanced disease)
   B. You are 18 years of age or older
   C. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Zeposia (ozanimod), fingolimod (Gilenya), dimethyl fumarate (Tecfidera), Vumerity (diroximel fumarate), Mayzent (siponimod)

   (Denial text continued on next page)

PONESIMOD

GUIDELINES FOR USE (CONTINUED)

D. You do NOT have any of the following contraindications to (harmful for you to use) Ponvory:
   1. Within the past 6 months, experienced a myocardial infarction (heart attack), unstable angina (chest pain), stroke, transient ischemic attack (TIA: short stroke-like attack), decompensated heart failure requiring hospitalization, or Class III/IV heart failure
   2. A presence of Mobitz Type II 2nd degree or 3rd degree AV block, sick sinus syndrome, or sino-atrial block (types of irregular heartbeats), unless you have a functioning pacemaker (a small device that is placed [implanted] in your chest to help control your heartbeat)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Ponvory.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PORFIMER

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PORFIMER SODIUM	PHOTOFRIN	11790		GPI-10 (2170707010)	

GUIDELINES FOR USE

1. Is the requested medication being used for the reduction of obstruction and palliation of symptoms in patients with completely or partially obstructing endobronchial non-small cell lung cancer (NSCLC)?

   If yes, **approve once by HICL or GPI-10.**
   If no, continue to #2.

2. Is the requested medication being used for the treatment of microinvasive endobronchial non-small cell lung cancer (NSCLC) in patients for whom surgery and radiotherapy are not indicated?

   If yes, **approve once by HICL or GPI-10.**
   If no, continue to #3.

3. Is the requested medication being used for the palliation of patients with completely obstructing esophageal cancer, or of patients with partially obstructing esophageal cancer who, in the opinion of their physician, cannot be satisfactorily treated with Nd:YAG laser therapy?

   If yes, **approve once by HICL or GPI-10.**
   If no, continue to #4.

4. Is the requested medication being used for the ablation of high-grade dysplasia in Barrett's esophagus patients who do not undergo esophagectomy?

   If yes, **approve once by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PORFIMER (Photofrin)** requires that the drug is being used for one of the following conditions:
   A. The reduction of blockage and palliation of symptoms (treatment focused on relief from the symptoms and stress of a serious illness) in patients with completely or partially obstructing endobronchial non-small cell lung cancer (NSCLC) or,
   B. Treatment of microinvasive endobronchial non-small cell lung cancer (a type of lung cancer that involves airway blockage) where surgery and radiation therapy cannot be used; or
   C. Helping to lessen your symptoms with completely obstructing or partially obstructing esophageal cancer, where in the opinion of your physician, you cannot be treated with Nd:YAG laser therapy (a high intensity laser that can be used to remove cancer) or,

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

POSACONAZOLE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
POSACONAZOLE	NOXAFIL, POSACONAZOLE	33461		GPI-10 (1140706000)	ROUTE = ORAL

GUIDELINES FOR USE

1. Is the request for continuation of therapy after the patient was started on posaconazole in the hospital?

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, continue to #2.

2. Is the request for the treatment of invasive aspergillosis (ICD-10 B44.0)?

   If yes, continue to #3.
   If no, continue to #5.

3. Is the request for posaconazole (Noxafil) tablets **AND** the patient meets the following criterion?
   - The patient is 2 years of age or older

   If yes, **approve for 12 weeks by GPID or GPI-14.**
   If no, continue to #4.

4. Is the request for posaconazole (Noxafil) PowderMix and the patient meets **ALL** of the following criteria?
   - The patient is 2 to 17 years of age
   - The patient has a contraindication to or is unable to swallow tablets

   If yes, **approve for 12 weeks by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Is the request for prophylaxis of invasive Aspergillus or Candida infections **AND** the patient meets the following criterion?
   - The patient is at high risk of developing these infections due to being severely immunocompromised (e.g., hematopoietic stem cell transplant [HSCT] recipients with graft-versus-host disease [GVHD], hematologic malignancy with prolonged neutropenia from chemotherapy)

   If yes, continue to #6.
   If no, continue to #9.

POSACONAZOLE

GUIDELINES FOR USE (CONTINUED)

6. Is the request for posaconazole (Noxafil) tablets **AND** the patient meets the following criterion?
   - The patient is 2 years of age or older

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, continue to #7.

7. Is the request for posaconazole (Noxafil) oral suspension and the patient meets **ALL** of the following criteria?
   - The patient is 13 years of age or older
   - The patient has a contraindication to or is unable to swallow tablets

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, continue to #8.

8. Is the request for posaconazole (Noxafil) PowderMix and the patient meets **ALL** of the following criteria?
   - The patient is 2 to 17 years of age
   - The patient has a contraindication to or is unable to swallow tablets

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

9. Does the patient have a diagnosis of oropharyngeal candidiasis (OPC) (ICD-10 B37.0) and meet **ALL** of the following criteria?
   - The patient is 13 years of age or older
   - The patient had a trial of or contraindication to ONE preferred agent: fluconazole, itraconazole
   - The request is for posaconazole (Noxafil) oral suspension

   If yes, **approve for 3 months by GPID or GPI-14.**
   If no, continue to #10.

10. Does the patient have a diagnosis of esophageal candidiasis (ICD-10 B37.81) and meet **ALL** of the following criteria?
    - The patient is 13 years of age or older
    - The patient had a trial of or contraindication to TWO of the following clinical standard of care agents: fluconazole, itraconazole solution, voriconazole

    If yes, **approve for 3 months by GPID or GPI-14.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

POSACONAZOLE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **POSACONAZOLE (Noxafil)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Continuation of therapy after hospital discharge
   2. Treatment of invasive aspergillosis (type of fungal infection)
   3. Prophylaxis (prevention) of invasive aspergillus or candida infections (types of fungal infection)
   4. Oropharyngeal candidiasis (OPC: fungal infection of the throat)
   5. Esophageal candidiasis (fungal infection in the tube connecting the throat and stomach)

B. If the request is for treatment of invasive aspergillosis, approval also requires:
   1. If the request is for posaconazole (Noxafil) tablets, approval also requires you meet the following:
      a. You are 2 years of age or older
   2. If the request is for posaconazole (Noxafil) PowderMix, approval also requires you meet ALL of the following:
      a. You are 2 to 17 years of age
      b. You have a contraindication to (harmful for you to use) or are unable to swallow tablets

C. If the request is for prophylaxis of invasive aspergillus or candida infections, approval also requires:
   1. You are at high risk of developing these infections due to being severely immunocompromised (such as hematopoietic stem cell transplant (HSCT: bone marrow transplant] recipients with graft-versus-host disease [GVHD: a type of immune disorder], hematologic malignancies [cancer affecting the blood] with prolonged neutropenia [low levels of a type of white blood cell] from chemotherapy [cancer treatment])
   2. If the request is for posaconazole (Noxafil) tablets, approval also requires you meet the following:
      a. You are 2 years of age or older
   3. If the request is for posaconazole (Noxafil) oral suspension, approval also requires you meet ALL of the following:
      a. You are 13 years of age or older
      b. You have a contraindication to (harmful for you to use) or are unable to swallow tablets
   4. If the request is for posaconazole (Noxafil) PowderMix, approval also requires you meet ALL of the following:
      a. You are 2 to 17 years of age
      b. You have a contraindication to (harmful for you to use) or are unable to swallow tablets

(Denial text continued on next page)

POSACONAZOLE

GUIDELINES FOR USE (CONTINUED)

D. If the request is for oropharyngeal candidiasis, approval also requires:
1. You are 13 years of age or older
2. You have tried or have a contraindication to (harmful for you to use) ONE preferred medication: fluconazole, itraconazole
3. You are requesting posaconazole (Noxafil) oral suspension

E. If the request is for esophageal candidiasis, approval also requires:
1. You are 13 years of age or older
2. You have tried or have a contraindication to (harmful for you to use) TWO of the following clinical standard of care medications: fluconazole, itraconazole solution, voriconazole

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PYRIMETHAMINE	DARAPRIM, PYRIMETHAMINE	04150		GPI-10 (1300004000)	ROUTE=ORAL

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the patient being treated for acute toxoplasmosis (ICD-10 Group B58) **AND** meets the following criterion?
   - Therapy is prescribed by or in consultation with an infectious disease specialist

   If yes**, approve for 6 weeks by HICL or GPI-10. Please enter two authorizations as follows:**
   - **Approve one fill for #8 per day.**
   - **Approve for 6 weeks with a quantity limit of #3 per day.**

   If no, continue to #2.

2. Is the patient being treated for chronic maintenance of toxoplasmosis (ICD-10 Group B58) and meets **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an infectious disease specialist
   - The patient is infected with human immunodeficiency virus (HIV)
   - The patient has successfully completed treatment for acute toxoplasmosis for at least 6

   weeks If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2 per day.**

   If no, continue to #3.

3. Is the patient being treated for primary prophylaxis of toxoplasmosis and meets **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an infectious disease specialist
   - The patient is infected with human immunodeficiency virus (HIV)
   - The patient had a trial of or has a contraindication to the clinical standard of care agent: Bactrim (SMX/TMP)
   - The patient is positive for *Toxoplasma gondii* IgG
   - The patient has a CD4 count of less than 100 cells/mm(3)

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #3 per day.**
   If no, continue to #4.

PYRIMETHAMINE

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of congenital toxoplasmosis (ICD-10 P37.1) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a neonatologist or pediatric infectious disease specialist

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: Our guideline for **PYRIMETHAMINE (Daraprim)** requires the following rule(s) be met for approval:
   A. The request is ONE of the following:
      1. Acute (short-term) treatment of toxoplasmosis (a type of parasite infection)
      2. Chronic (long-term) maintenance therapy for toxoplasmosis
      3. Primary prophylaxis of toxoplasmosis (prevention of a type of parasite infection)
      4. Congenital toxoplasmosis (unborn baby infected with parasite from the mother)

   B. If you are being treated for acute toxoplasmosis, approval also requires:
      1. Therapy is prescribed by or in consultation with an infectious disease specialist (a doctor that specializes in treating infections)

   C. If you are being treated for chronic maintenance for toxoplasmosis, approval also requires:
      1. Therapy is prescribed by or in consultation with an infectious disease specialist (a doctor that specializes in treating infections)
      2. You are also infected with human immunodeficiency virus (HIV: an immune system disease caused by a virus)
      3. You have successfully completed treatment for acute toxoplasmosis for at least 6 weeks

   D. If you are being treated for primary prophylaxis of toxoplasmosis, approval also requires:
      1. Therapy is prescribed by or in consultation with an infectious disease specialist (a doctor that specializes in treating infections)
      2. You are also infected with human immunodeficiency virus (HIV: an immune system disease caused by a virus)
      3. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: Bactrim (sulfamethoxazole-trimethoprim)
      4. You tested positive for *Toxoplasma gondii* (a type of parasite) Immunoglobulins (IgG) (you had a current or past infection with *Toxoplasma gondii)*
      5. Your CD4 count (a type of lab test) is less than 100 cells/mm(3)

   E. If you have congenital toxoplasmosis, approval also requires:
      1. Therapy is prescribed by or in consultation with a neonatologist (doctor that specializes in sick and premature newborn infants) or pediatric infectious disease specialist (a doctor that specializes in treating infections in children and adolescents)

PYRIMETHAMINE

RENEWAL CRITERIA

NOTE: For the diagnosis of congenital toxoplasmosis, please refer to Initial Criteria section.

1. Is the patient being treated for acute toxoplasmosis (ICD-10 Group B58) **AND** meets the following criterion?
   - The patient has persistent clinical disease (headache, neurological symptoms, or fever) and persistent radiographic disease (one or more mass lesions on brain imaging)

   If yes, **approve for 6 weeks by HICL or GPI-10 with a quantity limit of #3 per day.**
   If no, continue to #2.

2. Is the patient being treated for chronic maintenance of toxoplasmosis (ICD-10 Group B58) OR primary prophylaxis of toxoplasmosis and meets **ALL** of the following criteria?
   - The patient is infected with human immunodeficiency virus (HIV)
   - The patient has a CD4 count of less than 200 cells/mm(3)
   - The patient is currently taking ART (anti-retroviral therapy)

   If yes, **approve for 6 months by HICL or GPI-10 as follows:**
   - **Chronic maintenance of toxoplasmosis: #2 per day.**
   - **Primary prophylaxis of toxoplasmosis: #3 per day.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: Our guideline for **PYRIMETHAMINE (Daraprim)** requires the following rule(s) be met for renewal:
   A. The request is ONE of the following:
      1. Acute (short-term) treatment of toxoplasmosis (a type of parasite infection)
      2. Chronic (long-term) maintenance therapy for toxoplasmosis
      3. Primary prophylaxis of toxoplasmosis (prevention of a type of parasite infection)

   B. If you are being treated for acute toxoplasmosis, renewal also requires:
      1. You have persistent clinical disease (headache, neurological symptoms, or fever) and persistent radiographic disease (one or more mass lesions on brain imaging)

   C. If you are being treated for chronic maintenance of toxoplasmosis OR primary prophylaxis for toxoplasmosis, renewal also requires:
      1. You are also infected with human immunodeficiency virus (HIV: an immune system disease caused by a virus)
      2. Your CD4 count (a type of lab test) is less than 200 cells/mm(3)
      3. You are currently taking anti-retroviral therapy (ART: medications that treat HIV)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

QUIZARTINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
QUIZARTINIB DIHYDROCHLORIDE	VANFLYTA	49083		GPI-10 (2153304710)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of acute myeloid leukemia (AML) (ICD-10 Group C92.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is newly diagnosed (e.g., starting or previously started Vanflyta treatment at the time of diagnosis)
   - The patient's cancer is FLT3 internal tandem duplication (ITD)-positive, as detected by a Food and Drug Administration (FDA)-approved test

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Will Vanflyta be used in combination with standard cytarabine and anthracycline (e.g., daunorubicin, idarubicin) for induction therapy, followed by use with cytarabine as consolidation therapy?

   If yes, **approve all strengths for 6 months by GPID or GPI-14 with the following quantity limits:**
   - **17.7 mg: #28 per fill for a total of 6 fills.**
   - **26.5 mg: #14 per fill for a total of 6 fills.**

   If no, continue to #3.

3. Will Vanflyta be used as maintenance monotherapy following consolidation chemotherapy?

   If yes, **approve for 34 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

QUIZARTINIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **QUIZARTINIB (Vanflyta)** requires the following rule(s) be met for approval:

A. You have acute myeloid leukemia (AML: a type of blood and bone marrow cancer)
B. You are 18 years of age or older
C. You are newly diagnosed (such as you are starting or previously started Vanflyta treatment at the time your condition was identified)
D. Your cancer is FMS-like tyrosine kinase 3 internal tandem duplication (FLT3-ITD: a type of mutation) positive, as detected by a Food and Drug Administration (FDA)-approved test
E. You meet ONE of the following:
    1. Vanflyta will be used in combination with a standard cytarabine and anthracycline (such as daunorubicin, idarubicin) as induction therapy (a type of therapy to treat cancer), followed by use with cytarabine as consolidation therapy (type of therapy to treat cancer)
    2. Vanflyta will be used as maintenance monotherapy (one drug treatment) following consolidation chemotherapy

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Vanflyta.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

RAMUCIRUMAB (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RAMUCIRUMAB	CYRAMZA	41109		GPI-10 (2133507000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of advanced or metastatic gastric cancer or gastro-esophageal junction (GEJ) adenocarcinoma and meet **ALL** of the following criteria?
   - The requested medication will be used as a single agent or in combination with paclitaxel
   - The patient has experienced disease progression on or after prior fluoropyrimidine-containing chemotherapy (examples include fluorouracil [5-FU], capecitabine, floxuridine) **OR** platinum-containing chemotherapy (examples include cisplatin, oxaliplatin, carboplatin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis metastatic non-small cell lung cancer (NSCLC) and meet **ALL** of the following criteria?
   - The requested medication will be used in combination with docetaxel
   - The patient has experienced disease progression on or after platinum-based chemotherapy (cisplatin, oxaliplatin, carboplatin) **OR** if the patient has an EGFR or ALK genomic tumor aberration, there is disease progression on an FDA-approved therapy for these aberrations (examples include Tarceva, Gilotrif, Xalkori, or Zykadia) prior to receiving Cyramza

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis metastatic non-small cell lung cancer (NSCLC) and meet **ALL** of the following criteria?
   - The requested medication will be used in combination with erlotinib as first-line treatment
   - The tumors have epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 (L858R) substitution mutations

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

RAMUCIRUMAB (NSA)

GUIDELINE FOR USE (CONTINUED)

4. Does the patient have a diagnosis of metastatic colorectal cancer and meet **ALL** of the following criteria?
   - The requested medication will be used in combination with FOLFIRI (irinotecan, folinic acid, and 5-fluorouracil)
   - The patient has experienced disease progression on or after prior therapy with bevacizumab, oxaliplatin, and a fluoropyrimidine (such as 5-fluorouracil or capecitabine)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

5. Does the patient have a diagnosis of hepatocellular carcinoma and meet **ALL** of the following criteria?
   - The requested medication will be used as a single agent
   - Patient has an alpha fetoprotein (AFP) greater than or equal to 400 ng/mL
   - Patient has been treated with sorafenib (Nexavar)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RAMUCIRUMAB (Cyramza)** requires the following rule(s) be met for approval:
   A. You have ONE of the following diagnoses:
      1. Advanced or metastatic (cancer that has spread to other parts of the body), gastric cancer or gastro-esophageal junction adenocarcinoma (cancer of the stomach or caner of the esophagus [tube that connects mouth and stomach])
      2. Metastatic non-small cell lung cancer (NSCLC: type of lung cancer that has spread to other parts of your body)
      3. Metastatic colorectal cancer (type of rcolon or rectum cancer that has spread to other parts of the body)
      4. Hepatocellular carcinoma (type of liver cancer)

   B. If you have advanced or metastatic gastric cancer or gastro-esophageal junction adenocarcinoma, approval also requires:
      1. The requested medication will be used as a single agent or in combination with paclitaxel
      2. You have experienced disease progression (disease has worsened) on or after prior fluoropyrimidine-containing chemotherapy (examples include fluorouracil [5-FU], capecitabine, floxuridine) OR platinum-containing chemotherapy (examples include cisplatin, oxaliplatin, carboplatin)

   (Denial text continued on next page)

RAMUCIRUMAB (NSA)

GUIDELINE FOR USE (CONTINUED)

C. If you have metastatic non-small cell lung cancer (NSCLC), approval also requires ONE of the following:

1. The requested medication will be used in combination with docetaxel and you meet ONE of the following:
   a. You have experienced disease progression (disease has worsened) on or after platinum-based chemotherapy (cisplatin, oxaliplatin, carboplatin)
   b. You have an epidermal growth factor receptor (EGFR: type of protein) or anaplastic lymphoma kinase (ALK : type of enzyme) genomic tumor abnormality AND your disease has gotten worse on an Food and Drug Administration (FDA)-approved therapy (examples include Tarceva, Gilotrif, Xalkori, or Zykadia) prior to receiving Cyramza
2. The requested medication will be used in combination with erlotinib as first-line treatment AND your tumors have epidermal growth factor receptor (EGFR: type of protein) exon 19 deletions or exon 21 (L858R) substitution mutations

D. If you have metastatic colorectal cancer, approval also requires:

1. The requested medication will be used in combination with FOLFIRI (drug combination of irinotecan, folinic acid, and 5-fluorouracil)
2. You have experienced disease progression (disease has worsened) on or after prior therapy with bevacizumab, oxaliplatin, and a fluoropyrimidine (such as 5-fluorouracil or capecitabine)

E. If you have hepatocellular carcinoma, approval also requires:

1. The requested medication will be used as a single agent
2. You have an alpha fetoprotein (AFP) greater than or equal to 400 ng/mL
3. You have been treated with sorafenib (Nexavar)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RANIBIZUMAB-EQRN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RANIBIZUMAB-EQRN	CIMERLI		52665 52664	GPI-14 (86655060302012, 86655060302020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of neovascular (wet) age-related macular degeneration (nAMD) (ICD-10 Group H35.32) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - Cimerli will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Susvimo [ranibizumab], Beovu [brolucizumab-dbll])

   If yes, **approve Cimerli 0.5mg for 4 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of macular edema following retinal vein occlusion (RVO) (ICD-10 H34.9; Groups H34.81, H34.83) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - Cimerli will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Vabysmo [faricimab-svoa])

   If yes, **approve Cimerli 0.5mg for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #3.

3. Does the patient have a diagnosis of diabetic macular edema (DME) (ICD-10 E08.311, E08.321, E08.331, E08.341, E08.351, E08.37, E09.311, E09.321, E09.331, E09.341, E09.351, E09.37, E10.311, E10.321, E10.331, E10.341, E10.351, E10.37, E11.311, E11.321, E11.331, E11.341, E11.351, E11.37, E13.311, E13.321, E13.331, E13.341, E13.351, E13.37) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - Cimerli will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Vabysmo [faricimab-svoa])

   If yes, **approve Cimerli 0.3mg for 4 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #4.

RANIBIZUMAB-EQRN

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of diabetic retinopathy (DR) (ICD-10 Group E08.3 except E08.36, E08.37, and E08.39; Group E09.3 except E09.36, E09.37, and E09.39; Group E10.3 except E10.36, E10.37, and E10.39; Group E11.3 except E11.36, E11.37, and E11.39) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - Cimerli will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Susvimo [ranibizumab])

   If yes, **approve Cimerli 0.3mg for 4 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #5.

5. Does the patient have a diagnosis of myopic choroidal neovascularization (mCNV) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist

   If yes, **approve Cimerli 0.5mg for 3 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RANIBIZUMAB-EQRN (Cimerli)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Neovascular (wet) age-related macular degeneration (nAMD: a type of eye condition)
      2. Macular edema following retinal vein occlusion (RVO: a type of eye condition)
      3. Diabetic macular edema (DME: a type of eye condition caused by high blood sugar)
      4. Diabetic retinopathy (DR: a type of eye condition caused by high blood sugar)
      5. Myopic choroidal neovascularization (mCNV: a type of eye condition)

RANIBIZUMAB-EQRN

RENEWAL CRITERIA

NOTE: For the diagnosis of myopic choroidal neovascularization (mCNV), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of neovascular (wet) age-related macular degeneration (nAMD) (ICD-10 Group H35.32) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Cimerli will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Susvimo [ranibizumab], Beovu [brolucizumab-dbll])

   If yes, **approve Cimerli 0.5mg for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of macular edema following retinal vein occlusion (RVO) (ICD-10 H34.9; Groups H34.81, H34.83) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Cimerli will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Vabysmo [faricimab-svoa])

   If yes, **approve Cimerli 0.5mg for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #3.

3. Does the patient have a diagnosis of diabetic macular edema (DME) (ICD-10 E08.311, E08.321, E08.331, E08.341, E08.351, E08.37, E09.311, E09.321, E09.331, E09.341, E09.351, E09.37, E10.311, E10.321, E10.331, E10.341, E10.351, E10.37, E11.311, E11.321, E11.331, E11.341, E11.351, E11.37, E13.311, E13.321, E13.331, E13.341, E13.351, E13.37) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Cimerli will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Vabysmo [faricimab-svoa])

   If yes, **approve Cimerli 0.3mg for 12 months by GPID or GPI-14 with quantity limit of #0.1mL per 28 days.**

   If no, continue to #4.

RANIBIZUMAB-EQRN

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of diabetic retinopathy (DR) (ICD-10 Group E08.3 except E08.36, E08.37, and E08.39; Group E09.3 except E09.36, E09.37, and E09.39; Group E10.3 except E10.36, E10.37, and E10.39; Group E11.3 except E11.36, E11.37, and E11.39) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Cimerli will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Susvimo [ranibizumab])

   If yes, **approve Cimerli 0.3mg for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RANIBIZUMAB-EQRN (Cimerli)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Neovascular (wet) age-related macular degeneration (nAMD: a type of eye condition)
      2. Macular edema following retinal vein occlusion (RVO: a type of eye condition)
      3. Diabetic macular edema (DME: a type of eye condition caused by high blood sugar)
      4. Diabetic retinopathy (DR: a type of eye condition caused by high blood sugar)

   B. If you have neovascular (wet) age-related macular degeneration, renewal also requires:
      1. You have maintenance or improvement of visual acuity (vision clarity or sharpness)
      2. You will NOT use Cimerli concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Susvimo [ranibizumab], Beovu [brolucizumab-dbll])

   C. If you have macular edema following retinal vein occlusion, renewal also requires:
      1. You have maintenance or improvement of visual acuity (vision clarity or sharpness)
      2. You will NOT use Cimerli concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Vabysmo [faricimab-svoa])

   (Renewal denial text continued on next page)

CONTINUED ON NEXT PAGE

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

RANIBIZUMAB-LUCENTIS

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RANIBIZUMAB	LUCENTIS	33861		GPI-10 (8665506000)	BRAND ≠ SUSVIMO

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of neovascular (wet) age-related macular degeneration (nAMD) (ICD-10 Group H35.32) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Byooviz (ranibizumab-nuna), Cimerli (ranibizumab-eqrn)
   - Lucentis will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Susvimo [ranibizumab], Beovu [brolucizumab-dbll])

   If yes, **approve Lucentis 0.5mg for 4 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of macular edema following retinal vein occlusion (RVO) (ICD-10 H34.9; Groups H34.81, H34.83) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Byooviz (ranibizumab-nuna), Cimerli (ranibizumab-eqrn)
   - Lucentis will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Vabysmo [faricimab-svoa])

   If yes, **approve Lucentis 0.5mg for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #3.

RANIBIZUMAB-LUCENTIS

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of diabetic macular edema (DME) (ICD-10 E08.311, E08.321, E08.331, E08.341, E08.351, E08.37, E09.311, E09.321, E09.331, E09.341, E09.351, E09.37, E10.311, E10.321, E10.331, E10.341, E10.351, E10.37, E11.311, E11.321, E11.331, E11.341, E11.351, E11.37, E13.311, E13.321, E13.331, E13.341, E13.351, E13.37) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Byooviz (ranibizumab-nuna), Cimerli (ranibizumab-eqrn)
   - Lucentis will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Vabysmo [faricimab-svoa])

   If yes, **approve Lucentis 0.3mg for 4 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #4.

4. Does the patient have a diagnosis of diabetic retinopathy (DR) (ICD-10 Group E08.3 except E08.36, E08.37, and E08.39; Group E09.3 except E09.36, E09.37, and E09.39; Group E10.3 except E10.36, E10.37, and E10.39; Group E11.3 except E11.36, E11.37, and E11.39) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Byooviz (ranibizumab-nuna), Cimerli (ranibizumab-eqrn)
   - Lucentis will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Susvimo [ranibizumab])

   If yes, **approve Lucentis 0.3mg for 4 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #5.

5. Does the patient have a diagnosis of myopic choroidal neovascularization (mCNV) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist

   If yes, **approve Lucentis 0.5mg for 3 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RANIBIZUMAB-LUCENTIS

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RANIBIZUMAB-LUCENTIS** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Neovascular (wet) age-related macular degeneration (nAMD: a type of eye condition)
   2. Macular edema following retinal vein occlusion (RVO: a type of eye condition)
   3. Diabetic macular edema (DME: a type of eye condition caused by high blood sugar)
   4. Diabetic retinopathy (DR: a type of eye condition caused by high blood sugar)
   5. Myopic choroidal neovascularization (mCNV: a type of eye condition)

B. If you have neovascular (wet) age-related macular degeneration, approval also requires:
   1. Therapy is prescribed by or in consultation with an ophthalmologist (a type of eye doctor) or retina (a part of the eye) specialist
   2. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Byooviz (ranibizumab-nuna), Cimerli (ranibizumab-eqrn)
   3. You will NOT use Lucentis concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Susvimo [ranibizumab], Beovu [brolucizumab-dbll])

C. If you have macular edema following retinal vein occlusion, approval also requires:
   1. Therapy is prescribed by or in consultation with an ophthalmologist (a type of eye doctor) or retina (a part of the eye) specialist
   2. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Byooviz (ranibizumab-nuna), Cimerli (ranibizumab-eqrn)
   3. You will NOT use Lucentis concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Vabysmo [faricimab-svoa])

D. If you have diabetic macular edema, approval also requires:
   1. Therapy is prescribed by or in consultation with an ophthalmologist (a type of eye doctor) or retina (a part of the eye) specialist
   2. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Byooviz (ranibizumab-nuna), Cimerli (ranibizumab-eqrn)
   3. You will NOT use Lucentis concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Vabysmo [faricimab-svoa])

(Initial denial text continued on next page)

RANIBIZUMAB-LUCENTIS

INITIAL CRITERIA (CONTINUED)

E. If you have diabetic retinopathy, approval also requires:
1. Therapy is prescribed by or in consultation with an ophthalmologist (a type of eye doctor) or retina (a part of the eye) specialist
2. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Byooviz (ranibizumab-nuna), Cimerli (ranibizumab-eqrn)
3. You will NOT use Lucentis concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Susvimo [ranibizumab])

F. If you have myopic choroidal neovascularization, approval also requires:
1. Therapy is prescribed by or in consultation with an ophthalmologist (a type of eye doctor) or retina (a part of the eye) specialist

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RANIBIZUMAB-LUCENTIS

RENEWAL CRITERIA

NOTE: For the diagnosis of myopic choroidal neovascularization (mCNV), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of neovascular (wet) age-related macular degeneration (nAMD) (ICD-10 Group H35.32) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Lucentis will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Susvimo [ranibizumab], Beovu [brolucizumab-dbll])

   If yes, **approve Lucentis 0.5mg for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of macular edema following retinal vein occlusion (RVO) (ICD-10 H34.9; Groups H34.81, H34.83) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Lucentis will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Vabysmo [faricimab-svoa])

   If yes, **approve Lucentis 0.5mg for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #3.

3. Does the patient have a diagnosis of diabetic macular edema (DME) (ICD-10 E08.311, E08.321, E08.331, E08.341, E08.351, E08.37, E09.311, E09.321, E09.331, E09.341, E09.351, E09.37, E10.311, E10.321, E10.331, E10.341, E10.351, E10.37, E11.311, E11.321, E11.331, E11.341, E11.351, E11.37, E13.311, E13.321, E13.331, E13.341, E13.351, E13.37) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Lucentis will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Vabysmo [faricimab-svoa])

   If yes, **approve Lucentis 0.3mg for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #4.

RANIBIZUMAB-LUCENTIS

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of diabetic retinopathy (DR) (ICD-10 Group E08.3 except E08.36, E08.37, and E08.39; Group E09.3 except E09.36, E09.37, and E09.39; Group E10.3 except E10.36, E10.37, and E10.39; Group E11.3 except E11.36, E11.37, and E11.39) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Lucentis will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Susvimo [ranibizumab])

   If yes, **approve Lucentis 0.3mg for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RANIBIZUMAB-LUCENTIS** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Neovascular (wet) age-related macular degeneration (nAMD: a type of eye condition)
      2. Macular edema following retinal vein occlusion (RVO: a type of eye condition)
      3. Diabetic macular edema (DME: a type of eye condition caused by high blood sugar)
      4. Diabetic retinopathy (DR: a type of eye condition caused by high blood sugar)

   B. If you have neovascular (wet) age-related macular degeneration, renewal also requires:
      1. You have maintenance or improvement of visual acuity (vision clarity or sharpness)
      2. You will NOT use Lucentis concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Susvimo [ranibizumab], Beovu [brolucizumab-dbll])

   C. If you have macular edema following retinal vein occlusion, renewal also requires:
      1. You have maintenance or improvement of visual acuity (vision clarity or sharpness)
      2. You will NOT use Lucentis concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Vabysmo [faricimab-svoa])

   (Renewal denial text continued on next page)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of neovascular (wet) age-related macular degeneration (nAMD) (ICD-10 Group H35.32) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - Byooviz will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Beovu [brolucizumab-dbll], Eylea [aflibercept], Lucentis [ranibizumab])

   If yes, **approve for 4 months by HICL or GPI-10 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of macular edema following retinal vein occlusion (RVO) (ICD-10 H34.9; Groups H34.81, H34.83) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - Byooviz will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Vabysmo [faricimab-svoa])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #3.

3. Does the patient have a diagnosis of diabetic macular edema (DME) (ICD-10 E08.311, E08.321, E08.331, E08.341, E08.351, E08.37, E09.311, E09.321, E09.331, E09.341, E09.351, E09.37, E10.311, E10.321, E10.331, E10.341, E10.351, E10.37, E11.311, E11.321, E11.331, E11.341, E11.351, E11.37, E13.311, E13.321, E13.331, E13.341, E13.351, E13.37) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - Byooviz will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Beovu [brolucizumab-dbll], Eylea [aflibercept], Lucentis [ranibizumab])

   If yes, **approve for 4 months by HICL or GPI-10 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #4.

RANIBIZUMAB-NUNA

RENEWAL CRITERIA

NOTE: For the diagnosis of myopic choroidal neovascularization (mCNV), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of neovascular (wet) age-related macular degeneration (nAMD) (ICD-10 Group H35.32) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Byooviz will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Beovu [brolucizumab-dbll], Eylea [aflibercept], Lucentis [ranibizumab])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of macular edema following retinal vein occlusion (RVO) (ICD-10 H34.9; Groups H34.81, H34.83) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Byooviz will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Vabysmo [faricimab-svoa])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #3.

3. Does the patient have a diagnosis of diabetic macular edema (DME) (ICD-10 E08.311, E08.321, E08.331, E08.341, E08.351, E08.37, E09.311, E09.321, E09.331, E09.341, E09.351, E09.37, E10.311, E10.321, E10.331, E10.341, E10.351, E10.37, E11.311, E11.321, E11.331, E11.341, E11.351, E11.37, E13.311, E13.321, E13.331, E13.341, E13.351, E13.37) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Byooviz will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Beovu [brolucizumab-dbll], Eylea [aflibercept], Lucentis [ranibizumab])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.1mL per 28 days.**

   If no, continue to #4.

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of diabetic retinopathy (DR) (ICD-10 Group E08.3 except E08.36, E08.37, and E08.39; Group E09.3 except E09.36, E09.37, and E09.39; Group E10.3 except E10.36, E10.37, and E10.39; Group E11.3 except E11.36, E11.37, and E11.39) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Byooviz will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Lucentis [ranibizumab])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.1mL per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RANIBIZUMAB-NUNA (Byooviz)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Neovascular (wet) age-related macular degeneration (nAMD: a type of eye condition)
      2. Macular edema following retinal vein occlusion (RVO: a type of eye condition)
      3. Diabetic macular edema (DME: a type of eye condition caused by high blood sugar)
      4. Diabetic retinopathy (DR: a type of eye condition caused by high blood sugar)

   B. If you have neovascular (wet) age-related macular degeneration, renewal also requires:
      1. You have maintenance or improvement of visual acuity (vision clarity or sharpness)
      2. You will NOT use Byooviz concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Beovu [brolucizumab-dbll], Eylea [aflibercept], Lucentis [ranibizumab])

   C. If you have macular edema following retinal vein occlusion, renewal also requires:
      1. You have maintenance or improvement of visual acuity (vision clarity or sharpness)
      2. You will NOT use Byooviz concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Vabysmo [faricimab-svoa])

   (Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

D. If you have diabetic macular edema, renewal also requires:
1. You have maintenance or improvement of visual acuity (vision clarity or sharpness)
2. You will NOT use Byooviz concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Beovu [brolucizumab-dbll], Eylea [aflibercept], Lucentis [ranibizumab])

E. If you have diabetic retinopathy, renewal also requires:
1. You have maintenance or improvement of visual acuity (vision clarity or sharpness)
2. You will NOT use Byooviz concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Lucentis [ranibizumab])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Byooviz and Lucentis.

PRIOR AUTHORIZATION GUIDELINES

RANIBIZUMAB-SUSVIMO

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RANIBIZUMAB, RANIBIZUMAB/INIT FILL NEEDLE	SUSVIMO		51414 52174	GPI-14 (86655060002040, 86655060002042)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of neovascular (wet) age-related macular degeneration (nAMD) (ICD-10 Group H35.32) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - The patient has previously responded to at least TWO intravitreal injections of a VEGF inhibitor (e.g., Cimerli [ranibizumab-eqrn], Byooviz [ranibizumab-nuna])
   - Susvimo will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Lucentis [ranibizumab], Beovu [brolucizumab-dbll]) for the treatment of nAMD

   If yes, **approve the requested medication for 6 months by GPID or GPI-14 with a quantity limit of #0.1mL per 6 months.**

   If no, continue to #2.

2. Does the patient have a diagnosis of diabetic macular edema (DME) (ICD-10 E08.311, E08.321, E08.331, E08.341, E08.351, E08.37, E09.311, E09.321, E09.331, E09.341, E09.351, E09.37, E10.311, E10.321, E10.331, E10.341, E10.351, E10.37, E11.311, E11.321, E11.331, E11.341, E11.351, E11.37, E13.311, E13.321, E13.331, E13.341, E13.351, E13.37) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - The patient has previously responded to at least TWO intravitreal injections of a VEGF inhibitor (e.g., Cimerli [ranibizumab-eqrn], Byooviz [ranibizumab-nuna])
   - Susvimo will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Lucentis [ranibizumab], Beovu [brolucizumab-dbll])

   If yes, **approve the requested medication for 6 months by GPID or GPI-14 with a quantity limit of #0.1mL per 6 months.**

   If no, continue to #3.

RANIBIZUMAB-SUSVIMO

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of diabetic retinopathy (DR) (ICD-10 Group E08.3 except E08.36, E08.37, E08.39; Group E09.3 except E09.36, E09.37, E09.39; Group E10.3 except E10.36, E10.37, E10.39; Group E11.3 except E11.36, E11.37, E11.39) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an ophthalmologist or retina specialist
   - The patient has previously responded to at least TWO intravitreal injections of a VEGF inhibitor (e.g., Cimerli [ranibizumab-eqrn], Byooviz [ranibizumab-nuna])
   - Susvimo will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Lucentis [ranibizumab])

   If yes, **approve the requested medication for 9 months by GPID or GPI-14 with a quantity limit of #0.1mL per 9 months.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RANIBIZUMAB (Susvimo)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Neovascular (wet) age-related macular degeneration (nAMD: a type of eye condition)
      2. Diabetic macular edema (DME: a type of eye condition caused by high blood sugar)
      3. Diabetic retinopathy (DR: a type of eye condition caused by high blood sugar)

   B. If you have neovascular (wet) age-related macular degeneration, approval also requires:
      1. Therapy is prescribed by or in consultation with an ophthalmologist (a type of eye doctor) or retina (a part of the eye) specialist
      2. You have previously responded to at least TWO intravitreal (into the eye) injections of a vascular endothelial growth factor (VEGF) inhibitor (such as Cimerli [ranibizumab-eqrn], Byooviz [ranibizumab-nuna])
      3. You will NOT use Susvimo concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Lucentis [ranibizumab], Beovu [brolucizumab-dbll]) for the treatment of neovascular (wet) age-related macular degeneration

   (Initial denial text continued on next page)

RANIBIZUMAB-SUSVIMO

INITIAL CRITERIA (CONTINUED)

C. If you have diabetic macular edema, approval also requires:
1. Therapy is prescribed by or in consultation with an ophthalmologist (a type of eye doctor) or retina (a part of the eye) specialist
2. You have previously responded to at least TWO intravitreal (into the eye) injections of a vascular endothelial growth factor (VEGF) inhibitor (such as Cimerli [ranibizumab-eqrn], Byooviz [ranibizumab-nuna])
3. You will NOT use Susvimo concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Lucentis [ranibizumab], Beovu [brolucizumab-dbll])

D. If you have diabetic retinopathy, approval also requires:
1. Therapy is prescribed by or in consultation with an ophthalmologist (a type of eye doctor) or retina (a part of the eye) specialist
2. You have previously responded to at least TWO intravitreal (into the eye) injections of a vascular endothelial growth factor (VEGF) inhibitor (such as Cimerli [ranibizumab-eqrn], Byooviz [ranibizumab-nuna])
3. You will NOT use Susvimo concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Lucentis [ranibizumab])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RANIBIZUMAB-SUSVIMO

RENEWAL CRITERIA

1. Does the patient have a diagnosis of neovascular (wet) age-related macular degeneration (nAMD) (ICD-10 Group H35.32) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Susvimo will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Lucentis [ranibizumab], Beovu [brolucizumab-dbll]) for the treatment of nAMD

   If yes, **approve the requested medication for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 6 months.**

   If no, continue to #2.

2. Does the patient have a diagnosis of diabetic macular edema (DME) (ICD-10 E08.311, E08.321, E08.331, E08.341, E08.351, E08.37, E09.311, E09.321, E09.331, E09.341, E09.351, E09.37, E10.311, E10.321, E10.331, E10.341, E10.351, E10.37, E11.311, E11.321, E11.331, E11.341, E11.351, E11.37, E13.311, E13.321, E13.331, E13.341, E13.351, E13.37) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Susvimo will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Lucentis [ranibizumab], Beovu [brolucizumab-dbll])

   If yes, **approve the requested medication for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 6 months.**

   If no, continue to #3.

3. Does the patient have a diagnosis of diabetic retinopathy (DR) (ICD-10 Group E08.3 except E08.36, E08.37, E08.39; Group E09.3 except E09.36, E09.37, E09.39; Group E10.3 except E10.36, E10.37, E10.39; Group E11.3 except E11.36, E11.37, E11.39) and meet **ALL** of the following criteria?
   - The patient has maintenance or improvement of visual acuity
   - Susvimo will NOT be used concurrently with other intravitreal VEGF inhibitors (e.g., Eylea [aflibercept], Lucentis [ranibizumab])

   If yes, **approve the requested medication for 12 months by GPID or GPI-14 with a quantity limit of #0.1mL per 9 months.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RANIBIZUMAB-SUSVIMO

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RANIBIZUMAB (Susvimo)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Neovascular (wet) age-related macular degeneration (nAMD: a type of eye condition)
   2. Diabetic macular edema (DME: a type of eye condition caused by high blood sugar)
   3. Diabetic retinopathy (DR: a type of eye condition caused by high blood sugar)

B. If you have neovascular (wet) age-related macular degeneration, renewal also requires:
   1. You have maintenance or improvement of visual acuity (vision clarity or sharpness)
   2. You will NOT use Susvimo concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Lucentis [ranibizumab], Beovu [brolucizumab-dbll]) for the treatment of neovascular (wet) age-related macular degeneration

C. If you have diabetic macular edema, renewal also requires:
   1. You have maintenance or improvement of visual acuity (vision clarity or sharpness)
   2. You will NOT use Susvimo concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Lucentis [ranibizumab], Beovu [brolucizumab-dbll])

D. If you have diabetic retinopathy, renewal also requires:
   1. You have maintenance or improvement of visual acuity (vision clarity or sharpness)
   2. You will NOT use Susvimo concurrently (at the same time) with other intravitreal (into the eye) vascular endothelial growth factor (VEGF) inhibitors (such as Eylea [aflibercept], Lucentis [ranibizumab])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

PRIOR AUTHORIZATION GUIDELINES

RAVULIZUMAB-CWVZ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RAVULIZUMAB-CWVZ	ULTOMIRIS	45548		GPI-10 (8580508020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Shiga toxin E. coli related hemolytic uremic syndrome (STEC- HUS) (ICD-10 D59.31)?

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.
   If no, continue to #2.

2. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient is 1 month of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - The patient has flow cytometry demonstrating at least 2 different GPI-protein deficiencies (e.g., CD55, CD59) on at least 2 cell lineages (e.g., erythrocytes, granulocytes) AND a PNH granulocyte clone size of at least 10 percent
   - Ultomiris will NOT be used concurrently with C5 complement inhibitor therapy (e.g., Soliris [eculizumab], Piasky [crovalimab-akkz]), C3 complement inhibitor therapy (e.g., Empaveli [pegcetacoplan]) or Factor B inhibitor therapy (e.g., Fabhalta [iptacopan])

   If yes, **approve for a total of 6 months by GPID or GPI-14 for the requested medication as follows:**
   - **For the 300mg/30mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #660mL per 28 days.**
     - **Maintenance dose: Approve for 5 months with a quantity limit of #360mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**
   - **For the 300mg/3mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #66mL per 28 days.**
     - **Maintenance dose: Approve for 5 months with a quantity limit of #36mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**
   - **For the 1,100mg/11mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #77mL per 28 days.**
     - **Maintenance dose: Approve for 5 months with a quantity limit of #44mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**

   If no, continue to #3.

RAVULIZUMAB-CWVZ

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of atypical hemolytic uremic syndrome (aHUS) (ICD-10 D59.32, D59.39) **AND** meet the following criterion?
   - The patient is 1 month of age or older

   If yes, **approve for a total of 12 months by GPID or GPI-14 for the requested medication as follows:**
   - **For the 300mg/30mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #660mL per 28 days.**
     - **Maintenance dose: Approve for 11 months with a quantity limit of #360mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**
   - **For the 300mg/3mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #66mL per 28 days.**
     - **Maintenance dose: Approve for 11 months with a quantity limit of #36mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**
   - **For the 1,100mg/11mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #77mL per 28 days.**
     - **Maintenance dose: Approve for 11 months with a quantity limit of #44mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**

   If no, continue to #4.

4. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient has a positive serologic test for the anti-acetylcholine receptor antibody (AChR-Ab+)
   - The patient is Myasthenia Gravis Foundation of America class II, III, or IV
   - The patient had a trial of or contraindication to ONE corticosteroid (e.g., prednisone)
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Rystiggo (rozanolixizumab-noli), Vyvgart (efgartigimod alfa-fcab)/Vyvgart Hytrulo (efgartigimod- hyaluronidase-qvfc)
   - Ultomiris will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]), complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (e.g., Uplizna [inebilizumab-cdon]) for the treatment of gMG

   If yes, continue to #5.
   If no, continue to #6.

RAVULIZUMAB-CWVZ

INITIAL CRITERIA (CONTINUED)

5. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO non-steroidal immunosuppressive therapies (e.g., azathioprine, cyclophosphamide, methotrexate)
   - The patient had a trial of or contraindication to ONE non-steroidal immunosuppressive therapy if on chronic plasmapheresis or plasma exchange

   If yes, **approve for a total of 6 months by GPID or GPI-14 for the requested medication as follows:**
   - **For the 300mg/30mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #660mL per 28 days.**
     - **Maintenance dose: Approve for 5 months with a quantity limit of #360mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**
   - **For the 300mg/3mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #66mL per 28 days.**
     - **Maintenance dose: Approve for 5 months with a quantity limit of #36mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**
   - **For the 1,100mg/11mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #77mL per 28 days.**
     - **Maintenance dose: Approve for 5 months with a quantity limit of #44mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

6. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist or ophthalmologist
   - The patient is positive for anti-aquaporin-4 (AQP4) antibodies
   - Ultomiris will NOT be used concurrently with another NMOSD agent (e.g., Rituxan [rituximab], Enspryng [satralizumab-mwge], Uplizna [inebilizumab-cdon], Soliris [eculizumab])

   If yes, continue to #7.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RAVULIZUMAB-CWVZ

INITIAL CRITERIA (CONTINUED)

7. Does the patient have at least **ONE** of the following core clinical characteristics?
   - Optic neuritis
   - Acute myelitis
   - Area postrema syndrome
   - Acute brainstem syndrome
   - Symptomatic narcolepsy or acute diencephalic clinical syndrome with NMOSD-typical diencephalic MRI lesions
   - Symptomatic cerebral syndrome with NMOSD-typical brain lesions

   If yes, **approve for a total of 12 months by GPID or GPI-14 for the requested medication as follows:**
   - **For the 300mg/30mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #660mL per 28 days.**
     - **Maintenance dose: Approve for 11 months with a quantity limit of #360mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**
   - **For the 300mg/3mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #66mL per 28 days.**
     - **Maintenance dose: Approve for 11 months with a quantity limit of #36mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**
   - **For the 1,100mg/11mL vial, enter BOTH of the following approvals:**
     - **Loading dose plus 1st maintenance dose: Approve for 1 month with a quantity limit of #77mL per 28 days.**
     - **Maintenance dose: Approve for 11 months with a quantity limit of #44mL per 8 weeks (start date is 3 weeks from the end date of the first approval).**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RAVULIZUMAB-CWVZ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RAVULIZUMAB-CWVZ (Ultomiris)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
   2. Atypical hemolytic uremic syndrome (aHUS: a rare blood disorder)
   3. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
   4. Neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)

B. Ultomiris (ravulizumab-cwvz) is NOT being used for the treatment of hemolytic uremic syndrome related to Shiga toxin E. coli (a bacteria)

C. If you have paroxysmal nocturnal hemoglobinuria, approval also requires:
   1. You are 1 month of age or older
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
   3. You have flow cytometry (a type of lab test) demonstrating at least 2 different GPI-protein deficiencies (you are missing a certain type of protein, such as CD55, CD59) on at least 2 cell lineages (types of cells, such as erythrocytes [red blood cells], granulocytes [a type of white blood cell]) AND a PNH granulocyte clone size of at least 10 percent
   4. You will NOT use Ultomiris concurrently (at the same time) with C5 complement inhibitor therapy (such as Soliris [eculizumab], Piasky [crovalimab-akkz]), C3 complement inhibitor therapy (such as Empaveli [pegcetacoplan]) or Factor B inhibitor therapy (such as Fabhalta [iptacopan])

D. If you have atypical hemolytic uremic syndrome, approval also requires:
   1. You are 1 month of age or older

(Initial denial text continued on next page)

INITIAL CRITERIA (CONTINUED)

E. If you have generalized myasthenia gravis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
3. You have a positive serologic test for the anti-acetylcholine receptor antibody (AChR-Ab+: a type of blood test that shows you have myasthenia gravis)
4. You have Myasthenia Gravis Foundation of America class II, III, or IV (types of severity of disease)
5. You have tried or have a contraindication to (harmful for you to use) ONE corticosteroid (such as prednisone)
6. You have tried or have a contraindication to ONE of the following preferred medications: Rystiggo (rozanolixizumab-noli), Vyvgart (efgartigimod alfa-fcab)/Vyvgart Hytrulo (efgartigimod-hyaluronidase-qvfc)
7. You will NOT use Ultomiris concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]), complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (such as Uplizna [inebilizumab-cdon]) for the treatment of generalized myasthenia gravis
8. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO non-steroidal immunosuppressive therapies (such as azathioprine, cyclophosphamide, methotrexate)
   b. You have tried or have a contraindication to ONE non-steroidal immunosuppressive therapy if you are on chronic plasmapheresis or plasma exchange (types of blood therapy)

(Initial denial text continued on next page)

INITIAL CRITERIA (CONTINUED)

F. If you have neuromyelitis optica spectrum disorder (NMOSD), approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor) or ophthalmologist (a type of eye doctor)
3. You are positive for anti-aquaporin-4 (AQP4: a type of protein) antibodies
4. You will NOT use Ultomiris concurrently (at the same time) with another NMOSD medication (such as Rituxan [rituximab], Enspryng [satralizumab-mwge], Uplizna [inebilizumab-cdon], Soliris [eculizumab])
5. You have at least ONE of the following core clinical characteristics:
   a. Optic neuritis (a type of brain disorder)
   b. Acute myelitis (a type of brain disorder)
   c. Area postrema syndrome (a type of brain disorder)
   d. Acute brainstem syndrome (a type of brain disorder)
   e. Symptomatic narcolepsy (a type of sleep condition) or acute diencephalic clinical syndrome (tumor in a part of the brain) with NMOSD-typical diencephalic magnetic resonance imaging (MRI: a type of imaging lab) lesions (affected areas)
   f. Symptomatic cerebral syndrome with NMOSD-typical brain lesions

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RAVULIZUMAB-CWVZ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient has experienced a clinical benefit (e.g., reduction in number of blood transfusions, improvement/stabilization of lactate dehydrogenase [LDH] and hemoglobin levels) compared to baseline
   - Ultomiris will NOT be used concurrently with C5 complement inhibitor therapy (e.g., Soliris [eculizumab], Piasky [crovalimab-akkz]), C3 complement inhibitor therapy (e.g., Empaveli [pegcetacoplan]) or Factor B inhibitor therapy (e.g., Fabhalta [iptacopan])

   If yes, **approve for 12 months by GPID or GPI-14 for the requested medication with the following quantity limits:**
   - **300mg/30mL vial: #360mL per 8 weeks.**
   - **300mg/3mL vial: #36mL per 8 weeks.**
   - **1,100mg/11mL vial: #44mL per 8 weeks.**

   If no, continue to #2.

2. Does the patient have a diagnosis of atypical hemolytic uremic syndrome (aHUS) (ICD-10 D59.32, D59.39)?

   If yes, **approve for 12 months by GPID or GPI-14 for the requested medication with the following quantity limits:**
   - **300mg/30mL vial: #360mL per 8 weeks.**
   - **300mg/3mL vial: #36mL per 8 weeks.**
   - **1,100mg/11mL vial: #44mL per 8 weeks.**

   If no, continue to #3.

RAVULIZUMAB-CWVZ

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient experienced a clinical benefit compared to baseline according to validated gMG instruments (e.g., Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   - Ultomiris will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]), complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (e.g., Uplizna [inebilizumab-cdon]) for the treatment of gMG

   If yes, **approve for 12 months by GPID or GPI-14 for the requested medication with the following quantity limits:**
   - **300mg/30mL vial: #360mL per 8 weeks.**
   - **300mg/3mL vial: #36mL per 8 weeks.**
   - **1,100mg/11mL vial: #44mL per 8 weeks.**

   If no, continue to #4.

4. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient has experienced a clinical benefit (reduction in relapse frequency compared to baseline or a decrease in NMOSD-related hospitalizations)
   - Ultomiris will NOT be used concurrently with another NMOSD agent (e.g., Rituxan [rituximab], Enspryng [satralizumab-mwge], Uplizna [inebilizumab-cdon], Soliris [eculizumab])

   If yes, **approve for 12 months by GPID or GPI-14 for the requested medication with the following quantity limits:**
   - **300mg/30mL vial: #360mL per 8 weeks.**
   - **300mg/3mL vial: #36mL per 8 weeks.**
   - **1,100mg/11mL vial: #44mL per 8 weeks.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RAVULIZUMAB-CWVZ

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RAVULIZUMAB-CWVZ (Ultomiris)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
   2. Atypical hemolytic uremic syndrome (aHUS: a rare blood disorder)
   3. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
   4. Neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)

B. If you have paroxysmal nocturnal hemoglobinuria, renewal also requires:
   1. You have experienced a clinical benefit (such as a reduction in the number of blood transfusions [adding blood to your body], improvement/stabilization of lactate dehydrogenase [LDH: a type of enzyme] levels and hemoglobin [Hgb: a type of protein in red blood cells] levels) compared to baseline (before treatment)
   2. You will NOT use Ultomiris concurrently (at the same time) with C5 complement inhibitor therapy (such as Soliris [eculizumab], Piasky [crovalimab-akkz]), C3 complement inhibitor therapy (such as Empaveli [pegcetacoplan]) or Factor B inhibitor therapy (such as Fabhalta [iptacopan])

C. If you have generalized myasthenia gravis, renewal also requires:
   1. You have experienced a clinical benefit compared to baseline (before treatment) according to validated gMG instruments (such as Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   2. You will NOT use Ultomiris concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]), complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (such as Uplizna [inebilizumab-cdon]) for the treatment of generalized myasthenia gravis

D. If you have neuromyelitis optica spectrum disorder, renewal also requires:
   1. You have experienced a clinical benefit (reduction in relapse frequency compared to baseline [before treatment] or a decrease in NMOSD-related hospitalizations)
   2. You will NOT use Ultomiris concurrently (at the same time) with another NMOSD medication (such as Rituxan [rituximab], Enspryng [satralizumab-mwge], Uplizna [inebilizumab-cdon], Soliris [eculizumab])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

REGORAFENIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
REGORAFENIB	STIVARGA	39665		GPI-10 (2153305000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic colorectal cancer (CRC) (ICD-10 C19) and meet **ALL** of the following criteria?
   - The patient has received previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy (e.g., FOLFOX, FOLFIRI, FOLFOXIRI, CapeOx, infusional 5-FU/LV, capecitabine)
   - The patient has received previous treatment with an anti-VEGF therapy (e.g., Avastin [bevacizumab], Zaltrap [ziv-aflibercept])

   If yes, continue to #2.
   If no, continue to #4.

2. Is the colorectal cancer RAS wild-type (mutation negative)?

   If yes, continue to #3.
   If no, **approve for 12 months by HICL or GPI-10 with a quantity limit of #84 per 28 days.**

3. Has the patient received previous treatment with an anti-EGFR therapy (e.g., Erbitux [cetuximab], Vectibix [panitumumab])?

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #84 per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient have a diagnosis of locally advanced, unresectable, or metastatic gastrointestinal stromal tumor (GIST) (ICD-10 Group C49.A) **AND** meet the following criterion?
   - The patient has received previous treatment with Gleevec (imatinib) and Sutent (sunitinib)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #84 per 28 days.**
   If no, continue to #5.

5. Does the patient have a diagnosis of hepatocellular carcinoma (HCC) (ICD-10 C22.0) **AND** meet the following criterion?
   - The patient has received previous treatment with Nexavar (sorafenib)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #84 per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

REGORAFENIB

GUIDELINE FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **REGORAFENIB (Stivarga)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Metastatic colorectal cancer (CRC: a type of digestive cancer that has spread to other parts of the body)
   2. Locally advanced, unresectable, or metastatic gastrointestinal stromal tumor (GIST: a type of digestive tumor that has spread from where it started to nearby tissue or lymph nodes, unable to remove by surgery, or has spread to other parts of the body)
   3. Hepatocellular carcinoma (HCC: a type of liver cancer)

B. If you have metastatic colorectal cancer, approval also requires:
   1. You had previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy such as FOLFOX, FOLFIRI, FOLFOXIRI, CapeOx, infusional 5-FU/LV, capecitabine
   2. You had previous treatment with an anti-VEGF therapy such as Avastin (bevacizumab), Zaltrap (ziv-aflibercept)
   3. If you have RAS wild-type (a type of unmutated gene) metastatic colorectal cancer, approval also requires you had previous treatment with an anti-EGFR therapy such as Erbitux (cetuximab), Vectibix (panitumumab)

C. If you have locally advanced, unresectable, or metastatic gastrointestinal stromal tumor, approval also requires:
   1. You had previous treatment with Gleevec (imatinib) and Sutent (sunitinib)

D. If you have hepatocellular carcinoma, approval also requires:
   1. You had previous treatment with Nexavar (sorafenib)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

RELACORILANT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RELACORILANT	LIFYORLI	51244		GPI-10 (2140536500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of epithelial ovarian, fallopian tube, or primary peritoneal cancer (ICD-10 Groups C56, C57.0, C48, C79.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is platinum-resistant
   - Lifyorli will be used in combination with nab-paclitaxel
   - The patient has received one to three prior systemic treatment regimens, at least one of which included bevacizumab

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: Our guideline named **RELACORILANT (Lifyorli)** requires the following rule(s) be met for approval:
   A. You have epithelial ovarian, fallopian tube, or primary peritoneal cancer (types of reproductive system cancers)
   B. You are 18 years of age or older
   C. Your cancer is platinum-resistant (resistant to medications such as paclitaxel, docetaxel, cisplatin, carboplatin)
   D. Lifyorli will be used in combination with nab-paclitaxel
   E. You have received at least one to three prior systemic treatment regimens (treatment that targets the entire body), at least one of which included bevacizumab

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Has the patient received a total of 24 months cumulative treatment with Myfembree?

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for the management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids) (ICD-10 Group D25) and the patient meets **ALL** the following criteria?
   - The patient is 18 years of age or older
   - The patient is a premenopausal woman
   - Therapy is prescribed by or in consultation with an obstetrician or gynecologist (OB/GYN)
   - Myfembree will NOT be used concurrently with another GnRH-modulating agent (e.g., Oriahnn [elagolix/estradiol/norethindrone], Lupron Depot [leuprolide])

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #3.

3. Is the request for the management of moderate to severe pain associated with endometriosis (ICD-10 Group N80 and R52) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is a premenopausal woman
   - Therapy is prescribed by or in consultation with an obstetrician or gynecologist (OB/GYN)
   - Myfembree will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa [elagolix], Lupron Depot [leuprolide], Synarel [nafarelin])

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day**.
   If no, do not approve.

RELUGOLIX-ESTRADIOL-NORETHINDRONE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RELUGOLIX-ESTRADIOL-NORETHINDRONE (Myfembree)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids: non-cancerous growths in the uterus)
   2. Management of moderate to severe pain associated with endometriosis (condition affecting the uterus)

B. If the request is for management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids), approval also requires:
   1. You are 18 years of age or older
   2. You are a premenopausal (before menopause) woman
   3. Therapy is prescribed by or in consultation with an obstetrician or gynecologist (OB/GYN: a type of women's health doctor)
   4. You will NOT use Myfembree concurrently (at the same time) with another gonadotropin-releasing hormone (GnRH)-modulating medication (such as Oriahnn [elagolix/estradiol/norethindrone], Lupron Depot [leuprolide])
   5. You have not received a total of 24 months cumulative (total) treatment with Myfembree

C. If the request is for management of moderate to severe pain associated with endometriosis, approval also requires:
   1. You are 18 years of age or older
   2. You are a premenopausal (before menopause) woman
   3. Therapy is prescribed by or in consultation with an obstetrician or gynecologist (OB/GYN: a type of women's health doctor)
   4. You will NOT use Myfembree concurrently (at the same time) with another gonadotropin-releasing hormone (GnRH)-modulating medication (such as Orilissa [elagolix], Lupron Depot [leuprolide], Synarel [nafarelin])
   5. You have not received a total of 24 months cumulative (total) treatment with Myfembree

RELUGOLIX-ESTRADIOL-NORETHINDRONE

RENEWAL CRITERIA

1. Has the patient received a total of 24 months cumulative treatment with Myfembree?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for the management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids) (ICD-10 D25.9) and the patient meets **ALL** of the following criteria?
   - The patient has had improvement of heavy menstrual bleeding
   - Myfembree will NOT be used concurrently with another GnRH-modulating agent (e.g., Oriahnn [elagolix/estradiol/norethindrone], Lupron Depot [leuprolide])

   If yes, **approve for 18 months (or up to 24 months cumulative lifetime treatment duration) by HICL or GPI-10 with a quantity limit of #1 per day.**

   If no, continue to #3.

3. Is the request for the management of moderate to severe pain associated with endometriosis (ICD-10 Group N80 and R52) and the patient meets **ALL** of the following criteria?
   - The patient has had improvement in pain related to endometriosis
   - Myfembree will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa [elagolix], Lupron Depot [leuprolide], Synarel [nafarelin])

   If yes, **approve for 18 months (or up to 24 months cumulative lifetime treatment duration) by HICL or GPI-10 with a quantity limit of #1 per day.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RELUGOLIX-ESTRADIOL-NORETHINDRONE (Myfembree)** requires the following rule(s) be met for renewal:
   A. The request is for ONE of the following:
      1. Management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids: non-cancerous growths in the uterus)
      2. Management of moderate to severe pain associated with endometriosis (condition affecting the uterus)

RELUGOLIX-ESTRADIOL-NORETHINDRONE

RENEWAL CRITERIA (CONTINUED)

B. If the request is for management of heavy menstrual bleeding associated with uterine leiomyomas (fibroids), renewal also requires:
1. You had improvement of heavy menstrual bleeding on therapy
2. You will NOT use Myfembree concurrently (at the same time) with another gonadotropin-releasing hormone (GnRH)-modulating medication (such as Oriahnn [elagolix/estradiol/norethindrone], Lupron Depot [leuprolide])
3. You have not received a total of 24 months cumulative (total) treatment with Myfembree

C. If the request is for management of moderate to severe pain associated with endometriosis, renewal also requires:
1. You have had improvement in pain related to endometriosis (condition affecting the uterus) while on therapy
2. You will NOT use Myfembree concurrently (at the same time) with another gonadotropin-releasing hormone (GnRH)-modulating medication (such as Orilissa [elagolix], Lupron Depot [leuprolide], Synarel [nafarelin])
3. You have not received a total of 24 months cumulative (total) treatment with Myfembree

---

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

REMIBRUTINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
REMIBRUTINIB	RHAPSIDO	50918		GPI-10 (9939376500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of chronic spontaneous urticaria (CSU; also called chronic idiopathic urticaria [CIU]) (ICD-10 L50.1, L50.8, L50.9) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an allergist, dermatologist, or immunologist
   - The patient still experiences hives or angioedema on most days of the week for at least 6 weeks
   - The patient had a trial of and is maintained on, OR has a contraindication to, 4-times the maximally labeled dose of a second generation H1 antihistamine (Zyrtec [cetirizine] dose of 40mg/day, Xyzal [levocetirizine] dose of 20mg/day, Claritin [loratadine] dose of 40mg/day, Clarinex [desloratadine] dose of 20mg/day, or Allegra [fexofenadine] dose of 720mg/day)
   - Rhapsido will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)
   - The patient had a trial of or contraindication to ONE preferred agent: Dupixent (dupilumab), Xolair (omalizumab)

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **REMIBRUTINIB (Rhapsido)** requires the following rule(s) be met for approval:
   A. You have chronic spontaneous urticaria (CSU) (also called chronic idiopathic urticaria [CIU]) [severe itching with unknown cause]
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
   D. You still experience hives or angioedema (a type of swelling) on most days of the week for at least 6 weeks

   (Initial denial text continued on the next page)

REMIBRUTINIB

INITIAL CRITERIA (CONTINUED)

E. You have tried and are maintained on (continue to use on a regular basis), OR you have a contraindication to (harmful for you to use), 4-times the maximally labeled dose of a second generation H1 antihistamine (type of allergy medication) (Zyrtec [cetirizine] dose of 40mg/day, Xyzal [levocetirizine] dose of 20mg/day, Claritin [loratadine] dose of 40mg/day, Clarinex [desloratadine] dose of 20mg/day, or Allegra [fexofenadine] dose of 720mg/day)
F. You will NOT use Rhapsido concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria) [severe itching with unknown cause]
G. You have tried or have a contraindication to (harmful for you to use) ONE preferred medication: Dupixent (dupilumab), Xolair (omalizumab)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

REPOTRECTINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
REPOTRECTINIB	AUGTYRO	49312		GPI-10 (2153386500)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has *ROS1*-positive tumors

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with a quantity limit as follows:**
   - **40mg: #8 per day.**
   - **160mg: #2 per day.**

   If no, continue to #2.

2. Does the patient have solid tumors and meet **ALL** of the following criteria?
   - The patient is 12 years of age and older
   - The tumors have a neurotrophic tyrosine receptor kinase (NTRK) gene fusion
   - The tumors are locally advanced or metastatic, OR surgical resection is likely to result in severe morbidity
   - The patient has progressed following treatment OR has no satisfactory alternative therapy

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with a quantity limit as follows:**
   - **40mg: #8 per day.**
   - **160mg: #2 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **REPOTRECTINIB (Augtyro)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Locally advanced or metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
      2. Solid tumors

   (Denial text continued on next page)

REPOTRECTINIB

GUIDELINES FOR USE (CONTINUED)

B. If you have non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. You have *ROS1*-positive (abnormal change in a type of gene) tumors

C. If you have solid tumors, approval also requires:
1. You are 12 years of age and older
2. Your tumors have a neurotrophic tyrosine receptor kinase (NTRK) gene fusion (abnormal change in a type of gene)
3. Yours tumors are locally advanced or metastatic (cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body), OR surgical resection (removal by surgery) is likely to result in severe morbidity (illness)
4. You have progressed following treatment OR have no satisfactory alternative (other) therapy

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

RESLIZUMAB (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RESLIZUMAB	CINQAIR	43211		GPI-10 (4460446000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in pulmonary medicine or allergy medicine
   - The patient has a blood eosinophil level of at least 150 cells/mcL within the past 12 months
   - Cinqair will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline, or an oral corticosteroid [e.g., prednisone])
   - Cinqair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of eosinophilic phenotype asthma
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Fasenra (benralizumab), Nucala (mepolizumab), Dupixent (dupilumab), Tezspire (tezepelumab-ekko)

     If yes, continue to #2.
     If no, do not approve.
     DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced at least ONE asthma exacerbation requiring systemic corticosteroid burst lasting at least 3 days within the past 12 months
   - The patient has experienced at least ONE serious asthma exacerbation requiring a hospitalization or an emergency room visit within the past 12 months

     If yes, **approve for 4 months by HICL or GPI-10.**
     If no, continue to #3.

RESLIZUMAB (NSA)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have poor symptom control despite current therapy as evidenced by at least **THREE** of the following within the past 4 weeks?
   - Daytime asthma symptoms more than twice per week
   - Any night waking due to asthma
   - Use of a short-acting inhaled beta2-agonist (SABA) reliever (e.g., albuterol) for symptoms more than twice per week
   - Any activity limitation due to asthma

   If yes, **approve for 4 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RESLIZUMAB (Cinqair)** requires the following rule(s) be met for approval:
   A. You have severe asthma with an eosinophilic phenotype (a type of lung condition with inflammation)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with a physician specializing in pulmonary (relating to lungs/breathing) medicine or allergy medicine
   D. You have a blood eosinophil (a type of white blood cell) level of at least 150 cells/mcL within the past 12 months
   E. Cinqair will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), theophylline, or an oral corticosteroid (such as prednisone)

RESLIZUMAB (NSA)

INITIAL CRITERIA (CONTINUED)

F. You will NOT use Cinqair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma
G. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Fasenra (benralizumab), Nucala (mepolizumab), Dupixent (dupilumab), Tezspire (tezepelumab-ekko)
H. You meet ONE of the following:
    1. You have experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months:
    2. You have experienced at least ONE serious asthma exacerbation requiring a hospitalization or an emergency room visit within the past 12 months
    3. You have poor symptom control despite current therapy as evidenced by at least THREE of the following within the past 4 weeks:
        a. Daytime asthma symptoms more than twice per week
        b. Any night waking due to asthma
        c. Use of a short-acting inhaled beta2-agonist reliever (such as albuterol) for symptoms more than twice per week
        d. Any activity limitation due to asthma

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RESLIZUMAB (NSA)

RENEWAL CRITERIA

1. Does the patient meet **ALL** of the following criteria?
   - The patient will continue to use an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline, or an oral corticosteroid [e.g., prednisone])
   - Cinqair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of eosinophilic phenotype asthma

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient shown a clinical response as evidenced by **ONE** of the following?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Increase in percent predicted FEV1 from pretreatment baseline
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RESLIZUMAB (NSA)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RESLIZUMAB (Cinqair)** requires the following rule(s) be met for renewal:

A. You will continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), theophylline, or an oral corticosteroid (such as prednisone)
B. You will NOT use Cinqair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma
C. You have shown a clinical response as evidenced by ONE of the following:
    1. You have experienced a decrease in asthma exacerbations (worsening of symptoms) from baseline
    2. You have decreased your use of rescue medications (such as albuterol)
    3. You have an increase in the percent predicted FEV1 (a type of lung test) from pre-treatment baseline (before starting Cinqair)
    4. You have a decrease in the severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RESMETIROM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RESMETIROM	REZDIFFRA	49451		GPI-10 (5260106000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of non-alcoholic steatohepatitis (NASH)/metabolic dysfunction-associated steatohepatitis (MASH) (ICD-10 K75.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient does NOT have cirrhosis
   - Therapy is prescribed by or in consultation with a hepatologist, gastroenterologist, or endocrinologist
   - The patient is enrolled in or has already completed a lifestyle intervention (e.g., dietary, exercise, psychology)
   - Rezdiffra will NOT be used concurrently with Wegovy for the treatment of NASH/MASH
   - The patient has a biopsy or non-invasive test (e.g., elastography, ELF testing) that was obtained in the past 12 months demonstrating liver fibrosis stage 2 or 3

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is Wegovy an excluded drug for this patient?
   (**NOTE:** Run a test claim for Wegovy to verify if it is an excluded benefit by the member's plan.)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #3.

3. Has the patient had a trial of or contraindication to Wegovy?

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RESMETIROM

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RESMETIROM (Rezdiffra)** requires the following rule(s) be met for approval:

A. You have non-alcoholic steatohepatitis (NASH: a type of liver disease)/metabolic dysfunction-associated steatohepatitis (MASH: a type of liver disease)
B. You are 18 years of age or older
C. You do NOT have cirrhosis (liver damage and scarring)
D. Therapy is prescribed by or in consultation with a hepatologist (a type of liver doctor), gastroenterologist (doctor who treats digestive conditions), or endocrinologist (a type of hormone doctor)
E. You are enrolled in or have already completed a lifestyle intervention (such as dietary, exercise, psychology)
F. You will NOT use Rezdiffra concurrently (at the same time) with Wegovy for the treatment of non-alcoholic steatohepatitis (NASH: a type of liver disease)/metabolic dysfunction-associated steatohepatitis (MASH: a type of liver disease)
G. You have had a biopsy (removal of cells or tissue from the body for examination) or non- invasive test (such as elastography [type of imaging test], Enhanced Liver Fibrosis [ELF] testing [a type of blood test]) in the past 12 months which shows you have liver fibrosis stage 2 or 3 (scoring system to measure liver damage)
H. If Wegovy is covered by your plan, approval also requires:
    1. You have tried or have a contraindication to (harmful for you to use) Wegovy

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

RETIFANLIMAB-DLWR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RETIFANLIMAB-DLWR	ZYNYZ	48795		GPI-10 (2135796020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic or recurrent locally advanced Merkel cell carcinoma (MCC) (ICD-10 C7B.1; Group C4A) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.715mL per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of locally recurrent or metastatic squamous cell carcinoma of the anal canal (SCAC) (ICD-10 C44.520) **AND** meet the following criterion?
   - The patient is 18 years of age or

   older If yes, continue to #3.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - Zynyz will be used in combination with carboplatin and paclitaxel AND the patient's cancer is inoperable
   - Zynyz will be used as a single agent AND the patient has experienced disease progression on or is intolerant to platinum-based chemotherapy (e.g., paclitaxel, docetaxel, cisplatin, carboplatin)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.953mL per day.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

RETIFANLIMAB-DLWR

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RETIFANLIMAB-DLWR (Zynyz)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Metastatic or recurrent locally advanced Merkel cell carcinoma (MCC: a type of skin cancer that has spread to other parts of the body or has returned and spread from where it started to nearby tissue or lymph nodes)
   2. Locally recurrent or metastatic squamous cell carcinoma of the anal canal (SCAC: a type of cancer of the anal canal that has returned from where it started or has spread to other parts of the body)

B. If you have metastatic or recurrent locally advanced Merkel cell carcinoma, approval also requires:
   1. You are 18 years of age or older

C. If you have locally recurrent or metastatic squamous cell carcinoma of the anal canal, approval also requires:
   1. You are 18 years of age or older
   2. You meet ONE of the following:
      a. Zynyz will be used in combination with carboplatin and paclitaxel AND your cancer is inoperable (not able to operate on)
      b. Zynyz will be used as a single agent (used alone) AND your disease has progressed (worsened) while on platinum-based chemotherapy (such as paclitaxel, docetaxel, cisplatin, carboplatin) or you are intolerant (side effects) to platinum-based chemotherapy

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Zynyz.

PRIOR AUTHORIZATION GUIDELINES

REVUMENIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
REVUMENIB CITRATE	REVUFORJ	50008		GPI-10 (2148007020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory acute leukemia (ICD-10 C91.00, C91.02, C92.00, C92.02, C92.40, C92.42, C92.50, C92.52, C92.60, C92.62, C92.A0, C92.A2, C95.00, C95.02) **AND** meet the following criterion?
   - The patient is 1 year of age or older

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has a lysine methyltransferase 2A gene (KMT2A) translocation, as determined by an FDA-authorized test
   - The patient has a susceptible nucleophosmin 1 (NPM1) mutation AND has no satisfactory alternative treatment options

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths as follows:**
   - **25mg: #8 per day.**
   - **110mg: #4 per day.**
   - **160mg: #2 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **REVUMENIB (Revuforj)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory acute leukemia (a type of blood cancer that has returned or did not respond to treatment)
   B. You are 1 year of age or older
   C. You meet ONE of the following:
      1. You have a lysine methyltransferase 2A gene (KMT2A) translocation (a type of gene abnormality), as determined by a Food and Drug Administration (FDA)-authorized test
      2. You have a susceptible nucleophosmin 1 (NPM1) mutation (an abnormal change in gene) AND you have no satisfactory alternative treatment options

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

RIBOCICLIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RIBOCICLIB SUCCINATE	KISQALI	44151		GPI-10 (2153107050)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer (ICD-10 Group C50) **AND** meet the following criterion?
   - The patient's cancer is hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient in stage II or III early cancer and the patient meets **ALL** of the following criteria?
   - Kisqali will be used in combination with an aromatase inhibitor (e.g., anastrozole, exemestane, letrozole) for adjuvant treatment
   - The patient is at high risk of recurrence

   If yes, **approve all daily dosage strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **200mg daily dose: #21 per 28 days.**
   - **400mg daily dose: #42 per 28 days.**

   If no, continue to #3.

3. Is the patient's cancer advanced or metastatic and the patient meets **ONE** of the following criteria?
   - Kisqali will be used in combination with an aromatase inhibitor (e.g., anastrozole, exemestane, letrozole) as initial endocrine-based therapy
   - Kisqali will be used in combination with fulvestrant (Faslodex), as initial endocrine-based therapy or following disease progression on endocrine therapy (e.g., anastrozole, letrozole, tamoxifen)

   If yes, **approve all daily dosage strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **200mg daily dose: #21 per 28 days.**
   - **400mg daily dose: #42 per 28 days.**
   - **600mg daily dose: #63 per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

RIBOCICLIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

Our guideline named **RIBOCICLIB (Kisqali)** requires the following rule(s) be met for approval:

A. You have breast cancer
B. Your cancer is hormone receptor (HR: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative
C. You meet ONE of the following:
    1. You have stage II or III early breast cancer (initial stage of cancer); you will use Kisqali in combination with an aromatase inhibitor (such as anastrozole, exemestane, letrozole) for adjuvant (add-on) treatment; AND you are at high risk of recurrence (disease returning)
    2. You have advanced or metastatic breast cancer (cancer that has progressed or has spread to other parts of the body), and you meet ONE of the following:
        a. You will use Kisqali in combination with an aromatase inhibitor (such as anastrozole, exemestane, letrozole) as initial endocrine (hormone)-based therapy
        b. You will use Kisqali in combination with fulvestrant (Faslodex), as initial endocrine (hormone)-based therapy or following disease progression (your condition worsened) on endocrine (hormone) therapy (such as anastrozole, letrozole, tamoxifen)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Kisqali.

RIBOCICLIB SUCCINATE/ LETROZOLE	KISQALI FEMARA CO-PACK	44246		GPI-10 (2199000260)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of stage II or III early breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient's cancer is hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative
   - Kisqali Femara Co-Pack will be used for adjuvant treatment
   - The patient is at high risk of recurrence

   If yes, **approve all daily dosage strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **200mg-2.5mg daily dose: #49 per 28 days.**
   - **400mg-2.5mg daily dose: #70 per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of advanced or metastatic breast cancer (ICD-10 Groups C50, C79.81) and meet **ALL** of the following criteria?
   - The patient's cancer is hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative
   - Kisqali Femara Co-Pack will be used as initial endocrine-based therapy

   If yes, **approve all daily dosage strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **200mg-2.5mg daily dose: #49 per 28 days.**
   - **400mg-2.5mg daily dose: #70 per 28 days.**
   - **600mg-2.5mg daily dose: #91 per 28 days.**

   If no, do not approve.

PRIOR AUTHORIZATION GUIDELINES

RIFAXIMIN 200MG

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RIFAXIMIN	XIFAXAN		93749	GPI-14 (16000049000320)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of travelers' diarrhea (TD) (ICD-10 A09) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient had a trial of or contraindication to oral azithromycin, ciprofloxacin, ofloxacin, or levofloxacin

   If yes, **approve for 3 days by GPID or GPI-14 for 1 fill of #9.**
   If no, continue to #2.

2. Does the patient have a diagnosis of overt hepatic encephalopathy (HE) (ICD-10 K76.82) **AND** meet the following criterion?
   - Xifaxan will be used in combination with lactulose

   If yes, **approve for 10 days by GPID or GPI-14 with a quantity limit of #6 per day.**
   If no, continue to #3.

3. Does the patient have a diagnosis of *Clostridium difficile* infection (CDI) (ICD-10 Group A04.7) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an infectious disease specialist
   - The patient had at least one previous occurrence of Clostridium difficile infection
   - The patient has been treated with vancomycin for the current *Clostridium difficile* infection

   If yes, **approve for 20 days by GPID or GPI-14 with a quantity limit of #6 per day.**

   If no, do not approve.

RIFAXIMIN 200MG

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RIFAXIMIN 200MG (Xifaxan)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Travelers' diarrhea
   2. Overt hepatic encephalopathy (HE: a type of brain condition caused by liver damage)
   3. *Clostridium difficile* infection (a type of bacterial infection)

B. If you have travelers' diarrhea, approval also requires:
   1. You are 12 years of age or older
   2. You have tried or have a contraindication to (harmful for you to use) oral azithromycin, ciprofloxacin, ofloxacin, or levofloxacin

C. If you have overt hepatic encephalopathy, approval also requires:
   1. Xifaxan will be used in combination with lactulose

D. If you have *Clostridium difficile* infection, approval also requires:
   1. Therapy is prescribed by or in consultation with an infectious disease specialist (a doctor who specializes in the treatment of infections)
   2. You had at least one previous occurrence of *Clostridium difficile* infection
   3. You have been treated with vancomycin for the current *Clostridium difficile* infection

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information for Xifaxan.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

RILONACEPT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RILONACEPT	ARCALYST	35438		GPI-10 (6645006000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Cryopyrin-Associated Periodic Syndromes (CAPS), including Familial Cold Autoinflammatory Syndrome (FCAS) or Muckle-Wells Syndrome (MWS) (ICD-10 M04.2) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient has genetic testing for gain-of-function mutations in the *NLRP3* gene OR has inflammatory markers (i.e., elevated CRP, ESR, serum amyloid A protein [SAA] or S100 proteins)
   - The patient has TWO of the following: urticarial-like rash (neutrophilic dermatitis), cold-triggered episodes, sensorineural hearing loss, musculoskeletal symptoms, chronic aseptic meningitis, skeletal abnormalities
   - Arcalyst will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CAPS

   If yes, **enter TWO approvals by HICL or GPI-10 as follows:**
   - **FIRST APPROVAL:**
     - **Approve for 1 month with a quantity limit of #5 per 28 days.**
   - **SECOND APPROVAL:**
     - **Approve for lifetime with a quantity limit of #4 per 28 days (enter a start date of 3 days BEFORE the END of the first approval).**

   If no, continue to #2.

2. Does the patient have a diagnosis of Deficiency of Interleukin-1 Receptor Antagonist (DIRA) (ICD-10 M04.8) and meet **ALL** of the following criteria?
   - The patient has genetic testing for gain-of-function mutations in the *IL1RN* gene OR has inflammatory markers (i.e., elevated CRP, ESR)
   - The patient has ONE of the following: pustular psoriasis-like rashes, osteomyelitis, absence of bacterial osteomyelitis, nail changes (i.e., onychomadesis)
   - Arcalyst will NOT be used concurrently with another systemic biologic (e.g., Kineret [anakinra]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of DIRA

   If yes, **approve for lifetime by HICL or GPI-10 with a quantity limit of #8 per 28 days.**
   If no, continue to #3.

RILONACEPT

INITIAL CRITERIA (CONTINUED)

3. Is the request for the treatment or reduction in risk of recurrent pericarditis (RP) (ICD-10 I31.9) and the patient meets **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient had an episode of acute pericarditis
   - The patient has been symptom-free for an interval of 4 to 6 weeks
   - The patient has TWO of the following: chest pain consistent with pericarditis, pericardial friction rub, ECG showing diffuse ST-segment elevation or PR-segment depression, and new or worsening pericardial effusion
   - The patient had a trial of or contraindication to the following clinical standard of care agents: two NSAIDs (e.g., ibuprofen, indomethacin) AND colchicine
   - Arcalyst will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of recurrent pericarditis

   If yes, **enter TWO approvals by HICL or GPI-10 as follows:**
   - **FIRST APPROVAL:**
     - **Approve for 1 month with a quantity limit of #5 per 28 days.**
   - **SECOND APPROVAL:**
     - **Approve for 11 months with a quantity limit of #4 per 28 days (enter a start date of 3 days BEFORE the END of the first approval).**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RILONACEPT (Arcalyst)** requires the following rule(s) be met for approval:

   A. You meet ONE of the following:
      1. You have Cryopyrin-Associated Periodic Syndromes (CAPS: a type of immune disorder) including, Familial Cold Autoinflammatory Syndrome (FCAS: a type of immune disorder) or Muckle-Wells Syndrome (MWS: a type of gene disorder)
      2. You have Deficiency of Interleukin-1 Receptor Antagonist (DIRA: a type of immune system disorder)
      3. Arcalyst will be used for the treatment or reduction in risk of recurrent pericarditis (RP: a type of heart condition that returns)

   (Initial denial text continued on next page)

RILONACEPT

INITIAL CRITERIA (CONTINUED)

B. If you have Cryopyrin-Associated Periodic Syndromes including Familial Cold Autoinflammatory Syndrome or Muckle-Wells Syndrome, approval also requires:

1. You are 12 years of age or older
2. You had genetic testing for gain-of-function mutations (abnormal change in gene) in the *NLRP3* gene (a type of gene) OR you have inflammatory markers (elevated C-reactive protein [CRP: a measure of how much inflammation is in the body], erythrocyte sedimentation rate [ESR: a measure of how much inflammation is in the body], serum amyloid A protein [SAA: a type of protein] or S100 proteins [a type of protein])
3. You have TWO of the following: urticarial-like rash (neutrophilic dermatitis: a type of skin condition), cold-triggered episodes, sensorineural hearing loss (SNHL: a type of hearing loss), musculoskeletal symptoms (symptoms related to the skin and bones), chronic aseptic meningitis (inflammation of the brain and spinal cord), and skeletal (bone) abnormalities
4. You will NOT use Arcalyst concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Cryopyrin-Associated Periodic Syndromes (a type of immune system disorder)

C. If you have Deficiency of Interleukin-1 Receptor Antagonist, approval also requires:

1. You had genetic testing for gain-of-function mutations (abnormal change in gene) in the *IL1RN* gene (a type of gene) OR you have inflammatory markers (elevated C-reactive protein [CRP: a measure of how much inflammation is in the body], erythrocyte sedimentation rate [ESR: a measure of how much inflammation is in the body])
2. You have ONE of the following: pustular psoriasis-like rashes (a type of skin condition), osteomyelitis (bone infection), absence of bacterial osteomyelitis, nail changes (onychomadesis: fungal infection of toenail)
3. You will NOT use Arcalyst concurrently (at the same time) with another systemic biologic (such as Kineret [anakinra]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Deficiency of Interleukin-1 Receptor Antagonist (a type of immune system disorder)

(Initial denial text continued on next page)

RILONACEPT

INITIAL CRITERIA (CONTINUED)

D. If the request is for the treatment or reduction in risk of recurrent pericarditis, approval also requires:

1. You are 12 years of age or older
2. You had an episode of acute pericarditis (a type of short-term heart condition)
3. You have been symptom-free for 4 to 6 weeks
4. You have TWO of the following: chest pain consistent with pericarditis, pericardial friction rub (a type of heart condition), electrocardiogram (ECG: a type of lab test) showing diffuse ST-segment elevation or PR-segment depression (an abnormal heart test), and new or worsening pericardial effusion (a type of heart condition)
5. You have tried or have a contraindication to (harmful for you to use) the following clinical standard of care medications: two NSAIDS (non-steroidal anti-inflammatory drugs such as ibuprofen, indomethacin) AND colchicine
6. You will NOT use Arcalyst concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of recurrent pericarditis (a type of heart condition that returns)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RILONACEPT

RENEWAL CRITERIA

NOTE: For the diagnoses of Cryopyrin-Associated Periodic Syndromes (CAPS), including Familial Cold Autoinflammatory Syndrome (FCAS) or Muckle-Wells Syndrome (MWS), or Deficiency of Interleukin-1 Receptor Antagonist (DIRA), please refer to the Initial Criteria section.

1. Is the request for the treatment or reduction in risk of recurrent pericarditis (RP) (ICD-10 I31.9) and the patient meets **ALL** of the following criteria?
   - The patient has had a reduction of pericarditis recurrence or improvement in symptoms
   - Arcalyst will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of recurrent pericarditis

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per 28 days**. If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RILONACEPT (Arcalyst)** requires the following rule(s) be met for renewal:
   A. Arcalyst will be used for the treatment or reduction in risk of recurrent pericarditis (RP: a type of heart condition that returns)
   B. You have had a reduction in pericarditis recurrence (a type of heart condition that has come back less often) or improvement in symptoms
   C. You will NOT use Arcalyst concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of recurrent pericarditis (a type of heart condition that returns)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Arcalyst.

RILZABRUTINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RILZABRUTINIB	WAYRILZ	50857		GPI-10 (8575205000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of persistent or chronic immune thrombocytopenia (ITP) (ICD-10 D69.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to a corticosteroid or IV immunoglobulin, OR had an insufficient response to a splenectomy
   - The patient has a platelet count of less than 30 x 10^9/L, OR has a platelet count of less than 50 x 10^9/L and had a prior bleeding event
   - The patient had a trial of or contraindication to a spleen tyrosine kinase (SYK) inhibitor (e.g., Tavalisse [fostamatinib]) OR a thrombopoietin receptor agonist (e.g., Doptelet [avatrombopag], Promacta [eltrombopag])
   - Wayrilz will NOT be used concurrently with a spleen tyrosine kinase (SYK) inhibitor (e.g., Tavalisse [fostamatinib])

   If yes, **approve for 3 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RILZABRUTINIB (Wayrilz)** requires the following rule(s) be met for approval:
   A. You have persistent or chronic immune thrombocytopenia (ITP: a type of blood disorder)
   B. You are 18 years of age or older
   C. You have tried or have a contraindication to (harmful for you to use) a corticosteroid or intravenous (injection into the vein) immunoglobulin, OR you did not have a good enough response to a splenectomy (spleen removal)
   D. You have a platelet (a type of blood cell) count of less than 30 x 10^9/L, OR you have a platelet count of less than 50 x 10^9/L and had a prior bleeding event
   E. You have tried or have a contraindication to (harmful for you to use) a spleen tyrosine kinase (SYK) inhibitor (such as Tavalisse [fostamatinib]) OR a thrombopoietin receptor agonist (such as Doptelet [avatrombopag], Promacta [eltrombopag])
   F. You will NOT use Wayrilz concurrently (at the same time) with a spleen tyrosine kinase (SYK) inhibitor (such as Tavalisse [fostamatinib])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RILZABRUTINIB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of persistent or chronic immune thrombocytopenia (ITP) (ICD-10 D69.3) and meet **ALL** of the following criteria?
   - The patient has shown a clinical response to therapy, defined as having an improvement in platelet counts from baseline OR a reduction in bleeding events
   - Wayrilz will NOT be used concurrently with a spleen tyrosine kinase (SYK) inhibitor (e.g., Tavalisse [fostamatinib])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RILZABRUTINIB (Wayrilz)** requires the following rule(s) be met for renewal:
   A. You have persistent or chronic immune thrombocytopenia (ITP: a type of blood disorder)
   B. You have shown a clinical response to therapy, defined as having an improvement in platelet (a type of blood cell) count from baseline OR a decrease in bleeding events
   C. You will NOT use Wayrilz concurrently (at the same time) with a spleen tyrosine kinase (SYK) inhibitor (such as Tavalisse [fostamatinib])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

RIMABOTULINUM TOXIN B (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RIMABOTULINUM TOXIN B	MYOBLOC	21869		GPI-10 (7440002010)	

GUIDELINES FOR USE

1. Is the request for a cosmetic indication (e.g., wrinkles - glabellar lines, lateral canthal lines, forehead lines)?

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of cervical dystonia (spasmodic torticollis or involuntary contracting of the neck muscles) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **2,500u/0.5mL: #1mL every 3 months.**
   - **5,000u/1mL: #1mL every 3 months.**
   - **10,000u/2mL: #2mL every 3 months.**

   If no, continue to #3.

3. Does the patient have a diagnosis of chronic sialorrhea (drooling or excessive salivation) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **2,500u/0.5mL: #1mL every 3 months.**
   - **5,000u/1mL: #1mL every 3 months.**
   - **10,000u/2mL: #2mL every 3 months.**

   If no, do not approve.

RIMEGEPANT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RIMEGEPANT SULFATE	NURTEC ODT	46383		GPI-10 (6770106070)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for the acute treatment of migraines (ICD-10 Group G43 except G43.7 and G43.E) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Nurtec ODT will NOT be used concurrently with other CGRP inhibitors (e.g., Zavzpret [zavegepant], Ubrelvy [ubrogepant]) for the acute treatment of migraines
   - The patient had a trial of or contraindication to the clinical standard of care agent: ONE triptan (e.g., Imitrex [sumatriptan], Maxalt [rizatriptan])

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #2.

2. Is the request for the preventive treatment of episodic migraines and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Nurtec ODT will NOT be used concurrently with other CGRP inhibitors (e.g., Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Emgality [galcanezumab-gnlm], Vyepti [eptinezumab-jjmr], Qulipta [atogepant]) for migraine prevention

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RIMEGEPANT

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RIMEGEPANT (Nurtec ODT)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Acute (quick onset) treatment of migraines (a type of headache)
   2. Preventive treatment of episodic migraines (a type of headache)

B. If the request is for the acute treatment of migraines, approval also requires:
   1. You are 18 years of age or older
   2. You will NOT use Nurtec ODT concurrently (at the same time) with other calcitonin gene-related peptide (CGRP) inhibitors (such as Zavzpret [zavegepant], Ubrelvy [ubrogepant]) for the acute (quick onset) treatment of migraines (a type of headache)
   3. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: ONE triptan (such as Imitrex [sumatriptan], Maxalt [rizatriptan])

C. If the request is for the preventive treatment of episodic migraines (0-14 headache days per month), approval also requires:
   1. You are 18 years of age or older
   2. You will NOT use Nurtec ODT concurrently (at the same time) with other calcitonin gene-related peptide (CGRP) inhibitors (such as Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Emgality [galcanezumab-gnlm], Vyepti [eptinezumab-jjmr], Qulipta [atogepant]) for migraine (a type of headache) prevention

RIMEGEPANT

RENEWAL CRITERIA

NOTE: For the diagnosis of acute treatment of migraines, please refer to the Initial Criteria section.

1. Is the request for the preventive treatment of episodic migraines **AND** the patient meets the following criterion?
   - Nurtec ODT will NOT be used concurrently with other CGRP inhibitors (e.g., Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Emgality [galcanezumab-gnlm], Vyepti [eptinezumab-jjmr], Qulipta [atogepant]) for migraine prevention

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced a reduction in migraine or headache frequency of at least 2 days per month
   - The patient has experienced a reduction in migraine severity
   - The patient has experienced a reduction in migraine duration

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RIMEGEPANT (Nurtec ODT)** requires the following rule(s) be met for renewal:
   A. The request is the preventive treatment of episodic migraines (a type of headache, 0-14 headache days per month):
   B. You will NOT use Nurtec ODT concurrently (at the same time) with other calcitonin gene-related peptide (CGRP) inhibitors (such as Ajovy [fremanezumab-vfrm], Aimovig [erenumab-aooe], Emgality [galcanezumab-gnlm], Vyepti [eptinezumab-jjmr], Qulipta [atogepant]) for migraine (a type of headache) prevention
   C. You meet ONE of the following:
      1. You have experienced a reduction in migraine or headache frequency of at least 2 days per month
      2. You have experienced a reduction in migraine severity
      3. You have experienced a reduction in migraine duration

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

RIOCIGUAT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RIOCIGUAT	ADEMPAS	40644		GPI-10 (4013405000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - Adempas will NOT be used concurrently with nitrates or nitric oxide donors (e.g., amyl nitrate), phosphodiesterase inhibitors (e.g., Viagra [sildenafil], Cialis [tadalafil], Levitra [vardenafil]), or non-specific phosphodiesterase inhibitors (e.g., dipyridamole, theophylline)

   If yes, continue to #2.
   If no, continue to #3.

2. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) of greater than 2 Wood units (WU)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #3 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of persistent/recurrent chronic thromboembolic pulmonary hypertension (CTEPH) (WHO Group 4) (ICD-10 I27.24) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The patient has persistent or recurrent disease after surgical treatment OR is not a candidate for surgery OR has inoperable CTEPH
   - The patient has NYHA-WHO Functional Class II to IV symptoms
   - Adempas will NOT be used concurrently with nitrates or nitric oxide donors (e.g., amyl nitrate), phosphodiesterase inhibitors (e.g., Viagra [sildenafil], Cialis [tadalafil], Levitra [vardenafil]), or non-specific phosphodiesterase inhibitors (e.g., dipyridamole, theophylline)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #3 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RIOCIGUAT

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RIOCIGUAT (Adempas)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1)
   2. Persistent/recurrent chronic thromboembolic pulmonary hypertension (CTEPH: a type of heart and lung condition) (World Health Organization [WHO] Group 4)

B. If you have pulmonary arterial hypertension, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   3. Your pulmonary arterial hypertension is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
      a. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
      b. Pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg
      c. Pulmonary vascular resistance (PVR) greater than 2 Wood units
   4. You will NOT use Adempas concurrently (at the same time) with nitrates or nitric oxide donors (such as amyl nitrate), phosphodiesterase inhibitors (such as Viagra [sildenafil], Cialis [tadalafil], Levitra [vardenafil]), or non-specific phosphodiesterase inhibitors (such as dipyridamole, theophylline)

C. If you have chronic thromboembolic pulmonary hypertension, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   3. You have persistent or recurrent disease after surgical treatment (condition continues to exist or returns after surgery) OR you are not a candidate for surgery OR you have inoperable (not able to operate on) chronic thromboembolic pulmonary hypertension
   4. You have NYHA-WHO Functional Class II to IV symptoms (a way to classify how limited you are during physical activity)
   5. You will NOT use Adempas concurrently (at the same time) with nitrates or nitric oxide donors (such as amyl nitrate), phosphodiesterase inhibitors (such as Viagra [sildenafil], Cialis [tadalafil], Levitra [vardenafil]), or non-specific phosphodiesterase inhibitors (such as dipyridamole, theophylline)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RISANKIZUMAB-RZAA

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RISANKIZUMAB-RZAA	SKYRIZI	45699		GPI-10 (9025057070, 5250406070)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of one clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
   - The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RISANKIZUMAB-RZAA

INITIAL CRITERIA (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic and is switching to Skyrizi
   - The patient has psoriasis covering 3 percent or more of body surface area (BSA)
   - The patient has psoriatic lesions affecting the hands, feet, face, genital area, or scalp

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**

   If no, continue to #5.

RISANKIZUMAB-RZAA

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths as follows:**
   - **180mg/1.2mL: #1.2 mL per 56 days**
   - **360mg/2.4mL: #2.4 mL per 56 days**

   (Please enter a 3 month approval by GPID or GPI-14 for the 600mg/10mL strength with a quantity limit of #10 mL per 28 days.)

   If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, approve for 6 months by GPID or GPI-14 for all strengths as follows:
   - **180 mg/1.2 mL: #1.2 mL per 56 days**
   - **360 mg/2.4 mL: #2.4 mL per 56 days**

   (Please enter a 3 month approval by GPID or GPI-14 for the 600mg/10mL strength with a quantity limit of #20 mL per 28 days.)

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RISANKIZUMAB-RZAA

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **RISANKIZUMAB-RZAA (Skyrizi)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe plaque psoriasis, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
   3. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
   4. You meet ONE of the following:
      a. You have had at least a 3-month trial of one clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis
      b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy) for the treatment of plaque psoriasis
      c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication
   5. You meet ONE of the following:
      a. You were previously stable on another biologic and are switching to Skyrizi
      b. You have psoriasis covering 3 percent or more of body surface area (BSA)
      c. You have psoriatic lesions (rashes) affecting the hands, feet, face, genital area, or scalp

C. If you have psoriatic arthritis, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
   3. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

(Initial denial text continued on next page)

RISANKIZUMAB-RZAA

INITIAL CRITERIA (CONTINUED)

D. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

RISANKIZUMAB-RZAA

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following strengths:**
   - **180mg/1.2mL: #1.2mL per 56 days.**
   - **360mg/2.4mL: #2.4mL per 56 days.**

   If no, continue to #4.

RISANKIZUMAB-RZAA

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Skyrizi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following strengths:**
   - **180mg/1.2mL: #1.2mL per 56 days.**
   - **360mg/2.4mL: #2.4mL per 56 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: Our guideline named **RISANKIZUMAB-RZAA (Skyrizi)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   B. If you have moderate to severe plaque psoriasis, renewal also requires:
      1. You have achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index: used to measure the severity and extent of psoriasis) of at least 50 percent or more while on therapy
      2. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

   C. If you have psoriatic arthritis, renewal also requires:
      1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
      2. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

   (Renewal denial text continued on next page)

CONTINUED ON NEXT PAGE

RENEWAL CRITERIA (CONTINUED)

D. If you have moderate to severe Crohn's disease, renewal also requires:
1. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

E. If you have moderate to severe ulcerative colitis, renewal also requires:
1. You will NOT use Skyrizi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

---

PRIOR AUTHORIZATION GUIDELINES

RISDIPLAM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RISDIPLAM	EVRYSDI	46765		GPI-10 (7470656000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of spinal muscular atrophy (SMA) (ICD-10 G12.9) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with a neuromuscular specialist or spinal muscular atrophy (SMA) specialist at a SMA Specialty Center
- The diagnosis is confirmed by gene mutation analysis indicating mutations or deletions of both alleles of the survival motor neuron 1 (SMN1) gene (e.g., homozygous deletions of SMN1, homozygous mutations of SMN1, compound heterozygous mutations in SMN1 [i.e., deletion of SMN1 on one allele and point mutation of SMN1 on the other allele])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient pre-symptomatic **AND** meets the following criterion?
- The patient has up to (i.e., no more than) THREE copies of the survival motor neuron 2 (SMN2) gene based on newborn screening

If yes, **approve all formulations for 12 months by GPID or GPI-14 with the following quantity limits:**
- **5 mg: #1 per day.**
- **0.75 mg/mL: #8mL per day.**

If no, continue to #3.

3. Is the patient symptomatic and meets **ALL** of the following criteria?
- The onset of spinal muscular atrophy (SMA) symptoms occurred before 20 years of age
- The patient had a baseline motor function assessment by a neuromuscular specialist or SMA specialist
- If the patient received prior gene therapy, the patient had a less than expected clinical benefit with gene therapy

If yes, **approve all formulations for 12 months by GPID or GPI-14 with the following quantity limits:**
- **5 mg: #1 per day.**
- **0.75 mg/mL: #8mL per day.**

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

RISDIPLAM

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RISDIPLAM (Evrysdi)** requires the following rule(s) be met for approval:

A. You have spinal muscular atrophy (SMA: a type of nerve and muscle movement disorder)
B. Therapy is prescribed by or in consultation with a neuromuscular (nerve and muscle) specialist or spinal muscular atrophy (SMA) specialist at a SMA Specialty Center
C. Your diagnosis is confirmed by a gene mutation (abnormal change) analysis indicating mutations or deletions of both alleles of the survival motor neuron 1 (SMN1: type of protein) gene (such as homozygous deletions of SMN1, homozygous mutations of SMN1, compound heterozygous mutations in SMN1 [deletion of SMN1 on one allele and point mutation of SMN1 on the other allele])
D. If you are pre-symptomatic (symptoms have not yet appeared), approval also requires:
    1. You have up to (no more than) THREE copies of the survival motor neuron 2 (SMN2: type of protein) gene based on a screening that was done when you were a newborn
E. If you are symptomatic (symptoms have appeared), approval also requires:
    1. The onset of spinal muscular atrophy (SMA) symptoms occurred before 20 years of age
    2. You had a baseline motor function assessment by a neuromuscular (nerve and muscle) specialist or SMA specialist
    3. If you have received prior gene therapy, you experienced a less than expected clinical benefit with gene therapy

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

RISDIPLAM

RENEWAL CRITERIA

1. Does the patient have a diagnosis of spinal muscular atrophy (SMA) (ICD-10 G12.9) and meet **ONE** of the following criteria?
- The patient has improved, maintained, or demonstrated a less than expected decline in motor function assessments compared to baseline (e.g., HINE, HFMSE, CHOP-INTEND)
- The patient has improved, maintained, or demonstrated a less than expected decline in other muscle function (e.g., pulmonary)

If yes, **approve all formulations for 12 months by GPID or GPI-14 with the following quantity limits:**
- **5 mg: #1 per day.**
- **0.75 mg/mL: #8mL per day.**

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RISDIPLAM (Evrysdi)** requires the following rule(s) be met for renewal:
A. You have spinal muscular atrophy (SMA: a type of nerve and muscle movement disorder)
B. You meet ONE of the following:
   1. You have improved, maintained, or demonstrated a less than expected decline in motor function assessments compared to baseline. Some types of motor assessment tests include Hammersmith Infant Neurological Examination (HINE), Hammersmith Functional Motor Scale - Expanded (HFMSE), and Children's Hospital of Philadelphia Infant Test of Neuromuscular Disorders (CHOP-INTEND)
   2. You have improved, maintained, or demonstrated a less than expected decline in other muscle function (such as pulmonary [lung/breathing] function)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RITUXIMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RITUXIMAB	RITUXAN	16848		GPI-10 (2135186000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient is currently using or has a contraindication to methotrexate
   - Rituxan will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying antirheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10 for #2 fills.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RITUXIMAB

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of non-Hodgkin's lymphoma (NHL) (ICD-10 Group C85) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Rituxan will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of NHL
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by HICL or GPI-10 for up to #8 fills.**
     If no, continue to #4.

4. Does the patient have previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL) (ICD-10 Group C83.3), Burkitt lymphoma (BL) (ICD-10 Group C83.7), Burkitt-like lymphoma (BLL) (ICD-10 Group C83.7) or mature B-cell acute leukemia (B-AL) (ICD-10 Group C91.A) and meet **ALL** of the following criteria?
   - The patient is 6 months to 17 years of age
   - Therapy is prescribed by or in consultation with an oncologist
   - Rituxan will be used in combination with chemotherapy (e.g., CVP [cyclophosphamide-vincristine- prednisolone])
   - Rituxan will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of DLBCL, BL, BLL, or B-AL
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by HICL or GPI-10 for up to #6 fills.**
     If no, continue to #5.

RITUXIMAB

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Rituxan will be used in combination with chemotherapy (e.g., fludarabine, cyclophosphamide)
   - Rituxan will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CLL
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 6 months by HICL or GPI-10 for up to #6 fills.**
     If no, continue to #6.

6. Does the patient have a diagnosis of granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis) (ICD-10 Group M31.3) or microscopic polyangiitis (MPA) (ICD-10 M31.7) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Rituxan will be used in combination with glucocorticoids (e.g., methylprednisolone, prednisone)
   - Rituxan will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPA (Wegener's granulomatosis) or MPA
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by HICL or GPI-10 for #4 fills.**
     If no, continue to #7.

RITUXIMAB

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of moderate to severe pemphigus vulgaris (PV) (ICD-10 L10.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Rituxan will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PV
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by HICL or GPI-10 for #3 fills.**
     If no, continue to #8.

8. Is the request for an FDA-approved indication **AND** Rituxan will be used in combination with another chemotherapy agent(s)?
   [**NOTE:** Please check claims history, MRF, etc. for combination chemotherapy agent(s). In addition, please refer to the label of the combination chemotherapy agent(s) to ensure the indication is to be used with Rituxan. Clinically appropriate to accept FDA approval in any of the combination chemotherapy agent(s) labels.]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RITUXIMAB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RITUXIMAB (Rituxan)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Non-Hodgkin's lymphoma (NHL: a type of blood cancer)
   3. Previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL: a type of blood cancer), Burkitt lymphoma (BL: a type of blood cancer), Burkitt- like lymphoma (BLL: a type of blood cancer), or mature B-cell acute leukemia (B-AL: a type of blood cancer)
   4. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
   5. Granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis) (a condition that affects the blood vessels)
   6. Microscopic polyangiitis (MPA: a condition that affects the blood vessels)
   7. Moderate to severe pemphigus vulgaris (PV: a type of skin condition)
   8. Rituxan will be used in combination with another chemotherapy agent(s) for a Food and Drug Administration (FDA)-approved indication

(Initial denial text continued on next page)

RITUXIMAB

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You are currently using or have a contraindication to (harmful for you to use) methotrexate
4. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
5. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease modifying antirheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
6. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

C. If you have non-Hodgkin's lymphoma, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
3. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-Hodgkin’s lymphoma (a type of blood cancer)
4. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)

RITUXIMAB

INITIAL CRITERIA (CONTINUED)

D. If you have previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma, Burkitt lymphoma, Burkitt-like lymphoma, or mature B-cell acute leukemia, approval also requires:
1. You are 6 months to 17 years of age
2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
3. Rituxan will be used in combination with chemotherapy (such as CVP [cyclophosphamide-vincristine-prednisolone])
4. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of diffuse large B-cell lymphoma, Burkitt lymphoma, Burkitt-like lymphoma, or mature B-cell acute leukemia (types of blood cancer)
5. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)

E. If you have chronic lymphocytic leukemia, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
3. Rituxan will be used in combination with chemotherapy (such as fludarabine, cyclophosphamide)
4. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic lymphocytic leukemia (a type of blood cancer)
5. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)

F. If you have granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis, approval also requires:
1. You are 2 years of age or older
2. Rituxan will be used in combination with glucocorticoids (such as methylprednisolone, prednisone)
3. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis (conditions that affect the blood vessels)
4. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Riabni (rituximab-arrx), Ruxience (rituximab-pvvr), Truxima (rituximab-abbs)

(Initial denial text continued on next page)

RITUXIMAB

RENEWAL CRITERIA

NOTE: For the diagnoses of non-Hodgkin's lymphoma (NHL), diffuse large B-cell lymphoma (DLBCL), Burkitt lymphoma (BL), Burkitt-like lymphoma (BLL), or mature B-cell acute leukemia (B-AL), chronic lymphocytic leukemia (CLL), granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis), microscopic polyangiitis (MPA), and moderate to severe pemphigus vulgaris (PV), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
   - Rituxan will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 for #3 fills.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RITUXIMAB

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RITUXIMAB (Rituxan)** requires the following rule(s) be met for renewal:

A. You have moderate to severe rheumatoid arthritis (RA: a type of joint condition)
B. You have experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count from baseline while on therapy
C. You will NOT use Rituxan concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
D. You meet ONE of the following:
    1. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
        a. Enbrel (etanercept)
        b. Adalimumab-ryvk/adalimumab-aaty
        c. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
        d. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
    2. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of non-Hodgkin's lymphoma (NHL) (ICD-10 Group C85) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Truxima will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of NHL

   If yes, **approve for 12 months by HICL or GPI-10 for up to #8 fills.**
   If no, continue to #2.

2. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Truxima will be used in combination with chemotherapy (e.g., fludarabine, cyclophosphamide)
   - Truxima will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CLL

   If yes, **approve for 6 months by HICL or GPI-10 for up to #6 fills.**
   If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient is currently using or has a contraindication to methotrexate
   - Truxima will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying antirheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

   If yes, continue to #4.
   If no, continue to #5.

RITUXIMAB-ABBS

INITIAL CRITERIA (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 6 months by HICL or GPI-10 for #2 fills.**
     If no, do not approve.
     DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Does the patient have a diagnosis of granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis) (ICD-10 Group M31.3) or microscopic polyangiitis (MPA) (ICD-10 M31.7) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Truxima will be used in combination with glucocorticoids (e.g., methylprednisolone, prednisone)
   - Truxima will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPA (Wegener's granulomatosis) or MPA

     If yes, **approve for 12 months by HICL or GPI-10 for #4 fills.**
     If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe pemphigus vulgaris (PV) (ICD-10 L10.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Truxima will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PV

     If yes, **approve for 12 months by HICL or GPI-10 for #3 fills.**
     If no, continue to #7.

RITUXIMAB-ABBS

INITIAL CRITERIA (CONTINUED)

7. Does the patient have previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL) (ICD-10 Group C83.3), Burkitt lymphoma (BL) (ICD-10 Group C83.7), Burkitt-like lymphoma (BLL) (ICD-10 Group C83.7) or mature B-cell acute leukemia (B-AL) (ICD-10 Group C91.A) and meet **ALL** of the following criteria?
   - The patient is 6 months to 17 years of age
   - Therapy is prescribed by or in consultation with an oncologist
   - Truxima will be used in combination with chemotherapy (e.g., CVP [cyclophosphamide-vincristine-prednisolone])
   - Truxima will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of DLBCL, BL, BLL, or B-AL

   If yes, **approve for 12 months by HICL or GPI-10 for up to #6 fills.**
   If no, continue to #8.

8. Is the request for an FDA-approved indication **AND** Truxima will be used in combination with another chemotherapy agent(s)?
   [**NOTE:** Please check claims history, MRF, etc. for combination chemotherapy agent(s). In addition, please refer to the label of the combination chemotherapy agent(s) to ensure the indication is to be used with Truxima. Clinically appropriate to accept FDA approval in any of the combination chemotherapy agent(s) labels.]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RITUXIMAB-ABBS

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RITUXIMAB-ABBS (Truxima)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Non-Hodgkin's lymphoma (NHL: a type of blood cancer)
   2. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
   3. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   4. Granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis) (a condition that affects the blood vessels)
   5. Microscopic polyangiitis (MPA: a condition that affects the blood vessels)
   6. Moderate to severe pemphigus vulgaris (PV: a type of skin condition)
   7. Previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL: a type of blood cancer), Burkitt lymphoma (BL: a type of blood cancer), Burkitt- like lymphoma (BLL: a type of blood cancer), or mature B-cell acute leukemia (B-AL: a type of blood cancer)
   8. Truxima will be used in combination with another chemotherapy agent(s) for a Food and Drug Administration (FDA)-approved indication

B. If you have non-Hodgkin's lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
   3. You will NOT use Truxima concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-Hodgkin’s lymphoma (a type of blood cancer)

C. If you have chronic lymphocytic leukemia, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
   3. Truxima will be used in combination with chemotherapy (such as fludarabine, cyclophosphamide)
   4. You will NOT use Truxima concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic lymphocytic leukemia (a type of blood cancer)

(Initial denial text continued on next page)

RITUXIMAB-ABBS

INITIAL CRITERIA (CONTINUED)

D. If you have moderate to severe rheumatoid arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You are currently using or have a contraindication to (harmful for you to use) methotrexate
4. You will NOT use Truxima concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
5. You have tried at least 3 months of or have a contraindication to clinical standard of care medication: a ONE conventional synthetic DMARD (disease-modifying antirheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
6. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

(Initial denial text continued on next page)

RITUXIMAB-ABBS

INITIAL CRITERIA (CONTINUED)

E. If you have granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis, approval also requires:
1. You are 2 years of age or older
2. Truxima will be used in combination with glucocorticoids (such as methylprednisolone, prednisone)
3. You will NOT use Truxima concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis (conditions that affect the blood vessels)

F. If you have moderate to severe pemphigus vulgaris, approval also requires:
1. You are 18 years of age or older
2. You will NOT use Truxima concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of pemphigus vulgaris (a type of skin condition)

G. If you have previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma, Burkitt lymphoma, Burkitt-like lymphoma, or mature B-cell acute leukemia, approval also requires:
1. You are 6 months to 17 years of age
2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
3. Truxima will be used in combination with chemotherapy (such as CVP [cyclophosphamide-vincristine-prednisolone])
4. You will NOT use Truxima concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of diffuse large B-cell lymphoma, Burkitt lymphoma, Burkitt-like lymphoma, or mature B-cell acute leukemia (types of blood cancer)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

RITUXIMAB-ABBS

RENEWAL CRITERIA

NOTE: For the diagnoses of non-Hodgkin's lymphoma (NHL), diffuse large B-cell lymphoma (DLBCL), Burkitt lymphoma (BL), Burkitt-like lymphoma (BLL), or mature B-cell acute leukemia (B-AL), chronic lymphocytic leukemia (CLL), granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis), microscopic polyangiitis (MPA), and moderate to severe pemphigus vulgaris (PV), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
   - Truxima will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 for #3 fills.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RITUXIMAB-ABBS

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

Our guideline named **RITUXIMAB-ABBS (Truxima)** requires the following rule(s) be met for renewal:

A. You have moderate to severe rheumatoid arthritis (RA: a type of joint condition)
B. You have experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
C. You will NOT use Truxima concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
D. You meet ONE of the following:
    1. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
        a. Enbrel (etanercept)
        b. Adalimumab-ryvk/adalimumab-aaty
        c. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
        d. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
    2. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of non-Hodgkin's lymphoma (NHL) (ICD-10 Group C85) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Riabni will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of NHL

   If yes, **approve for 12 months by HICL or GPI-10 for up to #8 fills.**
   If no, continue to #2.

2. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Riabni will be used in combination with chemotherapy (e.g., fludarabine, cyclophosphamide)
   - Riabni will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CLL

   If yes, **approve for 6 months by HICL or GPI-10 for up to #6 fills.**
   If no, continue to #3.

3. Does the patient have a diagnosis of granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis) (ICD-10 Group M31.3) or microscopic polyangiitis (MPA) (ICD-10 M31.7) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Riabni will be used in combination with glucocorticoids (e.g., methylprednisolone, prednisone)
   - Riabni will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPA (Wegener's granulomatosis) or MPA

   If yes, **approve for 12 months by HICL or GPI-10 for #4 fills.**
   If no, continue to #4.

RITUXIMAB-ARRX

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient is currently using or has a contraindication to methotrexate
   - Riabni will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying antirheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

   If yes, continue to #5.
   If no, continue to #6.

5. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10 for #2 fills.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RITUXIMAB-ARRX

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of moderate to severe pemphigus vulgaris (PV) (ICD-10 L10.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Riabni will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PV

   If yes, **approve for 12 months by HICL or GPI-10 for #3 fills.**
   If no, continue to #7.

7. Does the patient have previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL) (ICD-10 Group C83.3), Burkitt lymphoma (BL) (ICD-10 Group C83.7), Burkitt-like lymphoma (BLL) (ICD-10 Group C83.7) or mature B-cell acute leukemia (B-AL) (ICD-10 Group C91.A) and meet **ALL** of the following criteria?
   - The patient is 6 months to 17 years of age
   - Therapy is prescribed by or in consultation with an oncologist
   - Riabni will be used in combination with chemotherapy (e.g., CVP [cyclophosphamide-vincristine-prednisolone])
   - Riabni will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of DLBCL, BL, BLL, or B-AL

   If yes, **approve for 12 months by HICL or GPI-10 for up to #6 fills.**
   If no, continue to #8.

8. Is the request for an FDA-approved indication **AND** Riabni will be used in combination with another chemotherapy agent(s)?
   [**NOTE:** Please check claims history, MRF, etc. for combination chemotherapy agent(s). In addition, please refer to the label of the combination chemotherapy agent(s) to ensure the indication is to be used with Riabni. Clinically appropriate to accept FDA approval in any of the combination chemotherapy agent(s) labels.]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RITUXIMAB-ARRX

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RITUXIMAB-ARRX (Riabni)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Non-Hodgkin's lymphoma (NHL: a type of blood cancer)
   2. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
   3. Granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis) (a condition that affects the blood vessels)
   4. Microscopic polyangiitis (MPA: a condition that affects the blood vessels)
   5. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   6. Moderate to severe pemphigus vulgaris (PV: a type of skin condition)
   7. Previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL: a type of blood cancer), Burkitt lymphoma (BL: a type of blood cancer), Burkitt- like lymphoma (BLL: a type of blood cancer), or mature B-cell acute leukemia (B-AL: a type of blood cancer)
   8. Riabni will be used in combination with another chemotherapy agent(s) for a Food and Drug Administration (FDA)-approved indication

B. If you have non-Hodgkin's lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
   3. You will NOT use Riabni concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-Hodgkin's lymphoma (a type of blood cancer)

C. If you have chronic lymphocytic leukemia, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
   3. Riabni will be used in combination with chemotherapy (such as fludarabine, cyclophosphamide)
   4. You will NOT use Riabni concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic lymphocytic leukemia (a type of blood cancer)

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

INITIAL CRITERIA (CONTINUED)

D. If you have granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis, approval also requires:
1. You are 2 years of age or older
2. Riabni will be used in combination with glucocorticoids (such as methylprednisolone, prednisone)
3. You will NOT use Riabni concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis (conditions that affect the blood vessels)

E. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You are currently using or have a contraindication to (harmful for you to use) methotrexate
4. You will NOT use Riabni concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
5. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying antirheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
6. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

(Initial denial text continued on next page)

RITUXIMAB-ARRX

INITIAL CRITERIA (CONTINUED)

F. If you have moderate to severe pemphigus vulgaris, approval also requires:
1. You are 18 years of age or older
2. You will NOT use Riabni concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of pemphigus vulgaris (a type of skin condition)

G. If you have previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma, Burkitt lymphoma, Burkitt-like lymphoma, or mature B-cell acute leukemia, approval also requires:
1. You are 6 months to 17 years of age
2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
3. Riabni will be used in combination with chemotherapy (such as CVP [cyclophosphamide-vincristine-prednisolone])
4. You will NOT use Riabni concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of diffuse large B-cell lymphoma, Burkitt lymphoma, Burkitt-like lymphoma, or mature B-cell acute leukemia (types of blood cancer)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

RITUXIMAB-ARRX

RENEWAL CRITERIA

NOTE: For the diagnoses of non-Hodgkin's lymphoma (NHL), diffuse large B-cell lymphoma (DLBCL), Burkitt lymphoma (BL), Burkitt-like lymphoma (BLL), or mature B-cell acute leukemia (B-AL), chronic lymphocytic leukemia (CLL), granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis), microscopic polyangiitis (MPA), and moderate to severe pemphigus vulgaris (PV), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
   - Riabni will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 for #3 fills.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RITUXIMAB-ARRX

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RITUXIMAB-ARRX (Riabni)** requires the following rule(s) be met for renewal:

A. You have moderate to severe rheumatoid arthritis (RA: a type of joint condition)
B. You have experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
C. You will NOT use Riabni concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
D. You meet ONE of the following:
    1. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
        i. Enbrel (etanercept)
        ii. Adalimumab-ryvk/adalimumab-aaty
        iii. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
        iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
    2. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

RITUXIMAB AND HYALURONIDASE HUMAN - SQ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RITUXIMAB/ HYALURONIDASE, HUMAN	RITUXAN HYCELA	44378		GPI-10 (2199000264)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of follicular lymphoma (FL) (ICD-10 Group C82) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient has received or will receive at least one full dose of a rituximab product by intravenous infusion prior to the initiation of Rituxan Hycela
- Rituxan Hycela will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of FL

If yes, continue to #2.
If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
- The patient has relapsed or refractory FL
- The patient has previously untreated FL AND Rituxan Hycela will be used in combination with chemotherapy (e.g., CHOP [cyclophosphamide, doxorubicin, vincristine, prednisone], CVP [cyclophosphamide, vincristine, prednisone])
- The patient has achieved a complete or partial response to rituximab in combination with chemotherapy (e.g., R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine, prednisone])
- The patient has non-progressing (including stable disease) FL AND Rituxan Hycela will be used after cyclophosphamide, vincristine, and prednisone (CVP) chemotherapy

If yes, **approve the 1,400 mg-23,400 units/11.7mL strength for 12 months by GPID or GPI-14.**

If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

RITUXIMAB AND HYALURONIDASE HUMAN - SQ

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of diffuse large B-cell lymphoma (DLBCL) (ICD-10 Group C83.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received or will receive at least one full dose of a rituximab product by intravenous infusion prior to the initiation of Rituxan Hycela
   - The patient has not been previously treated for DLBCL
   - Rituxan Hycela will be used in combination with cyclophosphamide, doxorubicin, vincristine, prednisone (CHOP), or another anthracycline-based chemotherapy regimen
   - Rituxan Hycela will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of DLBCL

   If yes, **approve the 1,400 mg-23,400 units/11.7mL strength for 12 months by GPID or GPI-14.**
   If no, continue to #4.

4. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received or will receive at least one full dose of a rituximab product by intravenous infusion prior to the initiation of Rituxan Hycela
   - Rituxan Hycela will be used in combination with fludarabine and cyclophosphamide (FC)
   - Rituxan Hycela will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CLL

   If yes, **approve the 1,600 mg-26,800 units/13.4mL strength for 12 months by GPID or GPI-14.**

   If no, continue to #5.

5. Is the request for an FDA-approved indication **AND** Rituxan Hycela will be used in combination with another chemotherapy agent(s)?
   [**NOTE:** Please check claims history, MRF, etc. for combination chemotherapy agent(s). In addition, please refer to the label of the combination chemotherapy agent(s) to ensure the indication is to be used with Rituxan Hycela. Clinically appropriate to accept FDA approval in any of the combination chemotherapy agent(s) labels.]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

RITUXIMAB AND HYALURONIDASE HUMAN - SQ

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RITUXIMAB AND HYALURONIDASE HUMAN - SQ (Rituxan Hycela)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Follicular lymphoma (FL: a type of blood cancer)
   2. Diffuse large B-cell lymphoma (DLBCL: a type of blood cancer)
   3. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
   4. Rituxan Hycela will be used in combination with another chemotherapy agent(s) for a Food and Drug Administration (FDA)-approved indication

B. If you have follicular lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have received or will receive at least one full dose of a rituximab product by intravenous infusion (injection into the vein) before starting Rituxan Hycela
   3. You will NOT use Rituxan Hycela concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of follicular lymphoma
   4. You meet ONE of the following:
      a. You have relapsed or refractory follicular lymphoma (cancer that has returned or does not fully respond to treatment)
      b. You have previously untreated follicular lymphoma AND Rituxan Hycela will be used in combination with chemotherapy (a type of cancer treatment, such as CHOP [cyclophosphamide, doxorubicin, vincristine, prednisone], CVP [cyclophosphamide, vincristine, prednisone])
      c. You have achieved a complete or partial response to rituximab in combination with chemotherapy (such as R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine, prednisone])
      d. You have non-progressing (including stable disease) follicular lymphoma (cancer that is not worsening), AND Rituxan Hycela will be used after cyclophosphamide, vincristine, and prednisone (CVP) chemotherapy

(Denial text continued on next page)

RITUXIMAB AND HYALURONIDASE HUMAN - SQ

GUIDELINES FOR USE (CONTINUED)

C. If you have diffuse large B-cell lymphoma, approval also requires:
1. You are 18 years of age or older
2. You have received or will receive at least one full dose of a rituximab product by intravenous infusion (injection into the vein) before starting Rituxan Hycela
3. You have not been previously treated for diffuse large B-cell lymphoma
4. Rituxan Hycela will be used in combination with cyclophosphamide, doxorubicin, vincristine, prednisone (CHOP), or another anthracycline-based chemotherapy regimen (a type of cancer treatment)
5. You will NOT use Rituxan Hycela concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of diffuse large B-cell lymphoma

D. If you have chronic lymphocytic leukemia (CLL), approval also requires:
1. You are 18 years of age or older
2. You have received or will receive at least one full dose of a rituximab product by intravenous infusion (injection into the vein) before starting Rituxan Hycela
3. Rituxan Hycela will be used in combination with fludarabine and cyclophosphamide (FC)
4. You will NOT use Rituxan Hycela concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic lymphocytic leukemia

Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

RITUXIMAB-PVVR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RITUXIMAB-PVVR	RUXIENCE	45899		GPI-10 (2135186060)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of non-Hodgkin's lymphoma (NHL) (ICD-10 Group C85) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Ruxience will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of NHL

   If yes, **approve for 12 months by HICL or GPI-10 for up to #8 fills.**
   If no, continue to #2.

2. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oncologist
   - Ruxience will be used in combination with chemotherapy (e.g., fludarabine, cyclophosphamide)
   - Ruxience will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CLL

   If yes, **approve for 6 months by HICL or GPI-10 for up to #6 fills.**
   If no, continue to #3.

3. Does the patient have a diagnosis of granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis) (ICD-10 Group M31.3) or microscopic polyangiitis (MPA) (ICD-10 M31.7) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Ruxience will be used in combination with glucocorticoids (e.g., methylprednisolone, prednisone)
   - Ruxience will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPA (Wegener's granulomatosis) or MPA

   If yes, **approve for 12 months by HICL or GPI-10 for #4 fills.**
   If no, continue to #4.

RITUXIMAB-PVVR

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient is currently using or has a contraindication to methotrexate
   - Ruxience will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying antirheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

   If yes, continue to #5.
   If no, continue to #6.

5. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE**: Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10 for #2 fills.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RITUXIMAB-PVVR

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of moderate to severe pemphigus vulgaris (PV) (ICD-10 L10.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Ruxience will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PV

   If yes, **approve for 12 months by HICL or GPI-10 for #3 fills.**
   If no, continue to #7.

7. Does the patient have previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL) (ICD-10 Group C83.3), Burkitt lymphoma (BL) (ICD-10 Group C83.7), Burkitt-like lymphoma (BLL) (ICD-10 Group C83.7) or mature B-cell acute leukemia (B-AL) (ICD-10 Group C91.A) and meet **ALL** of the following criteria?
   - The patient is 6 months to 17 years of age
   - Therapy is prescribed by or in consultation with an oncologist
   - Ruxience will be used in combination with chemotherapy (e.g., CVP [cyclophosphamide-vincristine-prednisolone])
   - Ruxience will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of DLBCL, BL, BLL, or B-AL

   If yes, **approve for 12 months by HICL or GPI-10 for up to #6 fills.**
   If no, continue to #8.

8. Is the request for an FDA-approved indication **AND** Ruxience will be used in combination with another chemotherapy agent(s)?
   [**NOTE:** Please check claims history, MRF, etc. for combination chemotherapy agent(s). In addition, please refer to the label of the combination chemotherapy agent(s) to ensure the indication is to be used with Ruxience. Clinically appropriate to accept FDA approval in any of the combination chemotherapy agent(s) labels.]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RITUXIMAB-PVVR

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RITUXIMAB-PVVR (Ruxience)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Non-Hodgkin's lymphoma (NHL: a type of blood cancer)
   2. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
   3. Granulomatosis with polyangiitis (GPA) (Wegener's granulomatosis) (a condition that affects the blood vessels)
   4. Microscopic polyangiitis (MPA: a condition that affects the blood vessels)
   5. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   6. Moderate to severe pemphigus vulgaris (PV: a type of skin condition)
   7. Previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma (DLBCL: a type of blood cancer), Burkitt lymphoma (BL: a type of blood cancer), Burkitt- like lymphoma (BLL: a type of blood cancer), or mature B-cell acute leukemia (B-AL: a type of blood cancer)
   8. Ruxience will be used in combination with another chemotherapy agent(s) for a Food and Drug Administration (FDA)-approved indication

B. If you have non-Hodgkin's lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
   3. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-Hodgkin's lymphoma (a type of blood cancer)

(Initial denial text continued on next page)

RITUXIMAB-PVVR

INITIAL CRITERIA (CONTINUED)

C. If you have chronic lymphocytic leukemia, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
3. Ruxience will be used in combination with chemotherapy (such as fludarabine, cyclophosphamide)
4. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic lymphocytic leukemia (a type of blood cancer)

D. If you have granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis, approval also requires:
1. You are 2 years of age or older
2. Ruxience will be used in combination with glucocorticoids (such as methylprednisolone, prednisone)
3. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of granulomatosis with polyangiitis (Wegener's granulomatosis) or microscopic polyangiitis (conditions that affect the blood vessels)

E. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You are currently using or have a contraindication to (harmful for you to use) methotrexate
4. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
5. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE standard of care medication: a conventional synthetic DMARD (disease-modifying antirheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

(Initial denial text continued on next page)

RITUXIMAB-PVVR

INITIAL CRITERIA (CONTINUED)

6. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use)TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

F. If you have moderate to severe pemphigus vulgaris, approval also requires:
1. You are 18 years of age or older
2. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of pemphigus vulgaris (a type of skin condition)

G. If you have previously untreated advanced stage, CD20-positive diffuse large B-cell lymphoma, Burkitt lymphoma, Burkitt-like lymphoma, or mature B-cell acute leukemia, approval also requires:
1. You are 6 months to 17 years of age
2. Therapy is prescribed by or in consultation with an oncologist (a type of cancer doctor)
3. Ruxience will be used in combination with chemotherapy (such as CVP [cyclophosphamide-vincristine-prednisolone])
4. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of diffuse large B-cell lymphoma, Burkitt lymphoma, Burkitt-like lymphoma, or mature B-cell acute leukemia (types of blood cancer)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

RITUXIMAB-PVVR

RENEWAL CRITERIA

NOTE: For the diagnoses of non-Hodgkin's lymphoma (NHL), diffuse large B-cell lymphoma (DLBCL), Burkitt lymphoma (BL), Burkitt-like lymphoma (BLL), or mature B-cell acute leukemia (B-AL), chronic lymphocytic leukemia (CLL), granulomatosis with polyangiitis (GPA) Wegener's granulomatosis), microscopic polyangiitis (MPA), and moderate to severe pemphigus vulgaris (PV), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
   - Ruxience will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE**: Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 for #3 fills.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RITUXIMAB-PVVR

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RITUXIMAB-PVVR (Ruxience)** requires the following rule(s) be met for renewal:

A. You have moderate to severe rheumatoid arthritis (RA: a type of joint condition)
B. You have experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
C. You will NOT use Ruxience concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
D. You meet ONE of the following:
    1. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
        a. Enbrel (etanercept)
        b. Adalimumab-ryvk/adalimumab-aaty
        c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
        d. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
    2. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

PRIOR AUTHORIZATION GUIDELINES

ROFLUMILAST - FOAM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ROFLUMILAST	ZORYVE		55119	GPI-14 (90230061003920)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of seborrheic dermatitis (ICD-10 Group L21) **AND** meet the following criterion?
   - The patient is 9 years of age or older

   If yes, continue to #2.
   If no, continue to #4.

2. Has the patient had a trial of or contraindication to **ONE** of the following preferred agents?
   - High potency topical corticosteroid (e.g., triamcinolone acetonide 0.5% cream or ointment, halobetasol propionate 0.01% lotion) or a super-high potency topical corticosteroid (e.g., fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
   - Topical antifungal (e.g., ketoconazole, ciclopirox)
   - Topical calcineurin inhibitor (e.g., tacrolimus, pimecrolimus)

   If yes, **approve for 8 weeks by GPID or GPI-14.**
   If no, continue to #3.

3. Has the patient had a prior successful treatment with roflumilast foam?

   If yes, **approve for 8 weeks by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of plaque psoriasis (ICD-10 L40.0) **AND** meet the following criterion?
   - The patient is 12 years of age or older

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ROFLUMILAST - FOAM

INITIAL CRITERIA (CONTINUED)

5. Has the patient had a trial of or contraindication to **ONE** of the following clinical standard of care agents?
   - High potency topical corticosteroid (e.g., triamcinolone acetonide 0.5% cream or ointment, halobetasol propionate 0.01% lotion) or a super-high potency topical corticosteroid (e.g., fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
   - Topical vitamin D analog (e.g., calcipotriene cream, calcitriol ointment)

   If yes, **approve for 8 weeks by GPID or GPI-14.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ROFLUMILAST - FOAM (Zoryve)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Seborrheic dermatitis (a type of skin condition)
      2. Plaque psoriasis (a type of skin condition)

   B. If you have seborrheic dermatitis, approval also requires:
      1. You are 9 years of age or older
      2. You meet ONE of the following:
         a. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
            i. High potency topical corticosteroid (such as triamcinolone acetonide 0.5% cream or ointment, halobetasol propionate 0.01% lotion) or a super-high potency topical corticosteroid (such as fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
            ii. Topical antifungal (such as ketoconazole, ciclopirox)
            iii. Topical calcineurin inhibitor (such as tacrolimus, pimecrolimus)
         b. You previously had a successful treatment with roflumilast foam

   C. If you have plaque psoriasis, approval also requires:
      1. You are 12 years of age or older
      2. You have tried or have a contraindication to (harmful for you to use) ONE of the following clinical standard of care medications:
         a. High potency topical corticosteroid (such as triamcinolone acetonide 0.5% cream or ointment, halobetasol propionate 0.01% lotion) or a super-high potency topical corticosteroid (such as fluocinonide 0.1% cream, clobetasol propionate 0.05% cream or ointment)
         b. Topical vitamin D analog (such as calcipotriene cream, calcitriol ointment)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ROMIPLOSTIM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ROMIPLOSTIM	NPLATE	35798		GPI-10 (8240506000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of immune thrombocytopenia (ITP) (ICD-10 D69.3) and meet **ONE** of the following criteria?
   - The patient is 1 to 17 years of age AND has had ITP for at least 6 months
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to ONE of the following clinical standard of care agents: a corticosteroid or IV immunoglobulin, OR had an insufficient response to a splenectomy
   - Nplate will NOT be used concurrently with other thrombopoietin receptor agonists (TPO-RAs) (e.g., Doptelet [avatrombopag], Promacta [eltrombopag], Alvaiz [eltrombopag])

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient has a platelet count of less than 30 x 10^9/L
   - The patient has a platelet count of less than 50 x 10^9/L AND a prior bleeding event

   If yes, **approve all strengths for 4 months by GPID or GPI-14 as follows:**
   - **125mcg: no quantity limit.**
   - **250mcg: #8 per 28 days.**
   - **500mcg: #8 per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ROMIPLOSTIM

INITIAL CRITERIA (CONTINUED)

4. Is the request to increase survival in a patient acutely exposed to myelosuppressive doses of radiation (Hematopoietic Syndrome of Acute Radiation Syndrome [HS-ARS])?

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ROMIPLOSTIM (Nplate)** requires the following rule(s) be met for approval:

   A. You meet ONE of the following:
      1. You have immune thrombocytopenia (ITP: a type of blood disorder)
      2. You will be using Nplate to increase survival if you have been acutely exposed to myelosuppressive doses of radiation (doses that decrease bone marrow activity)

   B. If you have immune thrombocytopenia, approval also requires:
      1. You are 1 to 17 years of age with immune thrombocytopenia (ITP: a type of blood disorder) for at least 6 months, OR you are 18 years of age or older
      2. You have tried or have a contraindication to (harmful for you to use) ONE of the following clinical standard of care medications: a corticosteroid or intravenous (injection into the vein) immunoglobulin, OR you did not have a good enough response to a splenectomy (spleen removal)
      3. You will NOT use Nplate concurrently (at the same time) with other thrombopoietin receptor agonists (TPO-RAs, such as Doptelet [avatrombopag], Promacta [eltrombopag], Alvaiz [eltrombopag])
      4. You meet ONE of the following:
         a. You have a platelet (a type of blood cell) count of less than 30 x 10^9/L
         b. You have a platelet (a type of blood cell) count of less than 50 x 10^9/L AND a prior bleeding event

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

ROMIPLOSTIM

RENEWAL CRITERIA

NOTE: If the request is to increase survival in a patient acutely exposed to myelosuppressive doses of radiation, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of immune thrombocytopenia (ITP) (ICD-10 D69.3) and meet **ALL** of the following criteria?
   - The patient has shown a clinical response to therapy, defined as having an improvement in platelet count from baseline OR a reduction in bleeding events
   - Nplate will NOT be used concurrently with other thrombopoietin receptor agonists (TPO-RAs) (e.g., Doptelet [avatrombopag], Promacta [eltrombopag], Alvaiz [eltrombopag])

   If yes, **approve all strengths for 12 months by GPID or GPI-14 as follows:**
   - **125mcg: no quantity limit.**
   - **250mcg: #8 per 28 days.**
   - **500mcg: #8 per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ROMIPLOSTIM (Nplate)** requires the following rule(s) be met for renewal:
   A. You have immune thrombocytopenia (ITP: a type of blood disorder)
   B. You have shown a clinical response to therapy, defined as having an improvement in platelet (a type of blood cell) count from baseline (before starting Nplate) OR a decrease in bleeding events
   C. You will NOT use Nplate concurrently (at the same time) with other thrombopoietin receptor agonists (TPO-RAs, such as Doptelet [avatrombopag], Promacta [eltrombopag], Alvaiz [eltrombopag])

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Nplate.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

ROMOSOZUMAB-AQQG (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ROMOSOZUMAB-AQQG	EVENITY	45681		GPI-10 (3004486010)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of postmenopausal osteoporosis and meet **ONE** of the following criteria?
   - The patient is at high risk for fractures defined as ONE of the following:
     - History of osteoporotic (i.e., fragility, low trauma) fracture(s)
     - 2 or more risk factors for fracture (e.g., history of multiple recent low trauma fractures, bone marrow density [BMD] T-score less than or equal to -2.5, corticosteroid use, or use of gonadotropin-releasing hormone [GnRH] analogs such as nafarelin, etc.)
     - No prior treatment for osteoporosis AND FRAX score greater than or equal to 20% for any major fracture OR greater than or equal to 3% for hip fracture
   - The patient is unable to use oral therapy (i.e., upper gastrointestinal [GI] problems - unable to tolerate oral medication, lower GI problems - unable to absorb oral medications, trouble remembering to take oral medications or coordinating an oral bisphosphonate with other oral medications or their daily routine)
   - The patient had an adequate trial of, intolerance to, or a contraindication to bisphosphonates (e.g., Fosamax, Actonel, Boniva)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Has the patient received a total of 12 months of Evenity therapy?

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2.34mL per month.**

ROMOSOZUMAB-AQQG (NSA)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ROMOSOZUMAB-AQQG (Evenity)** requires the following rule(s) be met for approval:

A. You have postmenopausal osteoporosis (weak and brittle bones)
B. You have not received a total of 12 months or more of Evenity therapy
C. You meet ONE of the following criteria:
   1. You are at high risk for fractures defined as ONE of the following:
      a. History of osteoporotic (fragility, low trauma) fracture(s)
      b. 2 or more risk factors for fracture such as history of multiple recent low trauma fractures, bone marrow density [BMD] T-score (measurement of how high your risk for osteoporosis is) less than or equal to -2.5, corticosteroid use, or use of gonadotropin-releasing hormone [GnRH] analogs such as nafarelin, etc.
      c. No prior treatment for osteoporosis AND FRAX score (test for your risk of fractures) greater than or equal to 20% for any major fracture OR greater than or equal to 3% for hip fracture
   2. You are unable to use oral therapy. Reasons include upper gastrointestinal [GI] problems - unable to tolerate oral medication, lower GI problems - unable to absorb oral medications, trouble remembering to take oral medications or coordinating an oral bisphosphonate with other oral medications or their daily routine
   3. You had an adequate trial of, intolerance to, or a contraindication to (medical reason why you cannot use) bisphosphonates such as Fosamax, Actonel, Boniva

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

ROPEGINTERFERON ALFA-2B-NJFT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ROPEGINTERFERON ALFA-2B-NJFT	BESREMI	47669		GPI-10 (2170007750)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of polycythemia vera (ICD-10 D45) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist or an oncologist

   If yes, **approve all formulations for 12 months by GPID or GPI-14 as follows:**
   - **500mcg/mL: #2mL per 28 days.**
   - **500mcg/0.5mL: #1mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of essential thrombocythemia (ICD-10 D47.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist or an oncologist
   - The patient had a trial of or contraindication to the clinical standard of care agent: hydroxyurea
   - The patient had a trial of or contraindication to the preferred agent: Pegasys (peginterferon alfa-2a)
   - Besremi will NOT be used concurrently with another interferon (e.g., Pegasys [peginterferon alfa-2a]) or anagrelide

   If yes, **approve all formulations for 12 months by GPID or GPI-14 as follows:**
   - **500mcg/mL: #2mL per 28 days.**
   - **500mcg/0.5mL: #1mL per 28 days.**

   If no, do not approve.

ROPEGINTERFERON ALFA-2B-NJFT

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ROPEGINTERFERON ALFA-2B-NJFT (Besremi)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Polycythemia vera (a type of blood cancer)
   2. Essential thrombocythemia (a rare type of blood cancer)

B. If you have polycythemia vera, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or an oncologist (a type of cancer doctor)

C. If you have essential thrombocythemia, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or an oncologist (a type of cancer doctor)
   3. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: hydroxyurea
   4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Pegasys (peginterferon alfa-2a)
   5. You will NOT use Besremi concurrently (at the same time) with another interferon (such as Pegasys [peginterferon alfa-2a]) or anagrelide

RATIONALE

ROSUVASTATIN

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ROSUVASTATIN (Ezallor Sprinkle)** requires the following rule(s) be met for approval:

A. You have a contraindication to (harmful for you to use) or are unable to swallow rosuvastatin oral tablets

B. Requests for zero-dollar cost share also requires the following:

1. You are between 40 to 75 years old
2. The requested quantity is within the low to moderate intensity daily dosage of 5mg to 10mg
3. You are NOT concurrently (at the same time) taking any of the following secondary prevention medications for cardiovascular disease (heart disease):
   a. Aspirin/dipyridamole (Aggrenox)
   b. Clopidogrel (Plavix)
   c. Dipyridamole
   d. Nitroglycerin (oral, sublingual, transdermal, translingual dosage forms)
   e. Prasugrel (Effient)
   f. Ticagrelor (Brilinta)
   g. Ticlopidine
   h. Vorapaxar (Zontivity)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Ezallor Sprinkle.

This guideline also applies to plans where the pharmacy benefit allows for coverage Ezallor Sprinkle at zero copay. The override criteria allow patient a zero copay by waiving the applicable cost-sharing to Ezallor Sprinkle, which is included in the MedImpact EHB Zero Dollar Copay List.

ROZANOLIXIZUMAB-NOLI

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ROZANOLIXIZUMAB-NOLI	RYSTIGGO	49035		GPI-10 (9939827055)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient has a positive serologic test for anti-acetylcholine receptor antibody (AChR-Ab+) OR anti-muscle-specific tyrosine kinase antibody (MuSK-Ab+)
   - The patient is Myasthenia Gravis Foundation of America class II, III, or IV
   - The patient had a trial of or contraindication to ONE corticosteroid (e.g., prednisone)
   - Rystiggo will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Vyvgart [efgartigimod alfa-fcab], Imaavy [nipocalimab-aahu]), complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (e.g., Uplizna [inebilizumab-cdon]) for the treatment of gMG

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO non-steroidal immunosuppressive therapies (e.g., azathioprine, cyclophosphamide, methotrexate)
   - The patient had a trial of or contraindication to ONE non-steroidal immunosuppressive therapy if on chronic plasmapheresis or plasma exchange

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #36 mL per 42 days for 3 fills.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ROZANOLIXIZUMAB-NOLI

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ROZANOLIXIZUMAB-NOLI (Rystiggo)** requires the following rule(s) be met for approval:

A. You have generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
D. You have a positive serologic test for the anti-acetylcholine receptor antibody (AChR-Ab+) OR anti-muscle-specific tyrosine kinase antibody (MuSK-Ab+) (a type of blood test that shows you have myasthenia gravis)
E. You have Myasthenia Gravis Foundation of America class II, III, or IV (types of severity of disease)
F. You have tried or have a contraindication to (harmful for you to use) ONE corticosteroid (such as prednisone)
G. You will NOT use Rystiggo concurrently (at the same time) with another neonatal Fc receptor blocker (such as Vyvgart [efgartigimod alfa-fcab], Imaavy [nipocalimab-aahu]), complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (such as Uplizna [inebilizumab-cdon]) for the treatment of generalized myasthenia gravis
H. You meet ONE of the following:
    1. You have tried or have a contraindication to (harmful for you to use) TWO non-steroidal immunosuppressive therapies (such as azathioprine, cyclophosphamide, methotrexate)
    2. You have tried or have a contraindication to ONE non-steroidal immunosuppressive therapy if you are on chronic plasmapheresis or plasma exchange (types of blood therapy)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ROZANOLIXIZUMAB-NOLI

RENEWAL CRITERIA

1. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient has had clinical benefit compared to baseline according to validated gMG instruments (e.g., Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   - Rystiggo will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Vyvgart [efgartigimod alfa-fcab], Imaavy [nipocalimab-aahu]), complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (e.g., Uplizna [inebilizumab-cdon]) for the treatment of gMG

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #36 mL per 42 days for 6 fills.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ROZANOLIXIZUMAB-NOLI (Rystiggo)** requires the following rule(s) be met for renewal:
   A. You have generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
   B. You have had clinical benefit compared to baseline (before treatment) according to validated gMG instruments (such as Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   C. You will NOT use Rystiggo concurrently (at the same time) with another neonatal Fc receptor blocker (such as Vyvgart [efgartigimod alfa-fcab], Imaavy [nipocalimab-aahu]), complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (such as Uplizna [inebilizumab-cdon]) for the treatment of generalized myasthenia gravis

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RUCAPARIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RUCAPARIB CAMSYLATE	RUBRACA	44002		GPI-10 (2153557020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of recurrent epithelial ovarian (ICD-10 Groups C56, C79.6), fallopian tube (ICD-10 Group C57.0), or primary peritoneal cancer (ICD-10 Group C48), and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has a deleterious BRCA mutation (germline and/or somatic)
   - The patient is in complete or partial response to platinum-based chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic castration-resistant prostate cancer (mCRPC) (ICD-10 Z19.2 and C61) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has a deleterious BRCA mutation (germline and/or somatic) based on an FDA-approved companion diagnostic for Rubraca
   - The patient has been treated with an androgen receptor-directed therapy

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient previously had a bilateral orchiectomy
   - The patient has a castrate level of testosterone (i.e., < 50 ng/dL)
   - The requested medication will be used concurrently with a gonadotropin-releasing hormone (GnRH) analog (e.g., leuprolide, goserelin, histrelin)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

RUCAPARIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RUCAPARIB (Rubraca)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer (types of reproductive system cancers that has returned)
   2. Metastatic castration-resistant prostate cancer (mCRPC: prostate cancer that has spread to other parts of the body and no longer responds to testosterone lowering treatment)

B. If you have recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer has a deleterious BRCA mutation (germline and/or somatic) (a type of gene mutation that is passed on from parent to child and/or acquired during life)
   3. You are in complete or partial response to platinum-based chemotherapy (a type of therapy to treat cancer)

C. If you have metastatic castration-resistant prostate cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer has a deleterious BRCA mutation (germline and/or somatic) (a type of gene mutation that is passed on from parent to child and/or acquired during life) based on a Food and Drug Administration (FDA)-approved companion diagnostic for Rubraca
   3. You have been treated with an androgen receptor-directed therapy (type of therapy to treat cancer)
   4. You meet ONE of the following:
      a. You previously received a bilateral orchiectomy (removal of both testicles)
      b. You have a castrate level of testosterone (blood testosterone levels are less than 50 ng/dL)
      c. Rubraca will be used concurrently (at the same time) with a gonadotropin-releasing hormone (GnRH) analog (such as leuprolide, goserelin, histrelin)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

RUXOLITINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RUXOLITINIB PHOSPHATE	JAKAFI, JAKAFI XR	38202		GPI-10 (2153756020)	ROUTE ≠ TOPICAL

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of intermediate or high-risk myelofibrosis (ICD-10 D75.81), including primary myelofibrosis (ICD-10 D47.1), post-polycythemia vera myelofibrosis, or post-essential thrombocythemia myelofibrosis, **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, continue to #4.

2. Is the request for Jakafi?

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of Jakafi.**
   If no, continue to #3.

3. Is the request for Jakafi XR **AND** the patient had a trial of or contraindication to the preferred agent: Jakafi?

   If yes, **approve for 6 months by GPID for all strengths of Jakafi XR or by GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of polycythemia vera (ICD-10 D45) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to the clinical standard of care agent: hydroxyurea

   If yes, continue to #7.
   If no, continue to #5.

5. Does the patient have a diagnosis of steroid-refractory acute graft-versus-host disease (ICD-10 D89.810, D89.812) **AND** meet the following criterion?
   - The patient is 12 years of age or older

   If yes, continue to #7.
   If no, continue to #6.

RUXOLITINIB

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of chronic graft-versus-host disease (cGVHD) (ICD-10 D89.811, D89.812) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient has failed at least ONE line of systemic therapy (e.g., prednisone, methotrexate, mycophenolate mofetil)
   - The requested medication will NOT be used concurrently with Rezurock (belumosudil), Niktimvo (axatilimab-csfr), or Imbruvica (ibrutinib)

   If yes, continue to #7.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Is the request for Jakafi?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of Jakafi.**
   If no, continue to #8.

8. Is the request for Jakafi XR **AND** the patient had a trial of or contraindication to the preferred agent: Jakafi?

   If yes, **approve for 12 months by GPID for all strengths of Jakafi XR or by GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RUXOLITINIB (Jakafi, Jakafi XR)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Intermediate or high-risk myelofibrosis, which includes primary myelofibrosis, post-polycythemia vera myelofibrosis, or post-essential thrombocythemia myelofibrosis (types of blood cancer)
      2. Polycythemia vera (a type of blood cancer)
      3. Steroid-refractory acute graft-versus-host disease (a type of short-term immune disorder that did not respond to a type of treatment)
      4. Chronic graft-versus-host disease (a type of long-term immune disorder)

   (Initial denial text continued on next page)

RUXOLITINIB

INITIAL CRITERIA (CONTINUED)

B. If you have intermediate or high-risk myelofibrosis, which includes primary myelofibrosis, post-polycythemia vera myelofibrosis, or post-essential thrombocythemia myelofibrosis, approval also requires:
1. You are 18 years of age or older
2. If the request is for Jakafi XR (extended-release), approval also requires you have tried or have a contraindication to (harmful for you to use) the preferred medication: Jakafi (immediate release)

C. If you have polycythemia vera, approval also requires:
1. You are 18 years of age or older
2. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: hydroxyurea
3. If the request is for Jakafi XR (extended-release), approval also requires you have tried or have a contraindication to (harmful for you to use) the preferred medication: Jakafi (immediate release)

D. If you have steroid-refractory acute graft-versus-host disease, approval also requires:
1. You are 12 years of age or older
2. If the request is for Jakafi XR (extended-release), approval also requires you have tried or have a contraindication to (harmful for you to use) the preferred medication: Jakafi (immediate release)

E. If you have chronic graft-versus-host disease, approval also requires:
1. You are 12 years of age or older
2. You have failed at least ONE line of systemic therapy (treatment that targets the entire body, such as prednisone, methotrexate, mycophenolate mofetil)
3. You will NOT use the requested medication concurrently (at the same time) with Rezurock (belumosudil), Niktimvo (axatilimab-csfr), or Imbruvica (ibrutinib)
4. If the request is for Jakafi XR (extended-release), approval also requires you have tried or have a contraindication to (harmful for you to use) the preferred medication: Jakafi (immediate release)

RUXOLITINIB

RENEWAL CRITERIA

NOTE: For the diagnoses of polycythemia vera, steroid-refractory acute graft-versus-host disease, or chronic graft-versus-host disease, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of intermediate or high-risk myelofibrosis (ICD-10 D75.81), including primary myelofibrosis (ICD-10 D47.1), post-polycythemia vera myelofibrosis, or post-essential thrombocythemia myelofibrosis?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient shown symptom improvement by meeting **ONE** of the following criteria?
   - The patient has had at least a 50% reduction in total symptom score (e.g., Myeloproliferative Neoplasm Symptom Assessment Form Total Symptom Score [MPN-SAF TSS], modified Myelofibrosis Symptom Assessment Form [MFSAF] v2.0)
   - The patient has had at least a 50% reduction in palpable spleen length
   - The patient has had a spleen volume reduction of at least 35% from baseline

   If yes, **approve for 12 months by GPID for all strengths of Jakafi or Jakafi XR or by GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RUXOLITINIB (Jakafi, Jakafi XR)** requires the following rule(s) be met for renewal:
   A. You have intermediate or high-risk myelofibrosis, which includes primary myelofibrosis, post-polycythemia vera myelofibrosis, or post-essential thrombocythemia myelofibrosis (types of blood cancer)
   B. You have shown symptom improvement by meeting ONE of the following:
      1. You have had at least a 50% reduction in total symptom score (such as Myeloproliferative Neoplasm Symptom Assessment Form Total Symptom Score [MPN-SAF TSS], modified Myelofibrosis Symptom Assessment Form [MFSAF] v2.0)
      2. You have had at least a 50% reduction in palpable (can be felt by external examination) spleen length
      3. You have had a spleen volume reduction of at least 35% from baseline (before treatment)

PRIOR AUTHORIZATION GUIDELINES

RUXOLITINIB TOPICAL

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
RUXOLITINIB PHOSPHATE	OPZELURA	38202		GPI-10 (9027206050)	ROUTE ≠ ORAL

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of mild to moderate atopic dermatitis (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient is NOT immunocompromised

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to the clinical standard of care agent: a topical corticosteroid (e.g., halobetasol, triamcinolone, fluocinonide)
   - The patient had a trial of or contraindication to the preferred agent: a topical non-steroidal immunomodulating agent (e.g., Elidel [pimecrolimus], Protopic [tacrolimus])

   If yes, **approve for 3 months by GPID or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of nonsegmental vitiligo (ICD-10 L80) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient has depigmented areas covering 10% or less of total body surface area (BSA)
   - The patient had a trial of or contraindication to ONE of the following clinical standard of care agents: a topical corticosteroid (e.g., halobetasol, triamcinolone, fluocinonide) OR a topical calcineurin inhibitor (e.g., Elidel [pimecrolimus], Protopic [tacrolimus])

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

RUXOLITINIB TOPICAL

INITIAL CRITERIA (CONTINUED)

4. Will Opzelura be used concurrently with **ANY** of the following?
   - Other non-steroid topicals (e.g., calcineurin inhibitors [e.g., Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 inhibitors [e.g., Eucrisa (crisaborole), Zoryve (roflumilast)])
   - Systemic therapeutic biologics (e.g., Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   - Other JAK inhibitors (e.g., Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   - Potent immunosuppressants (e.g., azathioprine, cyclosporine)

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, **approve for 6 months by GPID or GPI-10.**

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **RUXOLITINIB TOPICAL (Opzelura)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Mild to moderate atopic dermatitis (a type of skin condition)
      2. Nonsegmental vitiligo (a type of skin condition)
   B. If you have mild to moderate atopic dermatitis, approval also requires:
      1. You are 2 years of age or older
      2. You are NOT immunocompromised (weak immune system)
      3. You meet ONE of the following:
         a. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: a topical corticosteroid (such as halobetasol, triamcinolone, fluocinonide)
         b. You have tried or have a contraindication to (harmful for you to use) the preferred medication: a topical non-steroidal immunomodulating medication (such as Elidel [pimecrolimus], Protopic [tacrolimus])

   (Initial denial text continued on the next page)

RUXOLITINIB TOPICAL

INITIAL CRITERIA (CONTINUED)

C. If you have nonsegmental vitiligo, approval also requires:

1. You are 12 years of age or older
2. You have depigmented (lightening of the skin) areas covering 10% or less of your total body surface area (BSA)
3. You have tried or have a contraindication to (harmful for you to use) ONE of the following clinical standard of care medications: a topical corticosteroid (such as halobetasol, triamcinolone, fluocinonide) or a topical calcineurin inhibitor (such as Elidel [pimecrolimus], Protopic [tacrolimus])
4. You will NOT use Opzelura concurrently (at the same time) with ANY of the following:
   a. Other non-steroidal topicals (such as calcineurin inhibitors [such as Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 [phosphodiesterase-4] inhibitors [such as Eucrisa (crisaborole), Zoryve (roflumilast)])
   b. Systemic therapeutic biologics (such as Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
   c. Other JAK (Janus kinase) inhibitors (such as Rinvoq [upadacitinib], Cibinqo [abrocitinib])
   d. Potent immunosuppressants (such as azathioprine, cyclosporine)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RUXOLITINIB TOPICAL

RENEWAL CRITERIA

1. Does the patient have a diagnosis of mild to moderate atopic dermatitis (ICD-10 Group L20) **AND** meet the following criterion?
- The patient has experienced or maintained improvement in pruritus, relapsing-remitting dermatitis, or facial/interdigital involvement

If yes, **approve for 12 months by GPID or GPI-10**.
If no, continue to #2.

2. Does the patient have a diagnosis of nonsegmental vitiligo (ICD-10 L80) **AND** meet the following criterion?
- The patient has experienced or maintained clinically meaningful repigmentation

If yes, continue to #3.
If no, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Will Opzelura be used concurrently with **ANY** of the following?
- Other non-steroid topicals (e.g., calcineurin inhibitors [e.g., Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 inhibitors [e.g., Eucrisa (crisaborole), Zoryve (roflumilast)])
- Systemic therapeutic biologics (e.g., Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
- Other JAK inhibitors (e.g., Rinvoq [upadacitinib], Cibinqo [abrocitinib])
- Potent immunosuppressants (e.g., azathioprine, cyclosporine)

If yes, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

If no, **approve for 12 months by GPID or GPI-10.**

RUXOLITINIB TOPICAL

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **RUXOLITINIB TOPICAL (Opzelura)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Mild to moderate atopic dermatitis (a type of skin condition)
   2. Nonsegmental vitiligo (a type of skin condition)

B. If you have mild to moderate atopic dermatitis, renewal also requires:
   1. You have experienced or maintained improvement in pruritus (itchiness), relapsing-remitting dermatitis (a type of skin condition that returns and goes away), or facial/interdigital (between the fingers or toes) involvement

C. If you have nonsegmental vitiligo, renewal also requires:
   1. You have experienced or maintained clinically meaningful repigmentation (recoloration of the skin after loss in color)
   2. You will NOT use Opzelura concurrently (at the same time) with ANY of the following:
      a. Other non-steroidal topicals (such as calcineurin inhibitors [such as Elidel (pimecrolimus), Protopic (tacrolimus)], PDE-4 [phosphodiesterase-4] inhibitors [such as Eucrisa (crisaborole), Zoryve (roflumilast)])
      b. Systemic therapeutic biologics (such as Dupixent [dupilumab], Adbry [tralokinumab-ldrm])
      c. Other JAK (Janus kinase) inhibitors (such as Rinvoq [upadacitinib], Cibinqo [abrocitinib])
      d. Potent immunosuppressants (such as azathioprine, cyclosporine)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

PRIOR AUTHORIZATION GUIDELINES

SACITUZUMAB GOVITECAN-HZIY

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SACITUZUMAB GOVITECAN-HZIY	TRODELVY	46478		GPI-10 (2155106540)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable locally advanced or metastatic breast cancer (ICD-10 Group C50)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient's cancer triple-negative and the patient meets **ONE** of the following criteria?
   - The patient is not a candidate for programmed death receptor-1 (PD-1) or programmed death-ligand 1 (PD-L1) inhibitor based therapy
   - Trodelvy will be used in combination with Keytruda (pembrolizumab) or Keytruda Qlex (pembrolizumab and berahyaluronidase alfa-pmph), AND the patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 10], as determined by an FDA-authorized test
   - The patient has received two or more prior systemic therapies (e.g., docetaxel, paclitaxel), at least one of them for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Is the patient's cancer hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative (IHC 0, IHC 1+ or IHC 2+/ISH-) and the patient meets **ALL** of the following criteria?
   - The patient has received endocrine-based therapy (e.g., tamoxifen, Arimidex [anastrozole])
   - The patient has received at least two additional systemic therapies (e.g., Enhertu [fam-trastuzumab deruxtecan-nxki], Talzenna [talazoparib]) in the metastatic setting

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

SACITUZUMAB GOVITECAN-HZIY

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: Our guideline named **SACITUZUMAB GOVITECAN-HZIY (Trodelvy)** requires the following rule(s) be met for approval:

A. You have unresectable locally advanced or metastatic breast cancer (a type of breast cancer that cannot be surgically removed and has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
B. You meet ONE of the following:
    1. Your breast cancer is triple negative (TNBC: a type of breast cancer that does not have three receptors); AND you are not a candidate for programmed death receptor-1 (PD-1) or programmed death-ligand 1 (PD-L1) inhibitor based therapy (a type of cancer treatment)
    2. Your breast cancer is triple negative (TNBC: a type of breast cancer that does not have three receptors); Trodelvy will be used in combination with Keytruda (pembrolizumab) or Keytruda Qlex (pembrolizumab and berahyaluronidase alfa-pmph); AND your tumor has programmed death-ligand 1 (PD-L1: a type of protein) [Combined Positive Score (CPS) of at least 10], as determined by a Food and Drug Administration (FDA)-authorized test
    3. Your breast cancer is triple negative (TNBC: a type of breast cancer that does not have three receptors); AND you have tried two or more previous systemic therapies (treatment that targets the entire body such as docetaxel, paclitaxel), at least one of them for metastatic disease (disease that has spread to other parts of the body)
    4. Your breast cancer is hormone receptor (HR: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative (IHC 0, IHC 1+ or IHC 2+/ISH- [a type of lab test]); you have received endocrine (hormone)-based therapy (such as tamoxifen, Arimidex [anastrozole]); AND you have received at least two additional systemic therapies (treatment that targets the entire body such as Enhertu [fam-trastuzumab deruxtecan-nxki], Talzenna [talazoparib]) in the metastatic setting (disease has spread to other parts of the body)

SACROSIDASE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SACROSIDASE	SUCRAID	18554		GPI-10 (5120006000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of sucrase deficiency, which is part of congenital sucrase-isomaltase deficiency (CSID) (ICD-10 E74.31), and meet **ALL** of the following criteria?
   - The patient is 5 months of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist or medical geneticist
   - The patient has tried to manage CSID by adhering to a sucrose-free/low sucrose diet
   - The patient is experiencing symptoms, such as frequent watery diarrhea, abdominal pain/cramping, bloating, gas, dyspepsia, failure to thrive, weight loss, nausea and vomiting
   - The patient/caregiver will adhere to any necessary diet restrictions while on Sucraid

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See initial denial text at the end of the guideline.

2. Is the patient's diagnosis confirmed by **ONE** of the following?
   - Small bowel biopsy
   - Sucrose breath test
   - Genetic test

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SACROSIDASE (Sucraid)** requires the following rule be met for approval:
   A. You have sucrase deficiency, which is part of congenital sucrase-isomaltase deficiency (a type of genetic digestive condition)
   B. You are 5 months of age or older
   C. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions) or medical geneticist (doctor who treats gene disorders)
   D. You have tried to manage CSID (congenital sucrase-isomaltase deficiency: a type of genetic digestive condition) by keeping up with a sucrose-free/low sucrose diet (a type of diet)

   (Initial denial text continued on next page)

SARGRAMOSTIM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SARGRAMOSTIM	LEUKINE	06074		GPI-10 (8240205000)	

GUIDELINES FOR USE

1. Is therapy prescribed by or in consultation with a hematologist or oncologist?

   If yes, **approve by HICL or GPI-10 for 3 months or requested duration of treatment up to 1 year.**

   If no, continue to #2.

2. Has the patient undergone or is undergoing induction chemotherapy for acute myeloid leukemia (AML) (ICD-10 Group C92.0) **AND** meet the following criterion?
   - The patient is 55 years of age or older

   If yes, **approve by HICL or GPI-10 for 3 months or requested duration of treatment up to 1 year.**

   If no, continue to #3.

3. Is the patient undergoing autologous hematopoietic stem cell transplantation and meet **ALL** of the following criterion?
   - The patient has cancer
   - The patient is 18 years of age or older

   If yes, **approve by HICL or GPI-10 for 3 months or requested duration of treatment up to 1 year.**

   If no, continue to #4.

4. Has the patient undergone or is undergoing autologous peripheral blood progenitor cell (PBPC) or bone marrow transplantation and meet **ALL** of the following criteria?
   - The patient has non-Hodgkin's lymphoma (NHL) (ICD-10 Group C85), acute lymphoblastic leukemia (ALL) (ICD-10 Group C91.0), or Hodgkin's lymphoma (HL) (ICD-10 Group C81)
   - The patient is 2 years of age or older

   If yes, **approve by HICL or GPI-10 for 3 months or requested duration of treatment up to 1 year.**

   If no, continue to #5.

SARGRAMOSTIM

GUIDELINES FOR USE (CONTINUED)

5. Is the patient undergoing allogeneic bone marrow transplantation from an HLA-matched related donor **AND** meet the following criterion?
   - The patient is 2 years of age or older

   If yes, **approve by HICL or GPI-10 for 3 months or requested duration of treatment up to 1 year.**

   If no, continue to #6.

6. Has the patient undergone allogeneic or autologous bone marrow transplantation and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient's neutrophil recovery is delayed or has failed

   If yes, **approve by HICL or GPI-10 for 3 months or requested duration of treatment up to 1 year.**

   If no, continue to #7.

7. Is the patient acutely exposed to myelosuppressive doses of radiation (Hematopoietic Syndrome of Acute Radiation Syndrome [H-ARS])?

   If yes, **approve by HICL or GPI-10 for 3 months or requested duration of treatment up to 1 year.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

SARGRAMOSTIM

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SARGRAMOSTIM (Leukine)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
   2. You have undergone or are undergoing induction chemotherapy (you are starting cancer treatment or receiving treatment following initial therapy) for acute myeloid leukemia (AML: type of blood cancer) AND you are 55 years of age or older
   3. You are undergoing autologous hematopoietic stem cell transplantation (a type of procedure to replace damaged bone marrow with your own health blood-forming cells) for cancer AND you are 18 years of age or older
   4. You have undergone or are undergoing autologous peripheral blood progenitor cell or bone marrow transplantation (procedures to get healthy blood-forming cells) for non-Hodgkin's lymphoma (NHL: a type of blood cancer), acute lymphoblastic leukemia (ALL: type of blood cancer), or Hodgkin's lymphoma (a type of blood cancer), AND you are 2 years of age or older
   5. You are undergoing allogeneic bone marrow transplantation from human leukocyte antigen (HLA: a type of protein)-matched related donor (a type of procedure to get healthy blood-forming cells) AND you are 2 years of age or older
   6. You have undergone allogeneic or autologous bone marrow transplantation (procedure to get healthy blood-forming cells), your neutrophil (a type of white blood cell) recovery is delayed or has failed, AND you are 2 years of age or older
   7. You are acutely exposed to myelosuppressive doses (doses that suppress bone marrow activity) of radiation (Hematopoietic Syndrome of Acute Radiation Syndrome [H-ARS: an illness that happens after whole body radiation])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

SARILUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SARILUMAB	KEVZARA	44183		GPI-10 (6650006000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Kevzara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2.28mL per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SARILUMAB

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of polymyalgia rheumatica (PMR) (ICD-10 M35.3) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient had an inadequate response to corticosteroids (e.g., prednisone) or cannot tolerate a corticosteroid taper
- Kevzara will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PMR

If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2.28mL per 28 days.**

If no, continue to #4.

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
- The patient weighs at least 63 kg (138 lbs)
- Therapy is prescribed by or in consultation with a rheumatologist
- Kevzara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pJIA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Adalimumab-ryvk/adalimumab-aaty
  - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2.28mL per 28 days.**
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

SARILUMAB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SARILUMAB (Kevzara)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Polymyalgia rheumatica (PMR: an inflammatory disorder causing muscle pain and stiffness)
   3. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You will NOT use Kevzara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   4. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease modifying anti-rheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   5. You meet ONE of the following:
      a. You have tried or have a contraindication to TWO of the following preferred medications:
         i. Enbrel (etanercept)
         ii. Adalimumab-ryvk/adalimumab-aaty
         iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
         iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      b. You have tried a TNF inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated you cannot use a JAK inhibitor (Janus kinase inhibitor such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

(Initial denial text continued on next page)

SARILUMAB

INITIAL CRITERIA (CONTINUED)

C. If you have polymyalgia rheumatica, approval also requires:
1. You are 18 years of age or older
2. You had an inadequate response (drug did not work) to corticosteroids (such as prednisone) or cannot tolerate a corticosteroid taper
3. You will NOT use Kevzara concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polymyalgia rheumatica (an inflammatory disorder causing muscle pain and stiffness)

D. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You weigh at least 63 kilograms (138 pounds)
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Kevzara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

SARILUMAB

RENEWAL CRITERIA

NOTE: For the diagnosis of polymyalgia rheumatica (PMR), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
   - Kevzara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2.28mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SARILUMAB

RENEWAL CRITERIA (CONTINUED)

3. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a TNF inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated you cannot use a JAK inhibitor (Janus kinase inhibitor such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

C. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:

1. You have experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Kevzara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

SATRALIZUMAB-MWGE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SATRALIZUMAB-MWGE	ENSPRYNG	46781		GPI-10 (9940507040)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist or ophthalmologist
   - The patient has a positive serologic test for anti-aquaporin-4 (AQP4) antibodies
   - Enspryng will NOT be used concurrently with another NMOSD agent (e.g., Rituxan [rituximab], Uplizna [inebilizumab-cdon], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient have at least **ONE** of the following core clinical characteristics?
   - Optic neuritis
   - Acute myelitis
   - Area postrema syndrome
   - Acute brainstem syndrome
   - Symptomatic narcolepsy or acute diencephalic clinical syndrome with NMOSD-typical diencephalic MRI lesions
   - Symptomatic cerebral syndrome with NMOSD-typical brain lesions

   If yes, **approve for a total of 12 months by HICL or GPI-10 as follows:**
   - **FIRST APPROVAL: Approve for 1 month with a quantity limit of #2mL per 28 days.**
   - **SECOND APPROVAL: Approve for 11 months with a quantity limit of #1mL per 28 days (enter a start date 2 days BEFORE the end date of the first approval).**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SATRALIZUMAB-MWGE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SATRALIZUMAB-MWGE (Enspryng)** requires the following rule(s) be met for approval:

A. You have neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor) or ophthalmologist (a type of eye doctor)
D. You have a positive serologic (blood) test for anti-aquaporin-4 (AQP4: a type of protein) antibodies
E. You will NOT use Enspryng concurrently (at the same time) with another NMOSD medication (such as Rituxan [rituximab], Uplizna [inebilizumab-cdon], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])
F. You have at least ONE of the following core clinical characteristics:
    1. Optic neuritis (a type of brain disorder)
    2. Acute myelitis (a type of brain disorder)
    3. Area postrema syndrome (a type of brain disorder)
    4. Acute brainstem syndrome (a type of brain disorder)
    5. Symptomatic narcolepsy (a type of sleep condition) or acute diencephalic clinical syndrome (tumor in a part of the brain) with NMOSD-typical diencephalic magnetic resonance imaging (MRI: a type of imaging lab) lesions (affected areas)
    6. Symptomatic cerebral syndrome with NMOSD-typical brain lesions

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

SATRALIZUMAB-MWGE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient had a reduction in relapse frequency from baseline
   - Enspryng will NOT be used concurrently with another NMOSD agent (e.g., Rituxan [rituximab], Uplizna [inebilizumab-cdon], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 28 days.** If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SATRALIZUMAB-MWGE (Enspryng)** requires the following rule(s) be met for renewal:
   A. You have neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)
   B. You have experienced a reduction in relapse frequency from baseline (before treatment)
   C. You will NOT use Enspryng concurrently (at the same time) with another NMOSD medication (such as Rituxan [rituximab], Uplizna [inebilizumab-cdon], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Enspryng.

SEBELIPASE ALFA (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SEBELIPASE ALFA	KANUMA	42747		GPI-10 (3090636000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Therapy is prescribed by or given in consultation with an endocrinologist, hepatologist, gastroenterologist, medical geneticist, or lipidologist?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient have a diagnosis of rapidly progressive lysosomal acid lipase (LAL) deficiency presenting within the first 6 months of life (also known as Wolman Disease), as confirmed by the presence of clinical features (e.g., hepatomegaly, elevated serum transaminases, dyslipidemia, splenomegaly) and meets **ONE** of the following criteria?
   - A blood test indicating low or absent levels of LAL enzyme activity
   - A dried blood spot test indicating low or absent LAL enzyme activity
   - A genetic test indicating the bi-allelic presence of altered LIPA gene(s)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

SEBELIPASE ALFA (NSA)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of lysosomal acid lipase (LAL) deficiency presenting after the first 6 months of life and not considered rapidly progressive (also known as cholesteryl ester storage disease (CESD)), as confirmed by the presence of clinical features (e.g., hepatomegaly, elevated serum transaminases, dyslipidemia, splenomegaly) and meets **ONE** of the following criteria?
   - A blood test indicating low or absent levels of LAL enzyme activity
   - A dried blood spot test indicating low or absent LAL enzyme activity
   - A genetic test indicating the bi-allelic presence of altered LIPA gene(s)

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT: Renewal requires the patient has a documented improvement in ONE of the following clinical parameters associated with lysosomal acid lipase (LAL) deficiency while on therapy with Kanuma:
   - A relative reduction from baseline in any one of the following lipid levels (LDL-c, non-HDL-c, or triglycerides).
   - Normalization of aspartate aminotransferase (AST) based on age- and gender-specific normal ranges.
   - A decrease in liver fat content compared to baseline assessed by abdominal imaging (e.g., multi-echo gradient echo [MEGE] MRI).

   Any one of the following baseline measurements will be required to assess renewal criteria: lipids (LDL-c, Non-HDL-c, or triglycerides), aspartate aminotransferase (AST), or MEGE MRI.

   If no, do not approve.
   INTIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SEBELIPASE ALFA (Kanuma)** requires the following rule(s) be met for approval:
   A. You have lysosomal acid lipase (LAL) deficiency (inherited condition where your body cannot breakdown and use fats and cholesterol), as confirmed by the presence of clinical features such as hepatomegaly (enlarged liver), elevated serum transaminases (types of enzymes), dyslipidemia (abnormal levels of fats), splenomegaly (enlarge spleen)
   B. The medication is prescribed by or given in consultation with an endocrinologist (hormone doctor), hepatologist (liver specialist), gastroenterologist (digestive system doctor), medical geneticist, or lipidologist (cholesterol management specialist)
   (Initial denial text continued on next page)

SEBELIPASE ALFA (NSA)

INITIAL CRITERIA (CONTINUED)

C. You meet ONE of the following:
   1. A blood test indicating low or absent levels of lysosomal acid lipase enzyme activity
   2. A dried blood spot test indicating low or absent lysosomal acid lipase enzyme activity
   3. A genetic test indicating the bi-allelic presence of altered LIPA gene(s) (you have a change in a gene that provides instructions for producing an enzyme called lysosomal acid lipase)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RENEWAL CRITERIA

1. Does the patient have a diagnosis of lysosomal acid lipase (LAL) deficiency presenting after the first 6 months of life and not considered rapidly progressive?

   If yes, continue to #2.
   If no, do not approve.
   RENEWAL DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient have documented improvement in **ONE** of the following clinical parameters associated with lysosomal acid lipase (LAL) deficiency during the past 6 months?
   - A relative reduction from baseline in any one of the following lipid levels (LDL-c, Non-HDL-c, or triglycerides)
   - Normalization of aspartate aminotransferase (AST) based on age- and gender-specific normal ranges
   - A decrease in liver fat content compared to baseline assessed by abdominal imaging (e.g., multi-echo gradient echo [MEGE] MRI)

   If yes, **approve for all requested strengths for 12 months by HICL or GPI-10.**
   If no, do not approve.
   RENEWAL DENIAL TEXT: See the denial text at the end of the guideline.

SEBETRALSTAT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SEBETRALSTAT	EKTERLY	50678		GPI-10 (8584005000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?
- The patient is 12 years of age or older
- Ekterly will be used for the treatment of acute attacks of hereditary angioedema
- Therapy is prescribed by or in consultation with an allergist, immunologist, hematologist, or pulmonologist
- Ekterly will NOT be used concurrently with other agents used for the treatment of acute HAE attacks (e.g., Firazyr [icatibant], Berinert [C1 esterase inhibitor], Ruconest [C1 esterase inhibitor], Kalbitor [ecallantide])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient have Type I or II HAE **AND** meet the following criterion?
- The diagnosis is confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q

If yes, **approve for 12 months by HICL or GPI-10.**
If no, continue to #3.

3. Does the patient have HAE-nC1INH (Type III HAE) as confirmed by **ALL** of the following criteria?
- The patient has recurrent, non-urticarial angioedema involving the skin, gastrointestinal tract, or airway, consistent with bradykinin-mediated HAE AND the attacks cannot be explained by histaminergic/urticarial angioedema
- Other causes of angioedema have been excluded, including ACE-inhibitor/ARB-associated angioedema, acquired C1-INH deficiency, and mast-cell/histaminergic angioedema

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

SEBETRALSTAT

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SEBETRALSTAT (Ekterly)** requires the following rule(s) be met for approval:

A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
B. You are 12 years of age or older
C. Ekterly will be used for the treatment of acute (sudden and severe) attacks of hereditary angioedema (HAE: a type of gene condition with severe body swelling)
D. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), immunologist (a type of immune system doctor), hematologist (a type of blood doctor), or pulmonologist (lung/breathing doctor)
E. You will NOT use Ekterly concurrently (at the same time) with other medications used for the treatment of acute (sudden and severe) hereditary angioedema (HAE: a type of gene condition with severe body swelling) attacks (such as Firazyr [icatibant], Berinert [C1 esterase inhibitor], Ruconest [C1 esterase inhibitor], Kalbitor [ecallantide])
F. You meet ONE of the following:
    1. You have Type I or II hereditary angioedema (a type of gene condition with severe body swelling), as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q (types of lab tests)
    2. You have HAE-nC1INH (hereditary angioedema with normal C1 inhibitor) (Type III hereditary angioedema) (a type of gene condition with severe body swelling) as confirmed by ALL of the following:
        a. You have recurrent (condition continues to return), non-urticarial angioedema (a type of swelling without hives) involving the skin, gastrointestinal tract, or airway, consistent with bradykinin-mediated hereditary angioedema (a type of gene condition with severe body swelling) AND the attacks cannot be explained by histaminergic/urticarial angioedema (a type of swelling due to an allergic reaction)
        b. Other causes of angioedema (a type of swelling) have been ruled out, including angiotensin-converting enzyme (ACE)-inhibitor/angiotensin receptor blocker (ARB)-associated angioedema (a type of swelling due to types of medications), acquired C1-INH deficiency (a type of condition that causes swelling), and mast-cell/histaminergic angioedema (a type of swelling due to an allergic reaction)

SEBETRALSTAT

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?

- The patient has experienced a reduction in the severity or duration of HAE attacks
- Ekterly will NOT be used concurrently with other agents used for the treatment of acute HAE attacks (e.g., Firazyr [icatibant], Berinert [C1 esterase inhibitor], Ruconest [C1 esterase inhibitor], Kalbitor [ecallantide])

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SEBETRALSTAT (Ekterly)** requires the following rule(s) be met for renewal:

A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
B. You have experienced a reduction (decrease) in the severity or duration of hereditary angioedema (HAE: a type of gene condition with severe body swelling) attacks
C. You will NOT use Ekterly concurrently (at the same time) with other medications used for the treatment of acute (sudden and severe) hereditary angioedema (HAE: a type of gene condition with severe body swelling) attacks (such as Firazyr [icatibant], Berinert [C1 esterase inhibitor], Ruconest [C1 esterase inhibitor], Kalbitor [ecallantide])

SECUKINUMAB	COSENTYX	41715		GPI-10 (9025057500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3 percent or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, genital area, face, or scalp
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
   - The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SECUKINUMAB

INITIAL CRITERIA (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 11 years of age AND had a trial of or contraindication to FOUR of the following preferred agents: Enbrel (etanercept), Skyrizi (risankizumab-rzaa), Taltz (ixekizumab), Tremfya (guselkumab), Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba), Otezla (apremilast)
   - The patient is 12 to 17 years of age AND had a trial of or contraindication to FOUR of the following preferred agents: Enbrel (etanercept), Skyrizi (risankizumab-rzaa), Taltz (ixekizumab), Tremfya (guselkumab), Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba), Otezla (apremilast), Icotyde (icotrokinra)
   - The patient is 18 years of age or older AND had a trial of or contraindication to FOUR of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Tremfya (guselkumab)
     - Skyrizi (risankizumab-rzaa)
     - Enbrel (etanercept)
     - Otezla (apremilast)
     - Taltz (ixekizumab)
     - Sotyktu (deucravacitinib)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Icotyde (icotrokinra)

     [**NOTE**: Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 6 months by GPID or GPI-14 for all formulations of the following strengths:**
     - **75mg/0.5mL: #0.5mL per 28 days.**
     - **150mg/mL: #1mL per 28 days.**
     - **300mg/2mL: #2mL per 28 days.**

     (Please enter a 1 month approval by GPID or GPI-14 for all formulations of the following strengths:
     - **75mg/0.5mL: #2mL per 28 days.**
     - **150mg/mL: #4mL per 28 days.**
     - **300mg/2mL: #8mL per 28 days.)**

     If no, do not approve.
     DENIAL TEXT: See the initial denial text at the end of the guideline.

SECUKINUMAB

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, continue to #5.
If no, continue to #7.

5. Does the patient meet **ONE** of the following criteria?
- The patient is 2 to 5 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
  - Enbrel (etanercept)
  - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Enbrel])
- The patient is 6 to 17 years of age AND had a trial of or contraindication to THREE of the following preferred agents:
  - Enbrel (etanercept)
  - Otezla (apremilast)
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Enbrel])

[**NOTE**: Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve for 6 months by GPID or GPI-14 for all formulations of the following strengths:**
- **75mg/0.5mL: #0.5mL per 28 days.**
- **150mg/mL: #1mL per 28 days.**

(Please enter a 1 month approval by GPID or GPI-14 for all formulations of the following strengths:
- **75mg/0.5mL: #2mL per 28 days.**
- **150mg/mL: #4mL per 28 days.)**

If no, continue to #6.

SECUKINUMAB

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)

   If yes, continue to #8.
   If no, continue to #9.

8. Does the patient meet **ONE** of the following criteria?
   - The patient is 12 to 17 years of age
   - The patient is 18 years of age or older AND had a trial of or contraindication to THREE of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by GPID or GPI-14 for all formulations of the following strengths:**
   - **75mg/0.5mL: #0.5mL per 28 days.**
   - **150mg/mL: #1mL per 28 days.**
   - **300mg/2mL: #2mL per 28 days.**
   - **125mg/5mL: #15mL per 28 days.**

   (Please enter a 1 month approval by GPID or GPI-14 for all formulations of the following strengths:
   - **75mg/0.5mL: #2mL per 28 days.**
   - **150mg/mL: #4mL per 28 days.**
   - **125mg/5mL: #1 fill count [NOTE: Enter a Min Day Supply of 28 days].)**

   If no, do not approve.

SECUKINUMAB

INITIAL CRITERIA (CONTINUED)

9. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Cimzia (certolizumab)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Cimzia])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, continue to #10.
   If no, continue to #11.

10. Does the patient have **ONE** of the following objective signs of inflammation?
    - C-reactive protein (CRP) levels above the upper limit of normal
    - Sacroiliitis on magnetic resonance imaging (MRI)

    If yes, **approve for 6 months by GPID or GPI-14 for all formulations of the following strengths:**
    - **150mg/mL: #1mL per 28 days.**
    - **125mg/5mL: #15mL per 28 days.**

    (Please enter a 1 month approval by GPID or GPI-14 for all formulations of the following strengths:
    - **150mg/mL: #4mL per 28 days.**
    - **125mg/5mL: #1 fill count [NOTE: Enter a Min Day Supply of 28 days].)**

    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

SECUKINUMAB

INITIAL CRITERIA (CONTINUED)

11. Does the patient have a diagnosis of enthesitis-related arthritis (ERA) (ICD-10 M08.80) and meet **ALL** of the following criteria?
    - The patient is 4 years of age or older
    - Therapy is prescribed by or in consultation with a rheumatologist
    - Cosentyx will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of ERA
    - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam), sulfasalazine, or methotrexate

    If yes, **approve for 6 months by GPID or GPI-14 for all formulations of the following strengths:**
    - **75mg/0.5mL: #0.5mL per 28 days.**
    - **150mg/mL: #1mL per 28 days.**

    (Please enter a 1 month approval by GPID or GPI-14 for all formulations of the following strengths:
    - **75mg/0.5mL: #2mL per 28 days.**
    - **150mg/mL: #4mL per 28 days.)**

    If no, continue to #12.

12. Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
    - Therapy is prescribed by or in consultation with a dermatologist
    - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HS
    - The patient had a trial of or contraindication to ONE clinical standard of care therapy: topical therapy (e.g., clindamycin, resorcinol, chlorhexidine, zinc pyrithione, benzoyl peroxide) or an oral antibiotic (e.g., tetracycline, dapsone)

    If yes, continue to #13.
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

SECUKINUMAB

INITIAL CRITERIA (CONTINUED)

13. Does the patient meet **ONE** of the following criteria?
- The patient is 12 to 17 years of age AND had a trial of or contraindication to the following preferred agent: adalimumab-ryvk/adalimumab-aaty
- The patient is 18 years of age or older AND had a trial of or contraindication to ONE of the following preferred agents:
  - Bimzelx (bimekizumab-bkzx)
  - Adalimumab-ryvk/adalimumab-aaty

  [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

  If yes, **approve for 4 months by GPID or GPI-14 for all formulations of the following strengths:**
  - **150mg/mL: #1mL per 28 days.**
  - **300mg/2mL: #4mL per 28 days.**

  (Please enter a 1 month approval by GPID or GPI-14 for all formulations of the following strengths:
  - **150mg/mL: #4mL per 28 days.**
  - **300mg/2mL: #8mL per 28 days.)**

  If no, do not approve.
  DENIAL TEXT: See the initial denial text at the end of the guideline.

SECUKINUMAB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **SECUKINUMAB (Cosentyx)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
   5. Enthesitis-related arthritis (ERA: a type of joint condition)
   6. Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)

B. If you have moderate to severe plaque psoriasis, approval also requires:
   1. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
   2. You have psoriasis (a type of skin condition) covering 3 percent or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, genital area, face, or scalp
   3. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
   4. You meet ONE of the following:
      a. You have had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
      b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of medication that decreases the body's immune response) and PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
      c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

(Initial denial text continued on next page)

INITIAL CRITERIA (CONTINUED)

5. You meet ONE of the following:
    a. You are 6 to 11 years of age AND have tried or have a contraindication to (harmful for you to use) FOUR of the following preferred medications: Enbrel (etanercept), Skyrizi (risankizumab-rzaa), Taltz (ixekizumab), Tremfya (guselkumab), Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba), Otezla (apremilast)
    b. You are 12 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) FOUR of the following preferred medications: Enbrel (etanercept), Skyrizi (risankizumab-rzaa), Taltz (ixekizumab), Tremfya (guselkumab), Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba), Otezla (apremilast), Icotyde (icotrokinra)
    c. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) FOUR of the following preferred medications:
        i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
        ii. Tremfya (guselkumab)
        iii. Skyrizi (risankizumab-rzaa)
        iv. Enbrel (etanercept)
        v. Otezla (apremilast)
        vi. Taltz (ixekizumab)
        vii. Sotyktu (deucravacitinib)
        viii. Bimzelx (bimekizumab-bkzx)
        ix. Adalimumab-ryvk/adalimumab-aaty
        x. Icotyde (icotrokinra)

C. If you have psoriatic arthritis, approval also requires:

1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

(Initial denial text continued on next page)

SECUKINUMAB

INITIAL CRITERIA (CONTINUED)

3. You meet ONE of the following:
   a. You are 2 to 5 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Xeljanz IR (tofacitinib immediate-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
   b. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Otezla (apremilast)
      iii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      iv. Tremfya (guselkumab)
      v. Skyrizi (risankizumab-rzaa)
      vi. Xeljanz IR (tofacitinib immediate-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
   c. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      iii. Otezla (apremilast)
      iv. Tremfya (guselkumab)
      v. Skyrizi (risankizumab-rzaa)
      vi. Taltz (ixekizumab)
      vii. Bimzelx (bimekizumab-bkzx)
      viii. Sotyktu (deucravacitinib)
      ix. Adalimumab-ryvk/adalimumab-aaty
      x. Xeljanz IR/XR (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      xi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

SECUKINUMAB

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:

1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (nonsteroidal anti-inflammatory drug such as ibuprofen, naproxen, meloxicam)
4. You meet ONE of the following:
   a. You are 12 to 17 years of age
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Taltz (ixekizumab)
      iii. Bimzelx (bimekizumab-bkzx)
      iv. Adalimumab-ryvk/adalimumab-aaty
      v. Xeljanz IR/XR (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      vi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

SECUKINUMAB

INITIAL CRITERIA (CONTINUED)

E. If you have non-radiographic axial spondyloarthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (nonsteroidal anti-inflammatory drug such as ibuprofen, naproxen, meloxicam)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cimzia (certolizumab)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Cimzia])
6. You have ONE of the following signs of inflammation:
   a. C-reactive protein (CRP: a measure of how much inflammation is in the body) levels above the upper limit of normal
   b. Sacroiliitis (a type of inflammation where lower spine and pelvis connect) on magnetic resonance imaging (MRI: a type of imaging lab)

(Initial denial text continued on next page)

SECUKINUMAB

INITIAL CRITERIA (CONTINUED)

F. If you have enthesitis-related arthritis, approval also requires:
1. You are 4 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of enthesitis-related arthritis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (nonsteroidal anti-inflammatory drug such as ibuprofen, naproxen, meloxicam), sulfasalazine, or methotrexate

G. If you have moderate to severe hidradenitis suppurativa, approval also requires:
1. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of hidradenitis suppurativa (a type of skin condition)
3. You have tried or have a contraindication to (harmful for you to use) ONE clinical standard of care therapy: topical therapy (such as clindamycin, resorcinol, chlorhexidine, zinc pyrithione, benzoyl peroxide) or an oral antibiotic (such as tetracycline, dapsone)
4. You meet ONE of the following:
   a. You are 12 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) the following preferred medication: adalimumab-ryvk/adalimumab- aaty
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Bimzelx (bimekizumab-bkzx)
      ii. Adalimumab-ryvk/adalimumab-aaty

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

SECUKINUMAB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient has achieved or maintained clear or minimal disease or a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more while on therapy
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #3.

SECUKINUMAB

RENEWAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 11 years of age AND had a trial of or contraindication to FOUR of the following preferred agents: Enbrel (etanercept), Skyrizi (risankizumab-rzaa), Taltz (ixekizumab), Tremfya (guselkumab), Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba), Otezla (apremilast)
   - The patient is 12 to 17 years of age AND had a trial of or contraindication to FOUR of the following preferred agents: Enbrel (etanercept), Skyrizi (risankizumab-rzaa), Taltz (ixekizumab), Tremfya (guselkumab), Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba), Otezla (apremilast), Icotyde (icotrokinra)
   - The patient is 18 years of age or older AND had a trial of or contraindication to FOUR of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Tremfya (guselkumab)
     - Skyrizi (risankizumab-rzaa)
     - Enbrel (etanercept)
     - Otezla (apremilast)
     - Taltz (ixekizumab)
     - Sotyktu (deucravacitinib)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Icotyde (icotrokinra)

     [**NOTE**: Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by GPID or GPI-14 for all formulations of the following strengths:**
     - **75mg/0.5mL: #0.5mL per 28 days.**
     - **150mg/mL: #1mL per 28 days.**
     - **300mg/2mL: #2mL per 28 days.**

     If no, do not approve.
     DENIAL TEXT: See the renewal denial text at the end of the guideline.

SECUKINUMAB

RENEWAL CRITERIA (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient is 2 to 5 years of age AND had a trial of or contraindication to ONE of the following preferred agents: Enbrel (etanercept), Xeljanz IR (tofacitinib IR), Rinvoq (upadacitinib)
     [**NOTE**: Xeljanz and Rinvoq require additional criteria of inadequate response or intolerance to a TNF blocker (e.g., Enbrel)]
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to THREE of the following preferred agents:
     - o Enbrel (etanercept)
     - o Otezla (apremilast)
     - o Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - o Tremfya (guselkumab)
     - o Skyrizi (risankizumab-rzaa)
     - o Xeljanz IR (tofacitinib IR)
     - o Rinvoq (upadacitinib)

     [**NOTE**: Xeljanz and Rinvoq require additional criteria of inadequate response or intolerance to a TNF blocker (e.g., Enbrel)]
   - The patient is 18 years of age or older AND had a trial of or contraindication to THREE of the following preferred agents:
     - o Enbrel (etanercept)
     - o Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - o Otezla (apremilast)
     - o Tremfya (guselkumab)
     - o Skyrizi (risankizumab-rzaa)
     - o Taltz (ixekizumab)
     - o Bimzelx (bimekizumab-bkzx)
     - o Sotyktu (deucravacitinib)
     - o Adalimumab-ryvk/adalimumab-aaty
     - o Xeljanz (tofacitinib IR or XR)
     - o Rinvoq (upadacitinib)

     [**NOTE**: Xeljanz and Rinvoq require additional criteria of inadequate response or intolerance to a TNF blocker (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel)]
     [**NOTE**: Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by GPID or GPI-14 for all formulations of the following strengths:**
     - **75mg/0.5mL: #0.5mL per 28 days.**
     - **150mg/mL: #1mL per 28 days.**
     - **300mg/2mL: #2mL per 28 days.**
     - **125mg/5mL: #15mL per 28 days.**

     If no, do not approve.
     DENIAL TEXT: See the renewal denial text at the end of the guideline.

SECUKINUMAB

RENEWAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1 - 10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) while on therapy
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, continue to #6.
   If no, continue to #7.

6. Does the patient meet **ONE** of the following criteria?
   - The patient is 12 to 17 years of age
   - The patient is 18 years of age or older AND had a trial of or contraindication to THREE of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14 for all formulations of the following strengths:**
   - **75mg/0.5mL: #0.5mL per 28 days.**
   - **150mg/mL: #1mL per 28 days.**
   - **300mg/2mL: #2mL per 28 days.**
   - **125mg/5mL: #15mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SECUKINUMAB

RENEWAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1 - 10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) while on therapy
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - o Cimzia (certolizumab)
     - o Taltz (ixekizumab)
     - o Bimzelx (bimekizumab-bkzx)
     - o Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Cimzia])

     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by GPID or GPI-14 for all formulations of the following strengths:**
     - **150mg/mL: #1mL per 28 days.**
     - **125mg/5mL: #15mL per 28 days.**

     If no, continue to #8.

8. Does the patient have a diagnosis of enthesitis-related arthritis (ERA) (ICD-10 M08.80) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement in global assessment of disease activity, functional ability, number of joints with active arthritis, OR number of joints with limited range of motion
   - Cosentyx will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of ERA

     If yes, **approve for 12 months by GPID or GPI-14 for all formulations of the following strengths:**
     - **75mg/0.5mL: #0.5mL per 28 days.**
     - **150mg/mL: #1mL per 28 days.**

     If no, continue to #9.

SECUKINUMAB

RENEWAL CRITERIA (CONTINUED)

9. Does the patient have a diagnosis of moderate to severe hidradenitis suppurativa (HS) (ICD-10 L73.2) and meet **ALL** of the following criteria?
   - The patient has shown improvement in HS symptoms
   - Cosentyx will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HS

   If yes, continue to #10.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

10. Does the patient meet **ONE** of the following criteria?
    - The patient is 12 to 17 years of age AND had a trial of or contraindication to the following preferred agent: adalimumab-ryvk/adalimumab-aaty
    - The patient is 18 years of age or older AND had a trial of or contraindication to ONE of the following preferred agents:
      - Bimzelx (bimekizumab-bkzx)
      - Adalimumab-ryvk/adalimumab-aaty

    [**NOTE**: Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

    If yes, **approve for 12 months by GPID or GPI-14 for all formulations of the following strengths:**
    - **150mg/mL: #1mL per 28 days.**
    - **300mg/2mL: #4mL per 28 days.**

    If no, do not approve.
    DENIAL TEXT: See the renewal denial text at the end of the guideline.

SECUKINUMAB

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: Our guideline named **SECUKINUMAB (Cosentyx)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
   5. Enthesitis-related arthritis (ERA: a type of joint condition)
   6. Moderate to severe hidradenitis suppurativa (HS: a type of skin condition)

B. If you have moderate to severe plaque psoriasis, renewal also requires:
   1. You have achieved or maintained clear or minimal disease or a decrease in PASI (Psoriasis Area and Severity Index: used to measure the severity and extent of psoriasis) of at least 50 percent or more while on therapy
   2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
   3. You meet ONE of the following:
      a. You are 6 to 11 years of age AND have tried or have a contraindication to (harmful for you to use) FOUR of the following preferred medications: Enbrel (etanercept), Skyrizi (risankizumab-rzaa), Taltz (ixekizumab), Tremfya (guselkumab), Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba), Otezla (apremilast)
      b. You are 12 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) FOUR of the following preferred medications: Enbrel (etanercept), Skyrizi (risankizumab-rzaa), Taltz (ixekizumab), Tremfya (guselkumab), Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba), Otezla (apremilast), Icotyde (icotrokinra)
      c. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) FOUR of the following preferred medications:
         i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
         ii. Tremfya (guselkumab)
         iii. Skyrizi (risankizumab-rzaa)
         iv. Enbrel (etanercept)
         v. Otezla (apremilast)
         vi. Taltz (ixekizumab)
         vii. Sotyktu (deucravacitinib)
         viii. Bimzelx (bimekizumab-bkzx)
         ix. Adalimumab-ryvk/adalimumab-aaty
         x. Icotyde (icotrokinra)

(Renewal denial text continued on next page)

SECUKINUMAB

RENEWAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, renewal also requires:

1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

SECUKINUMAB

RENEWAL CRITERIA (CONTINUED)

3. You meet ONE of the following:
   a. You are 2 to 5 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Xeljanz IR (tofacitinib immediate-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
   b. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Otezla (apremilast)
      iii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      iv. Tremfya (guselkumab)
      v. Skyrizi (risankizumab-rzaa)
      vi. Xeljanz IR (tofacitinib immediate-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
   c. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      iii. Otezla (apremilast)
      iv. Tremfya (guselkumab)
      v. Skyrizi (risankizumab-rzaa)
      vi. Taltz (ixekizumab)
      vii. Bimzelx (bimekizumab-bkzx)
      viii. Sotyktu (deucravacitinib)
      ix. Adalimumab-ryvk/adalimumab-aaty
      x. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      xi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

SECUKINUMAB

RENEWAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, renewal also requires:
1. You have experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1 - 10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI: diagnostic test which allows a physician to determine the effectiveness of a current medication) while on therapy
2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
3. You meet ONE of the following:
   a. You are 12 to 17 years of age
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Taltz (ixekizumab)
      iii. Bimzelx (bimekizumab-bkzx)
      iv. Adalimumab-ryvk/adalimumab-aaty
      v. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      vi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

E. If you have non-radiographic axial spondyloarthritis, renewal also requires:
1. You have experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1 - 10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI: diagnostic test which allows a physician to determine the effectiveness of a current medication) while on therapy
2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Cimzia (certolizumab)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor

SECUKINUMAB

RENEWAL CRITERIA (CONTINUED)

F. If you have enthesitis-related arthritis, renewal also requires:
1. You have experienced or maintained an improvement in global assessment of disease activity, functional ability, number of joints with active arthritis, OR number of joints with limited range of motion
2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of enthesitis-related arthritis (a type of joint condition)

G. If you have moderate to severe hidradenitis suppurativa, renewal also requires:
1. You have shown improvement in your hidradenitis suppurativa symptoms
2. You will NOT use Cosentyx concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of hidradenitis suppurativa (a type of skin condition)
3. You meet ONE of the following:
   a. You are 12 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) the following preferred medication: adalimumab-ryvk/adalimumab- aaty
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Bimzelx (bimekizumab-bkzx)
      ii. Adalimumab-ryvk/adalimumab-aaty

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

SELADELPAR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SELADELPAR LYSINE	LIVDELZI	49816		GPI-10 (5278007050)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of primary biliary cholangitis (PBC), including cholestatic pruritus, as confirmed by at least **TWO** of the following criteria?
   - The patient has an elevated alkaline phosphatase (ALP) level
   - The patient has the presence of antimitochondrial antibodies (AMA) OR other PBC-specific autoantibodies, including sp100 or gp210, if AMA is negative
   - The patient has histologic evidence (obtained by liver biopsy) of non-suppurative destructive cholangitis and destruction of interlobular bile ducts

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist or hepatologist
   - The patient does NOT have decompensated cirrhosis (Child-Pugh B or C)
   - Livdelzi will NOT be used concurrently with any other second-line PBC treatment (Iqirvo [elafibranor]) or Lynavoy (linerixibat)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - Livdelzi will be used as monotherapy in a patient who is unable to tolerate ursodiol (ursodeoxycholic acid)
   - Livdelzi will be used in combination with ursodiol (ursodeoxycholic acid) in a patient who had an inadequate response to at least 1 year of treatment with ursodiol (ursodeoxycholic acid) monotherapy

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SELADELPAR

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT:

Our guideline named **SELADELPAR (Livdelzi)** requires the following rule(s) be met for approval:

A. You have primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct), including cholestatic pruritus (itching caused by liver disease), as confirmed by TWO of the following:
   1. You have an elevated (high) alkaline phosphatase (ALP) level (a type of lab test)
   2. You have the presence of antimitochondrial antibodies (AMA: indicator of the body attacking its own cells) or other PBC-specific autoantibodies (indicator of the body attacking its own cells), including sp100 or gp210, if AMA is negative
   3. You have histologic evidence (lab data obtained by liver biopsy [removal of cells or tissue from the liver for examination]) of non-suppurative destructive cholangitis and destruction of interlobular bile ducts (symptoms of liver disease)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions) or hepatologist (a type of liver doctor)
D. You do NOT have decompensated cirrhosis (a condition where there is liver damage and scarring with major symptoms) (Child-Pugh B or C: a score that evaluates the severity of liver damage)
E. You will NOT use Livdelzi concurrently (at the same time) with any other second-line therapy for primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct) (Iqirvo [elafibranor]) or Lynavoy (linerixibat)
F. You meet ONE of the following:
   1. Livdelzi will be used as monotherapy (one medication treatment) if you are unable to tolerate ursodiol (ursodeoxycholic acid)
   2. Livdelzi will be used in combination (together) with ursodiol (ursodeoxycholic acid) if you had an inadequate (poor) response to at least 1 year of treatment with ursodiol (ursodeoxycholic acid) monotherapy (one medication treatment)

SELADELPAR

RENEWAL CRITERIA

1. Does the patient have a diagnosis of primary biliary cholangitis (PBC), including cholestatic pruritus, **AND** meet the following criterion?
   - Livdelzi will NOT be used concurrently with any other second-line PBC treatment (Iqirvo [elafibranor]) or Lynavoy (linerixibat)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has an alkaline phosphatase (ALP) level that is less than 1.67 times the upper limit of normal AND has decreased by at least 15 percent from baseline while on treatment with Livdelzi
   - The patient has PBC-related cholestatic pruritus AND has shown a clinical response, defined as improvement in pruritus symptoms

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT:

   Our guideline named **SELADELPAR (Livdelzi)** requires the following rule(s) be met for renewal:
   A. You have primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct) including cholestatic pruritus (itching caused by liver disease)
   B. You will NOT use Livdelzi concurrently (at the same time) with any other second-line therapy for primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct) (Iqirvo [elafibranor]) or Lynavoy (linerixibat)
   C. You meet ONE of the following:
      1. You have an alkaline phosphatase (ALP) level (a type of lab test) that is less than 1.67 times the upper limit of normal AND which has decreased by at least 15 percent from baseline (before treatment) while on treatment with Livdelzi
      2. You have cholestatic pruritus (itching caused by liver disease) associated with primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct) AND have shown a clinical response, defined as improvement in pruritus (itching) symptoms

PRIOR AUTHORIZATION GUIDELINES

SELEXIPAG

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SELEXIPAG	UPTRAVI	42922		GPI-10 (4012007000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is 2 to 17 years of age
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #2.
   If no, continue to #3.

2. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) of greater than or equal to 3 Wood units (WU)

   If yes, **approve all strengths of the tablet formulation for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **Uptravi 200-800mcg Titration Pack: #200 per 28 days for 1 fill.**
   - **100mcg tablet: #16 per day.**
   - **150mcg tablet: #10 per day.**
   - **200mcg tablet: #8 per day.**
   - **400mcg, 600mcg, 800mcg, 1,000mcg, 1,200mcg, 1,400mcg, 1,600mcg tablet: #2 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD- 10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist or

   pulmonologist If yes, continue to #4.

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SELEXIPAG

INITIAL CRITERIA (CONTINUED)

4. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) of greater than 2 Wood units (WU)

   If yes, **approve for 12 months by GPID or GPI-14 as follows (enter first and second approvals):**
   - **FIRST APPROVAL: Approve Uptravi 200-800mcg Titration Pack with a quantity limit of #200 per 28 days for 1 fill.**
   - **SECOND APPROVAL: Approve all strengths as follows:**
     - **200mcg tablet: #8 per day.**
     - **400mcg, 600mcg, 800mcg, 1,000mcg, 1,200mcg, 1,400mcg, 1,600mcg tablet: #2 per day.**
     - **1,800mcg vial: #2 per day.**

   (NOTE: Uptravi vial is a non-self-administered [NSA] agent and may not be covered by some plans.)

   If no, do not approve.

   INITIAL DENIAL TEXT: Our guideline named **SELEXIPAG (Uptravi)** requires the following rule(s) be met for approval:
   A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1)
   B. You are 2 years of age or older
   C. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   D. You meet ONE of the following:
      1. You are 2 to 17 years of age AND meet the following criterion:
         a. Your pulmonary arterial hypertension is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
            i. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
            ii. Pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg
            iii. Pulmonary vascular resistance (PVR) greater than or equal to 3 Wood units
      2. You are 18 years of age or older AND meet the following criterion:
         a. Your pulmonary arterial hypertension is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
            i. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
            ii. Pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg
            iii. Pulmonary vascular resistance (PVR) greater than 2 Wood units

SELEXIPAG

RENEWAL CRITERIA

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2)?

   If yes, continue to #2.

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient 2 to 17 years of age?

   If yes, **approve all strengths of the tablet formulation for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **100mcg tablet: #16 per day.**
   - **150mcg tablet: #10 per day.**
   - **200mcg tablet: #8 per day.**
   - **400mcg, 600mcg, 800mcg, 1,000mcg, 1,200mcg, 1,400mcg, 1,600mcg tablet: #2 per day.**

   If no, continue to #3.

3. Is the patient 18 years of age or older?

   If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **200mcg tablet: #8 per day.**
   - **400mcg, 600mcg, 800mcg, 1,000mcg, 1,200mcg, 1,400mcg, 1,600mcg tablet: #2 per day.**
   - **1,800mcg vial: #2 per day.**

   (NOTE: Uptravi vial is a non-self-administered [NSA] agent and may not be covered by some plans.)

   If no, do not approve.

   RENEWAL DENIAL TEXT: Our guideline named **SELEXIPAG (Uptravi)** requires the following rule(s) be met for renewal:
   A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1)
   B. You are 2 years of age or older

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

SELINEXOR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SELINEXOR	XPOVIO	45854		GPI-10 (2156006000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of multiple myeloma (MM) (ICD-10 Group C90.0) **AND** meet the following criterion?
   - The patient is 18 years of age or

     older If yes, continue to #2.

     If no, do not approve.
     DENIAL TEXT: See the denial text at the end of the guideline.

2. Will Xpovio be used in combination with bortezomib (Velcade) and dexamethasone **AND** the patient meets the following criterion?
   - The patient has received at least one prior therapy

     If yes, **approve the requested GPID or GPI-14 for 12 months as follows:**
     - **40 mg once weekly dose (GPID 49534/ GPI-14 2156006000B760): #4 per 28 days.**
     - **40 mg once weekly dose (GPID 48265/ GPI-14 2156006000B708): #16 per 28 days. (NOTE: Approve both of the 40 mg once weekly dose above.)**
     - **60 mg once weekly dose (GPID 49537/ GPI-14 2156006000B780): #4 per 28 days.**
     - **80 mg once weekly dose (GPID 58636/ GPI-14 2156006000B785): #4 per 28 days.**
     - **80 mg once weekly dose (GPID 49538/ GPI-14 2156006000B770): #8 per 28 days. (NOTE: Approve both of the 80 mg once weekly dose above.)**
     - **100 mg once weekly dose (GPID 49539/ GPI-14 2156006000B775): #8 per 28 days.**

     If no, continue to #3.

3. Has the patient's cancer relapsed or is refractory (RRMM) and the patient meets **ALL** of the following criteria?
   - Xpovio will be used in combination with dexamethasone
   - The patient has received at least four prior therapies for the treatment of

     RRMM If yes, continue to #4.

     If no, do not approve.
     DENIAL TEXT: See the denial text at the end of the guideline.

SELINEXOR

GUIDELINES FOR USE (CONTINUED)

4. Is the patient's disease refractory to **ALL** of the following?
   - Two proteasome inhibitors (e.g., bortezomib [Velcade], carfilzomib [Kyprolis])
   - Two immunomodulatory agents (e.g., lenalidomide [Revlimid], pomalidomide [Pomalyst])
   - One anti-CD38 monoclonal antibody (e.g., daratumumab [Darzalex])

   If yes, **approve the requested GPID or GPI-14 for 12 months as follows:**
   - **60 mg once weekly dose (GPID 49537/ GPI-14 2156006000B780): #4 per 28 days.**
   - **80 mg once weekly dose (GPID 58636/ GPI-14 2156006000B785): #4 per 28 days.**
   - **80 mg once weekly dose (GPID 49538/ GPI-14 2156006000B770): #8 per 28 days. (NOTE: Approve both of the 80 mg once weekly dose above.)**
   - **100 mg once weekly dose (GPID 49539/ GPI-14 2156006000B775): #8 per 28 days.**
   - **80 mg twice weekly (160 mg total per week) dose (GPID 46634/ GPI-14 2156006000B720): #32 per 28 days.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SELINEXOR (Xpovio)** requires the following rule(s) be met for approval:
   A. You have multiple myeloma (MM: a type of blood cancer)
   B. You are 18 years of age or older
   C. You meet ONE of the following:
      1. Xpovio will be used in combination with bortezomib (Velcade) and dexamethasone; and you have received at least ONE prior therapy
      2. You have relapsed or refractory multiple myeloma (RRMM: a type of blood cancer that has returned or did not respond to treatment); Xpovio will be used in combination with dexamethasone; you have received at least four prior therapies for the treatment of RRMM; AND your disease is refractory (non-responsive) to ALL of the following:
         a. Two proteasome inhibitors (such as bortezomib [Velcade], carfilzomib [Kyprolis])
         b. Two immunomodulatory agents (such as lenalidomide [Revlimid], pomalidomide [Pomalyst])
         c. One anti-CD38 monoclonal antibody (such as daratumumab [Darzalex])

SELPERCATINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SELPERCATINIB	RETEVMO	46525		GPI-10 (2153577900)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has a *RET* (rearranged during transfection) gene fusion, as detected by an FDA-approved test

   If yes, **approve all formulations and strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **40mg capsule: #3 per day.**
   - **40mg tablet: #4 per day.**
   - **80mg, 120mg, 160mg: #2 per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of advanced or metastatic medullary thyroid cancer (MTC) (ICD-10 C73) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient's cancer has a *RET* (rearranged during transfection)-mutation, as detected by an FDA-approved test
   - The patient requires systemic therapy

   If yes, **approve all formulations and strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **40mg capsule: #3 per day.**
   - **40mg tablet: #4 per day.**
   - **80mg, 120mg, 160mg: #2 per day.**

   If no, continue to #3.

SELPERCATINIB

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of advanced or metastatic thyroid cancer (ICD-10 C73) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient's cancer has a *RET* (rearranged during transfection) gene fusion, as detected by an FDA-approved test
   - The patient requires systemic therapy
   - The cancer is refractory to radioactive iodine therapy (if radioactive iodine is appropriate)

   If yes, **approve all formulations and strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **40mg capsule: #3 per day.**
   - **40mg tablet: #4 per day.**
   - **80mg, 120mg, 160mg: #2 per day.**

   If no, continue to #4.

4. Does the patient have a diagnosis of locally advanced or metastatic solid tumors and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient's tumor has a *RET* (rearranged during transfection) gene fusion, as detected by an FDA-approved test
   - The patient's tumor has progressed on or following prior systemic treatment OR the patient has no satisfactory alternative treatment options

   If yes, **approve all formulations and strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **40mg capsule: #3 per day.**
   - **40mg tablet: #4 per day.**
   - **80mg, 120mg, 160mg: #2 per day.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

SELPERCATINIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SELPERCATINIB (Retevmo)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Locally advanced or metastatic non-small cell lung cancer (a type of lung cancer that has spread to nearby tissue or lymph nodes, or has spread to other parts of the body)
   2. Advanced or metastatic medullary thyroid cancer (a type of thyroid cancer that has progressed or has spread to other parts of the body)
   3. Advanced or metastatic thyroid cancer (thyroid cancer that has progressed or has spread to other parts of the body)
   4. Locally advanced or metastatic solid tumors (abnormal mass that has spread to nearby tissue or lymph nodes, or has spread to other parts of the body)

B. If you have locally advanced or metastatic non-small cell lung cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer has a rearranged during transfection (*RET*) gene fusion (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test

C. If you have advanced or metastatic medullary thyroid cancer, approval also requires:
   1. You are 2 years of age or older
   2. Your cancer has a rearranged during transfection (*RET*) mutation (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
   3. You require systemic therapy (treatment that targets the entire body)

D. If you have advanced or metastatic thyroid cancer, approval also requires:
   1. You are 2 years of age or older
   2. Your cancer has a rearranged during transfection (*RET*) gene fusion (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
   3. You require systemic therapy (treatment that targets the entire body)
   4. Your cancer is refractory (has not responded) to radioactive iodine therapy, if radioactive iodine is appropriate

E. If you have a locally advanced or metastatic solid tumors, approval also requires:
   1. You are 2 years of age or older
   2. Your tumor has a rearranged during transfection (*RET*) gene fusion (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
   3. Your tumor has progressed (worsened) on or following prior systemic treatment (treatment that targets the entire body) OR you have no alternative treatment options

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SELUMETINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SELUMETINIB SULFATE	KOSELUGO	46451		GPI-10 (2153356550)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of neurofibromatosis type 1 (NF1) (ICD-10 Q85.01) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has symptomatic, inoperable plexiform neurofibromas (PN)

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **10mg: #10 per day.**
   - **25mg: #4 per day.**
   - **5mg: #20 per day.**
   - **7.5mg: #13 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SELUMETINIB (Koselugo)** requires the following rule(s) be met for approval:
   A. You have neurofibromatosis type 1 (NF1: a type of skin and nervous system disorder)
   B. You are 1 year of age or older
   C. You have symptomatic, inoperable (cannot be treated by surgery) plexiform neurofibromas (PN: tumors that grow along the nerves)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

SEMAGLUTIDE - WEGOVY

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SEMAGLUTIDE	WEGOVY	44675		GPI-10 (6125207000)	BRAND = WEGOVY

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request to reduce the risk of major adverse cardiovascular events (MACE) (cardiovascular death, non-fatal myocardial infarction, or non-fatal stroke)?

   If yes, continue to #2.
   If no, continue to #6.

2. Is the patient overweight as defined by **ONE** of the following criteria?
   - The patient has a body mass index (BMI) of at least 27 kg/m(2)
   - The patient is Asian and has a BMI of at least 25 kg/m(2)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Wegovy will be used in combination with a reduced calorie diet and increased physical activity
   - Wegovy will NOT be used concurrently with another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]) or a GLP-1/GIP receptor agonist (e.g., Zepbound [tirzepatide], Mounjaro [tirzepatide])

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have established cardiovascular disease as evidenced by **ONE** of the following?
   - Prior myocardial infarction (MI) (ICD-10 Z86.74, I25.2)
   - Prior stroke (ischemic or hemorrhagic stroke) (ICD-10 Z86.73, Group I69.3)
   - Carotid artery stenosis of at least 50 percent (ICD-10 Group I65.2)
   - Symptomatic peripheral arterial disease (PAD) (ICD-10 I73.9), as evidenced by intermittent claudication with ankle-brachial index (ABI) less than 0.85 (at rest), peripheral arterial revascularization procedure, or amputation due to atherosclerotic disease

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

CONTINUED ON NEXT PAGE

SEMAGLUTIDE - WEGOVY

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a history of and will continue on, or has a contraindication to, **ALL** of the following standard treatments for the secondary prevention of MACE?
   - An antiplatelet medication (e.g., aspirin, clopidogrel, ticagrelor, aspirin-dipyridamole)
     NOTE: This does NOT apply to patients with a history of a hemorrhagic stroke.
   - A HMG-CoA reductase inhibitor (statins) (e.g., atorvastatin, lovastatin, pravastatin, rosuvastatin, simvastatin)
   - A blood pressure medication (e.g., angiotensin-converting enzyme [ACE] inhibitors [e.g., lisinopril], angiotensin II receptor blockers [ARBs] [e.g., losartan], beta blockers [e.g., propranolol])

     If yes, **approve all strengths and formulations for 12 months by GPID or GPI-14.**
     If no, do not approve.
     DENIAL TEXT: See the initial denial text at the end of the guideline.

6. Does the patient have a diagnosis of noncirrhotic metabolic dysfunction-associated steatohepatitis (MASH)/non-alcoholic steatohepatitis (NASH) (ICD-10 K75.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hepatologist, gastroenterologist, or endocrinologist
   - The patient is enrolled in or has already completed a lifestyle intervention (e.g., dietary, exercise, psychology)
   - Wegovy will NOT be used concurrently with Rezdiffra (resmetirom), another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]), or a GLP-1/GIP receptor agonist (e.g., Zepbound [tirzepatide], Mounjaro [tirzepatide])
   - The patient has a biopsy or non-invasive test (e.g., elastography, ELF testing) that was obtained in the past 12 months demonstrating liver fibrosis stage 2 or 3

     If yes, **approve all strengths of the pen for 72 weeks by GPID or GPI-14.**
     If no, continue to #7.

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

SEMAGLUTIDE - WEGOVY

INITIAL CRITERIA (CONTINUED)

7. Is the request for weight loss OR weight management (ICD-10 Group E66)?

   If yes, continue to #8.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

8. Is weight loss or weight management a covered benefit?
   (**NOTE:** If weight loss/weight management is NOT a covered benefit - Denied claim would have this POS message - '*Benefit exclusion if only indicated for weight loss.')*

   If yes, continue to #9.
   If no, do not approve.
   Change PA type to EX (excluded) and dismiss using the Dismissed letter template.

9. Does the patient meet **ALL** of the following criteria?
   - There is physician attestation of active enrollment in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program
   - Wegovy will NOT be used concurrently with another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]) or a GLP-1/GIP receptor agonist (e.g., Zepbound [tirzepatide], Mounjaro [tirzepatide])

   If yes, continue to #10.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

INITIAL CRITERIA (CONTINUED)

10. Is the patient 18 years of age or older and meets **ONE** of the following criteria prior to initiating weight loss therapy?
    - The patient has a body mass index (BMI) of at least 30 kg/m(2)
    - The patient is Asian and has a BMI of at least 27.5 kg/m(2)
    - The patient has a BMI of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non-alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)
    - The patient is Asian, has a BMI of at least 25 kg/m(2), AND has at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non- alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)

    If yes, **approve all strengths and formulations for 29 weeks by GPID or GPI-14.**
    If no, continue to #11.

11. Is the patient 12 to 17 years of age **AND** meets the following criterion?
    - The patient has an initial BMI at the 95th percentile or greater standardized for age and sex (see table below)

BMI Cut-offs for Obesity by Age and Sex

Age (in years)	Male	Female
	95th Percentile BMI Value	95th Percentile BMI Value
12	24.2	25.2
12.5	24.7	25.7
13	25.1	26.3
13.5	25.6	26.8
14	26.0	27.2
14.5	26.4	27.7
15	26.8	28.1
15.5	27.2	28.5
16	27.5	28.9
16.5	27.9	29.3
17	28.2	29.6
17.5	28.6	30.0

If yes, **approve all strengths of the pen for 29 weeks by GPID or GPI-14.**
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SEMAGLUTIDE - WEGOVY** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. To reduce the risk of major adverse cardiovascular events (MACE: cardiovascular death, non-fatal myocardial infarction [heart attack], or non-fatal stroke [a type of brain damage])
   2. Noncirrhotic metabolic dysfunction-associated steatohepatitis (MASH: a type of liver disease)/non-alcoholic steatohepatitis (NASH: a type of liver disease)
   3. Weight loss or weight management

B. If you will use Wegovy to reduce the risk of major adverse cardiovascular events, approval also requires:
   1. You are 18 years of age or older
   2. You are overweight as defined by ONE of the following:
      a. You have a body mass index (BMI: a tool for evaluating body fat) of at least 27 kg/m(2)
      b. You are Asian and have a body mass index (BMI: a tool for evaluating body fat) of at least 25 kg/m(2)
   3. Wegovy will be used in combination with a reduced calorie diet and increased physical activity
   4. You will NOT use Wegovy concurrently (at the same time) with another GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]) or a GLP-1/GIP receptor agonist (a type of medication such as Zepbound [tirzepatide], Mounjaro [tirzepatide])
   5. You have established cardiovascular disease as evidenced by ONE of the following:
      a. Prior myocardial infarction (heart attack)
      b. Prior stroke (ischemic [stroke caused by blood clot] or hemorrhagic [stroke caused by broken blood vessels in the brain])
      c. Carotid artery stenosis of at least 50 percent (the blood vessel that transports blood to the brain is blocked)
      d. Symptomatic peripheral arterial disease (PAD), as evidenced by intermittent claudication (pain caused by too little blood flow) with ankle-brachial index (ABI: a type of test to check blood flow) less than 0.85 (at rest), peripheral arterial revascularization procedure (surgery to restore blood flow in blocked arteries/veins), or amputation due to atherosclerotic disease (buildup of fat)

(Initial denial text continued on the next page)

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

INITIAL CRITERIA (CONTINUED)

6. You have a history of and will continue to use, or you have a contraindication to (harmful for you to use), ALL of the following standard treatments for the secondary prevention (reduce the risk) of a major adverse cardiovascular event:
   a. An antiplatelet medication (such as aspirin, clopidogrel, ticagrelor, aspirin-dipyridamole), unless you have a history of a hemorrhagic stroke (bleeding in the brain caused by broken blood vessels)
   b. A HMG-CoA reductase inhibitor (statins) (such as atorvastatin, lovastatin, pravastatin, rosuvastatin, simvastatin)
   c. A blood pressure medication (such as angiotensin-converting enzyme inhibitors [ACEi such as lisinopril], angiotensin II receptor blockers [ARBs such as losartan], beta blockers [such as propranolol])

C. If you will use Wegovy for noncirrhotic metabolic dysfunction-associated steatohepatitis/non-alcoholic steatohepatitis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a hepatologist (a type of liver doctor), gastroenterologist (doctor who treats digestive conditions), or endocrinologist (a type of hormone doctor)
3. You are enrolled in or have already completed a lifestyle intervention (such as dietary, exercise, psychology)
4. You will NOT use Wegovy concurrently (at the same time) with Rezdiffra (resmetirom), another GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]), or a GLP-1/GIP receptor agonist (a type of medication such as Zepbound [tirzepatide], Mounjaro [tirzepatide])
5. You have had a biopsy (removal of cells or tissue from the body for examination) or non- invasive test (such as elastography [type of imaging test], Enhanced Liver Fibrosis [ELF] testing [a type of blood test]) in the past 12 months which demonstrates liver fibrosis stage 2 or 3 (scoring system to measure liver damage)

(Initial denial text continued on the next page)

INITIAL CRITERIA (CONTINUED)

D. If you will use Wegovy for weight loss or weight management, approval also requires:

1. You are actively enrolled in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program
2. You will NOT use Wegovy concurrently (at the same time) with another GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]) or a GLP-1/GIP receptor agonist (a type of medication such as Zepbound [tirzepatide], Mounjaro [tirzepatide])
3. You meet ONE of the following:
   a. You are 18 years of age or older and meet ONE of the following before starting weight loss therapy:
      i. You have a body mass index (BMI: a tool for evaluating body fat) of at least 30 kg/m(2)
      ii. You are Asian and have a body mass index (BMI: a tool for evaluating body fat) of at least 27.5 kg/m(2)
      iii. You have a body mass index (BMI: a tool for evaluating body fat) of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], dyslipidemia [abnormal levels of fat], cardiovascular disease [condition of the heart or blood vessels], coronary artery disease [CAD: a type of heart condition], sleep apnea [a type of sleep condition with difficulty breathing], osteoarthritis [a type of joint condition] of the knee[s], polycystic ovarian syndrome [a hormonal disorder], non-alcoholic steatohepatitis/non-alcoholic fatty liver disease [a type of liver disease], asthma [a type of lung condition], and chronic obstructive pulmonary disease [COPD: a type of lung condition])
      iv. You are Asian, have a body mass index (BMI: a tool for evaluating body fat) of at least 25 kg/m(2), AND have at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], dyslipidemia [abnormal levels of fat], cardiovascular disease [condition of the heart or blood vessels], coronary artery disease [CAD: a type of heart condition], sleep apnea [a type of sleep condition with difficulty breathing], osteoarthritis [a type of joint condition] of the knee[s], polycystic ovarian syndrome [a hormonal disorder], non-alcoholic steatohepatitis/non-alcoholic fatty liver disease [a type of liver disease], asthma [a type of lung condition], and chronic obstructive pulmonary disease [COPD: a type of lung condition])
   b. You are 12 to 17 years of age and meet the following:
      i. You have an initial body mass index (BMI: a tool for evaluating body fat) in the 95th percentile or greater standardized for your age and sex

SEMAGLUTIDE - WEGOVY

RENEWAL CRITERIA

1. Is the request to reduce the risk of cardiovascular death, heart attack, and stroke, and the patient meets **ALL** of the following criteria?
   - The patient has established cardiovascular disease (e.g., prior myocardial infarction (MI) [ICD-10 Z86.74, I25.2], prior stroke [ICD-10 Z86.73, Group I69.3], carotid artery stenosis of at least 50 percent [ICD-10 Group I65.2], symptomatic peripheral arterial disease [PAD] [ICD-10 I73.9])
   - Wegovy will be used in combination with a reduced calorie diet and increased physical activity
   - Wegovy will NOT be used concurrently with another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]) or a GLP-1/GIP receptor agonist (e.g., Zepbound [tirzepatide], Mounjaro [tirzepatide])

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient have a history of and will continue on, or has a contraindication to, **ALL** of the following standard treatments for the secondary prevention of MACE?
   - An antiplatelet medication (e.g., aspirin, clopidogrel, ticagrelor, aspirin-dipyridamole)
     NOTE: This does NOT apply to patients with a history of a hemorrhagic stroke.
   - A HMG-CoA reductase inhibitor (statins) (e.g., atorvastatin, lovastatin, pravastatin, rosuvastatin, simvastatin)
   - A blood pressure medication (e.g., angiotensin-converting enzyme [ACE] inhibitors [e.g., lisinopril], angiotensin II receptor blockers [ARBs] [e.g., losartan], beta blockers [e.g., propranolol])

   If yes, **approve all strengths and formulations for 12 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Does the patient have a diagnosis of noncirrhotic metabolic dysfunction-associated steatohepatitis (MASH)/non-alcoholic steatohepatitis (NASH) (ICD-10 K75.81) and meet **ALL** of the following criteria?
   - The patient has a disease stability or improvement from baseline
   - Wegovy will NOT be used concurrently with Rezdiffra (resmetirom), another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]), or a GLP-1/GIP receptor agonist (e.g., Zepbound [tirzepatide], Mounjaro [tirzepatide])
   - The patient had a biopsy or non-invasive test (e.g., elastography, ELF testing) demonstrating liver fibrosis stage 2 or 3

   If yes, **approve all strengths of the pen for 12 months by GPID or GPI-14.**
   If no, continue to #4.

SEMAGLUTIDE - WEGOVY

RENEWAL CRITERIA (CONTINUED)

4. Is the request for weight loss OR weight management (ICD-10 Group E66)?

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

5. Is weight loss or weight management a covered benefit?
   (**NOTE:** If weight loss/weight management is NOT a covered benefit - Denied claim would have this POS message - '*Benefit exclusion if only indicated for weight loss.')*

   If yes, continue to #6.
   If no, do not approve.
   Change PA type to EX (excluded) and dismiss using the Dismissed letter template.

6. Will Wegovy be used concurrently with another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]) or a GLP-1/GIP receptor agonist (e.g., Zepbound [tirzepatide], Mounjaro [tirzepatide])?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #7.

7. Is the patient 12 to 17 years of age **AND** meets the following criterion?
   - The patient has achieved or maintained at least a 5 percent weight loss of baseline body mass index (BMI)

   If yes, **approve all strengths of the pen for 12 months by GPID or GPI-14.**
   If no, continue to #8.

CONTINUED ON NEXT PAGE

RENEWAL CRITERIA (CONTINUED)

8. Is the patient 18 years of age or older and meets **ONE** of the following criteria prior to initiating weight loss therapy?
   - The patient has a body mass index (BMI) of at least 30 kg/m(2)
   - The patient is Asian and has a BMI of at least 27.5 kg/m(2)
   - The patient has a BMI of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non-alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)
   - The patient is Asian, has a BMI of at least 25 kg/m(2), AND has at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non- alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)

   If yes, continue to #9.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

9. Has the patient achieved or maintained at least a 5 percent weight loss of baseline body weight?

   If yes, **approve all strengths and formulations for 12 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SEMAGLUTIDE - WEGOVY

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SEMAGLUTIDE - WEGOVY** requires the following rule(s) be met for renewal:

A. The request is for ONE of the following:
   1. To reduce the risk of cardiovascular death, heart attack, and stroke (a type of brain damage)
   2. Noncirrhotic metabolic dysfunction-associated steatohepatitis (MASH: a type of liver disease)/non-alcoholic steatohepatitis (NASH: a type of liver disease)
   3. Weight loss or weight management

B. If you will use Wegovy to reduce the risk of cardiovascular death, heart attack, and stroke, renewal also requires:
   1. You have cardiovascular disease (such as prior heart attack, prior stroke, carotid artery stenosis of at least 50 percent [the blood vessel that transports blood to the brain is blocked], symptomatic peripheral arterial disease [PAD])
   2. Wegovy will be used in combination with a reduced calorie diet and increased physical activity
   3. You will NOT use Wegovy concurrently (at the same time) with another GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]) or a GLP-1/GIP receptor agonist (a type of medication such as Zepbound [tirzepatide], Mounjaro [tirzepatide])
   4. You have a history of and will continue to use, or you have a contraindication to (harmful for you to use), ALL of the following standard treatments for the secondary prevention (reduce the risk) of a major adverse cardiovascular event (such as a non-fatal myocardial infarction [heart attack], non-fatal stroke [a type of brain damage]):
      a. An antiplatelet medication (such as aspirin, clopidogrel, ticagrelor, aspirin-dipyridamole), unless you have a history of a hemorrhagic stroke (a type of brain damage caused by broken blood vessels in the brain)
      b. A HMG-CoA reductase inhibitor (statins) (such as atorvastatin, lovastatin, pravastatin, rosuvastatin, simvastatin)
      c. A blood pressure medication (such as angiotensin-converting enzyme inhibitors [ACEi such as lisinopril], angiotensin II receptor blockers [ARBs such as losartan], beta blockers [such as propranolol])

(Renewal denial text continued on the next page)

RENEWAL CRITERIA (CONTINUED)

C. If you will use Wegovy for noncirrhotic metabolic dysfunction-associated steatohepatitis/non-alcoholic steatohepatitis, renewal also requires:

1. Your disease is stable or has improved from baseline
2. You will NOT use Wegovy concurrently (at the same time) with Rezdiffra (resmetirom), another GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]), or a GLP-1/GIP receptor agonist (a type of medication such as Zepbound [tirzepatide], Mounjaro [tirzepatide])
3. You have had a biopsy (removal of cells or tissue from the body for examination) or non- invasive test (such as elastography [type of imaging test], Enhanced Liver Fibrosis [ELF] testing [a type of blood test]) which demonstrates liver fibrosis stage 2 or 3 (scoring system to measure liver damage)

D. If you will use Wegovy for weight loss or weight management, renewal also requires:

1. You will NOT use Wegovy concurrently (at the same time) with another GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]) or a GLP-1/GIP receptor agonist (a type of medication such as Zepbound [tirzepatide], Mounjaro [tirzepatide])

(Renewal denial text continued on the next page)

RENEWAL CRITERIA (CONTINUED)

2. You meet ONE of the following:
   a. You are 12 to 17 years of age AND have achieved or maintained at least a 5 percent weight loss of baseline body mass index (BMI: a tool for evaluating body fat)
   b. You are 18 years of age or older and meet ALL of the following:
      i. You meet ONE of the following before starting weight loss therapy:
         1. You have a body mass index (BMI: a tool for evaluating body fat) of at least 30 kg/m(2)
         2. You are Asian and have a body mass index (BMI: a tool for evaluating body fat) of at least 27.5 kg/m(2)
         3. You have a body mass index (BMI: a tool for evaluating body fat) of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], dyslipidemia [abnormal levels of fat], cardiovascular disease [condition of the heart or blood vessels], coronary artery disease [CAD: a type of heart condition], sleep apnea [a type of sleep condition with difficulty breathing], osteoarthritis [a type of joint condition] of the knee[s], polycystic ovarian syndrome [a hormonal disorder], non-alcoholic steatohepatitis/non-alcoholic fatty liver disease [a type of liver disease], asthma [a type of lung condition], and chronic obstructive pulmonary disease [COPD: a type of lung condition])
         4. You are Asian, have a body mass index (BMI: a tool for evaluating body fat) of at least 25 kg/m(2), AND have at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], dyslipidemia [abnormal levels of fat], cardiovascular disease [condition of the heart or blood vessels], coronary artery disease [CAD: a type of heart condition], sleep apnea [a type of sleep condition with difficulty breathing], osteoarthritis [a type of joint condition] of the knee[s], polycystic ovarian syndrome [a hormonal disorder], non-alcoholic steatohepatitis/non-alcoholic fatty liver disease [a type of liver disease], asthma [a type of lung condition], and chronic obstructive pulmonary disease [COPD: a type of lung condition])
      ii. You have achieved or maintained at least a 5 percent weight loss of baseline body weight

SEPIAPTERIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SEPIAPTERIN	SEPHIENCE	50760		GPI-10 (3090856800)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of sepiapterin-responsive phenylketonuria (PKU) with hyperphenylalaninemia (HPA) (ICD-10 E70.1) and meet **ALL** of the following criteria?
   - The patient is 1 month of age or older
   - Therapy is prescribed by or in consultation with a metabolic or genetic disease specialist
   - The patient follows a phenylalanine-restricted diet
   - Sephience will NOT be used concurrently with another agent indicated for the treatment of phenylketonuria (PKU) (e.g., Kuvan [sapropterin], Palynziq [pegvaliase-pqpz])
   - The patient had a trial of or contraindication to the preferred agent: Kuvan (sapropterin)

   If yes, **approve for 6 weeks by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SEPIAPTERIN (Sephience)** requires the following rule(s) be met for approval:
   A. You have sepiapterin-responsive phenylketonuria (PKU: a type of genetic metabolic disorder) with hyperphenylalaninemia (HPA: high levels of a type of amino acid)
   B. You are 1 month of age or older
   C. Therapy is prescribed by or in consultation with a metabolic or genetic disease specialist (a doctor that treats metabolic or gene disorders)
   D. You follow a phenylalanine-restricted diet (a type of diet)
   E. You will NOT use Sephience concurrently (at the same time) with another medication indicated for the treatment of phenylketonuria (PKU) (such as Kuvan [sapropterin], Palynziq [pegvaliase-pqpz])
   F. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Kuvan (sapropterin)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SEPIAPTERIN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of sepiapterin-responsive phenylketonuria (PKU) with hyperphenylalaninemia (HPA) (ICD-10 E70.1) and meet **ALL** of the following criteria?
   - The patient has experienced a reduction in phenylalanine (Phe) levels by at least 30% compared to baseline or to a level below 360 micromoles/L
   - Sephience will NOT be used concurrently with another agent indicated for the treatment of phenylketonuria (PKU) (e.g., Kuvan [sapropterin], Palynziq [pegvaliase-pqpz])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SEPIAPTERIN (Sephience)** requires the following rule(s) be met for renewal:
   A. You have sepiapterin-responsive phenylketonuria (PKU: a type of genetic metabolic disorder) with hyperphenylalaninemia (HPA: high levels of a type of amino acid)
   B. Your phenylalanine (Phe) levels have decreased by at least 30 percent compared to baseline (before treatment) or to a level below 360 micromoles/L
   C. You will NOT use Sephience concurrently (at the same time) with another medication indicated for the treatment of phenylketonuria (PKU) (such as Kuvan [sapropterin], Palynziq [pegvaliase-pqpz])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Sephience.

SETMELANOTIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SETMELANOTIDE ACETATE	IMCIVREE	47002		GPI-10 (3090846010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of obesity (ICD-10 E66.8, E66.9) due to Bardet-Biedl syndrome (BBS) (ICD-10 Q87.83) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist, geneticist, or metabolic specialist
   - The patient meets ONE of the following criteria:
     - The patient is 2 to 5 years of age AND has a baseline body mass index (BMI) of at least in the 97th percentile for age, sex, and body weight
     - The patient is 6 to 17 years of age AND has a baseline body weight of at least in the 97th percentile using growth chart assessments
     - The patient is 18 years of age or older AND has a baseline body mass index (BMI) of at least 30 kg/m2

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.3 mL per day.** If no, continue to #2.

2. Does the patient have a diagnosis of obesity due to a pro-opiomelanocortin (POMC), proprotein convertase subtilisin/kexin type 1 (PCSK1), or leptin receptor (LEPR) deficiency (ICD-10 E88.82), as determined by an FDA-approved genetic test, and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist, geneticist, or metabolic specialist
   - The patient meets ONE of the following criteria:
     - The patient is 2 to 5 years of age AND has a baseline body mass index (BMI) of at least in the 97th percentile for age and sex
     - The patient is 6 to 17 years of age AND has a baseline body weight of at least in the 95th percentile using growth chart assessments
     - The patient is 18 years of age or older AND has a baseline body mass index (BMI) of at least 30 kg/m2

   If yes, **approve for 16 weeks by HICL or GPI-10 with a quantity limit of #0.3 mL per day.** If no, continue to #3.

SETMELANOTIDE

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of acquired hypothalamic obesity (HO) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist, geneticist, or metabolic specialist
   - The patient has or had hypothalamic damage or injury (e.g., tumors impacting the hypothalamus [such as craniopharyngioma], surgery or radiation to treat those tumors, other forms of hypothalamic damage [such as brain injury impacting the region])
   - The patient meets ONE of the following criteria:
     - The patient is 4 to 17 years of age AND has a baseline body mass index (BMI) of at least in the 95th percentile for age and sex on growth chart assessments
     - The patient is 18 years of age or older AND has a baseline body mass index (BMI) of at least 30 kg/m2

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.3mL per day.** If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SETMELANOTIDE (Imcivree)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Obesity (a condition where you have higher than normal body fat) due to Bardet-Biedl syndrome (BBS: a genetic disorder)
      2. Obesity (a condition where you have higher than normal body fat) due to pro-opiomelanocortin (POMC: type of protein), proprotein convertase subtilisin/kexin type 1 (PCSK1: type of protein), or leptin receptor (LEPR: type of protein) deficiency (low level), as determined by a Food and Drug Administration (FDA)-approved genetic test
      3. Acquired hypothalamic obesity (a condition where you have higher than normal body fat due to injury to the hypothalamus [a part of the brain])

   (Initial denial text continued on next page)

INITIAL CRITERIA (CONTINUED)

B. If you have obesity due to Bardet-Biedl syndrome, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), geneticist (doctor who treats gene disorders), or metabolic specialist (a doctor or health expert who focuses on how the body turns food into energy)
2. You meet ONE of the following:
   a. You are 2 to 5 years of age AND have a baseline (before treatment) body mass index (BMI: a tool for evaluating body fat) of at least in the 97th percentile for age, sex, and body weight
   b. You are 6 to 17 years of age AND have a baseline (before treatment) body weight of at least in the 97th percentile using growth chart assessments
   c. You are 18 years of age or older AND have a baseline (before treatment) body mass index (BMI: a tool for evaluating body fat) of at least 30 kg/m2

C. If you have obesity due to pro-opiomelanocortin, proprotein convertase subtilisin/kexin type 1, or leptin receptor deficiency, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), geneticist (doctor who treats gene disorders), or metabolic specialist (a doctor or health expert who focuses on how the body turns food into energy)
2. You meet ONE of the following:
   a. You are 2 to 5 years of age AND have a baseline (before treatment) body mass index (BMI: a tool for evaluating body fat) of at least in the 97th percentile for age and sex
   b. You are 6 to 17 years of age AND have a baseline (before treatment) body weight of at least in the 95th percentile using growth chart assessments
   c. You are 18 years of age or older AND have a baseline (before treatment) body mass index (BMI: a tool for evaluating body fat) of at least 30 kg/m2

D. If you have acquired hypothalamic obesity, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), geneticist (doctor who treats gene disorders), or metabolic specialist (a doctor or health expert who focuses on how the body turns food into energy)
2. You have or had hypothalamic damage or injury (damage or injury to part of the brain such as tumors impacting the hypothalamus [such as craniopharyngioma (a non- cancerous brain tumor)], surgery or radiation to treat those tumors, other forms of hypothalamic damage [such as brain injury impacting the region])
3. You meet ONE of the following:
   a. You are 4 to 17 years of age AND have a baseline (before treatment) body mass index (BMI: a tool for evaluating body fat) of at least in the 95th percentile for age and sex on growth chart assessments
   b. You are 18 years of age or older AND have a baseline (before treatment) body mass index (BMI) of at least 30 kg/m2

SETMELANOTIDE

RENEWAL CRITERIA

1. Does the patient have **ONE** of the following diagnoses?
   - Bardet-Biedl syndrome (BBS) (ICD-10 Q87.83)
   - Pro-opiomelanocortin (POMC), proprotein convertase subtilisin/kexin type 1 (PCSK1), or leptin receptor (LEPR) deficiency
   - Acquired hypothalamic obesity (HO)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient is 2 to 17 years of age AND has achieved or maintained at least a 5 percent weight loss of baseline body mass index (BMI)
   - The patient is 18 years of age or older AND has achieved or maintained at least a 5 percent weight loss of baseline body weight

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.3 mL per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SETMELANOTIDE (Imcivree)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Bardet-Biedl syndrome (BBS: a genetic disorder)
      2. Pro-opiomelanocortin (POMC: type of protein), proprotein convertase subtilisin/kexin type 1 (PCSK1: type of protein), or leptin receptor (LEPR: type of protein) deficiency (low level)
      3. Acquired hypothalamic obesity (HO: a condition where you have higher than normal body fat due to injury to the hypothalamus [a part of the brain])
   B. You meet ONE of the following:
      1. You are 2 to 17 years of age AND have achieved or maintained at least a 5 percent weight loss of baseline (before treatment) body mass index (BMI: a tool for evaluating body fat)
      2. You are 18 years of age or older AND have achieved or maintained at least a 5 percent weight loss of baseline (before treatment) body weight

SEVABERTINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SEVABERTINIB	HYRNUO	51015		GPI-10 (2153305700)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic non-squamous non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has tumors with HER2 (ERBB2) tyrosine kinase domain (TKD) activating mutations, as detected by an FDA-authorized test

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT:

   Our guideline named **SEVABERTINIB (Hyrnuo)** requires the following rule(s) be met for approval:
   A. You have locally advanced or metastatic non-squamous non-small cell lung cancer (NSCLC) (a type of lung cancer that has spread from where it started to nearby tissue, lymph nodes, or other parts of the body)
   B. You are 18 years of age or older
   C. Your tumors have HER2 (ERBB2) tyrosine kinase domain (TKD) activating mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-authorized test

SIBEPRENLIMAB-SZSI	VOYXACT	51027		GPI-10 (5648055000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is at risk for disease progression
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient's diagnosis is confirmed by a biopsy
   - The patient has proteinuria of at least 0.5 g/day
   - The patient has an eGFR of at least 30 mL/min/1.73 m(2)
   - The patient has tried an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use, OR has a contraindication to both drug classes
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Vanrafia (atrasentan), Filspari (sparsentan), Fabhalta (iptacopan)

   If yes, **approve for 9 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SIBEPRENLIMAB-SZSI

INITIAL CRITERIA (CONTINUED ON NEXT PAGE)

INITIAL DENIAL TEXT:

Our guideline named **SIBEPRENLIMAB-SZSI (Voyxact)** requires the following rule(s) be met for approval:

A. You have primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
B. You are 18 years of age or older
C. You are at risk for disease progression (worsening of disease)
D. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
E. Your diagnosis is confirmed by a biopsy (removal of cells or tissue from the kidney for examination)
F. You have proteinuria (high levels of protein in the urine) of at least 0.5 g/day
G. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 30 mL/min/1.73 m(2)
H. You have tried an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan) for at least three months at a maximum tolerated dose and will continue use, OR you have a contraindication to (harmful for you to use) both of these medication classes
I. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Vanrafia (atrasentan), Filspari (sparsentan), Fabhalta (iptacopan)

PRIOR AUTHORIZATION GUIDELINES

SIBEPRENLIMAB-SZSI

RENEWAL CRITERIA

1. Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) and meet **ONE** of the following criteria?
   - The patient has had a reduction in proteinuria
   - The patient has improved or stable kidney function compared to baseline

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT:

   Our guideline named **SIBEPRENLIMAB-SZSI (Voyxact)** requires the following rule(s) be met for renewal:
   A. You have primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
   B. You meet ONE of the following:
      1. You have had a reduction (decrease) in proteinuria (a condition with high levels of protein in the urine)
      2. You have improved or stable kidney function compared to baseline (before starting Voyxact)

RATIONALE

SILDENAFIL IV

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SILDENAFIL CITRATE	REVATIO, SILDENAFIL CITRATE		28273	GPI-14 (40143060102020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The requested medication will NOT be used concurrently or intermittently with oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - The requested medication will NOT be used concurrently with guanylate cyclase stimulators (e.g., Adempas [riociguat])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) of greater than 2 Wood units (WU)

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #37.5mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SILDENAFIL IV

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SILDENAFIL IV (Revatio)** requires the following rule(s) be met for approval:

A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
D. Your pulmonary arterial hypertension is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
    1. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
    2. Pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg
    3. Pulmonary vascular resistance (PVR) greater than 2 Wood units
E. You will NOT use the requested medication concurrently (at the same time) or intermittently (off and on) with oral erectile dysfunction medications (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
F. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (such as Adempas [riociguat])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SILDENAFIL SUSPENSION

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The requested medication will NOT be used concurrently or intermittently with oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - The requested medication will NOT be used concurrently with guanylate cyclase stimulators (e.g., Adempas [riociguat])

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) of greater than 2 Wood units (WU)

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Is the request for **Revatio** (sildenafil) suspension **AND** the patient meets the following criterion?
   - The patient is unable to swallow pills and has tried crushed sildenafil tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #26.13mL per day.**
   If no, continue to #6.

6. Is the request for **Liqrev** suspension and the patient meets **ALL** of the following criteria?
   - The patient is unable to swallow Revatio (sildenafil) tablets
   - The patient had a trial of the preferred agent: generic sildenafil powder for suspension

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #8.13mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SILDENAFIL SUSPENSION

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SILDENAFIL SUSPENSION (Revatio, Liqrev)** requires the following rule(s) be met for approval:

A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1)

B. If you are 1 to 17 years of age, approval also requires:

1. You are requesting Revatio (sildenafil) suspension
2. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
3. Your pulmonary arterial hypertension is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
   a. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   b. Pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg
   c. Pulmonary vascular resistance (PVR) greater than or equal to 3 Wood units
4. You will NOT use the requested medication concurrently (at the same time) or intermittently (off and on) with oral erectile dysfunction medications (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
5. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (such as Adempas [riociguat])
6. You are unable to swallow pills AND you have tried crushed sildenafil tablets

C. If you are 18 years of age or older, approval also requires:

1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
2. Your pulmonary arterial hypertension is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
   a. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   b. Pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg
   c. Pulmonary vascular resistance (PVR) greater than 2 Wood units
3. You will NOT use the requested medication concurrently (at the same time) or intermittently (off and on) with oral erectile dysfunction medications (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
4. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (such as Adempas [riociguat])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient 1 to 17 years of age **AND** meets the following criterion?
   - The request is for Revatio (sildenafil) suspension

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #14.93mL per day.**
   If no, continue to #3.

3. Is the patient 18 years of age or older?

   If yes**, approve for 12 months by GPID or GPI-14 for the requested agent with the following quantity limits:**
   - **Revatio (sildenafil): #26.13mL per day.**
   - **Liqrev (sildenafil): #8.13mL per day.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SILDENAFIL SUSPENSION

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SILDENAFIL SUSPENSION (Revatio, Liqrev)** requires the following rule(s) be met for renewal:

A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1)

B. If you are 1 to 17 years of age, approval also requires:

1. You are requesting Revatio (sildenafil) suspension
2. You will NOT use the requested medication concurrently (at the same time) or intermittently (off and on) with oral erectile dysfunction medications (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
3. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (such as Adempas [riociguat])

C. If you are 18 years of age or older, approval also requires:

1. You will NOT use the requested medication concurrently (at the same time) or intermittently (off and on) with oral erectile dysfunction medications (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
2. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (such as Adempas [riociguat])

RATIONALE

SILDENAFIL TABLET

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SILDENAFIL CITRATE	REVATIO, SILDENAFIL CITRATE		24758	GPI-14 (40143060100320)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is 1 to 17 years of age
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The requested medication will NOT be used concurrently or intermittently with oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - The requested medication will NOT be used concurrently with guanylate cyclase stimulators (e.g., Adempas [riociguat])

   If yes, continue to #2.
   If no, continue to #3.

2. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) of greater than or equal to 3 Wood units (WU)

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #6 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SILDENAFIL TABLET

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The requested medication will NOT be used concurrently or intermittently with oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - The requested medication will NOT be used concurrently with guanylate cyclase stimulators (e.g., Adempas [riociguat])

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) of greater than 2 Wood units (WU)

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #12 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SILDENAFIL TABLET (Revatio)** requires the following rule(s) be met for approval:
   A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1)
   (Initial denial text continued on next page)

SILDENAFIL TABLET

INITIAL CRITERIA (CONTINUED)

B. If you are 1 to 17 years of age, approval also requires:

1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
2. Your pulmonary arterial hypertension is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
   a. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   b. Pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg
   c. Pulmonary vascular resistance (PVR) greater than or equal to 3 Wood units
3. You will NOT use the requested medication concurrently (at the same time) or intermittently (off and on) with oral erectile dysfunction medications (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
4. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (such as Adempas [riociguat])

C. If you are 18 years of age or older, approval also requires:

1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
2. Your pulmonary arterial hypertension is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
   a. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   b. Pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg
   c. Pulmonary vascular resistance (PVR) greater than 2 Wood units
3. You will NOT use the requested medication concurrently (at the same time) or intermittently (off and on) with oral erectile dysfunction medications (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
4. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (such as Adempas [riociguat])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SIMVASTATIN ORAL SUSPENSION

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SIMVASTATIN	FLOLIPID		41189 41192	GPI-14 (39400075001810, 39400075001820)	

GUIDELINES FOR USE

1. Does the patient meet **ONE** of the following criteria?
   - The patient has a contraindication to or is unable to swallow simvastatin oral tablets
   - The patient has dysphagia (ICD-10 Group R13.1), difficulty swallowing tablets, or a feeding tube (e.g., G-tube or J-tube)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient also requesting a zero-dollar cost share exception (i.e., the plan follows Affordable Care Act [ACA] recommendations and is linked to MedImpact's Essential Health Benefit Tables)?

   If yes, continue to #3.
   If no, **approve the requested medication for 12 months by GPID or GPI-14 with a quantity limit of #5mL per day.**

3. Does the patient meet **ALL** of the following criteria?
   - The patient is between 40 to 75 years old
   - The requested quantity is within the low to moderate intensity daily dosage of 5mg to 40mg
   - The patient is NOT concurrently taking any of the below secondary prevention medications for cardiovascular disease:
     - Aspirin/dipyridamole (Aggrenox)
     - Clopidogrel (Plavix)
     - Dipyridamole
     - Nitroglycerin (oral, sublingual, transdermal, translingual dosage forms)
     - Prasugrel (Effient)
     - Ticagrelor (Brilinta)
     - Ticlopidine
     - Vorapaxar (Zontivity)

   If yes, **approve the requested medication for 12 months by GPID or GPI-14 with a quantity limit of #5mL per day at zero copay.**

   If no, **approve the requested medication for 12 months by GPID or GPI-14 with a quantity limit of #5mL per day (DO NOT enter a zero copay).**

SIMVASTATIN ORAL SUSPENSION

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SIMVASTATIN ORAL SUSPENSION (Flolipid)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. You have a contraindication to (harmful for you to use) or are unable to swallow simvastatin oral tablets
   2. You have dysphagia (difficulty swallowing), difficulty swallowing tablets, or a feeding tube (such as a G-tube or J-tube)

B. Requests for zero-dollar cost share also requires the following:
   1. You are between 40 to 75 years old
   2. The requested quantity is within the low to moderate intensity daily dosage of 5mg to 40mg
   3. You are NOT concurrently (at the same time) taking any of the following secondary prevention medications for cardiovascular disease (heart disease):
      a. Aspirin/dipyridamole (Aggrenox)
      b. Clopidogrel (Plavix)
      c. Dipyridamole
      d. Nitroglycerin (oral, sublingual, transdermal, translingual dosage forms)
      e. Prasugrel (Effient)
      f. Ticagrelor (Brilinta)
      g. Ticlopidine
      h. Vorapaxar (Zontivity)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Flolipid.

This guideline also applies to plans where the pharmacy benefit allows for coverage of Flolipid at zero copay. The override criteria allow patient a zero copay by waiving the applicable cost-sharing to Flolipid, which is included in the MedImpact EHB Zero Dollar Copay List.

SIROLIMUS	HYFTOR		52138	GPI-10 (9078407000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of facial angiofibroma associated with tuberous sclerosis (ICD-10 Q85.1) **AND** meet the following criterion?
   - The patient is 6 years of age or older

   If yes, **approve for 12 weeks by GPID or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SIROLIMUS TOPICAL (Hyftor)** requires the following rule(s) be met for approval:
   A. You have facial angiofibroma (a type of skin condition) associated with tuberous sclerosis (a rare type of tumor disorder)
   B. You are 6 years of age or older

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

SODIUM OXYBATE-LUMRYZ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SODIUM OXYBATE	LUMRYZ	12346		GPI-10 (6245006020)	FORM ≠ SOLUTION

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cataplexy with narcolepsy (ICD-10 G47.411) and the narcolepsy diagnosis is confirmed by **ONE** of the following criteria?
   - The patient has a Multiple Sleep Latency Test (MSLT) showing both a mean sleep latency of 8 minutes or less AND two or more sleep-onset rapid eye movement periods (SOREMPs)
   - The patient has a SOREMP within 15 minutes of sleep onset
   - The patient has low orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ALL** of the following criteria?
   - The patient is 7 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - The patient has an Epworth Sleepiness Scale (ESS) score greater than 10
   - The patient had a trial of the preferred agent: generic sodium oxybate
   - Lumryz will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

   If yes, **approve for 6 months by GPID or GPI-14 for all of the following:**
   - **Lumryz 28-day Starter Pack: #1 per day for 1 fill only.**
   - **4.5gm packet: #1 per day.**
   - **6gm packet: #1 per day.**
   - **7.5gm packet: #1 per day.**
   - **9gm packet: #1 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of excessive daytime sleepiness (EDS) with narcolepsy (ICD-10 G47.419) and meet **ALL** of the following criteria?
   - The patient is 7 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - The patient has excessive daytime sleepiness (EDS) persisting for at least 3 months
   - The patient has an Epworth Sleepiness Scale (ESS) score of greater than 10
   - The patient had a trial of the preferred agent: generic sodium oxybate
   - Lumryz will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Is the patient's diagnosis confirmed by **ONE** of the following criteria?
   - The patient has a Multiple Sleep Latency Test (MSLT) showing both a mean sleep latency of 8 minutes or less AND at least two early-onset REM sleep periods (SOREMPs)
   - The patient has a Multiple Sleep Latency Test (MSLT) showing both a mean sleep latency of 8 minutes or less AND at least one early-onset REM sleep period (SOREMP) AND additionally one early-onset SOREMP (within approximately 15 minutes or less) on a polysomnography the night preceding the MSLT, with the polysomnography ruling out non-narcolepsy causes of EDS [**Note to Pharmacist:** Multiple Sleep Latency Test (MSLT) is a guideline-supported instrument for assessing the severity and likelihood of narcolepsy, which consists of five 20-minute nap periods spread throughout *a single test* day at 2-hour intervals]
   - The patient has normal orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay

   If yes, **approve for 6 months by GPID or GPI-14 for all of the following:**
   - **Lumryz 28-day Starter Pack: #1 per day for 1 fill only.**
   - **4.5gm packet: #1 per day.**
   - **6gm packet: #1 per day.**
   - **7.5gm packet: #1 per day.**
   - **9gm packet: #1 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SODIUM OXYBATE-LUMRYZ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SODIUM OXYBATE-LUMRYZ** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Cataplexy with narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)
   2. Excessive daytime sleepiness (EDS) with narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)

B. If you have cataplexy with narcolepsy, approval also requires:
   1. You are 7 years of age or older
   2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
   3. You have an Epworth Sleepiness Scale (tool to measure your sleepiness) score of more than 10
   4. Your narcolepsy (a type of sleep condition) is confirmed by ONE of the following:
      a. A Multiple Sleep Latency Test (MSLT: a type of sleep study) showing both a mean sleep latency of 8 minutes or less AND two or more sleep-onset rapid eye movement periods (SOREMPs: time it takes to enter dream sleep)
      b. You have a sleep-onset rapid eye movement period (SOREMP: time it takes to enter dream sleep) within 15 minutes of sleep onset
      c. You have low orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay (test showing you have low levels of a chemical that helps with staying awake)
   5. You have tried the preferred medication: generic sodium oxybate
   6. You will NOT use Lumryz concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy) (such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

(Initial denial text continued on next page)

SODIUM OXYBATE-LUMRYZ

INITIAL CRITERIA (CONTINUED)

C. If you have excessive daytime sleepiness (EDS) with narcolepsy, approval also requires:

1. You are 7 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
3. You will NOT use Lumryz concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy) (such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
4. You have excessive daytime sleepiness (EDS) persisting for at least 3 months
5. You have an Epworth Sleepiness Scale (tool to measure your sleepiness) score of greater than 10
6. You have tried the preferred medication: generic sodium oxybate
7. Your diagnosis is confirmed by ONE of the following:
   a. You have a Multiple Sleep Latency Test (MSLT: a type of sleep study) showing both an average sleep latency of 8 minutes or less AND at least 2 early-onset rapid eye movement (REM) sleep test periods (SOREMPs: time it takes to enter dream sleep)
   b. You have a Multiple Sleep Latency Test (MSLT: a type of sleep study) showing an average sleep latency of 8 minutes or less AND at least one early-onset rapid eye movement (REM) sleep test period (SOREMP: time it takes to enter dream sleep) AND additionally one SOREMP (within approximately 15 minutes) on a polysomnography (type of sleep test) the night before the MSLT, with the polysomnography ruling out non-narcolepsy causes of excessive daytime sleepiness (EDS)
   c. You have normal orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay (test showing you have normal levels of a chemical that helps with staying awake)

SODIUM OXYBATE-LUMRYZ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of narcolepsy (ICD-10 Group G47.41) **AND** meet the following criterion?
   - Lumryz will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has demonstrated improvement of cataplexy symptoms compared to baseline
   - The patient has maintained an improvement in Epworth Sleepiness Scale (ESS) scores by at least 25 percent compared to baseline
   - The patient has demonstrated improvement in sleep latency compared to baseline

   If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **4.5gm packet: #1 per day.**
   - **6gm packet: #1 per day.**
   - **7.5gm packet: #1 per day.**
   - **9gm packet: #1 per day.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SODIUM OXYBATE-LUMRYZ

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SODIUM OXYBATE-LUMRYZ** requires the following rule(s) be met for renewal:

A. You have narcolepsy (a type of sleep condition)
B. You will NOT use Lumryz concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy) (such as Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
C. You meet ONE of the following:
    1. You have demonstrated improvement in cataplexy symptoms (sudden and uncontrollable muscle weakness) compared to baseline
    2. You have maintained an improvement in Epworth Sleepiness Scale (ESS: tool to measure your sleepiness) scores by at least 25 percent compared to baseline
    3. You have demonstrated improvement in sleep latency (the amount of time it takes you to fall asleep) compared to baseline

SODIUM OXYBATE-XYREM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SODIUM OXYBATE	XYREM, SODIUM OXYBATE		18104	GPI-14 (62450060202020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of idiopathic hypersomnia (IH) (ICD-10 G47.11, G47.12) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - The requested medication will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Restoril [temazepam])
   - The patient does NOT have cataplexy
   - The patient has a Multiple Sleep Latency Test (MSLT) showing less than two sleep-onset REM sleep periods (SOREMP) OR no SOREMPs if REM sleep latency on polysomnogram is 15 minutes or less
   - The patient has one or more MSLT mean sleep latency of 8 minutes or less, OR total 24-hour sleep is 660 minutes or more on 24-hour polysomnography or by wrist actigraphy in association with a sleep log
   - The patient has had insufficient sleep syndrome ruled out, AND there is no better explanation by another sleep/medical/psychiatric disorder or use of drugs/medications, AND the patient has experienced daily periods of an irrepressible need to sleep or daytime lapses into sleep for at least 3 months
   - The patient had a trial of or contraindication to ONE of the following preferred agents: armodafinil (Nuvigil), modafinil (Provigil)

     If yes, continue to #8.
     If no, continue to #2.

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of cataplexy in narcolepsy (ICD-10 G47.411) and the narcolepsy diagnosis is confirmed by **ONE** of the following criteria?
   - The patient has a Multiple Sleep Latency Test (MSLT) showing both a mean sleep latency of 8 minutes or less AND two or more sleep-onset rapid eye movement periods (SOREMPs)
   - The patient has a SOREMP within 15 minutes of sleep onset
   - The patient has low orexin/hypocretin levels on a CSF assay

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ALL** of the following criteria?
   - The patient is 7 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - The patient has an Epworth Sleepiness Scale (ESS) score greater than 10
   - The requested medication will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Restoril [temazepam])
   - The patient had a trial of or contraindication to TWO of the following preferred agents: venlafaxine, fluoxetine, TCA (tricyclic antidepressant, e.g., amitriptyline, clomipramine, imipramine)

   If yes, continue to #8.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of excessive daytime sleepiness (EDS) in narcolepsy (ICD-10 G47.419) and meet **ALL** of the following criteria?
   - The patient is 7 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - The patient has EDS persisting for at least 3 months
   - The patient has an Epworth Sleepiness Scale (ESS) score of more than 10
   - The requested medication will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Restoril [temazepam])

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SODIUM OXYBATE-XYREM

INITIAL CRITERIA (CONTINUED)

5. Does the patient have **ONE** of the following criteria?
   - The patient has a Multiple Sleep Latency Test (MSLT) showing both a mean sleep latency of 8 minutes or less AND at least 2 early-onset REM sleep periods (SOREMPs)
   - The patient has a Multiple Sleep Latency Test (MSLT) showing a mean sleep latency of 8 minutes or less AND at least one early-onset REM sleep period (SOREMP) AND additionally one early-onset SOREMP (within approximately 15 minutes or less) on a polysomnography the night preceding the MSLT, with the polysomnography ruling out non-narcolepsy causes of EDS [**Note to pharmacist:** Multiple Sleep Latency Test (MSLT) is a guideline-supported instrument for assessing the severity and likelihood of narcolepsy, which consists of five 20-minute nap periods spread throughout *a single test* day at 2-hour intervals]
   - The patient has normal orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

6. Is the patient 7 to 17 years of age **AND** meet the following criterion?
   - The patient had a trial of or contraindication to the following preferred agent: a generic stimulant (e.g., amphetamine sulfate, dextroamphetamine, methylphenidate)

   If yes, continue to #8.
   If no, continue to #7.

7. Is the patient 18 years of age or older **AND** meet the following criterion?
   - The patient had a trial of or contraindication to ONE of the following preferred agents from EACH of the following categories:
     - A generic typical stimulant (e.g., amphetamine sulfate, dextroamphetamine, methylphenidate)
     - Armodafinil (Nuvigil) OR modafinil (Provigil)

   If yes, continue to #8.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

8. Is the request for generic sodium oxybate?

   If yes, **approve the generic only for 6 months by GPID or GPI-14 with a quantity limit of #18mL per day.**

   If no, continue to #9.

CONTINUED ON NEXT PAGE

SODIUM OXYBATE-XYREM

INITIAL CRITERIA (CONTINUED)

9. Is the request for brand Xyrem **AND** the patient meets the following criterion?
   - The patient had a trial of or contraindication to generic sodium oxybate

   If yes, **approve for 6 months by GPID or GPI-14 with a quantity limit of #18mL per day.**
   If no, do not approve. **(NOTE: Please enter a proactive PA for 6 months for generic sodium oxybate by GPID or GPI-14 with a quantity limit of #18mL per day.)**

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SODIUM OXYBATE (Xyrem)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Idiopathic hypersomnia (IH: a type of sleep disorder)
      2. Cataplexy in narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)
      3. Excessive daytime sleepiness (EDS) in narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)

SODIUM OXYBATE-XYREM

INITIAL CRITERIA (CONTINUED)

B. If you have idiopathic hypersomnia, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
3. You will NOT use the requested medication concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta (eszopiclone), Ambien (zolpidem), or Restoril (temazepam)
4. You do NOT have cataplexy (sudden and uncontrollable muscle weakness or paralysis associated with a sleep disorder)
5. You have a Multiple Sleep Latency Test (MSLT: a type of sleep study) showing less than 2 sleep-onset rapid eye movement (REM: a stage of sleep) sleep periods (SOREMP: time it takes to enter dream sleep), OR no SOREMPs if REM sleep latency (the time it takes to fall asleep and enter REM sleep stage) on a polysomnogram (type of sleep test) is 15 minutes or less
6. You have one or more Multiple Sleep Latency Test (MSLT: a type of sleep study) mean (average) sleep latency (the time it takes to fall asleep) of 8 minutes or less, OR total 24-hour sleep is 660 minutes or more on a 24-hour polysomnography (type of sleep test) or by wrist actigraphy (device that monitors movement) in association with a sleep log
7. You have had insufficient sleep syndrome ruled out, AND there is no better explanation by another sleep/medical/psychiatric disorder or use of drugs/medications, AND you have experienced daily periods of an irrepressible need to sleep or daytime lapses into sleep for at least 3 months
8. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: armodafinil (Nuvigil), modafinil (Provigil)
9. If you are requesting brand Xyrem, you have tried or have a contraindication to (harmful for you to use) generic sodium oxybate

(Initial denial text continued on next page)

SODIUM OXYBATE-XYREM

INITIAL CRITERIA (CONTINUED)

C. If you have cataplexy in narcolepsy, approval also requires:

1. You are 7 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
3. You have an Epworth Sleepiness Scale (tool to measure your sleepiness) score of more than 10
4. Your narcolepsy (a type of sleep condition) is confirmed by ONE of the following:
   a. A Multiple Sleep Latency Test (MSLT: a type of sleep study) showing both a mean sleep latency of 8 minutes or less AND two or more sleep-onset rapid eye movement periods (SOREMPs: time it takes to enter dream sleep)
   b. You have a sleep-onset rapid eye movement period (SOREMP: time it takes to enter dream sleep) within 15 minutes of sleep onset
   c. You have low orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay (test showing you have low levels of a chemical that helps with staying awake)
5. You will NOT use the requested medication concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta (eszopiclone), Ambien (zolpidem), Restoril (temazepam)
6. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: venlafaxine, fluoxetine, a tricyclic anti-depressant (such as amitriptyline, clomipramine, imipramine)
7. If you are requesting brand Xyrem, you have tried or have a contraindication to (harmful for you to use) generic sodium oxybate

(Initial denial text continued on next page)

SODIUM OXYBATE-XYREM

INITIAL CRITERIA (CONTINUED)

D. If you have excessive daytime sleepiness in narcolepsy, approval also requires:

1. You are 7 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
3. You have excessive daytime sleepiness (EDS) persisting for at least 3 months
4. You have an Epworth Sleepiness Scale (ESS: tool to measure sleepiness) score of more than 10
5. You have ONE of the following:
   a. A Multiple Sleep Latency Test (MSLT: a type of sleep study) showing both an average sleep latency (the time it takes to fall asleep) of 8 minutes or less AND at least 2 early-onset rapid eye movement (REM: a stage of sleep) sleep test periods (SOREMPs: time it takes to enter dream sleep)
   b. A Multiple Sleep Latency Test (MSLT: a type of sleep study) showing an average sleep latency (the time it takes to fall asleep) of 8 minutes or less AND at least one early-onset rapid eye movement (REM: a stage of sleep) sleep test period (SOREMP: time it takes to enter dream sleep) AND additionally one early-onset SOREMP (within approximately 15 minutes or less) on a polysomnography (type of sleep test) the night before the MSLT, with the polysomnography ruling out non-narcolepsy causes of excessive daytime sleepiness
   c. You have normal orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay (test showing normal levels of a chemical that helps with staying awake)
6. You will NOT use the requested medication concurrently (at the same time) with a sedative hypnotic agent (drugs that make you sleepy), such as Lunesta (eszopiclone), Ambien (zolpidem), Restoril (temazepam)
7. If you are 7 to 17 years old, you have tried or have a contraindication to (harmful for you to use) the following preferred medication: a generic stimulant (such as amphetamine sulfate, dextroamphetamine, or methylphenidate)
8. If you are 18 years of age or older, you have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications from EACH of the following categories:
   a. A generic typical stimulant (such as amphetamine sulfate, dextroamphetamine, methylphenidate)
   b. Armodafinil (Nuvigil) OR modafinil (Provigil)
9. If you are requesting brand Xyrem, you have tried or have a contraindication to (harmful for you to use) generic sodium oxybate

SODIUM OXYBATE-XYREM

RENEWAL CRITERIA

1. Does the patient have a diagnosis of narcolepsy (Group G47.411, G47.419) **AND** meet the following criterion?
   - The requested medication will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Restoril [temazepam])

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has demonstrated improvement of cataplexy symptoms compared to baseline
   - The patient has maintained an improvement in Epworth Sleepiness Scale (ESS) scores by at least 25 percent compared to baseline
   - The patient has demonstrated improvement in sleep latency from baseline

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #18mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Does the patient have a diagnosis of idiopathic hypersomnia (IH) (ICD-10 G47.11, G47.12) and meet **ALL** of the following criteria?
   - The requested medication will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Restoril [temazepam])
   - The patient has demonstrated improvement of idiopathic hypersomnia symptoms compared to baseline OR maintained an improvement in Epworth Sleepiness Scale (ESS) scores by at least 25 percent compared to baseline

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #18mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SODIUM OXYBATE-XYREM

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SODIUM OXYBATE (Xyrem)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Narcolepsy (uncontrollable daytime sleepiness)
   2. Idiopathic hypersomnia (IH: a type of sleep disorder)

B. If you have narcolepsy, renewal also requires:
   1. You will NOT use the requested medication concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta [eszopiclone], Ambien [zolpidem], Restoril [temazepam]
   2. You meet ONE of the following:
      a. You have demonstrated improvement in cataplexy symptoms (sudden and uncontrollable muscle weakness) compared to baseline (before treatment)
      b. You have maintained improvement in Epworth Sleepiness Scale (tool to measure sleepiness) scores by at least 25 percent compared to baseline
      c. You have demonstrated improvement in sleep latency (the amount of time it takes to fall asleep)

C. If you have idiopathic hypersomnia, renewal also requires:
   1. You will NOT use the requested medication concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta [eszopiclone], Ambien [zolpidem], Restoril [temazepam]
   2. You have demonstrated improvement of idiopathic hypersomnia symptoms compared to baseline (before treatment) OR you have maintained an improvement in Epworth Sleepiness Scale (tool to measure sleepiness) scores by at least 25 percent compared to baseline

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Xyrem.

PRIOR AUTHORIZATION GUIDELINES

SODIUM PHENYLBUTYRATE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SODIUM PHENYLBUTYRATE	BUPHENYL, PHEBURANE, OLPRUVA, SODIUM PHENYLBUTYRATE	11317		GPI-10 (3090806000)	ROUTE = ORAL

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of a urea cycle disorder (UCD) (ICD-10 Group E72.2) and meet **ALL** of the following criteria?
   - The patient's UCD is confirmed by enzymatic, biochemical or genetic testing
   - The requested medication will be used as adjunctive therapy along with dietary protein restriction
   - The patient's disorder cannot be managed by dietary protein restriction or amino acid supplementation alone

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the request for Buphenyl (sodium phenylbutyrate)?

   If yes, **approve the requested formulation for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **Buphenyl tablets: #40 per day.**
   - **Buphenyl powder: #21.3 grams per day.**

   If no, continue to #3.

3. Is the request for Pheburane, and the patient meets **ALL** of the following criteria?
   - The patient had a trial of or contraindication to generic sodium phenylbutyrate powder
   - The patient is unable to swallow Buphenyl (sodium phenylbutyrate) tablet

   If yes, **approve Pheburane for 12 months by GPID or GPI-14 with a quantity limit of #41.5grams per day.**

   If no, continue to #4.

SODIUM PHENYLBUTYRATE

INITIAL CRITERIA (CONTINUED)

4. Is the request for Olpruva, and the patient meets **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient had a trial of or contraindication to generic sodium phenylbutyrate powder
   - The patient is unable to swallow Buphenyl (sodium phenylbutyrate) tablet

   If yes, **approve the requested strength of Olpruva for 12 months by GPID or GPI-14 as follows:**
   - **2 grams: #12 per day.**
   - **3 grams: #12 per day.**
   - **4 grams: #15 per day.**
   - **5 grams: #12 per day.**
   - **6 grams: #9 per day.**
   - **6.67 grams: #9 per day.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SODIUM PHENYLBUTYRATE (Buphenyl, Pheburane, Olpruva)** requires the following rule(s) be met for approval:

   A. You have a urea cycle disorder (UCD: a genetic disorder that causes high ammonia levels in the blood)
   B. Your disorder is confirmed by enzymatic, biochemical or genetic testing (types of lab tests)
   C. The requested medication will be used as adjunctive (add-on) therapy along with dietary protein restriction
   D. Your disorder cannot be managed by dietary protein restriction or amino acid supplementation alone
   E. If your request is for Pheburane, approval also requires:
      1. You have tried or have a contraindication to (harmful for you to use) generic sodium phenylbutyrate powder
      2. You are unable to swallow Buphenyl (sodium phenylbutyrate) tablet
   F. If your request is for Olpruva, approval also requires:
      1. You are 1 year of age or older
      2. You have tried or have a contraindication to (harmful for you to use) generic sodium phenylbutyrate powder
      3. You are unable to swallow Buphenyl (sodium phenylbutyrate) tablet

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SODIUM PHENYLBUTYRATE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of a urea cycle disorder (UCD) (ICD-10 Group E72.2) **AND** meet the following criterion?
   - The patient has experienced a clinical benefit from baseline (e.g., normal fasting glutamine, low- normal fasting ammonia levels, mental status clarity)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the request for Buphenyl or Pheburane?

   If yes, **approve the requested medication for 12 months by GPID or GPI-14 as follows:**
   - **Buphenyl tablets: #40 per day.**
   - **Buphenyl powder: #21.3 grams per day.**
   - **Pheburane: #41.5 grams per day.**

   If no, continue to #3.

3. Is the request for Olpruva?

   If yes, **approve the requested strength of Olpruva for 12 months by GPID or GPI-14 as follows:**
   - **2 grams: #12 per day.**
   - **3 grams: #12 per day.**
   - **4 grams: #15 per day.**
   - **5 grams: #12 per day.**
   - **6 grams: #9 per day.**
   - **6.67 grams: #9 per day.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

SODIUM/CALCIUM/MAG/POT OXYBATE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SODIUM, CALCIUM, MAG, POT OXYBATE	XYWAV	46743		GPI-10 (6245990420)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of idiopathic hypersomnia (IH) (ICD-10 G47.11, G47.12) and the diagnosis is confirmed by **ALL** of the following criteria?
   - The patient does not have cataplexy
   - The patient has a Multiple Sleep Latency Test (MSLT) showing less than 2 sleep-onset REM sleep periods (SOREMP) OR no SOREMPs if REM sleep latency on polysomnogram is 15 minutes or less
   - The patient has 1 or more MSLT mean sleep latency of 8 minutes or less, OR total 24-hour sleep is 660 minutes or more on 24-hour polysomnography or by wrist actigraphy in association with a sleep log
   - The patient has had insufficient sleep syndrome ruled out, AND there is no better explanation by another sleep/medical/psychiatric disorder or use of drugs/medications, AND the patient has experienced daily periods of irrepressible need to sleep or daytime lapses into sleep for at least 3 months

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - Xywav will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
   - The patient had a trial and failure of or contraindication to ONE of the following preferred agents: armodafinil, modafinil

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #18mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SODIUM/CALCIUM/MAG/POT OXYBATE

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of cataplexy in narcolepsy (ICD-10 G47.411) and the narcolepsy diagnosis is confirmed by **ONE** of the following criteria?
   - The patient has a Multiple Sleep Latency Test (MSLT) showing both a mean sleep latency of 8 minutes or less AND two or more sleep-onset rapid eye movement periods (SOREMPs)
   - The patient has a SOREMP within 15 minutes of sleep onset
   - The patient has low orexin/hypocretin levels on CSF assay

   If yes, continue to #4.
   If no, continue to #5.

4. Does the patient meet **ALL** of the following criteria?
   - The patient is 7 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - The patient has an Epworth Sleepiness Scale (ESS) score greater than 10
   - Xywav will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
   - The patient has tried TWO of the following preferred agents: venlafaxine, fluoxetine, TCA (e.g., amitriptyline, clomipramine, imipramine)

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #18mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Does the patient have a diagnosis of excessive daytime sleepiness (EDS) in narcolepsy (ICD-10 G47.419) and the narcolepsy diagnosis is confirmed by **ONE** of the following criteria?
   - The patient has a Multiple Sleep Latency Test (MSLT) showing both a mean sleep latency of 8 minutes or less AND two or more early-onset REM sleep periods (SOREMPs)
   - The patient has a Multiple Sleep Latency Test (MSLT) showing both a mean sleep latency of 8 minutes or less AND one or more early-onset REM sleep periods (SOREMPS) AND additionally one early-onset SOREMP (within approx. 15 minutes or less) on a polysomnography the night preceding the MSLT, with the polysomnography ruling out non-narcolepsy causes of EDS [**Note to pharmacist**: Multiple Sleep Latency Test (MSLT) is a guideline-supported instrument for assessing the severity and likelihood of narcolepsy, which consists of five 20-minute nap periods spread throughout a single test day at 2-hour intervals]
   - The patient has normal orexin/hypocretin levels on a CSF assay

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SODIUM/CALCIUM/MAG/POT OXYBATE

INITIAL CRITERIA (CONTINUED)

6. Does the patient meet **ALL** of the following criteria?
   - The patient is 7 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - The patient has EDS persisting for at least 3 months and an Epworth Sleepiness Scale (ESS) score greater than 10
   - Xywav will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])
   - The patient meets ONE of the following:
     - The patient is 7 to 17 years of age AND had a trial and failure of or contraindication to the following preferred agent: a generic stimulant (e.g., amphetamine, dextroamphetamine, methylphenidate)
     - The patient is 18 years of age or older AND had a trial and failure of or contraindication to ONE of the following preferred agents:
       - A generic typical stimulant (e.g., amphetamine sulfate, dextroamphetamine, methylphenidate)
       - Armodafinil OR modafinil

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #18mL per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SODIUM/CALCIUM/MAG/POT OXYBATE (Xywav)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Idiopathic hypersomnia (IH: a type of sleep disorder)
      2. Cataplexy in narcolepsy (a type of sleep condition with extreme drowsiness with sudden and uncontrollable muscle weakness)
      3. Excessive daytime sleepiness (EDS) in narcolepsy (a type of sleep condition with overwhelming daytime drowsiness)

   (Initial denial text continued on next page)

SODIUM/CALCIUM/MAG/POT OXYBATE

INITIAL CRITERIA (CONTINUED)

B. If you have idiopathic hypersomnia, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
3. You will NOT use Xywav concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta (eszopiclone), Ambien (zolpidem), Sonata (zaleplon), estazolam, Restoril (temazepam), Halcion (triazolam), flurazepam, quazepam, Belsomra (suvorexant)
4. Your diagnosis is confirmed by ALL of the following:
   a. You do not have cataplexy (sudden and uncontrollable muscle weakness or paralysis associated with a sleep disorder)
   b. You have a Multiple Sleep Latency Test (MSLT: a type of sleep study) showing less than 2 sleep-onset REM sleep periods (SOREMP: time it takes to enter dream sleep) OR no SOREMPs if REM sleep latency on polysomnogram (type of sleep test) is 15 minutes or less
   c. You have 1 or more MSLT mean sleep latency of 8 minutes or less, OR total 24-hour sleep is 660 minutes or more on 24-hour polysomnography or by wrist actigraphy (device that monitors movement) in association with a sleep log
   d. You have had insufficient sleep syndrome ruled out, AND there is no better explanation by another sleep/medical/psychiatric disorder or use of drugs/medications, AND you have experienced daily periods of irrepressible need to sleep or daytime lapses into sleep for at least 3 months
5. You tried and failed or have a contraindication to (harmful for you to use) ONE of the following preferred medications: armodafinil, modafinil

(Initial denial text continued on next page)

SODIUM/CALCIUM/MAG/POT OXYBATE

INITIAL CRITERIA (CONTINUED)

C. If you have cataplexy in narcolepsy, approval also requires:

1. You are 7 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
3. You have an Epworth Sleepiness Scale (tool to measure your sleepiness) score of more than 10
4. Your narcolepsy (a type of sleep condition) is confirmed by ONE of the following:
   a. A Multiple Sleep Latency Test (MSLT: a type of sleep study) showing both a mean sleep latency of 8 minutes or less AND two or more sleep-onset rapid eye movement periods (SOREMPs: time it takes to enter dream sleep)
   b. You have a sleep-onset rapid eye movement period (SOREMP: time it takes to enter dream sleep) within 15 minutes of sleep onset
   c. You have low orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay (test showing you have low levels of a chemical that helps with staying awake)
5. You will NOT use Xywav concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta (eszopiclone), Ambien (zolpidem), Sonata (zaleplon), estazolam, Restoril (temazepam), Halcion (triazolam), flurazepam, quazepam, Belsomra (suvorexant)
6. You have tried TWO of the following preferred medications: venlafaxine, fluoxetine, tricyclic anti-depressants (such as amitriptyline, clomipramine, imipramine)

(Initial denial text continued on next page)

SODIUM/CALCIUM/MAG/POT OXYBATE

INITIAL CRITERIA (CONTINUED)

D. If you have excessive daytime sleepiness in narcolepsy, approval also requires:

1. You are 7 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
3. You have EDS persisting for at least 3 months and an Epworth Sleepiness Scale (tool to measure your sleepiness) score of more than 10
4. Your narcolepsy (a type of sleep condition) is confirmed by ONE of the following:
   a. A Multiple Sleep Latency Test (MSLT: a type of sleep study) showing both an average sleep latency of 8 minutes or less AND 2 or more early-onset rapid eye movement (REM) sleep test periods (SOREMPs: time it takes to enter dream sleep)
   b. A Multiple Sleep Latency Test (MSLT: a type of sleep study) showing both an average sleep latency of 8 minutes or less AND one early-onset rapid eye movement (REM) sleep test period (SOREMP: time it takes to enter dream sleep) AND additionally one SOREMP (within approximately 15 minutes) on a polysomnography (type of sleep test) the night before the MSLT, with the polysomnography ruling out non-narcolepsy causes of excessive daytime sleepiness
   c. You have normal orexin/hypocretin levels on a cerebrospinal fluid (CSF) assay (test showing you have normal levels of a chemical that helps with staying awake)
5. You will NOT use Xywav concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta (eszopiclone), Ambien (zolpidem), Sonata (zaleplon), estazolam, Restoril (temazepam), Halcion (triazolam), flurazepam, quazepam, Belsomra (suvorexant)
6. If you are 7 to 17 years old, you tried and failed or have a contraindication to (harmful for you to use) the following preferred medication: a generic stimulant (such as amphetamine, dextroamphetamine, methylphenidate)
7. If you are 18 years or older, you tried and failed or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. A generic typical stimulant (such as amphetamine sulfate, dextroamphetamine, methylphenidate)
   b. Armodafinil OR modafinil

SODIUM/CALCIUM/MAG/POT OXYBATE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of narcolepsy (Group G47.41) **AND** meet the following criterion?
   - Xywav will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has demonstrated improvement of cataplexy symptoms compared to baseline
   - The patient has maintained an improvement in Epworth Sleepiness Scale (ESS) scores by at least 25 percent compared to baseline
   - The patient has demonstrated improvement in sleep latency from baseline

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #18mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Does the patient have a diagnosis of idiopathic hypersomnia (IH) (ICD-10 G47.11, G47.12) **AND** meet the following criterion?
   - Xywav will NOT be used concurrently with a sedative hypnotic agent (e.g., Lunesta [eszopiclone], Ambien [zolpidem], Sonata [zaleplon], estazolam, Restoril [temazepam], Halcion [triazolam], flurazepam, quazepam, Belsomra [suvorexant])

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

4. Does the patient meet **ONE** of the following criteria?
   - The patient has demonstrated improvement of idiopathic hypersomnia symptoms compared to baseline
   - The patient has maintained an improvement in Epworth Sleepiness Scale (ESS) scores by at least 25 percent compared to baseline

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #18mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SODIUM/CALCIUM/MAG/POT OXYBATE

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SODIUM/CALCIUM/MAG/POT OXYBATE (Xywav)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Narcolepsy (uncontrollable daytime sleepiness)
   2. Idiopathic hypersomnia (IH: a type of sleep disorder)

B. If you have narcolepsy, renewal also requires:
   1. You will NOT use Xywav concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta (eszopiclone), Ambien (zolpidem), Sonata (zaleplon), estazolam, Restoril (temazepam), Halcion (triazolam), flurazepam, quazepam, Belsomra (suvorexant)
   2. You meet ONE of the following:
      a. You have demonstrated improvement in cataplexy symptoms (sudden and uncontrollable muscle weakness) compared to baseline (before treatment)
      b. You have maintained an improvement in Epworth Sleepiness Scale (tool to measure sleepiness) scores by at least 25 percent compared to baseline
      c. You have demonstrated improvement in sleep latency (the amount of time it takes you to fall asleep)

C. If you have idiopathic hypersomnia, renewal also requires:
   1. You will NOT use Xywav concurrently (at the same time) with a sedative hypnotic medication (medications that make you sleepy), such as Lunesta (eszopiclone), Ambien (zolpidem), Sonata (zaleplon), estazolam, Restoril (temazepam), Halcion (triazolam), flurazepam, quazepam, Belsomra (suvorexant)
   2. You meet ONE of the following:
      a. You have demonstrated improvement of idiopathic hypersomnia symptoms compared to baseline (before treatment)
      b. You have maintained an improvement in Epworth Sleepiness Scale (tool to measure sleepiness) scores by at least 25 percent compared to baseline

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

SOFOSBUVIR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SOFOSBUVIR	SOVALDI	40795		GPI-10 (1235308000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chronic hepatitis C virus (HCV) (ICD-10 B18.2) and meet **ONE** of the following criteria?
- The patient has genotype 2 or 3 infection AND is 3 years of age or older
- The patient has genotype 1 or 4 infection AND is 18 years of age or older

If yes, continue to #2.
If no, continue to #10.

2. Does the patient have an HCV RNA level within the past 6 months?

If yes, continue to #3.
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ANY** of the following criteria?
- The patient has a limited life expectancy (less than 12 months) due to non-liver related comorbid conditions
- Sovaldi will be used concurrently with any medication with drug interactions that are contraindicated or not recommended per the prescribing information (e.g., amiodarone, carbamazepine, phenytoin, phenobarbital, oxcarbazepine, rifampin, rifabutin, Priftin [rifapentine], St. John's wort, Aptivus [tipranavir]/ritonavir)
- Solvadi will be used concurrently with Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Vosevi (velpatasvir/sofosbuvir/voxilaprevir), or Zepatier (elbasvir/grazoprevir)

If yes, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

If no, continue to #4.

SOFOSBUVIR

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have genotype 2 infection and meet **ALL** of the following criteria?
   - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
   - Sovaldi will be used with ribavirin
   - The patient is 3 years of age or older AND had an intolerance or contraindication to ONE of the following preferred agents: Epclusa, Mavyret

   If yes, **approve for 12 weeks by GPID or GPI-14 for all strengths and formulations as follows:**
   - **400mg tablets: #1 per day.**
   - **200mg tablets: #1 per day.**
   - **200mg pellets: #2 per day.**
   - **150mg pellets: #1 per day.**

   If no, continue to #5.

5. Does the patient have genotype 3 infection and meet **ALL** of the following criteria?
   - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
   - Sovaldi will be used with ribavirin
   - The patient is 3 years of age or older AND had an intolerance or contraindication to ONE of the following preferred agents: Epclusa, Mavyret

   If yes, **approve for 24 weeks by GPID or GPI-14 for all strengths and formulations as follows:**
   - **400mg tablets: #1 per day.**
   - **200mg tablets: #1 per day.**
   - **200mg pellets: #2 per day.**
   - **150mg pellets: #1 per day.**

   If no, continue to #6.

SOFOSBUVIR

GUIDELINES FOR USE (CONTINUED)

6. Does the patient have genotype 1 or 4 infection and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is treatment-naïve
   - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
   - Sovaldi will be used with peginterferon alfa and ribavirin
   - The patient had an intolerance or contraindication to ONE of the following preferred agents: Harvoni, Epclusa, Mavyret

   If yes, **approve for 12 weeks by GPID or GPI-14 for all strengths and formulations as follows:**
   - **400mg tablets: #1 per day.**
   - **200mg tablets: #1 per day.**
   - **200mg pellets: #2 per day.**
   - **150mg pellets: #1 per day.**

   If no, continue to #7.

7. Does the patient have genotype 1 infection and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is treatment-naïve
   - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
   - Sovaldi will be used with ribavirin
   - The patient has a contraindication to interferon (interferon ineligible)
   - The patient had an intolerance or contraindication to ONE of the following preferred agents: Harvoni, Epclusa, Mavyret

   If yes, **approve for 24 weeks by GPID or GPI-14 for all strengths and formulations as follows:**
   - **400mg tablets: #1 per day.**
   - **200mg tablets: #1 per day.**
   - **200mg pellets: #2 per day.**
   - **150mg pellets: #1 per day.**

   If no, continue to #8.

SOFOSBUVIR

GUIDELINES FOR USE (CONTINUED)

8. Is the request to prevent post-transplant HCV reinfection and the patient meets **ALL** of the following criteria?
   - The patient has hepatocellular carcinoma (ICD-10 C22.0)
   - The patient is awaiting liver transplantation
   - Sovaldi will be used with ribavirin as pre-transplant treatment

   If yes, **approve for 48 weeks by GPID or GPI-14 for all strengths and formulations as follows:**
   - **400mg tablets: #1 per day.**
   - **200mg tablets: #1 per day.**
   - **200mg pellets: #2 per day.**
   - **150mg pellets: #1 per day.**

   If no, continue to #9.

9. Has the patient previously failed treatment with Mavyret (glecaprevir/pibrentasvir) OR Vosevi (sofosbuvir/velpatasvir/voxilaprevir) and meets **ALL** of the following criteria?
   - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
   - Sovaldi will be used with Mavyret (glecaprevir/pibrentasvir) AND ribavirin

   If yes, **approve for 16 weeks by GPID or GPI-14 for all strengths and formulations as follows:**
   - **400mg tablets: #1 per day.**
   - **200mg tablets: #1 per day.**
   - **200mg pellets: #2 per day.**
   - **150mg pellets: #1 per day.**

   If no, continue to #10.

10. Is the requested regimen recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment?

    If yes, **approve as indicated per guidance in AASLD/IDSA.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

SOFOSBUVIR

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOFOSBUVIR (Sovaldi)** requires the following rule(s) be met for approval:

A. You have chronic hepatitis C virus (HCV: liver inflammation caused by a type of virus)
B. You have genotype 2 or 3 infection (types of hepatitis C virus) and are 3 years of age or older OR you have genotype 1 or 4 infection (types of hepatitis C virus) and are 18 years of age or older
C. You have an HCV RNA level (a measure of the amount of hepatitis C virus in the blood) within the past 6 months
D. You do NOT have a limited life expectancy (less than 12 months) due to non-liver related comorbid conditions
E. You will NOT use Sovaldi concurrently (at the same time) with any medication with drug interactions that are contraindicated (harmful for you to use) or not recommended per the prescribing information (such as amiodarone, carbamazepine, phenytoin, phenobarbital, oxcarbazepine, rifampin, rifabutin, Priftin [rifapentine], St. John's wort, Aptivus [tipranavir]/ritonavir)
F. You will NOT use Sovaldi concurrently (at the same time) with Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Vosevi (velpatasvir/sofosbuvir/voxilaprevir), or Zepatier (elbasvir/grazoprevir)
G. If you have genotype 2 infection, approval also requires:
    1. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring)
    2. Sovaldi will be used with ribavirin
    3. You are 3 years of age or older AND had an intolerance (side effect) or contraindication to (harmful for you to use) ONE of the following preferred medications: Epclusa, Mavyret
H. If you have genotype 3 infection, approval also requires:
    1. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring)
    2. Sovaldi will be used with ribavirin
    3. You are 3 years of age or older AND had an intolerance (side effect) or contraindication to (harmful for you to use) ONE of the following preferred medications: Epclusa, Mavyret

SOFOSBUVIR

GUIDELINES FOR USE (CONTINUED)

I. If you have genotype 1 infection, approval also requires:
1. You are 18 years of age or older
2. You are treatment-naïve (no prior treatment)
3. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring)
4. Sovaldi will be used with peginterferon alfa and ribavirin OR Sovaldi will be used with ribavirin if you have a contraindication to (harmful for you to use) interferon
5. You had an intolerance (side effect) or contraindication to ONE of the following preferred medications: Harvoni, Epclusa, Mavyret

J. If you have genotype 4 infection, approval also requires:
1. You are 18 years of age or older
2. You are treatment-naïve (no prior treatment)
3. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring)
4. Sovaldi will be used with peginterferon alfa and ribavirin
5. You had an intolerance (side effect) or contraindication to (harmful for you to use) ONE of the following preferred medications: Harvoni, Epclusa, Mavyret

K. If Sovaldi will be used to prevent post-transplant HCV reinfection (getting infected again with HCV after transplant), approval also requires:
1. You have hepatocellular carcinoma (HCC: a type of liver cancer)
2. You are awaiting liver transplantation (you have not yet replaced your liver)
3. Sovaldi will be used with ribavirin as pre-transplant (before transplant) treatment

L. If you had a previous treatment failure with Mavyret (glecaprevir/pibrentasvir) OR Vosevi (sofosbuvir/velpatasvir/voxilaprevir), approval also requires:
1. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring)
2. Sovaldi will be used with Mavyret (glecaprevir/pibrentasvir) AND ribavirin

M. Sovaldi will also be approved for any other regimen/condition not listed above that is recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment

GUIDELINES FOR USE (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient does not have cirrhosis
   - The patient has compensated cirrhosis (Child-Pugh A)
   - The patient has decompensated cirrhosis (moderate or severe hepatic impairment; Child- Pugh B or C) AND the requested medication will be used with ribavirin

   If yes, **approve for 12 weeks by GPID or GPI-14 for all strengths and formulations as follows:**
   - **400mg-100mg tablets: #1 per day.**
   - **200mg-50mg tablets: #1 per day.**
   - **200mg-50mg pellets: #2 per day.**
   - **150mg-37.5mg pellets: #1 per day.**

   If no, continue to #5.

5. Does the patient have decompensated cirrhosis and meet **ONE** of the following criteria?
   - The patient has a contraindication to ribavirin (ribavirin ineligible)
   - The patient has failed prior treatment with a sofosbuvir-based regimen (e.g., sofosbuvir/ribavirin) AND the requested medication will be used with ribavirin
   - The patient has failed prior treatment with an NS5A inhibitor-based regimen (e.g., Harvoni [ledipasvir/sofosbuvir]) AND the requested medication will be used with ribavirin
   - The patient is post-liver transplant, treatment-experienced, AND the requested medication will be used with ribavirin

   If yes, **approve for 24 weeks by GPID or GPI-14 for all strengths and formulations as follows:**
   - **400mg-100mg tablets: #1 per day.**
   - **200mg-50mg tablets: #1 per day.**
   - **200mg-50mg pellets: #2 per day.**
   - **150mg-37.5mg pellets: #1 per day.**

   If no, continue to #6.

6. Is the requested regimen recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment?

   If yes, **approve as indicated per guidance in AASLD/IDSA.**
   If no, do not approve.

SOFOSBUVIR/VELPATASVIR

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOFOSBUVIR/VELPATASVIR (Epclusa)** requires the following rule(s) be met for approval:

A. You have chronic hepatitis C virus (HCV: liver inflammation caused by a type of virus)
B. You are 3 years of age or older
C. You have genotype 1, 2, 3, 4, 5, or 6 hepatitis C infection (types of hepatitis C virus)
D. You have an HCV RNA level (a measure of the amount of hepatitis C virus in the blood) within the past 6 months
E. You do NOT have a limited life expectancy (less than 12 months) due to non-liver related comorbid conditions (having two or more diseases at the same time)
F. You will NOT use the requested medication concurrently (at the same time) with any medication with drug interactions that are contraindicated (harmful for you to use) or not recommended per the prescribing information (such as amiodarone, carbamazepine, phenytoin, phenobarbital, rifampin, rifabutin, Priftin [rifapentine], efavirenz-containing HIV [human immunodeficiency virus] regimens, rosuvastatin at doses greater than 10mg, Aptivus [tipranavir]/ritonavir, topotecan, St. John's wort)
G. You will NOT use the requested medication concurrently (at the same time) with Sovaldi (sofosbuvir; as a single agent), Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir), Mavyret (pibrentasvir/glecaprevir), or Vosevi (velpatasvir/sofosbuvir/voxilaprevir)
H. You meet ONE of the following:
    1. You do not have cirrhosis (liver damage and scarring)
    2. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage)
    3. You have decompensated cirrhosis (a condition where there is liver damage and scarring with major symptoms) (moderate or severe liver impairment; Child-Pugh B or C [a score that evaluates the severity of liver damage]), and you meet ONE of the following:
        a. You will use the requested medication with ribavirin
        b. You have a contraindication to (harmful for you to use) ribavirin
        c. You have failed prior treatment with a sofosbuvir-based regimen (such as sofosbuvir/ribavirin) AND the requested medication will be used with ribavirin
        d. You have failed prior treatment with an NS5A inhibitor-based regimen (such as Harvoni [ledipasvir/sofosbuvir]) AND the requested medication will be used with ribavirin
        e. You received a liver transplant (replaced your liver), are treatment-experienced (failed prior treatment), AND the requested medication will be used with

SOFOSBUVIR/VELPATASVIR/VOXILAPREVIR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SOFOSBUVIR/ VELPATASVIR/ VOXILAPREVIR	VOSEVI	44428		GPI-10 (1235990380)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chronic hepatitis C virus (HCV) (ICD-10 B18.2) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient has genotype 1, 2, 3, 4, 5, or 6 infection

If yes, continue to #2.
If no, continue to #8.

2. Does the patient have an HCV RNA level within the past 6 months?

If yes, continue to #3.
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ANY** of the following criteria?
- The patient has a limited life expectancy (less than 12 months) due to non-liver related comorbid conditions
- The patient has moderate or severe hepatic impairment (decompensated cirrhosis; Child-Pugh B or C)
- Vosevi will be used concurrently with any medication with drug interactions that are contraindicated or not recommended per the prescribing information (e.g., amiodarone, rifampin, carbamazepine, phenytoin, phenobarbital, rifabutin, Priftin [rifapentine], rosuvastatin, pitavastatin, pravastatin at doses greater than 40mg, cyclosporine, methotrexate, mitoxantrone, imatinib, irinotecan, lapatinib, sulfasalazine, topotecan, St. John's wort, HIV regimens containing atazanavir, lopinavir, Aptivus [tipranavir]/ritonavir, or efavirenz)
- Vosevi will be used concurrently with Sovaldi (sofosbuvir; as a single agent), Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir), or Mavyret (pibrentasvir/glecaprevir)

If yes, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

If no, continue to #4.

4. Is the patient treatment-naive and meets **ALL** of the following criteria?
   - The patient has genotype 3 infection
   - The patient has compensated cirrhosis
   - The patient has NS5A RAS Y93H polymorphism

   If yes, **approve for 12 weeks by HICL or GPI-10 for #1 per day.**
   If no, continue to #5.

5. Is the patient treatment-experienced and meets **ALL** of the following criteria?
   - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
   - The patient has failed prior treatment with a full course of an HCV regimen containing an NS5A inhibitor (e.g., Harvoni [ledipasvir/sofosbuvir], Mavyret [pibrentasvir/glecaprevir]) or a DAA (e.g., Olysio [simeprevir]/peginterferon/ribavirin, Epclusa [velpatasvir/sofosbuvir]) if post-liver or kidney transplant

   If yes, **approve for 12 weeks by HICL or GPI-10 for #1 per day.**
   If no, continue to #6.

6. Is the patient treatment-experienced and meets **ALL** of the following criteria?
   - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
   - The patient has failed prior treatment with a sofosbuvir-based regimen (e.g., Epclusa [sofosbuvir/velpatasvir], sofosbuvir with ribavirin, sofosbuvir with Olysio [simeprevir])

   If yes, **approve for 12 weeks by HICL or GPI-10 for #1 per day.**
   If no, continue to #7.

7. Is the patient treatment-experienced and meets **ALL** of the following criteria?
   - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
   - The patient failed prior treatment with Vosevi
   - Vosevi will be used with ribavirin

   If yes, **approve for 24 weeks by HICL or GPI-10 for #1 per day.**
   If no, continue to #8.

8. Is the requested regimen recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment?

   If yes, **approve as indicated per guidance in AASLD/IDSA.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOFOSBUVIR/VELPATASVIR/VOXILAPREVIR (Vosevi)** requires the following rule(s) be met for approval:

A. You have chronic hepatitis C virus (HCV: liver inflammation caused by a type of virus)
B. You are 18 years of age or older
C. You have genotype 1, 2, 3, 4, 5 or 6 infection (types of hepatitis C virus)
D. You have an HCV RNA level (a measure of the amount of hepatitis C virus in the blood) within the past 6 months
E. You do NOT have a limited life expectancy (less than 12 months) due to non-liver related comorbid conditions (having two or more diseases at the same time)
F. You do NOT have moderate or severe liver impairment (decompensated cirrhosis [a condition where there is liver damage and scarring with major symptoms]; Child-Pugh B or C [a score that evaluates the severity of liver damage])
G. You will NOT use Vosevi concurrently (at the same time) with any medication with drug interactions that are contraindicated (harmful for you to use) or not recommended per the prescribing information (such as amiodarone, rifampin, carbamazepine, phenytoin, phenobarbital, rifabutin, Priftin [rifapentine], rosuvastatin, pitavastatin, pravastatin at doses greater than 40mg, cyclosporine, methotrexate, mitoxantrone, imatinib, irinotecan, lapatinib, sulfasalazine, topotecan, St. John's wort, HIV (human immunodeficiency virus) regimens containing atazanavir, lopinavir, Aptivus [tipranavir]/ritonavir, or efavirenz)
H. You will NOT use Vosevi concurrently (at the same time) with Sovaldi (sofosbuvir; as a single agent), Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir), or Mavyret (pibrentasvir/glecaprevir)
I. **If you are treatment-naïve (no prior treatment), approval also requires**:
    1. You have genotype 3 infection
    2. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms)
    3. You have NS5A resistance-associated substitution (RAS) Y93H polymorphism (variations in a type of hepatitis C virus protein)

(Denial text continued on next page)

SOFOSBUVIR/VELPATASVIR/VOXILAPREVIR

GUIDELINES FOR USE (CONTINUED)

J. **If you are treatment-experienced (failed prior treatment), approval also requires**:
   1. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring)
   2. You meet ONE of the following:
      a. You have failed a full course of a regimen containing an NS5A inhibitor (such as Harvoni [ledipasvir/sofosbuvir], Mavyret [pibrentasvir/glecaprevir]) or a direct-acting antiviral (such as Olysio [simeprevir]/peginterferon/ribavirin, Epclusa [velpatasvir/sofosbuvir]) if post-liver or kidney transplant (replaced your liver or kidney)
      b. You have failed prior treatment with a sofosbuvir-based regimen (such as Epclusa [sofosbuvir/velpatasvir], sofosbuvir with ribavirin, sofosbuvir with Olysio [simeprevir])
      c. You have failed prior treatment with Vosevi AND Vosevi will be used with ribavirin

K. Vosevi will also be approved for any other regimen/condition not listed above that is recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Vosevi.

SOFPIRONIUM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SOFPIRONIUM BROMIDE	SOFDRA	49707		GPI-10 (9097008320)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of primary axillary hyperhidrosis (ICD-10 L74.510) and meet **ALL** of the following criteria?
- The patient is 9 years of age or older
- The patient has primary axillary hyperhidrosis as evidenced by focal, visible, excessive sweating of at least 6 months duration with all secondary causes ruled out
- Sofdra will NOT be used concurrently with other topical anticholinergics indicated for primary axillary hyperhidrosis (e.g., Qbrexza [glycopyrronium tosylate])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient meet at least **TWO** of the following criteria?
- Symptoms occur bilaterally
- Symptoms impair daily activities
- The patient has at least one episode per week
- Onset occurred prior to the patient turning 25 years of age
- The patient has a family history of primary axillary hyperhidrosis
- Symptoms do not occur during sleep

If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1.34mL per day.**
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

SOFPIRONIUM

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOFPIRONIUM (Sofdra)** requires the following rule(s) be met for approval:

A. You have primary axillary hyperhidrosis (excessive underarm sweating)
B. You are 9 years of age or older
C. You have primary axillary hyperhidrosis (excessive underarm sweating) as evidenced by focal (limited to a particular area of the body), visible, excessive sweating of at least 6 months duration with all secondary causes (caused by another medical condition) ruled out
D. You will NOT use Sofdra concurrently (at the same time) with other topical anticholinergics used for primary axillary hyperhidrosis (excessive underarm sweating) (such as Qbrexza [glycopyrronium tosylate])
E. You have at least two of the following:
    1. Symptoms occur bilaterally (on both sides of the body)
    2. Symptoms impair daily activities
    3. You have at least one episode per week
    4. Onset occurred before you turn(ed) 25 years old
    5. You have a family history of primary axillary hyperhidrosis (excessive underarm sweating)
    6. Symptoms do not occur during sleep

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Sofdra.

SOLIFENACIN SUSPENSION

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SOLIFENACIN SUCCINATE	VESICARE LS		47476	GPI-14 (54100055201820)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of neurogenic detrusor overactivity (ICD-10 N32.81) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient had a trial of or contraindication to TWO of the following:
     - Anticholinergics (e.g., oxybutynin)
     - Beta-3 agonists (e.g., Myrbetriq [mirabegron])
   - The patient is unable to swallow oral solifenacin tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #10mL per day.** If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOLIFENACIN SUSPENSION (Vesicare LS)** requires the following rule(s) be met for approval:
   A. You have neurogenic detrusor overactivity (type of bladder condition)
   B. You are 2 years of age or older
   C. You have tried or have a contraindication to (harmful for you to use) TWO of the following:
      1. Anticholinergics (such as oxybutynin)
      2. Beta-3 agonists (such as Myrbetriq [mirabegron])
   D. You are unable to swallow oral solifenacin tablets

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

SOLRIAMFETOL

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SOLRIAMFETOL	SUNOSI	45666		GPI-10 (6137007020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of excessive daytime sleepiness (EDS) with narcolepsy (ICD-10 G47.419) and the narcolepsy diagnosis is confirmed by **ONE** of the following criteria?
   - The patient has had a sleep study (e.g., polysomnography, multiple sleep latency test [MSLT])
   - The patient has had a measurement of orexin levels

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a neurologist, psychiatrist, or specialist in sleep medicine
   - The patient has an Epworth Sleepiness Scale (ESS) score greater than 10
   - The patient had a trial of or contraindication to ONE of the following preferred agents: a generic typical stimulant (e.g., amphetamine sulfate, methylphenidate), modafinil, armodafinil

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

SOLRIAMFETOL

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of excessive daytime sleepiness (EDS) (ICD-10 G47.10) with obstructive sleep apnea (OSA) (ICD-10 G47.33) and the OSA diagnosis is confirmed by **ONE** of the following criteria?
   - Polysomnography
   - Home sleep apnea testing devices
   - Hospital-based bedside monitoring

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient meet **ALL** of the following criteria?
   - The patient has EDS with an Epworth Sleepiness Scale (ESS) score greater than 10
   - The patient had a trial of or contraindication to ONE of the following preferred agents: modafinil, armodafinil
   - The patient is in ongoing treatment to address the obstructive causes of OSA, for at least one month since initiation

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOLRIAMFETOL (Sunosi)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Excessive daytime sleepiness (EDS) with narcolepsy (a sleep condition with overwhelming daytime drowsiness)
      2. Excessive daytime sleepiness (EDS) with obstructive sleep apnea (OSA) (a type of sleep condition due to a disorder where airflow is blocked during sleep)

   (Initial denial text continued on the next page)

SOLRIAMFETOL

INITIAL CRITERIA (CONTINUED)

B. If you have excessive daytime sleepiness with narcolepsy, approval also requires:
1. Your diagnosis of narcolepsy (a type of sleep condition) is confirmed by ONE of the following:
   i. You have had a sleep study (such as polysomnography [type of sleep test], multiple sleep latency test [MSLT: a type of sleep study])
   ii. You have had a measurement of orexin levels (test showing you have low levels of a chemical that helps with staying awake)
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor), psychiatrist (a type of mental health doctor), or specialist in sleep medicine
3. You have an Epworth Sleepiness Scale (ESS: tool to measure sleepiness) score of more than 10
4. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: a generic typical stimulant (such as amphetamine sulfate, methylphenidate), modafinil, armodafinil

C. If you have excessive daytime sleepiness with obstructive sleep apnea, approval also require:
1. Your diagnosis of obstructive sleep apnea (OSA: a disorder where airflow is blocked during sleep) is confirmed by a polysomnography (a type of sleep test), home sleep apnea testing devices, or hospital-based bedside monitoring
2. You have excessive daytime sleepiness with an Epworth Sleepiness Scale (ESS: tool to measure sleepiness) score of more than 10
3. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: modafinil, armodafinil
4. You have been on a treatment for the obstructive causes of obstructive sleep apnea (OSA: a disorder where airflow is blocked during sleep), for at least one month since initiation

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

SOMAPACITAN-BECO

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SOMAPACITAN-BECO	SOGROYA	46831		GPI-10 (3010000720)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes
   - Idiopathic short stature (ISS) (ICD-10 R62.52)

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 2.5 to 17 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand)
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has a height velocity that is less than the 25th percentile for age
   - The patient has a low peak growth hormone (less than 10 ng/mL) on TWO growth hormone stimulation tests, OR has an insulin-like growth factor 1 (IGF-1) that is at least 2 SD below the mean for the same age and gender

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

INITIAL CRITERIA (CONTINUED)

4. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 Group E34.3, E23.0), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, continue to #5.
   If no, continue to #7.

5. Is the patient's GHD caused by a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #6mL per 28 days**.
   If no, continue to #6.

6. Is the patient's GHD confirmed by **ONE** of the following growth hormone stimulation tests?
   - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
   - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
   - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #6mL per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Does the patient have a diagnosis of short stature born small for gestational age (SGA) (ICD-10 R62.52; Group P05.1) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand)
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10**.
   If no, continue to #8.

SOMAPACITAN-BECO

INITIAL CRITERIA (CONTINUED)

8. Does the patient have a diagnosis of growth failure associated with Noonan syndrome (ICD-10 Q87.19) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand)
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMAPACITAN-BECO (Sogroya)** requires the following rule(s) be met for approval:

   A. You meet ONE of the following:
      1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
      2. You are an adult patient with growth hormone deficiency (GHD: a type of hormone disorder with low growth hormone)
      3. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
      4. You have growth failure associated with Noonan syndrome (a type of genetic disorder)

   B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:
      1. You are 2.5 to 17 years of age
      2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
      3. Your epiphyses (end part of long bone) are NOT closed as confirmed by a radiograph (type of imaging test) of the wrist and hand
      4. You meet ONE of the following:
         a. Your height is at least 2 standard deviations (SD) below the mean (average) height for children of the same age and gender
         b. Your height velocity is less than the 25th percentile for your age
         c. You have a low peak growth hormone level (less than 10 ng/mL) on TWO growth hormone stimulation tests, OR an insulin-like growth factor 1 (IGF-1) level that is at least 2 standard deviations below the mean for your age and gender
      5. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

   (Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

SOMAPACITAN-BECO

INITIAL CRITERIA (CONTINUED)

C. If you are an adult patient with growth hormone deficiency, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
3. You meet ONE of the following:
   a. Your growth hormone deficiency is caused by a congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests (tests that measure the body's ability to produce growth hormone):
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)
4. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

D. If you have short stature born small for gestational age, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
3. Your epiphyses (end part of long bone) are NOT closed as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
5. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

E. If you have growth failure associated with Noonan syndrome, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
2. Your epiphyses (end part of long bone) are NOT closed as confirmed by radiograph (a type of imaging test) of the wrist and hand
3. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
4. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

F. Request for Sogroya will NOT be approved for athletic enhancement (to perform better in sports), anti-aging purposes, or idiopathic short stature (ISS: a type of growth condition)

SOMAPACITAN-BECO

RENEWAL CRITERIA

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes
   - Idiopathic short stature (ISS) (ICD-10 R62.52)

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 2.5 to 17 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand), OR the patient has not completed prepubertal growth
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - The patient has an annual growth velocity of at least 2 cm compared with what was observed from the previous year
   - The patient has an annual growth velocity of at least 1 cm compared with what was observed from the previous year if close to the terminal phase of puberty

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SOMAPACITAN-BECO

RENEWAL CRITERIA (CONTINUED)

4. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 Group E34.3, E23.0), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has achieved or maintained a response to therapy as evidenced by clinical treatment goals (e.g., improved body composition, lipid panel, bone health)
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #6mL per 28 days.**
   If no, continue to #5.

5. Does the patient have **ONE** of the following diagnoses?
   - Short stature born small for gestational age (SGA) (ICD-10 R62.52; Group P05.1)
   - Growth failure associated with Noonan syndrome (ICD-10 Q87.19)

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

6. Does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand, or the patient has not completed prepubertal growth)
   - The patient has a growth velocity of at least 2 cm compared with what was observed from the previous year, OR an annual growth velocity of at least 1 cm compared with what was observed from the previous year for patients that are near the terminal phase of puberty
   - Sogroya will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SOMAPACITAN-BECO

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOMAPACITAN-BECO (Sogroya)** requires the following rule(s) be met for renewal:

A. You meet ONE of the following:
   1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
   2. You are an adult patient with growth hormone deficiency (GHD: a type of hormone disorder with low growth hormone)
   3. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
   4. You have growth failure associated with Noonan syndrome (a type of genetic disorder)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
   1. You are 2.5 to 17 years of age
   2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   3. Your epiphyses (end part of long bone) are NOT closed as confirmed by a radiograph (type of imaging test) of the wrist and hand, OR you have not completed prepubertal (before puberty) growth
   4. You meet ONE of the following:
      a. Your annual growth velocity (rate of growth) is at least 2 cm compared with what was observed from the previous year
      b. Your annual growth velocity is at least 1 cm compared with what was observed from the previous year if you are close to the terminal (final) phase of puberty
   5. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

(Renewal denial text continued on next page)

SOMAPACITAN-BECO

RENEWAL CRITERIA (CONTINUED)

C. If you are an adult patient with growth hormone deficiency, renewal also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
3. You have achieved or maintained a response to therapy as evidenced by clinical treatment goals (such as improved body composition, lipid [fat] panel, bone health)
4. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

D. If you have short stature born small for gestational age OR growth failure associated with Noonan syndrome, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
2. Your epiphyses (end part of long bone) are not closed as confirmed by radiograph (a type of imaging test) of the wrist and hand OR you have not completed prepubertal (before puberty) growth
3. Your growth velocity is at least 2 cm compared with what was observed from the previous year OR your annual growth velocity is at least 1 cm compared with what was observed from the previous year if you are near the terminal (end) phase of puberty
4. You will NOT use Sogroya concurrently (at the same time) with Increlex (mecasermin)

E. Renewal request for Sogroya will NOT be approved for athletic enhancement (to perform better in sports), anti-aging purposes, or idiopathic short stature (ISS: a type of growth condition)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Sogroya.

PRIOR AUTHORIZATION GUIDELINES

SOMATROGON-GHLA

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SOMATROGON-GHLA	NGENLA	47896		GPI-10 (3010001500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes
   - Idiopathic short stature (ISS) (ICD-10 R62.52)

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.
   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 3 to 17 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand)
   - Ngenla will NOT be used concurrently with Increlex (mecasermin)
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Skytrofa (lonapegsomatropin-tcgd), Sogroya (somapacitan-beco)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has a height velocity that is less than the 25th percentile for age
   - The patient has a low peak growth hormone (less than 10 ng/mL) on TWO growth hormone stimulation tests, OR has an insulin-like growth factor 1 (IGF-1) that is at least 2 SD below the mean for the same age and gender

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

SOMATROGON-GHLA

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOMATROGON-GHLA (Ngenla)** requires the following rule(s) be met for approval:

A. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
B. You are 3 to 17 years of age
C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
D. Your epiphyses (end part of long bone) are NOT closed, as confirmed by a radiograph (type of imaging test) of the wrist and hand
E. You will NOT use Ngenla concurrently (at the same time) with Increlex (mecasermin)
F. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Skytrofa (lonapegsomatropin-tcgd), Sogroya (somapacitan-beco)
G. You meet ONE of the following:
    1. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
    2. Your height velocity is less than the 25th percentile for your age
    3. You have a low peak growth hormone level (less than 10 ng/mL) on TWO growth hormone stimulation tests, OR an insulin-like growth factor 1 (IGF-1) level that is at least 2 standard deviations below the mean for your age and gender
H. Request for Ngenla will NOT be approved for athletic enhancement (to perform better in sports), anti-aging purposes, or idiopathic short stature (ISS: a type of growth condition)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN - ZORBTIVE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SOMATROPIN	ZORBTIVE		12767	GPI-14 (30100020102132)	BRAND = ZORBTIVE

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of short bowel syndrome (SBS) (ICD-10 Group K90.82) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The patient is currently on specialized nutritional support (such as a high carbohydrate, low-fat diet, adjusted for individual requirements and preferences)

   If yes, **approve for 4 weeks by GPID or GPI-14 for #1 vial per day (max dose not to exceed 8mg per day).**

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOMATROPIN - ZORBTIVE** requires the following rule(s) be met for approval:
   A. You have short bowel syndrome (SBS: the body cannot absorb fluids and nutrients due to a lack of a functional small intestine)
   B. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
   C. You are currently on specialized nutritional support (such as a high carbohydrate, low-fat diet, adjusted for individual requirements and preferences)
   D. Request for Zorbtive will NOT be approved for athletic enhancement (to perform better in sports) or anti-aging purposes.

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SOMATROPIN

INITIAL CRITERIA (CONTINUED)

3. Does the patient have prolonged non-suppressed HIV viremia (a viral load greater than 200 copies/mL) and meet **ONE** of the following criteria?
   - The patient has a greater than 10% loss of baseline body weight AND either chronic diarrhea or chronic weakness or a fever for at least 30 days
   - The patient has 90% ideal body weight (or body mass index [BMI] less than 18.5 kg/m[2]) AND a greater than 10% weight loss from premorbid maximum over a 12-month period
   - The patient has 90% ideal body weight (or body mass index [BMI] less than 18.5 kg/m[2]) AND a greater than 5% weight loss in the previous 6 months

   If yes, continue to #5.
   If no, continue to #4.

4. Does the patient have suppressed HIV viremia (a viral load less than 200 copies/mL) and meet **ONE** of the following criteria?
   - The patient has a greater than 5% loss of premorbid body weight over 6 months
   - The patient has a greater than 10% loss of premorbid body weight over 12 months
   - The patient has a low BMI (less than 20 kg/m[2]) if objective weight loss is not available

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Has the patient received a total of 48 weeks of cumulative treatment with any somatropin (e.g., Genotropin, Humatrope, Norditropin)?

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, **approve for 12 weeks by HICL or GPI-10.**

SOMATROPIN

INITIAL CRITERIA (CONTINUED)

6. Is the request for Serostim?

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #7.

7. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand)
   - The requested medication will NOT be used concurrently with Increlex (mecasermin)

   If yes, continue to #8.
   If no, continue to #9.

8. Does the patient meet **ONE** of the following criteria?
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient's height velocity is less than the 25th percentile for age
   - The patient has a low peak growth hormone (less than 10ng/mL) on two GH stimulation tests OR an insulin-like growth factor 1 (IGF-1) of at least 2 SD below the mean for the same age and gender

   If yes, continue to #18.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

9. Does the patient have **ONE** of the following diagnoses?
   - Short stature associated with Noonan syndrome (ICD-10 Q87.19)
   - Short stature or growth failure with short stature homeobox-containing gene (SHOX) deficiency (ICD-10 E34.328)

   If yes, continue to #10.
   If no, continue to #11.

SOMATROPIN

INITIAL CRITERIA (CONTINUED)

10. Does the patient meet **ALL** of the following criteria?
    - Therapy is prescribed by or in consultation with an endocrinologist
    - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand)
    - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
    - The requested medication will NOT be used concurrently with Increlex (mecasermin)

    If yes, continue to #18.
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

11. Does the patient have a diagnosis of short stature associated with Turner syndrome (ICD-10 Group Q96) and meet **ALL** of the following criteria?
    - Therapy is prescribed by or in consultation with an endocrinologist
    - Turner syndrome diagnosis was confirmed by chromosomal analysis (karyotyping)
    - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand)
    - The requested medication will NOT be used concurrently with Increlex (mecasermin)

    If yes, continue to #18.
    If no, continue to #12.

12. Does the patient have a diagnosis of short stature born small for gestational age (SGA) (ICD-10 R62.52; Group P05.1) and meet **ALL** of the following criteria?
    - The patient is 2 years of age or older
    - Therapy is prescribed by or in consultation with an endocrinologist
    - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand)
    - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
    - The requested medication will NOT be used concurrently with Increlex (mecasermin)

    If yes, continue to #18.
    If no, continue to #13.

SOMATROPIN

INITIAL CRITERIA (CONTINUED)

13. Does the patient have a diagnosis of growth failure secondary to chronic kidney disease (CKD) (ICD-10 R62.52; Group N18) and meet **ALL** of the following criteria?
    - The request is for a pediatric patient
    - Therapy is prescribed by or in consultation with an endocrinologist or nephrologist
    - The patient has not had a renal transplant, or it has been at least one year since renal transplant
    - The patient has persistent growth failure (height below the 10th percentile) AND persistent low height velocity (below the 25th percentile)
    - The requested medication will NOT be used concurrently with Increlex (mecasermin)

    If yes, continue to #18.
    If no, continue to #14.

14. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Therapy is prescribed by or in consultation with an endocrinologist
    - The requested medication will NOT be used concurrently with Increlex (mecasermin)

    If yes, continue to #15.
    If no, continue to #17.

15. Is the patient's GHD caused by a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

    If yes, continue to #18.
    If no, continue to #16.

16. Is the patient's GHD confirmed by **ONE** of the following growth hormone stimulation tests?
    - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
    - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
    - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

    If yes, continue to #18.
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

SOMATROPIN

INITIAL CRITERIA (CONTINUED)

17. Does the patient have a diagnosis of Prader-Willi syndrome (PWS) (ICD-10 Q87.11) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with an endocrinologist
- The patient has a confirmed genetic diagnosis of PWS
- The requested medication will NOT be used concurrently with Increlex (mecasermin)

If yes, continue to #18.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

18. Is the request for Genotropin or Norditropin Flexpro?

If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the requested drug.**
If no, continue to #19.

19. Is the request for Humatrope, Omnitrope, Nutropin AQ, Saizen, or Zomacton **AND** the patient meets the following criterion?
- The patient had a trial of or contraindication to BOTH of the following preferred agents: Genotropin (somatropin) and Norditropin (somatropin)

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

SOMATROPIN

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOMATROPIN (Genotropin, Humatrope, Norditropin Flexpro, Nutropin AQ Nuspin, Omnitrope, Saizen/Saizenprep, Serostim, Zomacton)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. You have human immunodeficiency virus (HIV: an immune system disease caused by a virus) with wasting or cachexia (condition of severe weight and muscle loss)
   2. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
   3. You have short stature associated with Noonan syndrome (a type of genetic disorder)
   4. You have short stature or growth failure with short stature homeobox-containing gene (SHOX) deficiency (a type of genetic disorder)
   5. You have short stature associated with Turner syndrome (a type of genetic disorder)
   6. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
   7. You have growth failure secondary to chronic kidney disease (CKD: long-term kidney disease)
   8. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)
   9. You have Prader-Willi syndrome (PWS: a type of genetic disorder)

B. If you have human immunodeficiency virus with wasting or cachexia, approval also requires:
   1. You have NOT received a total of 48 weeks of cumulative treatment with any somatropin (such as Genotropin, Humatrope, Norditropin)
   2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions), nutritional support specialist, or infectious disease specialist (a doctor who specializes in the treatment of infections)
   3. You are on optimized human immunodeficiency virus (HIV) anti-retroviral therapy (a type of treatment for an immune system disease caused by a virus)
   4. Alternative causes of wasting (such as altered metabolism [metabolic and hormonal abnormalities] including testosterone deficiency or peripheral growth hormone resistance, diarrhea, inadequate energy [caloric] intake, malignancies [tumors], or opportunistic infections [an infection that can occur because of a weakened immune system]) have been ruled out

(Initial denial text continued on next page)

SOMATROPIN

INITIAL CRITERIA (CONTINUED)

5. You meet ONE of the following:
   a. You have prolonged non-suppressed human immunodeficiency virus (HIV: an immune system disease caused by a virus) viremia (virus in the blood) (a viral load greater than 200 copies/mL) and meet ONE of the following:
      i. You have a greater than 10% loss of baseline body weight AND either chronic (long-term) diarrhea or chronic weakness or a fever for at least 30 days
      ii. You have 90% ideal body weight (or body mass index [BMI: a tool for evaluating body fat] of less than 18.5 kg/m[2]) AND a greater than 10% weight loss from premorbid maximum (highest weight before onset of disease) over a 12-month period
      iii. You have 90% ideal body weight (or body mass index [BMI: a tool for evaluating body fat] of less than 18.5 kg/m[2]) AND a greater than 5% weight loss in the previous 6 months
   b. You have suppressed human immunodeficiency virus (HIV: an immune system disease caused by a virus) viremia (virus in the blood) (a viral load less than 200 copies/mL) and meet ONE of the following:
      i. You have a greater than 5% loss of premorbid (before onset of disease) body weight over 6 months
      ii. You have a greater than 10% loss of premorbid (before onset of disease) body weight over 12 months
      iii. You have a low body mass index (BMI: a tool for evaluating body fat) (less than 20 kg/m[2]) if objective (measurable) weight loss is not available

C. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:

1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your epiphyses (end part of long bone) are NOT closed as confirmed by radiograph (a type of imaging test) of the wrist and hand
3. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)
4. You meet at least ONE of the following:
   a. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
   b. Your height velocity is less than the 25th percentile for your age
   c. You have a low peak growth hormone (less than 10ng/mL) on two growth hormone stimulation tests OR an insulin-like growth factor 1 (IGF-1) of at least 2 standard deviations below the mean for your age and gender
5. If the request is for Humatrope, Omnitrope, Nutropin AQ, Saizen, or Zomacton, approval also requires:
   a. You have tried or have a contraindication to (harmful for you to use) BOTH of the following preferred medications: Genotropin (somatropin), Norditropin (somatropin)

(Initial denial text continued on next page)

SOMATROPIN

INITIAL CRITERIA (CONTINUED)

D. If you have short stature associated with Noonan syndrome OR short stature or growth failure with short stature homeobox-containing gene deficiency, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your epiphyses (end part of long bone) are NOT closed as confirmed by radiograph (a type of imaging test) of the wrist and hand
3. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
4. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)
5. If the request is for Humatrope, Omnitrope, Nutropin AQ, Saizen, or Zomacton, approval also requires:
   a. You have tried or have a contraindication to (harmful for you to use) BOTH of the following preferred medications: Genotropin (somatropin), Norditropin (somatropin)

E. If you have short stature associated with Turner syndrome, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your Turner syndrome diagnosis was confirmed by chromosomal analysis (karyotyping: a type of genetic test)
3. Your epiphyses (end part of long bone) are NOT closed as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)
5. If the request is for Humatrope, Omnitrope, Nutropin AQ, Saizen, or Zomacton, approval also requires:
   a. You have tried or have a contraindication to (harmful for you to use) BOTH of the following preferred medications: Genotropin (somatropin), Norditropin (somatropin)

(Initial denial text continued on next page)

SOMATROPIN

INITIAL CRITERIA (CONTINUED)

F. If you have short stature born small for gestational age, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. Your epiphyses (end part of long bone) are NOT closed as confirmed by radiograph (a type of imaging test) of the wrist and hand
4. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
5. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)
6. If the request is for Humatrope, Omnitrope, Nutropin AQ, Saizen, or Zomacton, approval also requires:
   a. You have tried or have a contraindication to (harmful for you to use) BOTH of the following preferred medications: Genotropin (somatropin), Norditropin (somatropin)

G. If you have growth failure secondary to chronic kidney disease, approval also requires:
1. You are a pediatric patient
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor) or nephrologist (kidney doctor)
3. You have not had a renal (kidney) transplant, or it has been at least one year since you had a renal (kidney) transplant
4. You have persistent growth failure (height below the 10th percentile) and persistent low height velocity (below the 25th percentile)
5. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)
6. If the request is for Humatrope, Omnitrope, Nutropin AQ, Saizen, or Zomacton, approval also requires:
   a. You have tried or have a contraindication to (harmful for you to use) BOTH of the following preferred medications: Genotropin (somatropin), Norditropin (somatropin)

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

SOMATROPIN

INITIAL CRITERIA (CONTINUED)

H. If you are an adult patient with growth hormone deficiency, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)
4. You meet ONE of the following:
   a. Your growth hormone deficiency is caused by a congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests (tests that measure the body's ability to produce growth hormone):
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)
5. If the request is for Humatrope, Omnitrope, Nutropin AQ, Saizen, or Zomacton, approval also requires:
   a. You have tried or have a contraindication to (harmful for you to use) BOTH of the following preferred medications: Genotropin (somatropin), Norditropin (somatropin)

I. If you have Prader-Willi syndrome, approval also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have a confirmed genetic diagnosis of Prader-Willi syndrome
3. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)
4. If the request is for Humatrope, Omnitrope, Nutropin AQ, Saizen, or Zomacton, approval also requires:
   a. You have tried or have a contraindication to (harmful for you to use) BOTH of the following preferred medications: Genotropin (somatropin), Norditropin (somatropin)

J. Requests for Serostim will only be approved for human immunodeficiency virus with wasting or cachexia diagnosis

K. The requested medication will NOT be approved for athletic enhancement (to perform better in sports), anti-aging purposes, or idiopathic short stature (short height due to unknown cause)

SOMATROPIN

RENEWAL CRITERIA

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes
   - Idiopathic short stature (ICD-10 R62.52)

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of HIV with wasting or cachexia (ICD-10 R64) and meet **ALL** of the following criteria?
   - The patient is currently on optimized HIV anti-retroviral therapy
   - The patient has experienced a positive response to treatment (e.g., improvement in BMI or weight, physical improvements such as timed walk or chair rise)

   If yes, continue to #3.
   If no, continue to #4.

3. Has the patient received a total of 48 weeks of cumulative treatment with any somatropin (e.g., Genotropin, Humatrope, Norditropin)?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, **approve for 36 weeks (or up to 48 weeks cumulative lifetime treatment duration) by HICL or GPI-10.**

4. Is the request for Serostim?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #5.

SOMATROPIN

RENEWAL CRITERIA (CONTINUED)

5. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand, or the patient has not completed prepubertal growth)
   - The patient has an annual growth velocity of at least 2 cm compared with what was observed from the previous year, OR an annual growth velocity of at least 1 cm compared with what was observed from the previous year for patients who are near the terminal phase of puberty
   - The requested medication will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #6.

6. Does the patient have **ONE** of the following diagnoses?
   - Short stature associated with Noonan syndrome (ICD-10 Q87.19)
   - Short stature or growth failure with short stature homeobox-containing gene (SHOX) deficiency (ICD-10 E34.328)
   - Short stature associated with Turner syndrome (ICD-10 Group Q96)
   - Short stature born small for gestational age (SGA) (ICD-10 R62.52; Group P05.1)

   If yes continue to #7.
   If no, continue to #8.

7. Does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand, or the patient has not completed prepubertal growth)
   - The patient has a growth velocity of at least 2 cm compared with what was observed from the previous year, OR annual growth velocity of at least 1 cm compared with what was observed from the previous year for patients that are near the terminal phase of puberty
   - The requested medication will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SOMATROPIN

RENEWAL CRITERIA (CONTINUED)

8. Does the patient have a diagnosis of growth failure secondary to chronic kidney disease (CKD) (ICD-10 R62.52; Group N18) and meet **ALL** of the following criteria?
   - The request is for a pediatric patient
   - The patient has not undergone a renal transplantation within the past year
   - The patient has a growth velocity of at least 2 cm compared with what was observed from the previous year, OR annual growth velocity of at least 1 cm compared with what was observed from the previous year for patients that are near the terminal phase of puberty
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand, or the patient has not completed prepubertal growth)
   - The requested medication will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #9.

9. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 E23.0; Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The requested medication will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #10.

10. Does the patient have a diagnosis of Prader-Willi syndrome (PWS) (ICD-10 Q87.11) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has shown improvement in body composition
   - The requested medication will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

SOMATROPIN

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOMATROPIN (Genotropin, Humatrope, Norditropin Flexpro, Nutropin AQ Nuspin, Omnitrope, Saizen/Saizenprep, Serostim, Zomacton)** requires the following rule(s) be met for renewal:

A. You meet ONE of the following:
   1. You have human immunodeficiency virus (HIV: an immune system disease caused by a virus) with wasting or cachexia (condition of severe weight and muscle loss)
   2. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
   3. You have short stature associated with Noonan syndrome (a type of genetic disorder)
   4. You have short stature or growth failure with short stature homeobox-containing gene (SHOX) deficiency (a type of genetic disorder)
   5. You have short stature associated with Turner syndrome (a type of genetic disorder)
   6. You have short stature born small for gestational age (SGA: birth weight is lower than expected for the number of weeks of pregnancy)
   7. You have growth failure secondary to chronic kidney disease (CKD: long-term kidney disease)
   8. You are an adult patient with growth hormone deficiency (GHD: type of hormone disorder with low growth hormone)
   9. You have Prader-Willi syndrome (PWS: a type of genetic disorder)

B. If you have human immunodeficiency virus with wasting or cachexia, renewal also requires:
   1. You have NOT received a total of 48 weeks of treatment with any somatropin (such as Genotropin, Humatrope, Norditropin)
   2. You are currently on optimized human immunodeficiency virus (HIV) anti-retroviral therapy (a type of treatment for an immune system disease caused by a virus)
   3. You have experienced a positive response to treatment (such as improvement in body mass index [BMI: a tool for evaluating body fat] or weight, physical improvements such as timed walk or chair rise)

(Renewal denial text continued on next page)

SOMATROPIN

RENEWAL CRITERIA (CONTINUED)

C. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your epiphyses (end part of long bone) are NOT closed (confirmed by radiograph [type of imaging test] of the wrist and hand OR you have not completed prepubertal growth)
3. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)
4. You meet ONE of the following:
   a. Your annual growth velocity is at least 2 cm compared with what was observed from the previous year
   b. Your annual growth velocity is at least 1 cm compared with what was observed from the previous year if you are near the terminal (end) phase of puberty

D. If you have short stature associated with Noonan syndrome, short stature or growth failure with short stature homeobox-containing gene deficiency, short stature associated with Turner syndrome, OR short stature born small for gestational age, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. Your epiphyses (end part of long bone) are not closed as confirmed by radiograph (a type of imaging test) of the wrist and hand OR you have not completed prepubertal growth
3. Your growth velocity is at least 2 cm compared with what was observed from the previous year OR your annual growth velocity of at least 1 cm compared with what was observed from the previous year if you are near the terminal (end) phase of puberty
4. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)

E. If you have growth failure secondary to chronic kidney disease, renewal also requires:
1. You are a pediatric patient
2. You have note not undergone a renal (kidney) transplantation within the past year
3. You have a growth velocity of at least 2 cm compared with what was observed from the previous year OR annual growth velocity of at least 1 cm compared with what was observed from the previous year for patients that are near the terminal (end) phase of puberty
4. Your epiphyses (end part of long bone) are not closed as confirmed by radiograph (a type of imaging test) of the wrist and hand, or you have not completed prepubertal growth
5. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)

(Renewal denial text continued on next page)

SOMATROPIN

RENEWAL CRITERIA (CONTINUED)

F. If you are an adult patient with growth hormone deficiency, renewal also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
3. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)

G. If you have Prader-Willi syndrome, renewal also requires:
1. Therapy is prescribed by or in consultation with an endocrinologist (hormone doctor)
2. You have shown improvement in body composition
3. You will NOT use the requested medication concurrently (at the same time) with Increlex (mecasermin)

H. Requests for Serostim will only be approved for human immunodeficiency virus with wasting or cachexia diagnosis

I. The requested medication will NOT be approved for athletic enhancement (to perform better in sports), anti-aging purposes, or idiopathic short stature (short height due to unknown cause)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

SONIDEGIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SONIDEGIB PHOSPHATE	ODOMZO	42369		GPI-10 (2137006020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced basal cell carcinoma (BCC) (ICD-10 C44.91, C44.01, C44.41, C44.81; Groups C44.11, C44.21, C44.31, C44.51, C44.61, C44.71) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - This is a recurrence of BCC after the patient had surgery or radiation therapy OR the patient is not a candidate for surgery or radiation therapy

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at end of the guideline.

2. Has the patient obtained **ALL** of the following tests prior to initiating therapy?
   - Baseline serum creatinine kinase (CK) level
   - Baseline serum creatinine level
   - Pregnancy status of females of reproductive potential

   If yes, **approve for 12 months by HICL or GPI 10 with a quantity limit of #1 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SONIDEGIB (Odomzo)** requires the following rule(s) be met for approval:
   A. You have locally advanced basal cell carcinoma (BCC: a type of skin cancer that has spread from where it started to nearby tissue or lymph nodes)
   B. You are 18 years of age or older
   C. This is a recurrence (disease returns) of basal cell carcinoma after surgery or radiation therapy OR you are not a candidate for surgery or radiation therapy
   D. You have obtained ALL of the following tests prior to starting therapy:
      1. Baseline serum creatine kinase (CK: a type of lab test) level
      2. Baseline serum creatinine level (a type of lab test to measure kidney function)
      3. If you are a female of reproductive potential, you have verified your pregnancy status

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

SORAFENIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SORAFENIB TOSYLATE	NEXAVAR, SORAFENIB TOSYLATE	33400		GPI-10 (2153306040)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65?

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of unresectable hepatocellular carcinoma (ICD-10 C22.0)?

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, continue to #3.

3. Does the patient have a diagnosis of locally recurrent or metastatic, progressive, differentiated thyroid carcinoma (DTC) (ICD-10 C73) **AND** meet the following criterion?
   - The patient's cancer is refractory to radioactive iodine treatment

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SORAFENIB (Nexavar)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Advanced renal cell carcinoma (RCC: type of kidney cancer)
      2. Unresectable hepatocellular carcinoma (liver cancer that cannot be removed with surgery)
      3. Locally recurrent or metastatic, progressive, differentiated thyroid carcinoma (DTC) (a type of thyroid cancer that returns, spreads, or is getting worse that does not fully respond to a type of treatment)

   B. If you have locally recurrent or metastatic, progressive, differentiated thyroid carcinoma, approval also requires:
      1. Your cancer is refractory to radioactive iodine treatment (does not respond to a type of treatment)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

SOTATERCEPT-CSRK

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SOTATERCEPT-CSRK	WINREVAIR	49475		GPI-10 (4011007020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age and older
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) of greater than 2 Wood units (WU)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Has the patient been on background PAH therapy (for at least 3 months) with at least TWO of the following agents from different drug classes?
   - Oral endothelin receptor antagonist (e.g., Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
   - Oral phosphodiesterase-5 inhibitor (e.g., Revatio [sildenafil], Adcirca [tadalafil])
   - Oral cGMP stimulator (e.g., Adempas [riociguat])
   - IV/SQ prostacyclin (e.g., Flolan [epoprostenol], Remodulin [treprostinil])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per 21 days.**
   If no, continue to #4.

SOTATERCEPT-CSRK

INITIAL CRITERIA (CONTINUED)

4. Is the patient on ONE agent from one of the following drug classes, **AND** has a contraindication or intolerance to ALL of the other drug classes?
   - Oral endothelin receptor antagonist (e.g., Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
   - Oral phosphodiesterase-5 inhibitor (e.g., Revatio [sildenafil], Adcirca [tadalafil])
   - Oral cGMP stimulator (e.g., Adempas [riociguat])
   - IV/SQ prostacyclin (e.g., Flolan [epoprostenol], Remodulin [treprostinil])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per 21 days.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SOTATERCEPT-CSRK (Winrevair)** requires the following rule(s) be met for approval:
   A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1)
   B. You are 18 years of age and older
   C. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   D. Your pulmonary arterial hypertension is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
      1. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
      2. Pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg
      3. Pulmonary vascular resistance (PVR) greater than 2 Wood units

SOTATERCEPT-CSRK

INITIAL CRITERIA (CONTINUED)

E. You meet ONE of the following:
   1. You have been on background PAH therapy (for at least 3 months) with at least TWO of the following medications from different drug classes:
      a. Oral endothelin receptor antagonist (such as Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
      b. Oral phosphodiesterase-5 inhibitor for PAH (such as Revatio [sildenafil], Adcirca [tadalafil])
      c. Oral cGMP stimulator (such as Adempas [riociguat])
      d. Intravenous or subcutaneous prostacyclin (such as Flolan [epoprostenol], Remodulin [treprostinil])
   2. You are on ONE medication from one of the following drug classes, AND you have a contraindication to (harmful for you to use) or intolerance (side effect) to ALL of the other drug classes:
      a. Oral endothelin receptor antagonist (such as Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
      b. Oral phosphodiesterase-5 inhibitor for PAH (such as Revatio [sildenafil], Adcirca [tadalafil])
      c. Oral cGMP stimulator (such as Adempas [riociguat])
      d. Intravenous or subcutaneous prostacyclin (such as Flolan [epoprostenol], Remodulin [treprostinil])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

SOTORASIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SOTORASIB	LUMAKRAS	47400		GPI-10 (2153248000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has a KRAS G12C-mutation, as determined by an FDA-approved test
   - The patient has received at least one prior systemic therapy

   If yes, **approve for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **120mg: #8 per day.**
   - **240mg: #4 per day.**
   - **320mg: #3 per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic colorectal cancer (mCRC) (ICD-10 C19) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Lumakras will be used in combination with Vectibix (panitumumab)
   - The patient's cancer has a KRAS G12C-mutation, as determined by an FDA-approved test
   - The patient has received previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy

   If yes, **approve for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **120mg: #8 per day.**
   - **240mg: #4 per day.**
   - **320mg: #3 per day.**

   If no, do not approve.

SOTORASIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SOTORASIB (Lumakras)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Locally advanced or metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread from where it started to nearby tissue or lymph nodes, or has spread to other parts of the body)
   2. Metastatic colorectal cancer (mCRC: a type of digestive tract cancer that has spread to other parts of the body)

B. If you have locally advanced or metastatic non-small cell lung cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer has a KRAS G12C-mutation (abnormal change in a type of gene), as determined by a Food and Drug Administration (FDA)-approved test
   3. You have received at least one prior systemic therapy (treatment that targets the entire body)

C. If you have metastatic colorectal cancer, approval also requires:
   1. You are 18 years of age or older
   2. Lumakras will be used in combination with Vectibix (panitumumab)
   3. Your cancer has a KRAS G12C-mutation (abnormal change in a type of gene), as determined by a Food and Drug Administration (FDA)-approved test
   4. You have received previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy (types of cancer treatments)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Lumakras.

SPARSENTAN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SPARSENTAN	FILSPARI	48721		GPI-10 (5648306500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is at risk of disease progression
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient's diagnosis is confirmed by a biopsy
   - The patient has proteinuria of at least 0.5 g/day
   - The patient has an eGFR of at least 30 mL/min/1.73 m(2)
   - The patient had a trial of or contraindication to at least 12 weeks of treatment with ONE of the following clinical standard of care agents: an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan)

     If yes, **approve for 9 months by HICL or GPI-10 with a quantity limit of #1 per day.**
     If no, continue to #2.

SPARSENTAN

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of focal segmental glomerulosclerosis (FSGS) (ICD-10 Group N04.1) and meet **ALL** of the following criteria?
   - The patient is 8 years of age or older
   - The patient has proteinuria
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient's diagnosis is confirmed by a renal biopsy
   - The patient has a urine-protein creatinine ratio (UPCR) of at least 1.5 g/g
   - The patient has an eGFR of at least 30 mL/min/1.73 m(2)
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE of the following clinical standard of care agents: an ACE inhibitor (e.g., benazepril, lisinopril), an ARB (e.g., losartan, valsartan)
   - Filspari will NOT be used concurrently with an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan)
   - The patient does NOT have nephrotic syndrome as evidenced by nephrotic range proteinuria (i.e., UPCR of at least 3.0 g/g in adults [18 years of age or older]; UPCR of at least 2.0 g/g in children [less than 18 years of age])
   - The patient does NOT have nephrotic syndrome as evidenced by the presence of hypoalbuminemia, edema, or hyperlipidemia

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SPARSENTAN (Filspari)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
      2. Focal segmental glomerulosclerosis (FSGS: a type of kidney disease)

   B. If you have primary immunoglobulin A nephropathy, approval also requires:
      1. You are 18 years of age or older
      2. You are at risk of disease progression (worsening)
      3. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
      4. Your diagnosis is confirmed by a biopsy (removal of cells or tissue for examination)
      5. You have proteinuria (high levels of protein in the urine) of at least 0.5 g/day
      6. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 30 mL/min/1.73 m(2)

   (Initial denial text continued on next page)

SPARSENTAN

INITIAL CRITERIA (CONTINUED)

7. You have tried or have a contraindication to (harmful for you to use) at least 12 weeks of treatment with ONE of the following clinical standard of care medications: an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan)

C. If you have focal segmental glomerulosclerosis, approval also requires:

1. You are 8 years of age or older
2. You have proteinuria (high levels of protein in the urine)
3. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
4. Your diagnosis is confirmed by a renal biopsy (removal of cells or tissue from the kidney for examination)
5. You have a urine-protein creatinine ratio (UPCR: a test that measures the amount of protein in urine) of at least 1.5 g/g
6. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 30 mL/min/1.73 m(2)
7. You have tried or have a contraindication to (harmful for you to use) at least 3 months of treatment with ONE of the following clinical standard of care medications: an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril), an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan)
8. You will NOT use Filspari concurrently (at the same time) with an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan)
9. You do NOT have nephrotic syndrome (a type of kidney disease) as shown by nephrotic range proteinuria (high levels of protein in the urine) [urine-protein creatinine ratio (UPCR: a test that measures the amount of protein in urine) of at least 3.0 g/g in adults (18 years of age or older); UPCR of at least 2.0 g/g in children (less than 18 years of age)]
10. You do NOT have nephrotic syndrome (a type of kidney disease) as shown by hypoalbuminemia (low levels of protein in the urine), edema (swelling caused by fluid build-up in the body), or hyperlipidemia (high level of fat in the blood)

SPARSENTAN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) **AND** meet the following criterion?
   - The patient has improved or stable kidney function compared to baseline OR has a reduction in proteinuria

   If yes, **approve for 9 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of focal segmental glomerulosclerosis (FSGS) (ICD-10 Group N04.1) and meet **ALL** of the following criteria?
   - The patient has had a greater than 40% reduction in proteinuria from baseline
   - The patient has a urine-protein creatinine ratio (UPCR) less than 1.5 g/g
   - Filspari will NOT be used concurrently with an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SPARSENTAN (Filspari)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
      2. Focal segmental glomerulosclerosis (FSGS: a type of kidney disease)

   B. If you have primary immunoglobulin A nephropathy, renewal also requires:
      1. You have improved or stable kidney function compared to baseline (before starting Filspari) OR you have a reduction (decrease) in proteinuria (a condition with high levels of protein in the urine)

   (Renewal denial text continued on next page)

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

SPESOLIMAB-SBZO - IV (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SPESOLIMAB-SBZO	SPEVIGO		52851	GPI-14 (90250577702050)	

GUIDELINES FOR USE

1. Is the request for the treatment of a generalized pustular psoriasis (GPP) (ICD-10 L40.1) flare and the patient meets **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient weighs at least 40 kg (88 lbs)
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has sterile, macroscopically visible pustules on non-acral skin
   - The patient has NOT received more than one dose in the previous 30 days and that dose was NOT within the last 7 days
   - Spevigo will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPP flare

   If yes, **approve for 1 month by GPID or GPI-14 with a quantity limit of #15 mL for 1 fill.** If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **SPESOLIMAB-SBZO - IV (Spevigo)** requires the following rule(s) be met for approval:
   A. Spevigo will be used for the treatment of a generalized pustular psoriasis (GPP: a type of skin condition) flare
   B. You are 12 years of age or older
   C. You weigh at least 40 kilograms (88 pounds)
   D. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
   E. You have sterile, macroscopically visible pustules (blisters with non-infectious pus that can be seen with the naked eye) on non-acral skin (skin in areas of the body such as arms and legs)
   F. You have NOT received more than one dose in the previous 30 days and that dose was NOT within the last 7 days
   G. You will NOT use Spevigo concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of generalized pustular psoriasis flare

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of generalized pustular psoriasis (GPP) (ICD-10 L40.1) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient weighs at least 40 kg (88 lbs)
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has a history of GPP flares of moderate to severe intensity defined as at least 5% body surface area covered with erythema and the presence of pustules AND a Generalized Pustular Psoriasis Physician Global Assessment [GPPPGA] total score of at least 3
   - Spevigo will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GPP

   If yes, **approve for 3 months by GPID or GPI-14 with a quantity limit of #2mL per 28 days. (Please enter a 1 month approval by GPID or GPI-14 with a quantity limit of #4mL per 28 days for 1 fill.)**

   If no, do not approve.

   INITIAL DENIAL TEXT: Our guideline named **SPESOLIMAB-SBZO - SQ (Spevigo)** requires the following rule(s) be met for approval:
   A. You have generalized pustular psoriasis (GPP: a type of skin condition)
   B. You are 12 years of age or older
   C. You weigh at least 40 kilograms (88 pounds)
   D. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
   E. You have a history of generalized pustular psoriasis (GPP: a type of skin condition) flares of moderate to severe intensity defined as at least 5% body surface area (BSA) covered with erythema (a type of skin condition) and the presence of pustules (a type of skin condition) AND a Generalized Pustular Psoriasis Physician Global Assessment [GPPPGA: a tool used to evaluate disease severity] total score of at least 3
   F. You will NOT use Spevigo concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of generalized pustular psoriasis (GPP: a type of skin condition)

SPIRONOLACTONE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SPIRONOLACTONE	CAROSPIR		15596	GPI-14 (37500020001820)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of heart failure (ICD-10 Group I50) and meet **ALL** of the following criteria?
   - The patient has New York Heart Association (NYHA) Class III-IV
   - The patient has a reduced ejection fraction
   - The patient has a contraindication to or is unable to swallow spironolactone tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #20mL per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of hypertension (ICD-10 I10) and meet **ALL** of the following criteria?
   - Carospir will be used as add-on therapy
   - The patient has a contraindication to or is unable to swallow spironolactone tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #20mL per day.**
   If no, continue to #3.

3. Does the patient have a diagnosis of edema (ICD-10 Group R60) caused by cirrhosis and meet **ALL** of the following criteria?
   - The patient's edema has not responded to fluid and sodium restrictions
   - The patient has a contraindication to or is unable to swallow spironolactone tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #20mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

SPIRONOLACTONE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SPIRONOLACTONE (Carospir)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Heart failure (a type of heart condition)
   2. Hypertension (high blood pressure)
   3. Edema (swelling caused by fluid build-up in the body) caused by cirrhosis (liver damage and scarring)

B. If you have heart failure, approval also requires:
   1. You have New York Heart Association (NYHA) Class III-IV (a way to classify severity of heart failure symptoms)
   2. You have a reduced (lower) ejection fraction (amount of blood that the heart can pump out)
   3. You have a contraindication to (harmful for you to use) or are unable to swallow spironolactone tablets

C. If you have hypertension, approval also requires:
   1. Carospir will be used as add-on therapy
   2. You have a contraindication to (harmful for you to use) or are unable to swallow spironolactone tablets

D. If you have edema caused by cirrhosis, approval also requires:
   1. Your edema (swelling caused by fluid build-up in the body) has not responded to fluid and sodium restrictions (limiting the amount of liquids and sodium)
   2. You have a contraindication to (harmful for you to use) or are unable to swallow spironolactone tablets

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Carospir.

STIRIPENTOL

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
STIRIPENTOL	DIACOMIT	35461		GPI-10 (7260007000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of seizures associated with Dravet syndrome (ICD-10 Group G40.83) and meet **ALL** of the following criteria?
   - The patient is 6 months of age or older
   - The patient is currently being treated with clobazam
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient had a trial of or contraindication to valproic acid or derivatives

   If yes, **approve all formulations of the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **250mg: #12 per day.**
   - **500mg: #6 per day.**

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **STIRIPENTOL (Diacomit)** requires the following rule(s) be met for approval:
   A. You have seizures associated with Dravet syndrome (a rare type of seizure)
   B. You are 6 months of age or older
   C. You are currently being treated with clobazam (a type of seizure medication)
   D. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
   E. You have tried or have a contraindication to (harmful for you to use) valproic acid or derivatives

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

SUNITINIB MALATE	SUTENT, SUNITINIB MALATE	33445		GPI-10 (2153307030)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of gastrointestinal stromal tumor (GIST) (ICD-10 Group C49.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to imatinib mesylate (Gleevec)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #3.

3. Does the patient have a diagnosis of unresectable locally advanced or metastatic pancreatic neuroendocrine tumor (pNET) (ICD-10 C25.4) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumor is progressive and well-differentiated

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #4.

4. Does the patient have a diagnosis of renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The requested medication will be used as adjuvant treatment
   - The patient is at high risk of recurrent renal cell carcinoma following nephrectomy

   If yes, **approve for 12 months by HICL or GPI-10, with a quantity limit of #1 per day.**
   If no, do not approve.

SUNITINIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **SUNITINIB (Sutent)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Advanced renal cell carcinoma (RCC: a type of kidney cancer)
   2. Gastrointestinal stromal tumor (GIST: a type of digestive tumor)
   3. Unresectable locally advanced or metastatic pancreatic neuroendocrine tumor (pNET: a type of tumor in the pancreas that cannot be completely removed by surgery or has spread to other parts of the body)
   4. Renal cell carcinoma

B. If you have advanced renal cell carcinoma, approval also requires:
   1. You are 18 years of age or older

C. If you have gastrointestinal stromal tumor, approval also requires:
   1. You are 18 years of age or older
   2. You have tried or have a contraindication to (harmful for you to use) imatinib mesylate (Gleevec)

D. If you have unresectable locally advanced or metastatic pancreatic neuroendocrine tumor, approval also requires:
   1. You are 18 years of age or older
   2. Your tumor is progressive (getting worse) and well-differentiated (looks like healthy cells)

E. If you have renal cell carcinoma, approval also requires:
   1. You are 18 years of age or older
   2. The requested medication will be used as adjuvant (add-on) treatment
   3. You are at high risk of recurrent renal cell carcinoma (cancer returning) following nephrectomy (surgical removal of kidney)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

TADALAFIL

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TADALAFIL	CIALIS, TADALAFIL		20736 99409	GPI-14 (40304080000305, 40304080000302)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of benign prostatic hyperplasia (BPH) (ICD-10 Group N40) and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to ONE preferred formulary 5-alpha-reductase inhibitor (e.g., finasteride, dutasteride)
   - The patient had a trial of or contraindication to ONE preferred formulary alpha blocker (e.g., doxazosin, terazosin, tamsulosin, alfuzosin)

   If yes, **approve for 12 months by GPID or GPI-14 for the requested strength (2.5 mg or 5 mg).**

   If no, continue to #2.

2. Does the patient have a diagnosis of erectile dysfunction (ICD-10 Group N52)?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Is erectile dysfunction a covered benefit?

   If yes, continue to #4.
   If no, do not approve.
   Change PA type to EX (excluded) and dismiss using the Dismissed letter template.

4. Has the patient tried the preferred agent: generic sildenafil (Viagra)?

   If yes, **approve for 12 months by GPID or GPI-14 for the requested strength (2.5 mg or 5 mg).**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TADALAFIL

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TADALAFIL (Cialis)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Benign prostatic hyperplasia (BPH: a type of prostate condition)
   2. Erectile dysfunction (difficulty getting or keeping an erection)

B. If you have benign prostatic hyperplasia, approval also requires:
   1. You have tried or have a contraindication to (harmful for you to use) ONE preferred formulary 5-alpha-reductase inhibitor (such as finasteride, dutasteride)
   2. You have tried or have a contraindication to (harmful for you to use) ONE preferred formulary alpha blocker (such as doxazosin, terazosin, tamsulosin, alfuzosin)

C. **If you have erectile dysfunction, approval also requires**:
   1. You have tried the preferred medication: generic sildenafil (Viagra)

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Cialis.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

TADALAFIL-ADCIRCA, ALYQ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TADALAFIL	ADCIRCA, ALYQ, TADALAFIL		26587	GPI-14 (40143080000320)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The requested medication will NOT be used concurrently or intermittently with oral erectile dysfunction agents (e.g., Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (e.g., nitroglycerin, isosorbide mononitrate)
   - The requested medication will NOT be used concurrently with guanylate cyclase stimulators (e.g., Adempas [riociguat])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of 15 mmHg or less
   - Pulmonary vascular resistance (PVR) greater than 2 Wood units (WU)

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TADALAFIL-ADCIRCA, ALYQ (Adcirca, Alyq)** requires the following rule(s) be met for approval:
   A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)
   B. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   (Initial denial text continued on the next page)

TADALAFIL-ADCIRCA, ALYQ

INITIAL CRITERIA (CONTINUED)

C. Your pulmonary arterial hypertension (a type of heart and lung condition) is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
   1. Mean pulmonary artery pressure (PAP: a type of measurement) greater than 20 mmHg
   2. Pulmonary capillary wedge pressure (PCWP: a type of measurement) of 15 mmHg or less
   3. Pulmonary vascular resistance (PVR: a type of measurement) greater than 2 Wood units
D. You will NOT use the requested medication concurrently (at the same time) or intermittently (off and on) with oral erectile dysfunction medications (such as Cialis [tadalafil], Viagra [sildenafil]) or any organic nitrates in any form (such as nitroglycerin, isosorbide mononitrate)
E. You will NOT use the requested medication concurrently (at the same time) with guanylate cyclase stimulators (such as Adempas [riociguat])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

TAFAMIDIS

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TAFAMIDIS MEGLUMINE	VYNDAQEL	41631		GPI-10 (4055008020)	
TAFAMIDIS	VYNDAMAX	45729		GPI-10 (4055008000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cardiomyopathy associated with wild-type transthyretin-mediated amyloidosis (ICD-10 E85.82) or hereditary transthyretin-mediated amyloidosis (ATTR-CM) (ICD-10 E85.4) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist, transthyretin amyloidosis (ATTR) specialist, or medical geneticist
   - The patient has New York Heart Association (NYHA) Class I, II, or III heart failure
   - The requested medication will NOT be used concurrently with a transthyretin stabilizer (acoramidis [Attruby]) or transthyretin silencer (vutrisiran [Amvuttra]) for the treatment of ATTR-CM

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's diagnosis confirmed by **ONE** of the following?
   - A bone scan (scintigraphy) strongly positive for myocardial uptake of TC-99m-PYP *(Note: Strongly positive defined as Grade 2 or 3 uptake using the Perugini Grade 1-3 scoring system)*
   - A biopsy of tissue of affected organ(s) (cardiac and possibly non-cardiac sites) to confirm amyloid presence **AND** chemical typing to confirm presence of transthyretin (TTR) protein

   If yes, **approve for 12 months by HICL or GPI-10 for all of the following:**
   - **Vyndaqel: #4 per day.**
   - **Vyndamax: #1 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TAFAMIDIS

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TAFAMIDIS (Vyndaqel, Vyndamax)** requires the following rule(s) be met for approval:

A. You have cardiomyopathy associated with wild-type or hereditary transthyretin-mediated amyloidosis (ATTR-CM: heart disease caused by a build-up of a type of protein)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor), transthyretin amyloidosis (ATTR) specialist, or medical geneticist (doctor who treats gene disorders)
D. You have New York Heart Association (NYHA) Class I, II, or III heart failure (classification of heart failure symptoms)
E. You will NOT use the requested medication concurrently (at the same time) with a transthyretin stabilizer (acoramidis [Attruby]) or transthyretin silencer (vutrisiran [Amvuttra]) for the treatment of cardiomyopathy of wild-type or hereditary transthyretin-mediated amyloidosis (heart disease caused by a build-up of a type of protein)
F. Your diagnosis is confirmed by ONE of the following:
    1. A bone scan (scintigraphy) strongly positive for myocardial uptake of TC-99m-PYP (a type of imaging test) (Note: Strongly positive defined as Grade 2 or 3 uptake using the Perugini Grade 1-3 scoring system)
    2. A biopsy of tissue of the affected organ(s) (removal of cells or tissue from the body for examination) (can be heart or non-heart related organs) to confirm amyloid (type of protein) presence AND chemical typing to confirm presence of transthyretin (TTR) protein

TAFASITAMAB-CXIX

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TAFASITAMAB-CXIX	MONJUVI	46758		GPI-10 (2135146720)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of diffuse large B-cell lymphoma (DLBCL) (ICD-10 Group C83.3), not otherwise specified, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The cancer has relapsed or is refractory
   - The patient is not eligible for autologous stem cell transplant (ASCT)
   - Monjuvi will be used in combination with Revlimid (lenalidomide)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of follicular lymphoma (FL) (ICD-10 Group C82) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The cancer has relapsed or is refractory
   - Monjuvi will be used in combination with Revlimid (lenalidomide) and rituximab

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TAFASITAMAB-CXIX (Monjuvi)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Diffuse large B-cell lymphoma (DLBCL: a type of blood cancer)
      2. Follicular lymphoma (FL: a type of blood cancer)

   B. If you have diffuse large B-cell lymphoma (not otherwise specified), approval also requires:
      1. You are 18 years of age or older
      2. Your cancer has relapsed or is refractory (cancer that has returned or does not fully respond to treatment)
      3. You are not eligible for autologous stem cell transplant (ASCT: stem cell transplant transferred from your own body)
      4. Monjuvi will be used in combination with Revlimid (lenalidomide)

TALAZOPARIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TALAZOPARIB TOSYLATE	TALZENNA	45368		GPI-10 (2153558040)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient's cancer is human epidermal growth factor receptor 2 (HER2)-negative
   - The patient's cancer has a deleterious or suspected deleterious germline breast cancer susceptibility gene (BRCA)-mutation (*gBRCAm*), as confirmed by an FDA-approved companion diagnostic test for Talzenna
   - The patient has been treated with chemotherapy (e.g., doxorubicin, docetaxel) in the neoadjuvant, adjuvant, or metastatic setting

   If yes, continue to #2**.**
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient's cancer is NOT hormone receptor (HR)-positive
   - The patient's cancer is hormone receptor (HR)-positive, AND the patient has received prior treatment with endocrine therapy (e.g., tamoxifen, Arimidex [anastrozole]) or endocrine therapy is considered to be inappropriate for the patient

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient have a diagnosis of metastatic castration-resistant prostate cancer (mCRPC) (ICD-10 Z19.2, C61) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Talzenna will be used in combination with Xtandi (enzalutamide)
   - The patient's cancer has a homologous recombination repair (HRR) gene mutation

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TALAZOPARIB

GUIDELINES FOR USE (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient had a bilateral orchiectomy
   - The patient has a castrate level of testosterone (i.e., less than 50 ng/dL)
   - Talzenna will be used concurrently with a gonadotropin-releasing hormone (GnRH) analog (e.g., Lupron-Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TALAZOPARIB (TALZENNA)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Locally advanced or metastatic breast cancer (cancer that has spread to nearby tissue or lymph nodes or other parts of the body)
      2. Metastatic castration-resistant prostate cancer (mCRPC: prostate cancer that has spread to other parts of the body and no longer responds to testosterone lowering treatment)

   B. If you have locally advanced or metastatic breast cancer, approval also requires:
      1. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-negative
      2. You have a deleterious or suspected deleterious germline breast cancer susceptibility gene (BRCA)-mutation (gBRCAm: a type of abnormal change in a gene), as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic test for Talzenna
      3. You have been treated with chemotherapy (such as doxorubicin, docetaxel) in the neoadjuvant (given before main treatment), adjuvant (add-on to main treatment), or metastatic setting (to treat disease that has spread to other parts of the body)
      4. You meet ONE of the following:
         a. You do NOT have hormone receptor (HR: a type of protein)-positive breast cancer
         b. You have hormone receptor (HR)-positive breast cancer, and you have been treated with prior endocrine (hormone) therapy (such as tamoxifen, Arimidex [anastrozole]), or endocrine therapy is considered to be inappropriate for you

TALIGLUCERASE ALFA

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TALIGLUCERASE ALFA	ELELYSO	38937		GPI-10 (8270008010)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of type 1 (non-neuronopathic) Gaucher disease (ICD-10 E75.22) and meet the following criterion?
   - The patient is 4 years of age or older

   If yes, **approve for up to 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TALIGLUCERASE ALFA (Elelyso)** requires the following rule(s) be met for approval:
   A. You have type 1 Gaucher disease (genetic disorder where a type of fatty substance builds up in the body)
   B. You are 4 years of age or older

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Elelyso.

PRIOR AUTHORIZATION GUIDELINES

TALIMOGENE LAHERPAREPVEC

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TALIMOGENE LAHERPAREPVEC	IMLYGIC	42741		GPI-10 (2157407040)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable melanoma and meet **ALL** of the following criteria?
   - The patient has a recurrence of melanoma lesions after initial surgery
   - The patient does not have a history of primary or acquired immunodeficient states, leukemia, lymphoma, or AIDS
   - The patient is not currently receiving immunosuppressive therapy
   - The patient is not receiving concurrent medical therapy for the treatment of melanoma including pembrolizumab (Keytruda), nivolumab (Opdivo), ipilimumab (Yervoy), dabrafenib (Tafinlar), trametinib (Mekinist), vemurafenib (Zelboraf), interleukin-2, interferon, dacarbazine, temozolomide (Temodar), paclitaxel, carboplatin, imatinib (Gleevec), melphalan (Alkeran), imiquimod, or radiation therapy

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Will Imlygic be injected into cutaneous, subcutaneous, and/or nodal lesions that are visible, palpable, or detectable by ultrasound guidance?

   If yes, **approve for a total of 12 months and enter three prior authorizations (initial, second, and maintenance doses) by GPID or GPI-14 as follows:**
   - **First authorization: approve for 1 fill of Imlygic 10^6 (1 million) PFU/mL vial: 4mL (#4 vials)**
   - **Second authorization (starting 3 weeks after initial authorization): approve for 1 fill of Imlygic 10^8 (100 million) PFU/mL vial: 4mL (#4 vials)**
   - **Third authorization (starting 5 weeks after initial authorization): approve for 11 months for Imlygic 10^8 (100 million) PFU/mL vial: 8mL (#8 vials) every 28 days**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TALIMOGENE LAHERPAREPVEC

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline for **TALIMOGENE LAHERPAREPVEC (Imlygic)** requires the following rule(s) be met for approval:

A. You have unresectable melanoma (type of skin cancer that cannot be removed with surgery)
B. Your melanoma lesions are recurrent after initial surgery (cancer returns after surgery)
C. You do not have a history of primary or acquired immunodeficient states (conditions that weaken your immune system), leukemia (type of white blood cell cancer), lymphoma (type of cancer affecting immune system), or Acquired Immunodeficiency Syndrome (AIDS)
D. You are not currently receiving immunosuppressive therapy (treatment that weakens your immune system)
E. You are not receiving concurrent medical therapy for the treatment of melanoma including pembrolizumab (Keytruda), nivolumab (Opdivo), ipilimumab (Yervoy), dabrafenib (Tafinlar), trametinib (Mekinist), vemurafenib (Zelboraf), interleukin-2, interferon, dacarbazine, temozolomide (Temodar), paclitaxel, carboplatin, imatinib (Gleevec), melphalan (Alkeran), imiquimod, or radiation therapy
F. The request is for Imlygic to be injected into cutaneous, subcutaneous, and/or nodal lesions (injected into the skin layers) that are visible, palpable (can be felt), or detectable by ultrasound guidance

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

PRIOR AUTHORIZATION GUIDELINES

TAPINAROF

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TAPINAROF	VTAMA	48031		GPI-10 (9025007500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of plaque psoriasis (ICD-10 L40.0) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, continue to #3.

2. Has the patient had a trial of or contraindication to **ONE** of the following clinical standard of care agents?
   - High or super-high potency topical corticosteroid (e.g., triamcinolone acetonide, fluocinonide, clobetasol propionate, halobetasol propionate)
   - Topical vitamin D analog (e.g., calcipotriene cream, calcitriol ointment)
   - Topical calcineurin inhibitor (e.g., tacrolimus, pimecrolimus)
   - Topical retinoid (e.g., tazarotene cream/gel)
   - Anthralin

   If yes, **approve for 3 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of atopic dermatitis (ICD-10 Group L20) **AND** meet the following criterion?
   - The patient is 2 years of age or older

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TAPINAROF

INITIAL CRITERIA (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to the clinical standard of care agent: a topical corticosteroid (e.g., triamcinolone 0.1% cream or ointment, mometasone furoate 0.1% ointment, fluocinonide 0.05% cream, halobetasol propionate 0.05% ointment)
   - The patient had a trial of or contraindication to the preferred agent: a topical calcineurin inhibitor (e.g., Elidel [pimecrolimus], Protopic [tacrolimus])

   If yes, **approve for 3 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TAPINAROF (Vtama)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Plaque psoriasis (a type of skin condition)
      2. Atopic dermatitis (a type of skin condition)
   B. If you have plaque psoriasis, approval also requires:
      1. You are 18 years of age or older
      2. You have tried or have a contraindication to (harmful for you to use) ONE of the following clinical standard of care medications:
         a. High or super-high potency topical corticosteroid (such as triamcinolone acetonide, fluocinonide, clobetasol propionate, halobetasol propionate)
         b. Topical vitamin D analog (such as calcipotriene cream, calcitriol ointment)
         c. Topical calcineurin inhibitor (such as tacrolimus, pimecrolimus)
         d. Topical retinoid (such as tazarotene cream/gel)
         e. Anthralin
   C. If you have atopic dermatitis, approval also requires:
      1. You are 2 years of age or older
      2. You meet ONE of the following:
         a. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: a topical corticosteroid (such as triamcinolone 0.1% cream or ointment, mometasone furoate 0.1% ointment, fluocinonide 0.05% cream, halobetasol propionate 0.05% ointment)
         b. You have tried or have a contraindication to (harmful for you to use) the preferred medication: a topical calcineurin inhibitor (such as Elidel [pimecrolimus], Protopic [tacrolimus])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TAPINAROF

RENEWAL CRITERIA

1. Does the patient have a diagnosis of plaque psoriasis (ICD-10 L40.0) **AND** meet the following criterion?
   - The patient has achieved or maintained clear or minimal disease

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, continue to #2.

2. Does the patient have a diagnosis of atopic dermatitis (ICD-10 Group L20) **AND** meet the following criterion?
   - The patient has experienced or maintained improvement in pruritus, relapsing-remitting dermatitis, or facial/interdigital involvement

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TAPINAROF (Vtama)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Plaque psoriasis (a type of skin condition)
      2. Atopic dermatitis (a type of skin condition)
   B. If you have plaque psoriasis, renewal also requires:
      1. You have achieved or maintained clear or minimal disease
   C. If you have atopic dermatitis, renewal also requires:
      1. You have experienced or maintained improvement in pruritus (itchiness), relapsing-remitting dermatitis (a type of skin condition that returns and goes away), or facial/interdigital (between the fingers or toes) involvement

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TASIMELTEON	HETLIOZ, HETLIOZ LQ, TASIMELTEON	40927		GPI-10 (6025007000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of non-24 hour sleep-wake disorder (N24HSWD) (ICD-10 G47.24, G47.9) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is light-insensitive or has total blindness
   - The patient had a trial and failure of maximally-tolerated melatonin therapy
   - The requested medication is for the Hetlioz (tasimelteon) capsules

   If yes, **approve the capsule for a lifetime by GPID or GPI-14 with a quantity limit of #1 per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of nighttime sleep disturbances in Smith-Magenis syndrome (SMS) (ICD-10 Q93.88) and meet the following criterion?
   - The patient had a trial and failure of maximally-tolerated melatonin therapy

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The requested medication is for brand Hetlioz capsules AND the patient is 16 years of age or older
   - The requested medication is for Hetlioz LQ oral suspension AND the patient is 3 years to 15 years of age

   If yes, **approve the requested medication for a lifetime by GPID or GPI-14 with the following quantity limits:**
   - **Brand Hetlioz capsules: #1 per day.**
   - **Hetlioz LQ oral suspension: #5mL per day.**

   If no, do not approve.

TASIMELTEON

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TASIMELTEON (Hetlioz, Hetlioz LQ)** requires the following rules(s) be met for approval:

A. You have one of the following:
   1. Non-24 hour sleep-wake disorder (N24HSWD: a type of sleep condition)
   2. Nighttime sleep disturbances in Smith-Magenis syndrome (SMS: a type of developmental disorder that causes sleeping problems)

B. If you have non-24 hour sleep-wake disorder, approval also requires:
   1. You are 18 years of age or older
   2. You are light-insensitive (not affected by light) or have total blindness
   3. You have tried and failed maximally-tolerated melatonin therapy
   4. You are requesting the capsule

C. If you have nighttime sleep disturbances in Smith-Magenis syndrome, approval also requires:
   1. You are requesting brand Hetlioz capsules if you are 16 years of age or older
   2. You are requesting Hetlioz LQ oral suspension if you are 3 to 15 years old
   3. You have tried and failed maximally-tolerated melatonin therapy

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TAZEMETOSTAT

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TAZEMETOSTAT (Tazverik)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Metastatic or locally advanced epithelioid sarcoma (a type of soft tissue cancer that has spread to other parts of the body or has spread from where it started to nearby tissue or lymph nodes)
   2. Relapsed or refractory follicular lymphoma (a type of blood cancer that has returned or did not respond to treatment)

B. If you have metastatic or locally advanced epithelioid sarcoma, approval also requires:
   1. You are 16 years of age or older
   2. You are not eligible for complete resection (surgically removing all of a tissue/organ)

C. If you have relapsed or refractory follicular lymphoma, approval also requires:
   1. You are 18 years or older
   2. You meet ONE of the following:
      a. Your tumors are positive for an EZH2 (type of gene) mutation as detected by a Food and Drug Administration (FDA)-approved test AND you have received at least 2 prior systemic therapies (treatment that targets the entire body)
      b. You have no satisfactory alternative treatment options

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TBO-FILGRASTIM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TBO-FILGRASTIM	GRANIX	40426		GPI-10 (8240152070)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of a non-myeloid malignancy and meet **ALL** of the following criteria?
   - The patient is 1 month of age or older
   - Therapy is prescribed by or in consultation with a hematologist or oncologist
   - The patient is receiving myelosuppressive anti-cancer drugs associated with a significant incidence of severe neutropenia with fever
   - The patient had a trial of or contraindication to the preferred agent: Nivestym

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TBO-FILGRASTIM (Granix)** requires the following rule(s) be met for approval:
   A. You have a non-myeloid malignancy (cancer not affecting bone marrow)
   B. You are 1 month of age or older
   C. Therapy is prescribed by or in consultation with a hematologist (blood specialist) or oncologist (cancer/tumor doctor)
   D. You are receiving myelosuppressive anti-cancer drugs (drugs that decrease bone marrow activity) associated with a significant incidence of severe neutropenia (a type of blood condition) with fever
   E. You had a trial of or contraindication (harmful for) to the preferred medication: Nivestym

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TEDIZOLID

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TEDIZOLID PHOSPHATE	SIVEXTRO	41209		GPI-10 (1623007020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of an acute bacterial skin and skin structure infection (ABSSSI) and meet **ONE** of the following criteria?
   - The request is for continuation of therapy (oral or intravenous)
   - The patient is being transitioned from intravenous Sivextro to oral Sivextro
   - The patient had a trial of, contraindication to, or resistance to generic linezolid tablets

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient weigh at least 35 kilograms (77 pounds)?

   If yes, **approve for 1 month by HICL or GPI-10 with a quantity limit of #6 for 1 fill only.**
   If no, continue to #3.

3. Does the patient weigh between 1 kilogram to 34 kilograms (2.2 pounds to 74.8 pounds) **AND** meet the following criterion?
   - The request is for Sivextro intravenous vial

   If yes, **approve the vial for 1 month by GPID or GPI-14 with a quantity limit of #12 for 1 fill only.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

TEDIZOLID

GUIDELINES FOR USE

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TEDIZOLID (Sivextro)** requires the following rule(s) be met for approval:

A. You have an acute bacterial skin and skin structure infection (ABSSSI: a type of skin condition)
B. You meet ONE of the following:
   1. The request is for continuation of therapy of oral or intravenous (IV: injection into the vein) Sivextro
   2. You are being transitioned from IV Sivextro to oral Sivextro
   3. You had a trial of, contraindication to (harmful for you to use), or resistance to (medication no longer works as well) generic linezolid tablets
C. If your weight is between 1 kilogram to 34 kilograms (2.2 pounds to 74.8 pounds), only Sivextro intravenous vial will be approved

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Sivextro.

TEDUGLUTIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TEDUGLUTIDE	GATTEX	39890		GPI-10 (5253307000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of short bowel syndrome (SBS) (ICD-10 Group K90.82) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The patient is dependent on intravenous parenteral nutrition, defined as requiring parenteral nutrition at least three times per week

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TEDUGLUTIDE (Gattex)** requires the following rule(s) be met for approval:
   A. You have short bowel syndrome (SBS: the body cannot absorb fluids and nutrients due to a lack of a functional small intestine)
   B. You are 1 year of age or older
   C. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions)
   D. You are dependent on parenteral nutrition (administration of nutrition through a vein), defined as requiring parenteral nutrition at least three times per week

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TEMOZOLOMIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TEMOZOLOMIDE	TEMODAR , TEMOZOLOMIDE	20355		GPI-10 (2110407000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have **ONE** of the following diagnoses?
   - Anaplastic astrocytoma (ICD-10 C71.9)
   - Glioblastoma multiforme (ICD-10 C72.9; Group C71)
   - Small cell lung cancer (SCLC) (ICD-10 Group C34)

   If yes, **approve for 12 months as follows:**
   - **If the plan covers non-self-administered (NSA) agents, approve by HICL or GPI-10.**
   - **If the plan does NOT cover NSA agents, approve only Temozolomide PO for all strengths by GPID or GPI-14.**

   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic melanoma (ICD-10 Group C43) **AND** meet the following criterion?
   - Temodar will NOT be used concurrently with an immunosuppressive therapy or a medical therapy for the treatment of melanoma

   If yes, **approve for 12 months as follows:**
   - **If the plan covers non-self-administered (NSA) agents, approve by HICL or GPI-10.**
   - **If the plan does NOT cover NSA agents, approve only Temozolomide PO for all strengths by GPID or GPI-14.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TEMOZOLOMIDE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TEMOZOLOMIDE (Temodar)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Anaplastic astrocytoma (a type of brain cancer)
   2. Glioblastoma multiforme (a type of brain or spine cancer)
   3. Small cell lung cancer (SCLC: a type of lung cancer)
   4. Metastatic melanoma (a type of skin cancer that has spread to other parts of the body)

B. If you have metastatic melanoma, approval also requires:
   1. Temodar will NOT be used concurrently (at the same time) with an immunosuppressive therapy (treatment that lowers the activity of the body's immune system) or a medical therapy for the treatment of melanoma

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TENAPANOR HCL	IBSRELA		46915	GPI-10 (5255858010)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of irritable bowel syndrome with constipation (IBS-C) (ICD-10 K58.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to the preferred agents: Linzess (linaclotide) AND Trulance (plecanatide)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TENAPANOR (Ibsrela)** requires the following rule(s) be met for approval:
   A. You have irritable bowel syndrome with constipation (IBS-C: a type of bowel disease)
   B. You are 18 years of age or older
   C. You have tried or have a contraindication to (harmful for you to use) the preferred medications: Linzess (linaclotide) AND Trulance (plecanatide)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Ibsrela.

TEPLIZUMAB-MZWV

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TEPLIZUMAB-MZWV	TZIELD	48464		GPI-10 (2752106520)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of stage 2 type 1 diabetes (ICD-10 Group E10) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has at least two positive pancreatic islet cell autoantibodies (e.g., insulin autoantibody, glutamic acid decarboxylase 65 autoantibodies, insulinoma-associated antigen 2 autoantibody)
   - An oral glucose tolerance test (or an alternative method, if oral glucose tolerance test is not available) confirms the patient has dysglycemia without overt hyperglycemia
   - The patient's clinical history does not suggest type 2 diabetes
   - The patient has NOT previously received a 14-dose treatment course

   If yes, **approve for 30 days by HICL or GPI-10 with a quantity limit of #28 mL.**
   If no, continue to #2.

2. Does the patient have a diagnosis of stage 3 type 1 diabetes (ICD-10 Group E10) and meet **ALL** of the following criteria?
   - The patient is 8 to 17 years of age
   - The patient has been recently diagnosed (within the last 8 weeks)
   - The patient has at least one positive pancreatic islet cell autoantibody (e.g., insulin autoantibody, glutamic acid decarboxylase 65 autoantibodies, insulinoma-associated antigen 2 autoantibody)
   - The patient has a peak C-peptide of at least 0.2 pmol/mL on a mixed-meal tolerance test (or an alternative method, if a mixed-meal tolerance test is not available)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TEPLIZUMAB-MZWV

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: Our guideline named **TEPLIZUMAB-MZWV (Tzield)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Stage 2 type 1 diabetes (an immune disorder with high blood sugar)
   2. Stage 3 type 1 diabetes (an immune disorder with high blood sugar)

B. If you have stage 2 type 1 diabetes, approval also requires:
   1. You are 1 year of age or older
   2. You have at least two positive pancreatic islet autoantibodies (predictors of type 1 diabetes such as insulin autoantibody, glutamic acid decarboxylase 65 autoantibodies, insulinoma-associated antigen 2 autoantibody)
   3. An oral glucose tolerance test (or an alternative method, if oral glucose tolerance test is not available) confirms you have dysglycemia (abnormal blood sugar stability) without overt hyperglycemia (high blood sugar)
   4. Your clinical history does not suggest type 2 diabetes (a disorder with high blood sugar)
   5. You have NOT previously received a 14-dose treatment course

C. If you have stage 3 type 1 diabetes, approval also requires:
   1. You are 8 to 17 years of age
   2. You have been recently diagnosed (within the last 8 weeks)
   3. You have at least one positive pancreatic islet cell autoantibody (a predictor of type 1 diabetes such as insulin autoantibody, glutamic acid decarboxylase 65 autoantibodies, insulinoma-associated antigen 2 autoantibody)
   4. You have a peak C-peptide (a type of protein) of at least 0.2 pmol/mL on a mixed-meal tolerance test (a type of test that measures how the body regulates sugar levels in response to food) (or an alternative method, if a mixed-meal tolerance test is not available)

TERIPARATIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TERIPARATIDE	FORTEO, TERIPARATIDE	24700		GPI-10 (3004407000)	

GUIDELINES FOR USE

1. Is the medication being used for **ONE** of the following diagnoses?
   - Postmenopausal osteoporosis (ICD-10 M81.0, Group M80.0)
   - Primary or hypogonadal osteoporosis in a male patient (ICD-10 M81.0, Group M80.0)
   - Glucocorticoid-induced osteoporosis (ICD-10 M81.8, Group M80.8)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient at high risk for fractures defined as **ONE** of the following?
   - History of osteoporotic (fragility, low trauma) fracture(s)
   - Two or more risk factors for fracture (e.g., history of multiple recent low trauma fractures, BMD T-score less than or equal to -2.5, corticosteroid use, or use of GnRH analogs such as Synarel [nafarelin])
   - No prior treatment for osteoporosis, AND a FRAX score of at least 20% for any major fracture OR at least 3% for hip fracture

   If yes, continue to #4.
   If no, continue to #3.

3. Does the patient meet **ONE** of the following criteria?
   - The patient is unable to use oral therapy (upper gastrointestinal [GI] problems - unable to tolerate oral medication, lower GI problems - unable to absorb oral medications, trouble remembering to take oral medications or coordinating an oral bisphosphonate with other oral medications or their daily routine)
   - The patient had a trial of, intolerance to, or a contraindication to a bisphosphonate (e.g., Fosamax [alendronate], Actonel [risedronate], Boniva [ibandronate])

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TERIPARATIDE

GUIDELINES FOR USE (CONTINUED)

4. Has the patient received a total of 24 months cumulative treatment with Forteo (teriparatide)?

   If yes, continue to #5.
   If no, **approve up to 24 months lifetime cumulative treatment duration by HICL or GPI-10 with a quantity limit of #2.24mL per 28 days.**

5. Does the patient remain at or has returned to having a high risk for fracture?

   If yes, **approve up to 12 months by HICL or GPI-10 with a quantity limit of #2.24mL per 28 days.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TERIPARATIDE (Forteo)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Postmenopausal osteoporosis (a type of bone condition)
      2. Primary or hypogonadal (low level of sex hormones) osteoporosis (a type of bone condition) in a male patient
      3. Glucocorticoid (steroid)-induced osteoporosis (a type of bone condition)
   B. You meet ONE of the following (1, 2, or 3):
      1. You are at high risk for fractures defined as ONE of the following:
         a. You have a history of osteoporotic (fragility [weakness], low trauma [injury]) fracture(s) (a type of complete or partial break in a bone)
         b. You have TWO or more risk factors for a fracture (such as a history of multiple recent low trauma fractures, bone mineral density [BMD] T-score [a type of lab test] less than or equal to -2.5, corticosteroid [such as prednisone] use, or use of gonadotropin-releasing hormone [GnRH] analogs [such as Synarel (nafarelin)])
         c. You have had no prior treatment for osteoporosis, AND you have a Fracture Risk Assessment Tool (FRAX: a type of test) score of at least 20 percent for any major fracture OR at least 3 percent for a hip fracture

   (Denial text continued on next page)

TERIPARATIDE

GUIDELINES FOR USE (CONTINUED)

2. You are unable to use oral therapy due to reasons such as upper gastrointestinal (GI: stomach and intestine) problems (such as unable to tolerate oral medications), lower GI problems (such as unable to absorb oral medications), trouble remembering to take oral medications or coordinating an oral bisphosphonate (such as Fosamax [alendronate]) with other oral medications or your daily routine
3. You have tried, have an intolerance to (side effect), or have a contraindication to (harmful for you to use) a bisphosphonate (such as Fosamax [alendronate], Actonel [risedronate], Boniva [ibandronate])

C. You meet ONE of the following:
1. You have received a total of 24 months or more of treatment with Forteo (teriparatide) AND remain at or have returned to having a high risk for fracture
2. You have received a total of less than 24 months of treatment with Forteo (teriparatide)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TESAMORELIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TESAMORELIN ACETATE	EGRIFTA SV, EGRIFTA WR	37268		GPI-10 (3015008510)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of HIV (ICD-10 B20) with lipodystrophy (ICD-10 E88.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The requested medication will be used for the reduction of excess abdominal fat
   - The patient is currently receiving treatment with a protease inhibitor (PI), PI combination (i.e., saquinavir, ritonavir, indinavir, nelfinavir, lopinavir/ritonavir, atazanavir, fosamprenavir, or tipranavir), a nucleoside reverse transcriptase inhibitor (NRTI), OR an NRTI combination (i.e., zidovudine, didanosine, stavudine, lamivudine, abacavir, tenofovir, emtricitabine, lamivudine/zidovudine, abacavir/lamivudine/zidovudine, efavirenz/emtricitabine/tenofovir, emtricitabine/tenofovir)

   If yes, **approve the requested medication for 3 months by GPID or GPI-14 with the following quantity limits:**
   - **Egrifta SV: #1 per day.**
   - **Egrifta WR: #1 per 28 days.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TESAMORELIN (Egrifta SV, Egrifta WR)** requires the following rule(s) be met for approval:
   A. You have human immunodeficiency virus (HIV: an immune system disease caused by a virus) with lipodystrophy (abnormal distribution of fat in the body)
   B. You are 18 years of age or older
   C. The requested medication will be used for the reduction of excess abdominal fat
   D. You are currently receiving treatment with a protease inhibitor (PI: a type of medication), PI combination (saquinavir, ritonavir, indinavir, nelfinavir, lopinavir/ritonavir, atazanavir, fosamprenavir, or tipranavir), a nucleoside reverse transcriptase inhibitor (NRTI: a type of medication), OR an NRTI combination (zidovudine, didanosine, stavudine, lamivudine, abacavir, tenofovir, emtricitabine, lamivudine/zidovudine, abacavir/lamivudine/zidovudine, efavirenz/emtricitabine/tenofovir, emtricitabine/tenofovir)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TESTOSTERONE CYPIONATE - AZMIRO

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TESTOSTERONE CYPIONATE	AZMIRO		56456	GPI-14 (2310003010E530)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1)?

   If yes, continue to #2.
   If no, continue to #6.

2. Does the patient meet **ONE** of the following criteria confirming low testosterone levels?
   - The patient has at least TWO total serum testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
   - The patient has a free serum testosterone level of less than 5 ng/dL (0.17 nmol/L)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Has the patient had a trial of or contraindication to the preferred agent: generic testosterone cypionate?

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Is the patient 40 years of age or older?

   If yes, continue to #5.
   If no, **approve for 12 months by HICL or GPI-10.**

5. Has the patient's prostate specific antigen (PSA) been evaluated within the past 12 months and the patient meets **ONE** of the following criteria?
   - The PSA level is less than or equal to 4 ng/mL
   - The PSA level is greater than 4 ng/mL and the provider attests that the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TESTOSTERONE CYPIONATE - AZMIRO

INITIAL CRITERIA (CONTINUED)

6. Is the requested agent for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TESTOSTERONE CYPIONATE - AZMIRO** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Primary or secondary male hypogonadism (hypotestosteronism or low testosterone)
      2. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)

   B. If you are a male with primary or secondary hypogonadism, approval also requires:
      1. You meet ONE of the following showing you have low testosterone levels:
         a. You have at least TWO total serum (blood) testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
         b. You have a free serum (blood) testosterone level of less than 5 ng/dL (0.17 nmol/L)
      2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: generic testosterone cypionate
      3. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated within the past 12 months and you meet ONE of the following:
         a. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is less than or equal to 4 ng/mL
         b. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is greater than 4 ng/mL and the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

   C. If you have gender dysphoria, approval also requires:
      1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for the treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TESTOSTERONE CYPIONATE - AZMIRO

RENEWAL CRITERIA

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1) who meets **ALL** of the following criteria?
   - The patient has improved symptoms compared to baseline and tolerance to treatment
   - The patient has yearly lab tests, AND both testosterone and hematocrit levels are NOT above the normal range

   If yes, continue to #2.
   If no, continue to #4.

2. Is the patient 40 years of age or older?

   If yes, continue to #3.
   If no, **approve for 12 months by HICL or GPI-10.**

3. Has the patient's prostate specific antigen (PSA) been evaluated within the past 12 months and the patient meets **ONE** of the following criteria?
   - The PSA level is less than or equal to 4 ng/mL
   - The PSA level is greater than 4 ng/mL and the provider attests that the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

4. Is the requested agent for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

TESTOSTERONE CYPIONATE - AZMIRO

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TESTOSTERONE CYPIONATE - AZMIRO** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Primary or secondary male hypogonadism (hypotestosteronism or low testosterone)
   2. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)

B. If you are a male with primary or secondary hypogonadism, renewal also requires:
   1. You have shown improvement in your symptoms compared to baseline (before treatment) and tolerance to treatment
   2. You have yearly lab tests, and your testosterone and hematocrit levels (types of blood tests) are not above the normal range
   3. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated within the past 12 months and you meet ONE of the following:
      a. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is less than or equal to 4 ng/mL
      b. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is greater than 4 ng/mL and the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

C. If you have gender dysphoria, renewal also requires:
   1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for the treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Azmiro.

TESTOSTERONE CYPIONATE - DEPO

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TESTOSTERONE CYPIONATE	DEPO-TESTOSTERONE, TESTOSTERONE CYPIONATE		10191 10194	GPI-14 (23100030102010, 23100030102015, 23100030102070)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1)?

   If yes, continue to #2.
   If no, continue to #5.

2. Does the patient meet **ONE** of the following criteria confirming low testosterone levels?
   - The patient has at least TWO total serum testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
   - The patient has a free serum testosterone level of less than 5 ng/dL (0.17 nmol/L)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the patient 40 years of age or older?

   If yes, continue to #4.
   If no, **approve all strengths for 12 months by GPID or GPI-14.**

4. Has the patient's prostate specific antigen (PSA) been evaluated within the past 12 months and the patient meets **ONE** of the following criteria?
   - The PSA level is less than or equal to 4 ng/mL
   - The PSA level is greater than 4 ng/mL and the provider attests that the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

   If yes, **approve all strengths for 12 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TESTOSTERONE CYPIONATE - DEPO

INITIAL CRITERIA (CONTINUED)

5. Is the requested agent for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve all strengths for 12 months by GPID or GPI-14 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TESTOSTERONE CYPIONATE - DEPO (Depo-Testosterone)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Primary or secondary male hypogonadism (hypotestosteronism or low testosterone)
      2. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)

   B. If you are a male with primary or secondary hypogonadism, approval also requires:
      1. You meet ONE of the following showing you have low testosterone levels:
         a. You have at least TWO total serum (blood) testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
         b. You have a free serum (blood) testosterone level of less than 5 ng/dL (0.17 nmol/L)
      2. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated within the past 12 months and you meet ONE of the following:
         a. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is less than or equal to 4 ng/mL
         b. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is greater than 4 ng/mL and the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

   C. If you have gender dysphoria, approval also requires:
      1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for the treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

TESTOSTERONE

INITIAL CRITERIA (CONTINUED)

5. Is the request for AndroGel 1%, AndroGel 1.62%, Axiron, Testim, or Vogelxo?

   If yes, **approve all strengths of all of the following for 12 months by GPID or GPI-14:**
   - **AndroGel (testosterone)**
   - **Axiron (testosterone)**
   - **Testim (testosterone)**
   - **Vogelxo (testosterone)**

   If no, continue to #6.

6. Is the request for Androderm, Fortesta, Natesto, or Striant, **AND** the patient meets the following criterion?
   - The patient had a trial of or contraindication to TWO preferred agents: testosterone cypionate and intramuscular testosterone enanthate

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Is the requested agent for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TESTOSTERONE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TESTOSTERONE** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Primary or secondary male hypogonadism (hypotestosteronism or low testosterone)
   2. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)

B. If you are a male with primary or secondary hypogonadism, approval also requires:
   1. You meet ONE of the following showing you have low testosterone levels:
      a. You have at least two total serum (blood) testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
      b. You have a free serum (blood) testosterone level of less than 5 ng/dL (0.17 nmol/L)
   2. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated within the past 12 months and you meet ONE of the following:
      a. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is less than or equal to 4 ng/mL
      b. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is greater than 4 ng/mL and the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA
   3. If the request is for Androderm, Fortesta, Natesto, or Striant, you have tried or have a contraindication to (harmful for you to use) TWO preferred medications: testosterone cypionate and intramuscular (injected into the muscle) testosterone enanthate

C. If you have gender dysphoria, approval also requires:
   1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TESTOSTERONE ENANTHATE

INITIAL CRITERIA (CONTINUED)

6. Is the request for Xyosted **AND** the patient meets the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve all strengths for 12 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Is the request for a male patient with a diagnosis of delayed puberty (ICD-10 E30.0), not secondary to a pathological disorder, **AND** the patient meets the following criterion?
   - The request is for generic intramuscular testosterone enanthate 200 mg/mL

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, continue to #8.

8. Is the request for a female patient with a diagnosis of metastatic breast cancer (ICD-10 Group C50) **AND** the patient meets the following criterion?
   - The request is for generic intramuscular testosterone enanthate 200 mg/mL

   If yes, continue to #9.
   If no, continue to #10.

9. Does the patient meet **ONE** of the following criteria?
   - The patient is postmenopausal
   - The patient is premenopausal, benefitted from an oophorectomy, AND is considered to have a hormone-responsive tumor

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

10. Is the requested agent for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

    If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

TESTOSTERONE ENANTHATE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TESTOSTERONE ENANTHATE (Xyosted)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Primary or secondary male hypogonadism (hypotestosteronism or low testosterone)
   2. Delayed puberty not due to a pathological disorder (disease) in a male
   3. Metastatic breast cancer (cancer that has spread to other parts of the body) in a female
   4. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)

B. If you are a male with primary or secondary hypogonadism, approval also requires:
   1. You meet ONE of the following showing you have low testosterone levels:
      a. You have at least TWO total serum (blood) testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
      b. You have a free serum (blood) testosterone level of less than 5 ng/dL (0.17 nmol/L)
   2. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated within the past 12 months and you meet ONE of the following:
      a. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is less than or equal to 4 ng/mL
      b. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is greater than 4 ng/mL and the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA
   3. If the request is for Xyosted, approval also requires:
      a. You are 18 years of age or older

C. If you are a male with delayed puberty not secondary to a pathological disorder, approval also requires:
   1. The request is for generic intramuscular (injected into the muscle) testosterone enanthate 200 mg/mL

D. If you are a female with metastatic breast cancer, approval also requires:
   1. You meet ONE of the following:
      a. You are postmenopausal (after menopause)
      b. You are premenopausal (before menopause), you have benefited from an oophorectomy (surgical removal of the ovaries), and your tumor is hormone-responsive
   2. The request is for generic intramuscular (injected into the muscle) testosterone enanthate 200 mg/mL

(Initial denial text continued on next page)

TESTOSTERONE ENANTHATE

INITIAL CRITERIA (CONTINUED)

E. If you have gender dysphoria, approval also requires:

1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for the treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TESTOSTERONE ENANTHATE

RENEWAL CRITERIA

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1) and the patient meets **ALL** of the following criteria?
   - The patient has improved symptoms compared to baseline and tolerance to treatment
   - The patient has yearly lab tests, AND both testosterone and hematocrit levels are NOT above the normal range

   If yes, continue to #2.
   If no, continue to #4.

2. Is the patient 40 years of age or older?

   If yes, continue to #3.
   If no, **approve for 12 months by HICL or GPI-10.**

3. Has the patient's prostate specific antigen (PSA) been evaluated within the past 12 months and the patient meets **ONE** of the following criteria?
   - The PSA level is less than or equal to 4 ng/mL
   - The PSA level is greater than 4 ng/mL and the provider attests that the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

4. Is the request for a male patient with a diagnosis of delayed puberty (ICD-10 E30.0), not secondary to a pathological disorder, and the patient meets **ALL** of the following criteria?
   - The patient has NOT received more than two 6-month courses of testosterone replacement therapy
   - The request is for generic intramuscular testosterone enanthate 200 mg/mL

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, continue to #5.

5. Is the request for a female patient with a diagnosis of metastatic breast cancer (ICD-10 Group C50) **AND** the patient meets the following criterion?
   - The request is for generic intramuscular testosterone enanthate 200 mg/mL

   If yes, continue to #6.
   If no, continue to #7.

TESTOSTERONE ENANTHATE

RENEWAL CRITERIA (CONTINUED)

6. Does the patient meet **ONE** of the following criteria?
   - The patient is postmenopausal
   - The patient is premenopausal, benefitted from an oophorectomy, AND is considered to have a hormone-responsive tumor

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

7. Is the requested agent for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TESTOSTERONE ENANTHATE (Xyosted)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Primary or secondary male hypogonadism (hypotestosteronism or low testosterone)
      2. Delayed puberty not due to a pathological disorder (disease) in a male
      3. Metastatic breast cancer (cancer that has spread to other parts of the body) in a female
      4. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)

   (Renewal denial text continued on next page)

TESTOSTERONE ENANTHATE

RENEWAL CRITERIA (CONTINUED)

B. If you are a male with primary or secondary hypogonadism, renewal also requires:
1. You have shown improvement in your symptoms compared to baseline (before treatment) and tolerance to treatment
2. You have yearly lab tests, and your testosterone and hematocrit levels (types of blood tests) are not above the normal range
3. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated within the past 12 months and you meet ONE of the following:
   a. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is less than or equal to 4 ng/mL
   b. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is greater than 4 ng/mL and the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

C. If you are a male with delayed puberty not secondary to a pathological disorder, renewal also requires:
1. You have NOT received more than two 6-month courses of testosterone replacement therapy
2. The request is for generic intramuscular (injected into the muscle) testosterone enanthate 200 mg/mL

D. If you are a female with metastatic breast cancer, renewal also requires:
1. You meet ONE of the following:
   a. You are postmenopausal (after menopause)
   b. You are premenopausal (before menopause), you have benefited from an oophorectomy (surgical removal of the ovaries), and your tumor is hormone-responsive
2. The request is for generic intramuscular (injected into the muscle) testosterone enanthate 200 mg/mL

E. If you have gender dysphoria, renewal also requires:
1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for the treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1) **AND** the patient meets the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, continue to #7.

2. Does the patient meet **ONE** of the following criteria confirming low testosterone levels?
   - The patient has at least TWO total serum testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
   - The patient has a free serum testosterone level of less than 5 ng/dL (0.17 nmol/L)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the patient 40 years of age or older?

   If yes, continue to #4.
   If no, continue to #5.

4. Has the patient's prostate specific antigen (PSA) been evaluated within the past 12 months and the patient meets **ONE** of the following criteria?
   - The PSA level is less than or equal to 4 ng/mL
   - The PSA level is greater than 4 ng/mL and the provider attests that the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

   If yes, continue to #5.
   If no, do not approve.

TESTOSTERONE UNDECANOATE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TESTOSTERONE UNDECANOATE (Aveed, Jatenzo, Kyzatrex, Tlando, Undecatrex)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Primary or secondary male hypogonadism (hypotestosteronism or low testosterone)
   2. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)

B. If you are a male with primary or secondary hypogonadism, approval also requires:
   1. You are 18 years of age or older
   2. You meet ONE of the following showing you have low testosterone levels:
      a. You have at least TWO total serum (blood) testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
      b. You have a free serum (blood) testosterone level of less than 5 ng/dL (0.17 nmol/L)
   3. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated within the past 12 months and you meet ONE of the following:
      a. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is less than or equal to 4 ng/mL
      b. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is greater than 4 ng/mL and the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA
   4. If the request is for Aveed or Undecatrex, you have tried or have a contraindication to (harmful for you to use) TWO preferred generic medications (such as intramuscular [injected into the muscle] testosterone cypionate, intramuscular testosterone enanthate, testosterone gel)
   5. If the request is for Jatenzo, Kyzatrex, or Tlando, you have tried or have a contraindication to (harmful for you to use) ONE preferred generic medication (such as intramuscular [injected into the muscle] testosterone cypionate, intramuscular testosterone enanthate, testosterone gel)

C. If you have gender dysphoria, approval also requires:
   1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for the treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

TETRABENAZINE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TETRABENAZINE	XENAZINE, TETRABENAZINE	07350		GPI-10 (6238007000)	

GUIDELINES FOR USE

1. Is the request for a tetrabenazine dosage that exceeds 50 mg?

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient have a diagnosis of chorea (involuntary movements) associated with Huntington's disease (ICD-10 G10) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a neurologist or movement disorder specialist
   - The patient has been genotyped for CYP2D6 and is identified as an extensive metabolizer (EM) or intermediate metabolizer (IM) of CYP2D6

   If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **12.5 mg: #3 per day**
   - **25 mg: #4 per day**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient have a diagnosis of chorea (involuntary movements) associated with Huntington's disease (ICD-10 G10) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a neurologist or movement disorder specialist

   If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **12.5 mg: #3 per day**
   - **25 mg: #2 per day**

   If no, do not approve.

TETRABENAZINE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TETRABENAZINE (Xenazine)** requires the following rule(s) be met for approval:

A. You have chorea (involuntary muscle movements) associated with Huntington's disease (a type of brain disorder)
B. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor) or movement disorder specialist
C. If your request is for a tetrabenazine dose that is greater than 50 mg, approval also requires:
    1. You have been genotyped (a type of lab test) for CYP2D6 (a type of enzyme) and you are identified as an extensive metabolizer (EM: normal enzyme activity) or intermediate metabolizer (IM: slower than normal enzyme activity) of CYP2D6

RATIONALE

TEZACAFTOR-IVACAFTOR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TEZACAFTOR/IVACAFTOR	SYMDEKO	44771		GPI-10 (4530990280)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or cystic fibrosis expert
   - Symdeko will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
   - The patient is homozygous for the F508del mutation OR has a responsive mutation in the CFTR gene

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TEZACAFTOR-IVACAFTOR (Symdeko)** requires the following rule(s) be met for approval:
   A. You have cystic fibrosis (CF: a type of lung disorder)
   B. You are 6 years of age or older
   C. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or cystic fibrosis expert
   D. You will NOT use Symdeko concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
   E. You are homozygous (have two copies of the same gene) for the F508del mutation (abnormal change) OR you have a responsive mutation in the CFTR gene (abnormal change in a type of gene that can be treated with Symdeko)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

TEZEPELUMAB-EKKO

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TEZEPELUMAB-EKKO	TEZSPIRE	47740		GPI-10 (4460807525)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of severe asthma (ICD-10 Group J45.5) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in allergy or pulmonary medicine
   - Tezspire will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline)
   - Tezspire will NOT be used concurrently with another systemic biologic (e.g., Xolair [omalizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of asthma

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced at least ONE asthma exacerbation requiring systemic corticosteroid (e.g., prednisone) burst lasting at least 3 days within the past 12 months
   - The patient has experienced at least ONE serious asthma exacerbation requiring a hospitalization or emergency room visit within the past 12 months

   If yes, **approve for 4 months by HICL or GPI-10 with a quantity limit of #1.91mL per 28 days.**

   If no, continue to #3.

TEZEPELUMAB-EKKO

INITIAL CRITERIA (CONTINUED)

3. Does the patient have poor symptom control despite current therapy as evidenced by at least **THREE** of the following within the past 4 weeks?
   - Daytime asthma symptoms more than twice per week
   - Any night waking due to asthma
   - Use of a short-acting inhaled beta2-agonist (SABA) (e.g., albuterol) reliever for symptoms more than twice per week
   - Any activity limitation due to asthma

   If yes, **approve for 4 months by HICL or GPI-10 with a quantity limit of #1.91mL per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with an otolaryngologist, allergist, or immunologist
   - There is evidence of nasal polyps by direct examination, endoscopy, or sinus CT scan
   - The patient has inadequately controlled disease
   - The patient had a 56-day trial of ONE clinical standard of care agent: an intranasal corticosteroid (e.g., mometasone nasal spray)
   - Tezspire will be used as add-on maintenance treatment (in conjunction with maintenance intranasal steroids)
   - Tezspire will NOT be used concurrently with another systemic biologic (e.g., Nucala [mepolizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1.91mL per 28 days.**

   If no, do not approve.

TEZEPELUMAB-EKKO

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TEZEPELUMAB-EKKO (Tezspire)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Severe asthma (a type of lung condition)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)

B. If you have severe asthma, approval also requires:
   1. You are 12 years of age or older
   2. Therapy is prescribed by or in consultation with a doctor specializing in allergy or pulmonary (relating to lungs/breathing) medicine
   3. Tezspire will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis), such as a long-acting inhaled beta2-agonist (such as salmeterol, formoterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), or theophylline
   4. You will NOT use Tezspire concurrently (at the same time) with another systemic biologic (such as Xolair [omalizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma
   5. You meet ONE of the following:
      a. You have experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
      b. You have experienced at least ONE serious asthma exacerbation (worsening of symptoms) requiring a hospitalization or emergency room visit within the past 12 months
      c. You have poor symptom control despite current therapy as shown by at least THREE of the following within the past 4 weeks:
         i. Daytime asthma symptoms more than twice per week
         ii. Any night waking due to asthma
         iii. Use of a short-acting inhaled beta2-agonist reliever (such as albuterol) for symptoms more than twice per week
         iv. Any activity limitation due to asthma

(Initial denial text continued on next page)

TEZEPELUMAB-EKKO

INITIAL CRITERIA (CONTINUED)

C. If you have chronic rhinosinusitis with nasal polyps, approval also requires:

1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with an otolaryngologist (ear, nose, and throat doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
3. There is evidence of nasal polyps (non-cancerous growths) by direct examination, endoscopy (using a small camera), or sinus computed tomography (CT) scan (a type of imaging test)
4. You have inadequately controlled disease
5. You had a 56-day trial of ONE clinical standard of care medication: an intranasal corticosteroid (such as mometasone nasal spray)
6. Tezspire will be used as add-on maintenance treatment (in conjunction [together] with maintenance intranasal steroids [a type of medication used in the nose])
7. You will NOT use Tezspire concurrently (at the same time) with another systemic biologic (such as Nucala [mepolizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TEZEPELUMAB-EKKO

RENEWAL CRITERIA

1. Does the patient have a diagnosis of severe asthma (ICD-10 Group J45.5) and meet **ALL** of the following criteria?
   - The patient will continue to use an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., salmeterol, formoterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline)
   - Tezspire will NOT be used concurrently with another systemic biologic (e.g., Xolair [omalizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of asthma

   If yes, continue to #2.
   If no, continue to #3.

2. Has the patient shown a clinical response as evidenced by **ONE** of the following?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Increase in percent predicted FEV1 from pretreatment baseline
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1.91mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline (e.g., improvements in nasal congestion, sense of smell, size of polyps)
   - Tezspire will NOT be used concurrently with another systemic biologic (e.g., Nucala [mepolizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1.91mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

TEZEPELUMAB-EKKO

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TEZEPELUMAB-EKKO (Tezspire)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Severe asthma (a type of lung condition)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)

B. If you have severe asthma, renewal also requires:
   1. You will continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as salmeterol, formoterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), or theophylline
   2. You will NOT use Tezspire concurrently (at the same time) with another systemic biologic (such as Xolair [omalizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma
   3. You have shown a clinical response as evidenced by ONE of the following:
      a. You have experienced a decrease in asthma exacerbations (worsening of symptoms) from baseline (before starting Tezspire)
      b. You have decreased your use of rescue medications (such as albuterol)
      c. You have an increase in the percent predicted FEV1 (a type of lung test) from pretreatment baseline (before starting Tezspire)
      d. You have a decrease in the severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)

C. If you have chronic rhinosinusitis with nasal polyps, renewal also requires:
   1. You have shown a clinical benefit compared to baseline (such as improvements in nasal congestion, sense of smell, size of polyps)
   2. You will NOT use Tezspire concurrently (at the same time) with another systemic biologic (such as Nucala [mepolizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

THALIDOMIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
THALIDOMIDE	THALOMID	11465		GPI-10 (9939207000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of multiple myeloma (ICD-10 Group C90.0) **AND** meet the following criterion?
   - Thalomid will be used in combination with dexamethasone

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of erythema nodosum leprosum (ENL) (ICD-10 L52)?

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, continue to #3.

3. Does the patient have a diagnosis of anemia due to myelodysplastic syndrome (ICD-10 D64.9 and Group D46) **AND** meet the following criterion?
   - The patient has been treated for anemia due to myelodysplastic syndrome

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, continue to #4.

4. Does the patient have a diagnosis of Waldenström's macroglobulinemia (ICD-10 C88.0)?

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

THYROTROPIN ALFA (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
THYROTROPIN ALFA	THYROGEN	18855		GPI-10 (9420009010)	

GUIDELINES FOR USE

1. Is the requested medication being used as diagnostic tool for serum thyroglobulin (Tg) testing?

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of thyroid cancer and meet **ALL** of the following criteria?
   - The requested medication will be used as adjunctive treatment for radioiodine ablation of thyroid tissue remnants
   - The patient does not have metastatic disease

   If yes, **approve for 30 days by HICL or GPI-10 for one fill of #2 vials.**

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **THYROTROPIN ALFA (Thyrogen)** requires the following rule(s) be met for approval:
   A. You have thyroid cancer
   B. The requested medication will be used as adjunctive (add-on) treatment for radioiodine ablation of thyroid tissue remnants (used to destroy thyroid tissue that is left over after using another treatment)
   C. You do not have metastatic disease (you have no signs of the disease spreading to other parts of the body)

   NOTE: The requested medication is not covered under the pharmacy benefit when used as a diagnostic tool for serum thyroglobulin (Tg) testing. It may be covered under the medical benefit.

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TILDRAKIZUMAB-ASMN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TILDRAKIZUMAB-ASMN	ILUMYA	44823		GPI-10 (9025058010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3 percent or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, genital area, or scalp
   - Ilumya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Tremfya (guselkumab)
     - Skyrizi (risankizumab-rzaa)
     - Enbrel (etanercept)
     - Otezla (apremilast)
     - Taltz (ixekizumab)
     - Sotyktu (deucravacitinib)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Icotyde (icotrokinra)

     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, continue to #2.
     If no, do not approve.
     DENIAL TEXT: See the initial denial text at the end of the guideline.

CONTINUED ON NEXT PAGE

TILDRAKIZUMAB-ASMN

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
   - The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TILDRAKIZUMAB-ASMN (Ilumya)** requires the following rule(s) be met for approval:
   A. You have moderate to severe plaque psoriasis (PsO: a type of skin condition)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
   D. You have psoriasis (a type of skin condition) covering 3 percent or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, face, genital area, or scalp
   E. You will NOT use Ilumya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)

   (Initial denial text continued on next page)

TILDRAKIZUMAB-ASMN

INITIAL CRITERIA (CONTINUED)

F. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   1. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   2. Tremfya (guselkumab)
   3. Skyrizi (risankizumab-rzaa)
   4. Enbrel (etanercept)
   5. Otezla (apremilast)
   6. Taltz (ixekizumab)
   7. Sotyktu (deucravacitinib)
   8. Bimzelx (bimekizumab-bkzx)
   9. Adalimumab-ryvk/adalimumab-aaty
   10. Icotyde (icotrokinra)

G. You meet ONE of the following:
   1. You have had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
   2. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of medication that decreases the body's immune response) AND PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
   3. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

TILDRAKIZUMAB-ASMN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more
   - Ilumya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Tremfya (guselkumab)
     - Skyrizi (risankizumab-rzaa)
     - Enbrel (etanercept)
     - Otezla (apremilast)
     - Taltz (ixekizumab)
     - Sotyktu (deucravacitinib)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Icotyde (icotrokinra)

     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.** If no, do not approve.

     RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

     Our guideline named **TILDRAKIZUMAB-ASMN (Ilumya)** requires the following rule(s) be met for renewal:

     A. You have moderate to severe plaque psoriasis (PsO: a type of skin condition)
     B. You have achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index: a tool for evaluating the severity of psoriasis [a type of skin condition]) of at least 50 percent or more
     C. You will NOT use Ilumya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

TIRZEPATIDE - ZEPBOUND

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TIRZEPATIDE	ZEPBOUND	48014		GPI-10 (6125258000)	BRAND = ZEPBOUND, FORM ≠ VIAL

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe obstructive sleep apnea (OSA) (ICD-10 G47.33)?

   If yes, continue to #2.
   If no, continue to #4.

2. Is the patient obese as defined by **ONE** of the following criteria?
   - The patient has a body mass index (BMI) of at least 30 kg/m(2)
   - The patient is Asian and has a BMI of at least 27.5 kg/m(2)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's diagnosis is confirmed by documentation of an Apnea Hypopnea Index/Respiratory Disturbance Index/Respiratory Event Index (AHI/RDI/REI) of at least 15 events per hour that is predominantly obstructive
   - There is physician attestation of active enrollment in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program
   - The patient has persistent OSA symptoms despite positive airway pressure (PAP) adherence (at least 4 hours per night on at least 70% of nights) OR there is clinical documentation that the patient is not a candidate for or is intolerant to PAP
   - Zepbound will NOT be used concurrently with another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release])

   If yes, **approve for 29 weeks by GPID for all strengths or by GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TIRZEPATIDE - ZEPBOUND

INITIAL CRITERIA (CONTINUED)

4. Is the request for weight loss OR weight management (ICD-10 Group E66)?

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Is weight loss or weight management a covered benefit?
   (**NOTE:** If weight loss/weight management is NOT a covered benefit - Denied claim would have this POS message - '*Benefit exclusion if only indicated for weight loss.')*

   If yes, continue to #6.
   If no, do not approve.
   Change PA type to EX (excluded) and dismiss using the Dismissed letter template.

6. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - There is physician attestation of active enrollment in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program
   - Zepbound will NOT be used concurrently with another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release])

   If yes, continue to #7.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TIRZEPATIDE - ZEPBOUND

INITIAL CRITERIA (CONTINUED)

7. Does the patient meet **ONE** of the following criteria prior to initiating weight loss therapy?
   - The patient has a body mass index (BMI) of at least 30 kg/m(2)
   - The patient is Asian and has a BMI of at least 27.5 kg/m(2)
   - The patient has a BMI of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non-alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)
   - The patient is Asian, has a BMI of at least 25 kg/m(2), AND has at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non- alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)

   If yes, **approve for 29 weeks by GPID for all strengths or by GPI-10.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TIRZEPATIDE - ZEPBOUND** requires the following rule(s) be met for approval:

   A. The request is for ONE of the following:
      1. Moderate to severe obstructive sleep apnea (OSA: a disorder where airflow is blocked during sleep)
      2. Weight loss or weight management

   (Initial denial text continued on next page)

TIRZEPATIDE - ZEPBOUND

INITIAL CRITERIA (CONTINUED)

B. If you will use Zepbound for moderate to severe obstructive sleep apnea, approval also requires:

1. You are 18 years of age or older
2. You are obese as defined by ONE of the following:
   a. You have a body mass index (BMI: a tool for evaluating body fat) of at least 30 kg/m(2)
   b. You are Asian and have a body mass index (BMI: a tool for evaluating body fat) of at least 27.5 kg/m(2)
3. Your diagnosis is confirmed by documentation of an Apnea Hypopnea Index/Respiratory Disturbance Index/Respiratory Event Index (AHI/RDI/REI) of at least 15 events per hour that is predominantly obstructive
4. You are actively enrolled in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program
5. You have persistent obstructive sleep apnea (OSA: a disorder where airflow is blocked during sleep) symptoms despite positive airway pressure (PAP: treatment method for sleep apnea) adherence (at least 4 hours per night on at least 70% of nights) OR there is clinical documentation that you are not a candidate for or are intolerant (side effect) to PAP
6. You will NOT use Zepbound concurrently (at the same time) with a GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release])

(Initial denial text continued on next page)

TIRZEPATIDE - ZEPBOUND

INITIAL CRITERIA (CONTINUED)

C. If you will use Zepbound for weight loss or weight management, approval also requires:

1. You are 18 years of age or older
2. You are actively enrolled in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program
3. You will NOT use Zepbound concurrently (at the same time) with a GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release])
4. You meet ONE of the following before starting weight loss therapy:
   a. You have a body mass index (BMI: a tool for evaluating body fat) of at least 30 kg/m(2)
   b. You are Asian and have a body mass index (BMI: a tool for evaluating body fat) of at least 27.5 kg/m(2)
   c. You have a body mass index (BMI: a tool for evaluating body fat) of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], dyslipidemia [abnormal levels of fat], cardiovascular disease [condition of the heart or blood vessels], coronary artery disease [CAD: a type of heart condition], sleep apnea [a type of sleep condition with difficulty breathing], osteoarthritis [a type of joint condition] of the knee[s], polycystic ovarian syndrome [a hormonal disorder], non-alcoholic steatohepatitis/non-alcoholic fatty liver disease [inflammation in the liver], asthma [a type of lung condition], and chronic obstructive pulmonary disease [COPD: a type of lung condition])
   d. You are Asian, have a body mass index (BMI: a tool for evaluating body fat) of at least 25 kg/m(2), AND have at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], dyslipidemia [abnormal levels of fat], cardiovascular disease [condition of the heart or blood vessels], coronary artery disease [CAD: a type of heart condition], sleep apnea [a type of sleep condition with difficulty breathing], osteoarthritis [a type of joint condition] of the knee[s], polycystic ovarian syndrome [a hormonal disorder], non-alcoholic steatohepatitis/non-alcoholic fatty liver disease [a type of liver disease], asthma [a type of lung condition], and chronic obstructive pulmonary disease [COPD: a type of lung condition])

TIRZEPATIDE - ZEPBOUND

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe obstructive sleep apnea (OSA) (ICD-10 G47.33) and meet **ALL** of the following criteria?
   - Zepbound will NOT be used concurrently with another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release])
   - The patient has achieved or maintained a reduction in Apnea Hypopnea Index/Respiratory Disturbance Index/Respiratory Event Index (AHI/RDI/REI) by at least 15 events per hour or by at least 50%

   If yes, **approve for 12 months by GPID for all strengths or by GPI-10.**
   If no, continue to #2.

2. Is the request for weight loss OR weight management (ICD-10 Group E66)?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Is weight loss or weight management a covered benefit?
   (**NOTE:** If weight loss/weight management is NOT a covered benefit - Denied claim would have this POS message - '*Benefit exclusion if only indicated for weight loss.')*

   If yes, continue to #4.
   If no, do not approve.
   Change PA type to EX (excluded) and dismiss using the Dismissed letter template.

TIRZEPATIDE - ZEPBOUND

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TIRZEPATIDE - ZEPBOUND** requires the following rule(s) be met for renewal:

A. The request is for ONE of the following:
   1. Moderate to severe obstructive sleep apnea (OSA: a disorder where airflow is blocked during sleep)
   2. Weight loss or weight management

B. If you will use Zepbound for moderate to severe obstructive sleep apnea, approval also requires:
   1. You will NOT use Zepbound concurrently (at the same time) with a GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release])
   2. You have achieved or maintained a reduction in Apnea Hypopnea Index/Respiratory Disturbance Index/Respiratory Event Index (AHI/RDI/REI) by at least 15 events per hour or by at least 50%

C. If you will use Zepbound for weight loss or weight management, approval also requires:
   1. You meet ONE of the following before starting weight loss therapy:
      a. You have a body mass index (BMI: a tool for evaluating body fat) of at least 30 kg/m(2)
      b. You are Asian and have a body mass index (BMI: a tool for evaluating body fat) of at least 27.5 kg/m(2)
      c. You have a body mass index (BMI: a tool for evaluating body fat) of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], dyslipidemia [abnormal levels of fat], cardiovascular disease [condition of the heart or blood vessels], coronary artery disease [CAD: a type of heart condition], sleep apnea [a type of sleep condition with difficulty breathing], osteoarthritis [a type of joint condition] of the knee[s], polycystic ovarian syndrome [a hormonal disorder], non-alcoholic steatohepatitis/non-alcoholic fatty liver disease [inflammation in the liver], asthma [a type of lung condition], and chronic obstructive pulmonary disease [COPD: a type of lung condition])

(Renewal denial text continued on next page)

TOBRAMYCIN/NEBULIZER	KITABIS PAK, TOBRAMYCIN		37569	GPI-14 (07000070002520)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of cystic fibrosis (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - The patient has a lung infection with a gram-negative species (e.g., *Pseudomonas aeruginosa*; *Staphylococcus aureus* is not a gram-negative species)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the request for Bethkis (tobramycin), Tobi (tobramycin) inhalation solution, or Kitabis Pak (tobramycin)?

   If yes, **approve the requested agent for 12 months by GPID or GPI-14 as follows:**
   - **Tobi inhalation solution: #280mL (#56 of 5mL ampules) per 28 days (fill count = 6).**
   - **Bethkis: #224mL (#56 of 4mL ampules) per 28 days (fill count = 6).**
   - **Kitabis Pak: #280mL per 28 days (fill count = 6).**

   If no, continue to #3.

3. Is the request for Tobi Podhaler and the patient meets **ONE** of the following criteria?
   - The patient had a trial and failure of or contraindication to ONE generic inhaled tobramycin product
   - The patient is not able to tolerate the prolonged administration of nebulizers

   If yes, **Tobi Podhaler for 12 months by GPID or GPI-14 with a quantity limit of #224 capsules per 28 days (fill count = 6).**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TOBRAMYCIN INHALED

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOBRAMYCIN INHALED (Bethkis, Tobi, Tobi Podhaler, Kitabis Pak)** requires the following rule(s) be met for approval:

A. You have cystic fibrosis (a type of lung disoder)
B. You are 6 years of age or older
C. You have a lung infection with a gram-negative species (a type of bacteria such as Pseudomonas aeruginosa)
D. If the request is for Tobi Podhaler, approval also requires ONE of the following:
   1. You have tried or have a contraindication to (harmful for you to use) ONE generic inhaled tobramycin product
   2. You are not able to tolerate the prolonged administration of nebulizers

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TOCILIZUMAB - IV

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   - The patient had a trial of or contraindication to THREE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR/XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Rinvoq, or Xeljanz IR/XR)

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation with a quantity limit of #40mL per 28 days.**

   If no, continue to #3.

TOCILIZUMAB - IV

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has completed, started, or will soon start a tapering course of glucocorticoids (e.g., prednisone)
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Rinvoq (upadacitinib)
     - Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Rinvoq)

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation with a quantity limit of #30mL per 28 days.**

   If no, continue to #4.

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to THREE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Xeljanz IR, or Rinvoq)

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.**
   If no, continue to #5.

TOCILIZUMAB - IV

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, or immunologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA
   - The patient had a trial of or contraindication to the preferred agent: Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.**
     If no, continue to #6.

6. Does the patient have a diagnosis of chimeric antigen receptor (CAR) T cell-induced severe or life-threatening cytokine release syndrome (CRS) (ICD-10 Group D89.83; Z92.850) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRS

     If yes, **approve for 1 fill by GPID or GPI-14 for all strengths of the IV formulation with a quantity limit of #160mL.**
     CLINICAL PHARMACISTS: Patient must also meet all criteria in Kymriah guideline to be approvable for both agents.

     If no, do not approve.
     DENIAL TEXT: See the initial denial text at the end of the guideline.

TOCILIZUMAB - IV

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOCILIZUMAB - IV (Actemra - intravenous)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Giant cell arteritis (GCA: a type of inflammatory condition)
   3. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
   4. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)
   5. Chimeric antigen receptor (CAR) T cell-induced severe or life-threatening cytokine release syndrome (CRS: a type of inflammatory response)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   4. You have tried 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   5. You have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
      a. Enbrel (etanercept)
      b. Adalimumab-ryvk/adalimumab-aaty
      c. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      d. Xeljanz (tofacitinib immediate release or extended release) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      e. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Rinvoq, or Xeljanz IR/XR)

(Initial denial text continued on next page)

TOCILIZUMAB - IV

INITIAL CRITERIA (CONTINUED)

C. If you have giant cell arteritis, approval also requires:
1. You are 18 years of age or older
2. You have completed, started, or will soon start a tapering course (slowly lowering the dose to stop use) of glucocorticoids (such as prednisone)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)
4. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. Rinvoq (upadacitinib)
   b. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Rinvoq)

D. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])
   e. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Xeljanz IR, or Rinvoq)

(Initial denial text continued on next page)

TOCILIZUMAB - IV

INITIAL CRITERIA (CONTINUED)

E. If you have systemic juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh)

F. If you have chimeric antigen receptor T cell-induced severe or life-threatening cytokine release syndrome, approval also requires:
1. You are 2 years of age or older
2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of cytokine release syndrome (a type of inflammatory response)

G. **NOTE:** Actemra will NOT be approved for the treatment of coronavirus disease 2019 (COVID-19) in hospitalized patients.

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

TOCILIZUMAB - IV

RENEWAL CRITERIA

NOTE: For the diagnosis of cytokine release syndrome (CRS), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to THREE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR/XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Rinvoq, or Xeljanz IR/XR)

     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation with a quantity limit of #40mL per 28 days.**

     If no, continue to #2.

TOCILIZUMAB - IV

RENEWAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) and meet **ALL** of the following criteria?
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Rinvoq (upadacitinib)
     - Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Rinvoq)

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation with a quantity limit of #30mL per 28 days.**

   If no, continue to #3.

3. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to THREE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Xeljanz IR, or Rinvoq)

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.**
   If no, continue to #4.

TOCILIZUMAB - IV

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA
   - The patient had a trial of or contraindication to the preferred agent: Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, continue to #5.
     If no, do not approve.
     DENIAL TEXT: See the renewal denial text at the end of the guideline.

5. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The patient has maintained or improved systemic inflammatory disease (e.g., fevers, pain, rash, arthritis)

     If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.**
     If no, do not approve.
     DENIAL TEXT: See the renewal denial text at the end of the guideline.

TOCILIZUMAB - IV

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOCILIZUMAB - IV (Actemra - intravenous)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Giant cell arteritis (GCA: a type of inflammatory condition)
   3. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
   4. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
   1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   3. You have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
      a. Enbrel (etanercept)
      b. Adalimumab-ryvk/adalimumab-aaty
      c. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      d. Xeljanz (tofacitinib immediate release or extended release) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      e. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Rinvoq, or Xeljanz IR/XR)

C. If you have giant cell arteritis, renewal also requires:
   1. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)
   2. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      a. Rinvoq (upadacitinib)
      b. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Rinvoq)

(Renewal denial text continued on next page)

TOCILIZUMAB - IV

RENEWAL CRITERIA (CONTINUED)

D. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])
   e. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Xeljanz IR, or Rinvoq)

E. If you have systemic juvenile idiopathic arthritis, renewal also requires:
1. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis (a type of joint condition)
2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh)
3. You meet ONE of the following:
   a. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   b. You have maintained or improved systemic inflammatory disease (such as fevers, pain, rash, arthritis)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   - The patient had a trial of or contraindication to THREE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR/XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Rinvoq, or Xeljanz IR/XR)

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

   If no, continue to #2.

TOCILIZUMAB - SQ

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has completed, started, or will soon start a tapering course of glucocorticoids (e.g., prednisone)
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - o Rinvoq (upadacitinib)
     - o Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Rinvoq)

     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

     If no, continue to #3.

3. Does the patient have a diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a diagnosis of systemic sclerosis (SSc) according to American College of Rheumatology (ACR) and European League Against Rheumatism (EULAR)
   - Therapy is prescribed by or in consultation with a pulmonologist or rheumatologist
   - The patient does NOT have other etiologies of interstitial lung disease (ILD) (e.g., heart failure/fluid overload, drug-induced lung toxicity [cyclophosphamide, methotrexate, ACE-inhibitors], recurrent aspiration [such as from GERD], pulmonary vascular disease, pulmonary edema, pneumonia, chronic pulmonary thromboembolism, alveolar hemorrhage or ILD caused by another rheumatic disease, such as mixed connective tissue disease [MCTD])
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SSc-ILD

     If yes, **approve all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

     If no, continue to #4.

TOCILIZUMAB - SQ

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to THREE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Xeljanz IR, or Rinvoq)

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #1.8mL per 28 days.**

   If no, continue to #5.

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, or immunologist
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA
   - The patient had a trial of or contraindication to the preferred agent: Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TOCILIZUMAB - SQ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOCILIZUMAB - SQ (Actemra - subcutaneous)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Giant cell arteritis (GCA: a type of inflammatory condition)
   3. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: a type of lung condition)
   4. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
   5. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   4. You have tried 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   5. You have tried or have a contraindication to THREE of the following preferred medications:
      a. Enbrel (etanercept)
      b. Adalimumab-ryvk/adalimumab-aaty
      c. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      d. Xeljanz (tofacitinib immediate release or extended release) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      e. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Rinvoq, or Xeljanz IR/XR)

(Initial denial text continued on next page)

TOCILIZUMAB - SQ

INITIAL CRITERIA (CONTINUED)

C. If you have giant cell arteritis, approval also requires:
1. You are 18 years of age or older
2. You have completed, started, or will soon start a tapering course (slowly lowering the dose to stop use) of glucocorticoids (such as prednisone)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)
4. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. Rinvoq (upadacitinib)
   b. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Rinvoq)

D. If you have systemic sclerosis-associated interstitial lung disease, approval also requires:
1. You are 18 years of age or older
2. Your diagnosis of systemic sclerosis (SSc) is according to the American College of Rheumatology (ACR) and European League Against Rheumatism (EULAR)
3. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or rheumatologist (a type of immune system doctor)
4. You do not have other causes of interstitial lung disease (such as heart failure or fluid overload, drug-induced lung toxicity [lung damage due to side effects of medications such as cyclophosphamide, methotrexate, angiotensin-converting enzyme (ACE)-inhibitors (a type of blood pressure medication)], recurrent aspiration [something enters the airways accidentally] such as from gastroesophageal reflux disease [GERD: acid reflux], pulmonary vascular disease [a condition affecting blood vessels in the lungs], pulmonary edema [excess fluid in the lungs], pneumonia [type of lung infection], chronic pulmonary thromboembolism [blood clot in the lungs], alveolar hemorrhage [bleeding of a part of the lungs], interstitial lung disease caused by another rheumatic [inflammatory] disease such as mixed connective tissue disease)
5. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic sclerosis-associated interstitial lung disease (a type of lung condition)

(Initial denial text continued on next page)

TOCILIZUMAB - SQ

INITIAL CRITERIA (CONTINUED)

E. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])
   e. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Xeljanz IR, or Rinvoq)

F. If you have systemic juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

TOCILIZUMAB - SQ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to THREE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR/XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Rinvoq, or Xeljanz IR/XR)

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 162mg/0.9mL strength for 12 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) and meet **ALL** of the following criteria?
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Rinvoq (upadacitinib)
     - Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Rinvoq)

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 162mg/0.9mL strength for 12 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

   If no, continue to #3.

CONTINUED ON NEXT PAGE

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81) and meet **ALL** of the following criteria?
   - The patient has experienced a clinical meaningful improvement or maintenance in annual rate of decline
   - Actemra will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SSc-ILD

   If yes, **approve all formulations of the 162mg/0.9mL strength for 12 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

   If no, continue to #4.

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to THREE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Xeljanz IR, or Rinvoq)

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 162mg/0.9mL strength for 12 months by GPID or GPI-14 with a quantity limit of #1.8mL per 28 days.**

   If no, continue to #5.

TOCILIZUMAB - SQ

RENEWAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - Actemra will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA
   - The patient had a trial of or contraindication to the preferred agent: Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, continue to #6.
     If no, do not approve.
     DENIAL TEXT: See the renewal denial text at the end of the guideline.

6. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The patient has maintained or improved systemic inflammatory disease (e.g., fevers, pain, rash, arthritis)

     If yes, **approve all formulations of the 162mg/0.9mL strength for 12 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

     If no, do not approve.

     RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

     Our guideline named **TOCILIZUMAB - SQ (Actemra - subcutaneous)** requires the following rule(s) be met for renewal:
     A. You have ONE of the following:
        1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
        2. Giant cell arteritis (GCA: a type of inflammatory condition)
        3. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: a type of lung condition)
        4. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
        5. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

     (Renewal denial text continued on next page)

TOCILIZUMAB - SQ

RENEWAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Xeljanz (tofacitinib immediate release or extended release) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   e. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Rinvoq, or Xeljanz IR/XR)

C. If you have giant cell arteritis, renewal also requires:
1. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)
2. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. Rinvoq (upadacitinib)
   b. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Rinvoq)

D. If you have systemic sclerosis-associated interstitial lung disease, renewal also requires:
1. You have experienced a clinically meaningful improvement or maintenance in annual rate of decline
2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic sclerosis-associated interstitial lung disease (a type of lung condition)

(Renewal denial text continued on next page)

TOCILIZUMAB - SQ

RENEWAL CRITERIA (CONTINUED)

E. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) THREE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])
   e. Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh) (**NOTE:** Tyenne and Avtozma require additional step through Enbrel, adalimumab-ryvk/adalimumab-aaty, Xeljanz IR, or Rinvoq)

F. If you have systemic juvenile idiopathic arthritis, renewal also requires:
1. You will NOT use Actemra concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis (a type of joint condition)
2. You have tried or have a contraindication to (harmful for you to use) the following preferred medication: Tyenne (tocilizumab-aazg)/Avtozma (tocilizumab-anoh)
3. You meet ONE of the following:
   a. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   b. You have maintained or improved systemic inflammatory disease (such as fevers, pain, rash, arthritis)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

TOCILIZUMAB-AAZG - IV

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR/XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation with a quantity limit of #40mL per 28 days.**

   If no, continue to #3.

TOCILIZUMAB-AAZG - IV

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has completed, started, or will soon start a tapering course of glucocorticoids (e.g., prednisone)
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to the preferred agent: Rinvoq (upadacitinib) [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation with a quantity limit of #30mL per 28 days.**

   If no, continue to #4.

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.**
   If no, continue to #5.

CONTINUED ON NEXT PAGE

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, or immunologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths of the IV formulation.**
   If no, continue to #6.

6. Does the patient have a diagnosis of chimeric antigen receptor (CAR) T cell-induced severe or life-threatening cytokine release syndrome (CRS) (ICD-10 Group D89.83; Z92.850) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRS

   If yes, **approve for 1 fill by GPID or GPI-14 for all strengths of the IV formulation with a quantity limit of #160mL.**
   CLINICAL PHARMACISTS: Patient must also meet all criteria in Kymriah guideline to be approvable for both agents.

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOCILIZUMAB-AAZG - IV (Tyenne - intravenous)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Giant cell arteritis (GCA: a type of inflammatory condition)
      3. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
      4. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)
      5. Chimeric antigen receptor (CAR) T cell-induced severe or life-threatening cytokine release syndrome (CRS: a type of inflammatory response)

   (Initial denial text continued on next page)

TOCILIZUMAB-AAZG - IV

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
4. You have tried 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
5. You have tried or have a contraindication to ONE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Xeljanz (tofacitinib immediate release or extended release) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

C. If you have giant cell arteritis, approval also requires:
1. You are 18 years of age or older
2. You have completed, started, or will soon start a tapering course (slowly lowering the dose to stop use) of glucocorticoids (such as prednisone)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Rinvoq (upadacitinib)

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

INITIAL CRITERIA (CONTINUED)

D. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])

E. If you have systemic juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis (a type of joint condition)

F. If you have chimeric antigen receptor T cell-induced severe or life-threatening cytokine release syndrome, approval also requires:
1. You are 2 years of age or older
2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of cytokine release syndrome (a type of inflammatory response)

G. **NOTE:** Tyenne will NOT be approved for the treatment of coronavirus disease 2019 (COVID-19) in hospitalized patients.

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

TOCILIZUMAB-AAZG - IV

RENEWAL CRITERIA

NOTE: For the diagnosis of cytokine release syndrome (CRS), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR/XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation with a quantity limit of #40mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) and meet **ALL** of the following criteria?
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to the preferred agent: Rinvoq (upadacitinib)

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation with a quantity limit of #30mL per 28 days.**

   If no, continue to #3.

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.**
   If no, continue to #4.

4. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) **AND** meet the following criterion?
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

5. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The patient has maintained or improved systemic inflammatory disease (e.g., fevers, pain, rash, arthritis)

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths of the IV formulation.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

TOCILIZUMAB-AAZG - IV

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOCILIZUMAB-AAZG - IV (Tyenne - intravenous)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Giant cell arteritis (GCA: a type of inflammatory condition)
   3. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
   4. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
   1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   3. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      a. Enbrel (etanercept)
      b. Adalimumab-ryvk/adalimumab-aaty
      c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      d. Xeljanz (tofacitinib immediate release or extended release) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

C. If you have giant cell arteritis, renewal also requires:
   1. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)
   2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Rinvoq (upadacitinib)

(Renewal denial text continued on next page)

CONTINUED ON NEXT PAGE

RENEWAL CRITERIA (CONTINUED)

D. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])

E. If you have systemic juvenile idiopathic arthritis, renewal also requires:
1. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis (a type of joint condition)
2. You meet ONE of the following:
   a. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   b. You have maintained or improved systemic inflammatory disease (such as fevers, pain, rash, arthritis)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR/XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days. (NOTE: Enter a proactive PA for Avtozma for all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.)**

   If no, continue to #2.

TOCILIZUMAB-AAZG - SQ

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has completed, started, or will soon start a tapering course of glucocorticoids (e.g., prednisone)
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to the preferred agent: Rinvoq (upadacitinib) [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days. (NOTE: Enter a proactive PA for Avtozma for all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.)**

   If no, continue to #3.

3. Does the patient have a diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a diagnosis of systemic sclerosis (SSc) according to American College of Rheumatology (ACR) and European League Against Rheumatism (EULAR)
   - Therapy is prescribed by or in consultation with a pulmonologist or rheumatologist
   - The patient does NOT have other etiologies of interstitial lung disease (ILD) (e.g., heart failure/fluid overload, drug-induced lung toxicity [cyclophosphamide, methotrexate, ACE-inhibitors], recurrent aspiration [such as from GERD], pulmonary vascular disease, pulmonary edema, pneumonia, chronic pulmonary thromboembolism, alveolar hemorrhage or ILD caused by another rheumatic disease, such as mixed connective tissue disease [MCTD])
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SSc-ILD

   If yes, **approve all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days. (NOTE: Enter a proactive PA for Avtozma for all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.)**

   If no, continue to #4.

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #1.8mL per 28 days. (NOTE: Enter a proactive PA for Avtozma for all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #1.8mL per 28 days.)**

   If no, continue to #5.

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, or immunologist
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA

   If yes, **approve all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days. (NOTE: Enter a proactive PA for Avtozma for all formulations of the 162mg/0.9mL strength for 6 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TOCILIZUMAB-AAZG - SQ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOCILIZUMAB-AAZG - SQ (Tyenne - subcutaneous)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Giant cell arteritis (GCA: a type of inflammatory condition)
   3. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: a type of lung condition)
   4. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
   5. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   4. You have tried 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   5. You have tried or have a contraindication to ONE of the following preferred medications:
      a. Enbrel (etanercept)
      b. Adalimumab-ryvk/adalimumab-aaty
      c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      d. Xeljanz (tofacitinib immediate release or extended release) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

INITIAL CRITERIA (CONTINUED)

C. If you have giant cell arteritis, approval also requires:
1. You are 18 years of age or older
2. You have completed, started, or will soon start a tapering course (slowly lowering the dose to stop use) of glucocorticoids (such as prednisone)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Rinvoq (upadacitinib)

D. If you have systemic sclerosis-associated interstitial lung disease, approval also requires:
1. You are 18 years of age or older
2. Your diagnosis of systemic sclerosis (SSc) is according to the American College of Rheumatology (ACR) and European League Against Rheumatism (EULAR)
3. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or rheumatologist (a type of immune system doctor)
4. You do not have other causes of interstitial lung disease (such as heart failure or fluid overload, drug-induced lung toxicity [lung damage due to side effects of medications such as cyclophosphamide, methotrexate, angiotensin-converting enzyme (ACE)-inhibitors (a type of blood pressure medication)], recurrent aspiration [something enters the airways accidentally] such as from gastroesophageal reflux disease [GERD: acid reflux], pulmonary vascular disease [a condition affecting blood vessels in the lungs], pulmonary edema [excess fluid in the lungs], pneumonia [type of lung infection], chronic pulmonary thromboembolism [blood clot in the lungs], alveolar hemorrhage [bleeding of a part of the lungs], interstitial lung disease caused by another rheumatic [inflammatory] disease such as mixed connective tissue disease)
5. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic sclerosis-associated interstitial lung disease (a type of lung condition)

(Initial denial text continued on next page)

INITIAL CRITERIA (CONTINUED)

E. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])

F. If you have systemic juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis (a type of joint condition)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

TOCILIZUMAB-AAZG - SQ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR/XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve all formulations of the 162mg/0.9mL strength for 12 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

     If no, continue to #2.

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) and meet **ALL** of the following criteria?
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to the preferred agent: Rinvoq (upadacitinib)

     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve all formulations of the 162mg/0.9mL strength for 12 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

     If no, continue to #3.

CONTINUED ON NEXT PAGE

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81) and meet **ALL** of the following criteria?
   - The patient has experienced a clinical meaningful improvement or maintenance in annual rate of decline
   - Tyenne will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SSc-ILD

   If yes, **approve all formulations of the 162mg/0.9mL strength for 12 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

   If no, continue to #4.

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 162mg/0.9mL strength for 12 months by GPID or GPI-14 with a quantity limit of #1.8mL per 28 days.**

   If no, continue to #5.

TOCILIZUMAB-AAZG - SQ

RENEWAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) **AND** meet the following criterion?
   - Tyenne will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

6. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The patient has maintained or improved systemic inflammatory disease (e.g., fevers, pain, rash, arthritis)

   If yes, **approve all formulations of the 162mg/0.9mL strength for 12 months by GPID or GPI-14 with a quantity limit of #3.6mL per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOCILIZUMAB-AAZG - SQ (Tyenne - subcutaneous)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Giant cell arteritis (GCA: a type of inflammatory condition)
      3. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: a type of lung condition)
      4. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
      5. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

   (Renewal denial text continued on next page)

CONTINUED ON NEXT PAGE

RENEWAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Xeljanz (tofacitinib immediate release or extended release) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

C. If you have giant cell arteritis, renewal also requires:
1. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)
2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Rinvoq (upadacitinib)

D. If you have systemic sclerosis-associated interstitial lung disease, renewal also requires:
1. You have experienced a clinically meaningful improvement or maintenance in annual rate of decline
2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic sclerosis-associated interstitial lung disease (a type of lung condition)

(Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

E. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])

F. If you have systemic juvenile idiopathic arthritis, renewal also requires:
1. You will NOT use Tyenne concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis (a type of joint condition)
2. You meet ONE of the following:
   a. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   b. You have maintained or improved systemic inflammatory disease (such as fevers, pain, rash, arthritis)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Avtozma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR/XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #3.6mL per 28 days.**

     If no, continue to #2.

CONTINUED ON NEXT PAGE

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has completed, started, or will soon start a tapering course of glucocorticoids (e.g., prednisone)
   - Avtozma will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to the preferred agent: Rinvoq (upadacitinib) [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #3.6mL per 28 days.**

   If no, continue to #3.

3. Does the patient have a diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a diagnosis of systemic sclerosis (SSc) according to American College of Rheumatology (ACR) and European League Against Rheumatism (EULAR)
   - Therapy is prescribed by or in consultation with a pulmonologist or rheumatologist
   - The patient does NOT have other etiologies of interstitial lung disease (ILD) (e.g., heart failure/fluid overload, drug-induced lung toxicity [cyclophosphamide, methotrexate, ACE-inhibitors], recurrent aspiration [such as from GERD], pulmonary vascular disease, pulmonary edema, pneumonia, chronic pulmonary thromboembolism, alveolar hemorrhage or ILD caused by another rheumatic disease, such as mixed connective tissue disease [MCTD])
   - Avtozma will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SSc-ILD

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #3.6mL per 28 days.**

   If no, continue to #4.

TOCILIZUMAB-ANOH - SQ

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Avtozma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1.8mL per 28 days.**

   If no, continue to #5.

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist, dermatologist, or immunologist
   - Avtozma will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #3.6mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TOCILIZUMAB-ANOH - SQ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOCILIZUMAB-ANOH - SQ (Avtozma - subcutaneous)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Giant cell arteritis (GCA: a type of inflammatory condition)
   3. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: a type of lung condition)
   4. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
   5. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You will NOT use Avtozma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   4. You have tried 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   5. You have tried or have a contraindication to ONE of the following preferred medications:
      a. Enbrel (etanercept)
      b. Adalimumab-ryvk/adalimumab-aaty
      c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      d. Xeljanz (tofacitinib immediate release or extended release) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

TOCILIZUMAB-ANOH - SQ

INITIAL CRITERIA (CONTINUED)

C. If you have giant cell arteritis, approval also requires:
1. You are 18 years of age or older
2. You have completed, started, or will soon start a tapering course (slowly lowering the dose to stop use) of glucocorticoids (such as prednisone)
3. You will NOT use Avtozma concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)
4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Rinvoq (upadacitinib)

D. If you have systemic sclerosis-associated interstitial lung disease, approval also requires:
1. You are 18 years of age or older
2. Your diagnosis of systemic sclerosis (SSc) is according to the American College of Rheumatology (ACR) and European League Against Rheumatism (EULAR)
3. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or rheumatologist (a type of immune system doctor)
4. You do not have other causes of interstitial lung disease (such as heart failure or fluid overload, drug-induced lung toxicity [lung damage due to side effects of medications such as cyclophosphamide, methotrexate, angiotensin-converting enzyme (ACE)-inhibitors (a type of blood pressure medication)], recurrent aspiration [something enters the airways accidentally] such as from gastroesophageal reflux disease [GERD: acid reflux], pulmonary vascular disease [a condition affecting blood vessels in the lungs], pulmonary edema [excess fluid in the lungs], pneumonia [type of lung infection], chronic pulmonary thromboembolism [blood clot in the lungs], alveolar hemorrhage [bleeding of a part of the lungs], interstitial lung disease caused by another rheumatic [inflammatory] disease such as mixed connective tissue disease)
5. You will NOT use Avtozma concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic sclerosis-associated interstitial lung disease (a type of lung condition)

(Initial denial text continued on next page)

TOCILIZUMAB-ANOH - SQ

INITIAL CRITERIA (CONTINUED)

E. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Avtozma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])

F. If you have systemic juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Avtozma concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis (a type of joint condition)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

TOCILIZUMAB-ANOH - SQ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Avtozma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR/XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #3.6mL per 28 days.**

     If no, continue to #2.

2. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) and meet **ALL** of the following criteria?
   - Avtozma will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of GCA
   - The patient had a trial of or contraindication to the preferred agent: Rinvoq (upadacitinib)

     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #3.6mL per 28 days.**

     If no, continue to #3.

CONTINUED ON NEXT PAGE

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81) and meet **ALL** of the following criteria?
   - The patient has experienced a clinical meaningful improvement or maintenance in annual rate of decline
   - Avtozma will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SSc-ILD

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #3.6mL per 28 days.**

   If no, continue to #4.

4. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Avtozma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1.8mL per 28 days.**

   If no, continue to #5.

TOCILIZUMAB-ANOH - SQ

RENEWAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of systemic juvenile idiopathic arthritis (SJIA) (ICD-10 Group M08.2) **AND** meet the following criterion?
   - Avtozma will NOT be used concurrently with another systemic biologic (e.g., Ilaris [canakinumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of SJIA

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

6. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The patient has maintained or improved systemic inflammatory disease (e.g., fevers, pain, rash, arthritis)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #3.6mL per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOCILIZUMAB-ANOH - SQ (Avtozma - subcutaneous)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Giant cell arteritis (GCA: a type of inflammatory condition)
      3. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: a type of lung condition)
      4. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)
      5. Systemic juvenile idiopathic arthritis (SJIA: a type of joint condition)

   (Renewal denial text continued on next page)

CONTINUED ON NEXT PAGE

RENEWAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Avtozma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Xeljanz (tofacitinib immediate release or extended release) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

C. If you have giant cell arteritis, renewal also requires:
1. You will NOT use Avtozma concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)
2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Rinvoq (upadacitinib)

D. If you have systemic sclerosis-associated interstitial lung disease, renewal also requires:
1. You have experienced a clinically meaningful improvement or maintenance in annual rate of decline
2. You will NOT use Avtozma concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic sclerosis-associated interstitial lung disease (a type of lung condition)

TOCILIZUMAB-ANOH - SQ

RENEWAL CRITERIA (CONTINUED)

E. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Avtozma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])

F. If you have systemic juvenile idiopathic arthritis, renewal also requires:
1. You will NOT use Avtozma concurrently (at the same time) with another systemic biologic (such as Ilaris [canakinumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of systemic juvenile idiopathic arthritis (a type of joint condition)
2. You meet ONE of the following:
   a. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   b. You have maintained or improved systemic inflammatory disease (such as fevers, pain, rash, arthritis)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   - The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

   If yes, **approve for 6 months by GPID or GPI-14 for all of the following:**
   - **5mg: #2 per day.**
   - **11mg: #1 per day.**

   If no, continue to #2.

TOFACITINIB

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., Enbrel [etanercept])

If yes, **approve for 6 months by GPID or GPI-14 for all of the following:**
- **5mg: #2 per day.**
- **11mg: #1 per day.**
- **1mg/mL: #10mL per day.**

If no, continue to #3.

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
- The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam, diclofenac)
- The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

If yes, **approve for 6 months by GPID or GPI-14 for all of the following:**
- **5mg: #2 per day.**
- **11mg: #1 per day.**

If no, continue to #4.

TOFACITINIB

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC
   - The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., adalimumab-ryvk/adalimumab-aaty)

   If yes, **approve for 6 months by GPID or GPI-14 for all of the following:**
   - **5mg and 10mg: #2 per day.**
   - **11mg and 22mg: #1 per day.**

   If no, continue to #5.

5. Does the patient have a diagnosis of polyarticular course juvenile idiopathic arthritis (pcJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pcJIA
   - The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

   If yes, **approve for 6 months by GPID or GPI-14 for all of the following:**
   - **5mg: #2 per day.**
   - **1mg/mL: #10mL per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TOFACITINIB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOFACITINIB (Xeljanz, Xeljanz XR)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
   5. Polyarticular course juvenile idiopathic arthritis (pcJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   4. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   5. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

C. If you have psoriatic arthritis, approval also requires:
   1. You are 2 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
   3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
   4. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as Enbrel [etanercept])

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

TOFACITINIB

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (nonsteroidal anti-inflammatory drug such as ibuprofen, naproxen, meloxicam, diclofenac)
5. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
4. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as adalimumab-ryvk/adalimumab-aaty)

F. If you have polyarticular course juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of polyarticular course juvenile idiopathic arthritis (a type of joint condition)
4. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

TOFACITINIB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **5mg: #2 per day.**
   - **11mg: #1 per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **5mg: #2 per day.**
   - **11mg: #1 per day.**
   - **1mg/mL: #10mL per day.**

   If no, continue to #3.

TOFACITINIB

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) score while on therapy
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **5mg: #2 per day.**
   - **11mg: #1 per day.**

   If no, continue to #4.

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **5mg and 10mg: #2 per day.**
   - **11mg and 22mg: #1 per day.**

   If no, continue to #5.

5. Does the patient have a diagnosis of polyarticular course juvenile idiopathic arthritis (pcJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of pcJIA

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **5mg: #2 per day.**
   - **1mg/mL: #10mL per day.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

TOFACITINIB

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TOFACITINIB (Xeljanz, Xeljanz XR)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
   5. Polyarticular course juvenile idiopathic arthritis (pcJIA: a type of joint condition)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
   1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)

C. If you have psoriatic arthritis, renewal also requires:
   1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

D. **If you have ankylosing spondylitis, renewal also requires**:
   1. You have experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI: a type of disease evaluation tool) score while on therapy
   2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)

(Renewal denial text continued on next page)

TOFACITINIB

RENEWAL CRITERIA (CONTINUED)

E. If you have moderate to severe ulcerative colitis, renewal also requires:
1. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

F. If you have polyarticular course juvenile idiopathic arthritis, renewal also requires:
1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of polyarticular course juvenile idiopathic arthritis (a type of joint condition)

TOFERSEN (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TOFERSEN	QALSODY	48878		GPI-10 (7450408000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of amyotrophic lateral sclerosis (ALS) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient has a superoxide dismutase 1 (SOD1) gene mutation

   If yes, **approve for a total of 12 months by HICL or GPI-10 as follows:**
   INITIAL REQUESTS: Please enter two authorizations as follows:
   - **FIRST APPROVAL: Approve for 1 month with a quantity limit of #30mL per 28 days.**
   - **SECOND APPROVAL: Approve for 11 months with a quantity limit of #15mL per 28 days (Please enter a start date of 3 days before the end of the first approval).**

   SUBSEQUENT REQUESTS:
   - **Approve for 12 months with a quantity limit of #15mL per 28 days.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOFERSEN (QALSODY)** requires the following rule(s) be met for approval:
   A. You have amyotrophic lateral sclerosis (ALS: a type of brain and nerve condition)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with a neurologist (a type of brain doctor)
   D. You have a superoxide dismutase 1 (SOD1: an enzyme) gene mutation (an abnormal change in your gene)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TOPIRAMATE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TOPIRAMATE	EPRONTIA, TOPIRAMATE		51457	GPI-14 (72600075002020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of partial-onset seizures (ICD-10 Groups G40.1, G40.2) or primary generalized tonic-clonic seizures (ICD-10 Group G40.3) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The requested medication will be used as initial monotherapy OR adjunctive therapy
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient has a contraindication to or is unable to swallow oral topiramate tablets or capsules
   - The patient had a trial of or contraindication to THREE preferred antiepileptic agents (e.g., carbamazepine, divalproex, valproic acid, oxcarbazepine, levetiracetam IR or ER, gabapentin, zonisamide, topiramate tablets or capsules, lamotrigine)

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #16mL per day**.
   If no, continue to #2.

2. Does the patient have a diagnosis of seizures associated with Lennox-Gastaut syndrome (ICD-10 Group G40.81) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The requested medication will be used as adjunctive therapy
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient has a contraindication to or is unable to swallow oral topiramate tablets or capsules
   - The patient had a trial of or contraindication to the standard of care agent: valproic acid or derivatives
   - The patient had a trial of or contraindication to TWO of the following preferred antiepileptic agents: Epidiolex, rufinamide, felbamate, clobazam, lamotrigine, clonazepam, generic topiramate tablets or capsules

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #16mL per day.**
   If no, continue to #3.

TOPIRAMATE

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of migraines (ICD-10 Group G43) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The requested medication will be used as preventative treatment of migraines
   - The patient is unable to take oral tablets or capsules
   - The patient had a trial of or contraindication to ONE preferred agent: Trokendi XR, generic topiramate tablet/sprinkle, topiramate ER sprinkle

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #4mL per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOPIRAMATE (Eprontia)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Partial-onset seizures (a type of seizure)
      2. Primary generalized tonic-clonic seizures (a type of seizure)
      3. Seizures associated with Lennox-Gastaut syndrome (a type of seizure disorder in young children)
      4. Migraine (a type of headache)

   B. If you have partial-onset seizures or primary generalized tonic-clonic seizures, approval also requires:
      1. You are 2 years of age or older
      2. The requested medication will be used as initial monotherapy (one medication treatment) OR adjunctive therapy (medications taken together with)
      3. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
      4. You have a contraindication to (harmful for you to use) or are unable to swallow oral topiramate tablets or capsules
      5. You have tried or have a contraindication to (harmful for you to use) THREE preferred anti-seizure medications (such as carbamazepine, divalproex, valproic acid, oxcarbazepine, levetiracetam immediate-release or extended-release, gabapentin, zonisamide, topiramate tablets or capsules, lamotrigine)

TOVORAFENIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TOVORAFENIB	OJEMDA	49542		GPI-10 (2153207500)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory low-grade glioma (LGG) (ICD-10 D33.2) **AND** meet the following criterion?
   - The patient's cancer has a BRAF fusion, BRAF rearrangement, or BRAF V600 mutation

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **100mg: #24 per 28 days.**
   - **25mg/mL: #96mL per 28 days.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TOVORAFENIB (Ojemda)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory low-grade glioma (LGG) (a type of brain cancer that has returned or did not respond to treatment)
   B. Your cancer has a BRAF fusion, BRAF rearrangement, or BRAF V600 mutation (types of abnormal changes in genes)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Ojemda.

TRABECTEDIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TRABECTEDIN	YONDELIS	35367		GPI-10 (2110707500)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable or metastatic liposarcoma or leiomyosarcoma and meets the following criterion?
   - The patient has received prior therapy with an anthracycline-containing regimen such as doxorubicin

   If yes, **approve for 12 months by HICL or GPI-10.**

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRABECTEDIN (Yondelis)** requires the following rule(s) be met for approval:
   A. You have unresectable or metastatic liposarcoma or leiomyosarcoma (cancer of the fat cells or muscles that cannot be removed with surgery or has spread to other parts of body).
   B. You have previously received therapy with an anthracycline-containing regimen such as doxorubicin.

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TRALOKINUMAB-LDRM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TRALOKINUMAB-LDRM	ADBRY	47741		GPI-10 (9027308045)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist, allergist, or immunologist
   - Adbry will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic (e.g., Dupixent [dupilumab], Rinvoq [upadacitinib]) and is switching to Adbry
   - The patient has atopic dermatitis involving at least 10% of body surface area (BSA)
   - The patient has atopic dermatitis affecting the face, head, neck, hands, feet, groin, or intertriginous areas

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TRALOKINUMAB-LDRM

INITIAL CRITERIA (CONTINUED)

3. Has the patient had a trial of or contraindication to **ONE** of the following clinical standard of care therapies?
   - Topical corticosteroid (e.g., hydrocortisone, clobetasol propionate, halobetasol propionate)
   - Topical calcineurin inhibitor (e.g., Protopic [tacrolimus], Elidel [pimecrolimus])
   - Topical PDE-4 inhibitor (e.g., Eucrisa [crisaborole], Adquey [difamilast], Zoryve [roflumilast])
   - Topical AhR agonist (e.g., Vtama [tapinarof])
   - Topical JAK inhibitor (e.g., Opzelura [ruxolitinib])
   - Phototherapy

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #4mL per 28 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #6mL per 28 days.)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TRALOKINUMAB-LDRM

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **TRALOKINUMAB-LDRM (Adbry)** requires the following rule(s) be met for approval:

A. You have moderate to severe atopic dermatitis (AD: a type of skin condition)
B. You are 12 years of age or older
C. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
D. You will NOT use Adbry concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis (a type of skin condition)
E. You meet ONE of the following:
    1. You were previously stable on another biologic (such as Dupixent [dupilumab], Rinvoq [upadacitinib]) and are switching to Adbry
    2. You have atopic dermatitis (a type of skin condition) involving at least 10 percent of body surface area (BSA)
    3. You have atopic dermatitis (a type of skin condition) affecting the face, head, neck, hands, feet, groin, or intertriginous areas (areas between skin folds)
F. You have tried or have a contraindication to (harmful for you to use) ONE of the following clinical standard of care therapies:
    1. Topical corticosteroid (such as hydrocortisone, clobetasol propionate, halobetasol propionate)
    2. Topical calcineurin inhibitor (such as Protopic [tacrolimus], Elidel [pimecrolimus])
    3. Topical PDE-4 (phosphodiesterase-4) inhibitor (such as Eucrisa [crisaborole], Adquey [difamilast], Zoryve [roflumilast])
    4. Topical aryl hydrocarbon receptor (AhR) agonist (such as Vtama [tapinarof])
    5. Topical JAK (Janus kinase) inhibitor (such as Opzelura [ruxolitinib])
    6. Phototherapy (a type of light therapy)

PRIOR AUTHORIZATION GUIDELINES

TRALOKINUMAB-LDRM

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient has shown improvement while on Adbry
   - Adbry will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4mL per 28 days.** If no, do not approve.

   RENEWAL DENIAL TEXT: Our guideline named **TRALOKINUMAB-LDRM (Adbry)** requires the following rule(s) be met for renewal:
   A. You have moderate to severe atopic dermatitis (AD: a type of skin condition)
   B. You have shown improvement while on Adbry
   C. You will NOT use Adbry concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis (a type of skin condition)

TRAMADOL HCL	QDOLO, TRAMADOL HCL		48598	GPI-14 (65100095102005)	

GUIDELINES FOR USE

1. Is the request for the management of pain (ICD-10 R52) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's pain is severe enough to require an opioid analgesic
   - Alternative treatments for the patient's pain are inadequate
   - The patient had a trial of or contraindication to the preferred agent: generic tramadol IR tablet or a generic tramadol with acetaminophen product
   - The patient is unable to take oral solid formulations of tramadol or tramadol with acetaminophen (e.g., difficulty swallowing)

   If yes, **approve for 6 months by GPID or GPI-14 with a quantity limit of #80mL per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRAMADOL (Qdolo)** requires the following rule(s) be met for approval:
   A. The request is for the management of pain
   B. You are 18 years of age or older
   C. Your pain is severe enough to require an opioid analgesic (type of pain medication)
   D. Alternative (other) treatments for your pain are inadequate (did not work)
   E. You have tried or have a contraindication to (harmful for you to use) the preferred medication: generic tramadol immediate-release (IR) tablet or a generic tramadol with acetaminophen product
   F. You are unable to take oral solid formulations (such as a tablet) of tramadol or tramadol with acetaminophen (such as with difficulty swallowing)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

TRAMETINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TRAMETINIB DIMETHYL SULFOXIDE	MEKINIST	40361		GPI-10 (2153357010)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient has a BRAF V600E or V600K mutation as detected by an FDA-approved test
   - Mekinist will be used as a single agent in a BRAF-inhibitor treatment-naive patient OR in combination with Tafinlar (dabrafenib)

   If yes, continue to #7.
   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (Group C34) and meet **ALL** of the following criteria?
   - The patient has a BRAF V600E mutation as detected by an FDA-approved test
   - Mekinist will be used in combination with Tafinlar (dabrafenib)

   If yes, continue to #7.
   If no, continue to #3.

3. Does the patient have a diagnosis of melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient has a BRAF V600E or V600K mutation as detected by an FDA-approved test
   - Mekinist will be used as an adjuvant therapy in combination with Tafinlar (dabrafenib)
   - There is involvement of lymph node(s), following complete resection

   If yes, continue to #7.
   If no, continue to #4.

4. Does the patient have a diagnosis of locally advanced or metastatic anaplastic thyroid cancer (ATC) (ICD-10 C73) and meet **ALL** of the following criteria?
   - The patient has a BRAF V600E mutation
   - Mekinist will be used in combination with Tafinlar (dabrafenib)
   - The patient has no satisfactory locoregional treatment options available

   If yes, continue to #7.
   If no, continue to #5.

TRAMETINIB

GUIDELINES FOR USE (CONTINUED)

5. Does the patient have a diagnosis of unresectable or metastatic solid tumor and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has a BRAF V600E mutation
   - Mekinist will be used in combination with Tafinlar (dabrafenib)
   - The patient's disease has progressed following prior treatment and has no satisfactory alternative treatment options

   If yes, continue to #7.
   If no, continue to #6.

6. Does the patient have a diagnosis of low-grade glioma (LGG) (ICD-10 D33.2) and meet **ALL** of the following criteria?
   - The patient is 1 to 17 years of age
   - The patient has a BRAF V600E mutation
   - Mekinist will be used in combination with Tafinlar (dabrafenib)
   - The patient requires systemic therapy

   If yes, continue to #7.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

7. Is the request for the tablet formulation?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **2mg: #1 per day.**
   - **0.5mg: #3 per day.**

   If no, continue to #8.

8. Is the request for the oral solution **AND** the patient meets the following criterion?
   - The patient is unable to swallow Mekinist (trametinib) tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #42mL per day.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TRAMETINIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRAMETINIB (Mekinist)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Unresectable or metastatic melanoma (a type of skin cancer that cannot be removed by surgery or has spread to other parts of the body)
   2. Metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body)
   3. Melanoma (a type of skin cancer)
   4. Locally advanced or metastatic anaplastic thyroid cancer (ATC: a type of thyroid cancer that has spread to nearby tissue or lymph nodes or has spread to other parts of the body)
   5. Unresectable or metastatic solid tumor (tumor that cannot be removed by surgery or has spread to other parts of the body)
   6. Low-grade glioma (LGG: a type of brain cancer)

B. If you have unresectable or metastatic melanoma, approval also requires:
   1. You have a BRAF V600E or V600K mutation (abnormal change in gene) as detected by a Food and Drug Administration (FDA)-approved test
   2. Mekinist will be used as a single agent in a BRAF-inhibitor treatment-naïve patient (you have not been previously treated for this cancer) OR in combination with Tafinlar (dabrafenib)

C. If you have metastatic non-small cell lung cancer, approval also requires:
   1. You have a BRAF V600E mutation (abnormal change in gene) as detected by a Food and Drug Administration (FDA)-approved test
   2. Mekinist will be used in combination with Tafinlar (dabrafenib)

D. If you have melanoma, approval also requires:
   1. You have a BRAF V600E or V600K mutation (abnormal change in gene) as detected by a Food and Drug Administration (FDA)-approved test
   2. Mekinist will be used as an adjuvant (add-on) therapy in combination with Tafinlar (dabrafenib)
   3. There is involvement of lymph node(s), following complete resection (surgical removal)

E. If you have locally advanced or metastatic anaplastic thyroid cancer, approval also requires:
   1. You have a BRAF V600E mutation (abnormal change in gene)
   2. Mekinist will be used in combination with Tafinlar (dabrafenib)
   3. You do not have any satisfactory locoregional treatment options available (treatments that are focused on the affected area)

(Denial text continued on next page)

TRAMETINIB

GUIDELINES FOR USE (CONTINUED)

F. If you have an unresectable or metastatic solid tumor, approval also requires:
1. You are 1 year of age or older
2. You have a BRAF V600E mutation (abnormal change in gene)
3. Mekinist will be used in combination with Tafinlar (dabrafenib)
4. Your disease has progressed following prior treatment and have no satisfactory alternative treatment options

G. If you have low-grade glioma, approval also requires:
1. You are 1 to 17 years of age
2. You have a BRAF V600E mutation (abnormal change in gene)
3. Mekinist will be used in combination with Tafinlar (dabrafenib)
4. You require systemic therapy (treatment that targets the entire body)

H. If the request is for the oral solution, approval also requires:
1. You are unable to swallow Mekinist (trametinib) tablets

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Mekinist.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient's cancer is HER2-overexpressing (HER2-positive), as detected by an FDA-approved companion diagnostic test for trastuzumab
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Kanjinti (trastuzumab-anns), Trazimera (trastuzumab-qyyp), Ogivri (trastuzumab-dkst)

   If yes, continue to #2.
   If no, continue to #4.

2. Will the requested medication be used as adjuvant therapy and the patient meets **ONE** of the following criteria?
   - The requested medication will be used as part of a treatment regimen consisting of doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
   - The requested medication will be used as part of a treatment regimen with docetaxel and carboplatin
   - The requested medication will be used as a single agent following multi-modality anthracycline based therapy (e.g., daunorubicin, doxorubicin, Idamycin [idarubicin], Ellence [epirubicin], Valstar [valrubicin])

   If yes, **approve for 12 months by HICL or GPI-10 for all of the following:**
   - **Herceptin: no quantity limit.**
   - **Herceptin Hylecta: #5mL per 21 days.**

   If no, continue to #3.

TRASTUZUMAB/TRASTUZUMAB-HYALURONIDASE

GUIDELINES FOR USE (CONTINUED)

3. Is the patient's cancer metastatic and does the patient meet **ONE** of the following criteria?
   - The requested medication will be used in combination with paclitaxel
   - The requested medication will be used as a single agent in a patient who has received at least one chemotherapy regimen for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10 for all of the following:**
   - **Herceptin: no quantity limit.**
   - **Herceptin Hylecta: #5mL per 21 days.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient have a diagnosis of metastatic gastric or gastroesophageal junction adenocarcinoma (ICD-10 Group C16) and meet **ALL** of the following criteria?
   - The request is for Herceptin
   - The patient's cancer is HER2-overexpressing (HER2-positive), as detected by an FDA-approved companion diagnostic test for trastuzumab
   - Herceptin will be used in combination with cisplatin AND either Xeloda (capecitabine) or 5-fluorouracil
   - The patient has NOT received prior treatment for metastatic disease

   If yes, **approve Herceptin for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRASTUZUMAB/TRASTUZUMAB-HYALURONIDASE (Herceptin, Herceptin Hylecta)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Breast cancer
      2. Metastatic gastric or gastroesophageal junction adenocarcinoma (a type of digestive system cancer that has spread to other parts of the body)

   (Denial text continued on next page)

TRASTUZUMAB/TRASTUZUMAB-HYALURONIDASE

GUIDELINES FOR USE (CONTINUED)

B. If you have breast cancer, approval also requires:

1. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for trastuzumab
2. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Kanjinti (trastuzumab-anns), Trazimera (trastuzumab-qyyp), Ogivri (trastuzumab-dkst)
3. You meet ONE of the following:
   a. The requested medication will be used as adjuvant (additional) treatment, and you meet ONE of the following:
      i. The requested medication will be used as part of a treatment plan that includes doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
      ii. The requested medication will be used as part of a treatment plan with docetaxel and carboplatin
      iii. The requested medication will be used as a single medication following multi-modality anthracycline based therapy (therapy using a class of cancer medications that combines more than one method of treatment), such as daunorubicin, doxorubicin, Idamycin (idarubicin), Ellence (epirubicin), Valstar (valrubicin)
   b. Your cancer is metastatic (has spread to other parts of the body), and you meet ONE of the following:
      i. The requested medication will be used in combination with paclitaxel
      ii. The requested medication will be used as a single medication if you have received at least one chemotherapy regimen (type of cancer treatment) for metastatic disease

C. If you have metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:

1. The request is for Herceptin
2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for trastuzumab
3. Herceptin will be used in combination with cisplatin AND either Xeloda (capecitabine) or 5-fluorouracil
4. You have NOT received prior treatment for metastatic disease

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

TRASTUZUMAB-ANNS (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TRASTUZUMAB-ANNS	KANJINTI	45796		GPI-10 (2117007014)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer and meet **ALL** of the following criteria?
   - The request is for adjuvant therapy
   - The patient has HER2-overexpressing (HER2-positive) tumor as detected by an FDA-approved test
   - The patient meets **ONE** of the following:
     - The requested medication is being used as part of a treatment regimen consisting of doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
     - The requested medication is being used as part of a treatment regimen with docetaxel and carboplatin
     - The requested medication is being used as a single agent following multi-modality anthracycline based therapy (e.g., daunorubicin, doxorubicin, idarubicin, epirubicin, or valrubicin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic breast cancer and meet **ALL** of the following criteria?
   - The patient has HER2-overexpressing (HER2-positive) metastatic breast cancer as detected by an FDA-approved test
   - The patient meets **ONE** of the following:
     - The requested medication is being used in combination with paclitaxel for first-line treatment
     - The requested medication is being used as a single agent in a patient who has previously received **ONE** or more chemotherapy regimens for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of metastatic gastric or gastroesophageal junction adenocarcinoma and meet **ALL** of the following criteria?
   - The patient has HER2-overexpressing (HER2-positive) metastatic cancer as detected by an FDA-approved test
   - The requested medication is being used in combination with cisplatin and capecitabine or 5-fluorouracil
   - The patient has not received prior treatment for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TRASTUZUMAB-ANNS (NSA)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRASTUZUMAB-ANNS (Kanjinti)** requires the following rule(s) be met for approval:

A. You have **ONE** of the following diagnoses:
   1. Breast cancer
   2. Metastatic breast cancer (breast cancer that has spread to other parts of body)
   3. Metastatic gastric or gastroesophageal junction adenocarcinoma (cancer in the stomach and/or throat that has spread to other parts of the body)

B. If you have breast cancer, approval also requires:
   1. You have HER2-positive tumor (type of protein found in breast cancer) as detected by a Food and Drug Administration (FDA)-approved test
   2. The request is for adjuvant (add-on) therapy
   3. You meet **ONE** of the following:
      a. The requested medication is being used as part of a treatment plan that includes doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
      b. The requested medication is being used as part of a treatment plan with docetaxel and carboplatin
      c. The requested medication is being used as a single agent following multi-modality anthracycline based therapy (therapy using a class of cancer drug that combines more than one method of treatment) such as daunorubicin, doxorubicin, idarubicin, epirubicin, or valrubicin

C. If you have metastatic breast cancer, approval also requires:
   1. You have HER2-positive tumor (type of protein found in breast cancer) as detected by a Food and Drug Administration (FDA)-approved test
   2. You meet **ONE** of the following:
      a. The requested medication is being used in combination with paclitaxel for first-line treatment
      b. The requested medication is being used as a single agent if you have previously received **ONE** or more chemotherapy regimens for metastatic disease (disease has spread to other parts of the body)

D. If you have metastatic gastric or gastroesophageal junction adenocarcinoma (cancer in the stomach and/or throat that has spread to other parts of the body), approval also requires:
   1. You have HER2-positive tumor (you have a type of protein present in breast cancer) as detected by a Food and Drug Administration (FDA)-approved test
   2. The requested medication is being used in combination with cisplatin and capecitabine or 5-fluorouracil
   3. You have not received prior treatment for metastatic disease (disease has spread to other parts of the body)

TRASTUZUMAB-DKST (NSA)

GUIDELINES FOR USE (CONTINUED)

3. Does the patient have a diagnosis of metastatic gastric or gastroesophageal junction adenocarcinoma and meet **ALL** of the following criteria?
   - The patient has HER2-overexpressing (HER2-positive) metastatic cancer as detected by an FDA-approved test
   - Requested medication is being used in combination with cisplatin and capecitabine or 5-fluorouracil
   - The patient has not received prior treatment for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRASTUZUMAB-DKST (Ogivri)** requires the following rule(s) be met for approval:
   A. You have **ONE** of the following diagnoses:
      1. Breast cancer
      2. Metastatic breast cancer (cancer has spread to other parts of the body)
      3. Metastatic gastric or gastroesophageal junction adenocarcinoma (type of cancer in the stomach and/or lower throat that has spread to other parts of the body)

   B. If you have breast cancer, approval also requires:
      1. You have HER2-positive tumor (type of protein found in breast cancer) as detected by a Food and Drug Administration (FDA)-approved test
      2. The request is for adjuvant (add-on) therapy
      3. You meet **ONE** of the following:
         a. The requested medication is being used as part of a treatment plan that includes doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
         b. The requested medication is being used as part of a treatment plan with docetaxel and carboplatin
         c. The requested medication is being used as a single agent following multi-modality anthracycline based therapy (therapy using a class of cancer drug that combines more than one method of treatment) such as daunorubicin, doxorubicin, idarubicin, epirubicin, or valrubicin

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRASTUZUMAB- QYYP (Trazimera)** requires the following rule(s) be met for approval:

A. You have ONE of the following diagnoses:
   1. Breast cancer
   2. Metastatic breast cancer (breast cancer that has spread to other parts of the body)
   3. Metastatic gastric or gastroesophageal junction adenocarcinoma (cancer in the stomach and/or throat that has spread to other parts of the body)

B. If you have breast cancer, approval also requires:
   1. The request is for adjuvant (add-on) therapy
   2. You have HER2-positive tumor (type of protein present in breast cancer) as detected by a Food and Drug Administration-approved test
   3. You meet ONE of the following:
      a. The requested medication is being used as part of a treatment plan that contains doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
      b. The requested medication is being used as part of a treatment plan with docetaxel and carboplatin
      c. The requested medication is being used as a single agent following multi-modality anthracycline based therapy (therapy using a class of cancer drug that combines more than one method of treatment) such as daunorubicin, doxorubicin, idarubicin, epirubicin, or valrubicin

C. If you have metastatic breast cancer, approval also requires:
   1. You have HER2-positive tumor (type of protein present in breast cancer) as detected by a Food and Drug Administration-approved test
   2. You meet ONE of the following:
      a. The requested medication is being used in combination with paclitaxel for first-line treatment
      b. The requested medication is being used as a single agent if you have previously received ONE or more chemotherapy regimens for metastatic disease (disease has spread to other parts of the body)

D. If you have metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:
   1. You have HER2-positive tumor (type of protein present in stomach cancer) as detected by a Food and Drug Administration-approved test
   2. The requested medication is being used in combination with cisplatin and capecitabine or 5-fluorouracil
   3. You have not received prior treatment for metastatic disease (disease has spread to other parts of the body)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

TRASTUZUMAB-STRF

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TRASTUZUMAB-STRF	HERCESSI	49554		GPI-10 (2117007040)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient's cancer is HER2-overexpressing (HER2-positive), as detected by an FDA-approved companion diagnostic test for a trastuzumab product
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Kanjinti (trastuzumab-anns), Trazimera (trastuzumab-qyyp), Ogivri (trastuzumab-dkst)

   If yes, continue to #2.
   If no, continue to #4.

2. Will Hercessi be used as adjuvant therapy and the patient meets **ONE** of the following criteria?
   - Hercessi will be used as part of a treatment regimen consisting of doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
   - Hercessi will be used as part of a treatment regimen with docetaxel and carboplatin
   - Hercessi will be used as a single agent following multi-modality anthracycline based therapy (e.g., daunorubicin, doxorubicin, Idamycin [idarubicin], Ellence [epirubicin], Valstar [valrubicin])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Is the patient's cancer metastatic and does the patient meet **ONE** of the following criteria?
   - Hercessi will be used in combination with paclitaxel
   - Hercessi will be used as a single agent in a patient who has received at least one chemotherapy regimen for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TRASTUZUMAB-STRF

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have a diagnosis of metastatic gastric or gastroesophageal junction adenocarcinoma (ICD-10 Group C16) and meet **ALL** of the following criteria?
   - The patient's cancer is HER2-overexpressing (HER2-positive), as detected by an FDA-approved companion diagnostic test for a trastuzumab product
   - Hercessi will be used in combination with cisplatin AND either Xeloda (capecitabine) or 5-fluorouracil
   - The patient has NOT received prior treatment for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRASTUZUMAB-STRF (Hercessi)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Breast cancer
      2. Metastatic gastric or gastroesophageal junction adenocarcinoma (a type of digestive system cancer that has spread to other parts of the body)

   B. If you have breast cancer, approval also requires:
      1. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, as detected by a Food and Drug Administration (FDA)-approved companion diagnostic test for a trastuzumab product
      2. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Kanjinti (trastuzumab-anns), Trazimera (trastuzumab-qyyp), Ogivri (trastuzumab-dkst)
      3. You meet ONE of the following:
         a. Hercessi will be used as adjuvant (additional) treatment, and you meet ONE of the following:
            i. Hercessi will be used as part of a treatment plan that includes doxorubicin, cyclophosphamide, and either paclitaxel or docetaxel
            ii. Hercessi will be used as part of a treatment plan with docetaxel and carboplatin
            iii. Hercessi will be used as a single medication following multi-modality anthracycline based therapy (therapy using a class of cancer medications that combines more than one method of treatment), such as daunorubicin, doxorubicin, Idamycin (idarubicin), Ellence (epirubicin), Valstar (valrubicin)

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

TREMELIMUMAB-ACTL (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TREMELIMUMAB-ACTL	IMJUDO	48415		GPI-10 (2135528010)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable hepatocellular carcinoma (uHCC) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Imjudo will be used in combination with Imfinzi (durvalumab)
- The patient has not received previous treatment with Imjudo per lifetime

If yes, **approve for 30 days by HICL or GPI-10 with a quantity limit of #15 mL and a fill count of 1.**

If no, continue to #2.

2. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient does not have sensitizing epidermal growth factor receptor (EGFR) mutations or anaplastic lymphoma kinase (ALK) genomic tumor aberrations
- Imjudo will be used in combination with Imfinzi (durvalumab) and platinum-based chemotherapy (e.g., cisplatin, carboplatin)
- The patient has not received a total of 5 doses of Imjudo per lifetime

If yes, **approve for 5 months by HICL or GPI-10 with a quantity limit of #3.75 mL per fill and a total fill count of 5 fills.**

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TREMELIMUMAB-ACTL (Imjudo)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Unresectable hepatocellular carcinoma (uHCC: a type of liver cancer that cannot be removed by surgery)
   2. Metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body)

TREPROSTINIL-ORENITRAM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TREPROSTINIL DIOLAMINE	ORENITRAM ER	40827		GPI-10 (4017008005)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist
   - The patient does NOT have severe hepatic impairment

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) of greater than 2 Wood units (WU)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TREPROSTINIL-ORENITRAM

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TREPROSTINIL-ORENITRAM** requires the following rule(s) be met for approval:

A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)
B. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
C. You do NOT have severe hepatic (liver) impairment
D. Your pulmonary arterial hypertension is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
    1. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary hypertension) greater than 20 mmHg
    2. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary hypertension) less than or equal to 15 mmHg
    3. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary hypertension) greater than 2 Wood units

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TREPROSTINIL-REMODULIN

INITIAL CRITERIA (CONTINUED)

D. For new start requests of Remodulin (treprostinil), approval also requires ONE of the following:
1. You are intermediate or high risk
2. You have tried or have a contraindication to (harmful for you to use) TWO of the following clinical standard of care medications from different medication classes:
   a. Oral endothelin receptor antagonist (such as Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
   b. Oral phosphodiesterase-5 inhibitor for PAH (such as Revatio [sildenafil], Adcirca [tadalafil])
   c. Oral cGMP stimulator (such as Adempas [riociguat])

E. If you are continuing current Remodulin (treprostinil) therapy from a hospital discharge, there is no additional requirement for approval.

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TREPROSTINIL-TYVASO DPI

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TREPROSTINIL-TYVASO DPI** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)
   2. Pulmonary hypertension associated with interstitial lung disease (PH-ILD: a type of heart and lung condition) (World Health Organization [WHO] Group 3: a way to classify the severity of disease)

B. If you have pulmonary arterial hypertension (WHO Group 1), approval also requires:
   1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   2. Your pulmonary arterial hypertension (PAH: a type of heart and lung condition) diagnosis is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
      a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary arterial hypertension [a type of heart and lung condition]) greater than 20 mmHg
      b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary arterial hypertension [a type of heart and lung condition]) less than or equal to 15 mmHg
      c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary arterial hypertension [a type of heart and lung condition]) greater than 2 Wood units

C. If you have pulmonary hypertension associated with interstitial lung disease (WHO Group 3), approval also requires:
   1. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
   2. Your pulmonary hypertension associated with interstitial lung disease (PH-ILD: a type of heart and lung condition) diagnosis is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
      a. Mean pulmonary artery pressure (PAP: a type of measurement for pulmonary hypertension [a type of heart and lung condition]) greater than 20 mmHg
      b. Pulmonary capillary wedge pressure (PCWP: a type of measurement for pulmonary hypertension [a type of heart and lung condition]) less than or equal to 15 mmHg
      c. Pulmonary vascular resistance (PVR: a type of measurement for pulmonary hypertension [a type of heart and lung condition]) greater than 2 Wood units

TREPROSTINIL-TYVASO DPI

RENEWAL CRITERIA

1. Does the patient have **ONE** of the following diagnoses?
   - Pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD-10 I27.0, Group I27.2)
   - Pulmonary hypertension associated with interstitial lung disease (PH-ILD) (WHO Group 3) (ICD-10 I27.23)

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #1 fill per 28 days for all of the following (NOTE: Enter a Min Day Supply of 28 days):**
   - **16mcg**
   - **32mcg**
   - **48mcg**
   - **64mcg**
   - **80mcg**
   - **32-48mcg**
   - **32-64mcg**
   - **48-64mcg**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TREPROSTINIL-TYVASO DPI** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1: a way to classify the severity of disease)
      2. Pulmonary hypertension associated with interstitial lung disease (PH-ILD: a type of heart and lung condition) (World Health Organization [WHO] Group 3: a way to classify the severity of disease)

RATIONALE

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD- 10 I27.0, Group I27.2) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #2.
   If no, continue to #3.

2. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) of greater than 2 Wood units (WU)

   If yes, **approve for a total of 12 months by GPID or GPI-14. Please enter TWO authorizations as follows:**
   - **FIRST APPROVAL: Approve Tyvaso Starter Kit for 1 month for 1 fill (PAC NOTE: Enter a Min Day Supply of 28 days).**
   - **SECOND APPROVAL: Approve Tyvaso or Tyvaso Refill Kit for 11 months (enter a start date of 3 days BEFORE the end date of the first approval).**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of pulmonary hypertension associated with interstitial lung disease (PH-ILD) (WHO Group 3) (ICD-10 I27.23) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TRIENTINE CAPSULE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TRIENTINE HCL	SYPRINE, CLOVIQUE, TRIENTINE HCL	01109		GPI-10 (9920002010)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of Wilson's disease (ICD-10 E83.01) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a hepatologist or gastroenterologist
   - The requested medication will be used with a dietary plan to maintain a copper intake of less than 0.9 mg/day
   - The patient had a trial of or contraindication to the preferred agent: penicillamine (Depen, Cuprimine)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient have genetic testing confirming an ATP7B mutation?

   If yes, **approve for lifetime by GPID or GPI-14 for all strengths with a quantity limit as follows:**
   - **250 mg: #8 per day.**
   - **500 mg: #4 per day.**

   If no, continue to #3.

3. Does the patient meet **ONE** of the following criteria?
   - The patient has a 24-hour urinary copper excretion (greater than 40 micrograms/24 hours)
   - The patient has a liver biopsy with copper dry weight greater than 75 micrograms/gram
   - The patient has a serum ceruloplasmin level of less than 20 mg/dL

   If yes, **approve for lifetime by GPID or GPI-14 for all strengths with a quantity limit as follows:**
   - **250 mg: #8 per day.**
   - **500 mg: #4 per day.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TRIENTINE CAPSULE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRIENTINE CAPSULE (Syprine, Clovique)** requires the following rule(s) be met for approval:

A. You have Wilson's disease (a type of genetic disorder)
B. Therapy is prescribed by or in consultation with a hepatologist (a type of liver doctor) or gastroenterologist (a type of digestive system doctor)
C. The requested medication will be used with a dietary plan to maintain a copper intake of less than 0.9 mg/day
D. You have tried or have a contraindication to (harmful for you to use) the preferred medication: penicillamine (Depen, Cuprimine)
E. You meet ONE of the following:
    1. You have genetic testing confirming an ATP7B mutation (an abnormal change in a type of gene)
    2. You meet ONE of the following:
        a. You have a 24-hour urinary copper excretion (a type of lab test) (greater than 40 micrograms/24 hours)
        b. You have a liver biopsy (removal of cells or tissue from the liver for examination) with copper dry weight greater than 75 micrograms/gram
        c. You have a serum ceruloplasmin (a type of lab test) level less than 20mg/dL

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic colorectal cancer (ICD-10 C19) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy in combination with an anti-VEGF biological therapy [e.g., Zaltrap (ziv-aflibercept), Cyramza (ramucirumab)]
   - Lonsurf will be used as a single agent OR in combination with bevacizumab

   If yes, continue to #2.
   If no, continue to #4.

2. Is the patient's metastatic colorectal cancer RAS wild-type?

   If yes, continue to #3.
   If no, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **15/6.14mg: #100 per 28 days.**
   - **20/8.19mg: #80 per 28 days.**

3. Has the patient had previous treatment with an anti-EGFR agent [e.g., Erbitux (cetuximab), Vectibix (panitumumab)]?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **15/6.14mg: #100 per 28 days.**
   - **20/8.19mg: #80 per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

TRIFLURIDINE/TIPIRACIL

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have a diagnosis of metastatic gastric or gastroesophageal junction adenocarcinoma (ICD-10 C16.0; Group C15) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received previous treatment with at least two prior lines of chemotherapy that included a fluoropyrimidine, a platinum, either a taxane or irinotecan, and if appropriate, HER2/neu-targeted therapy

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **15/6.14mg: #100 per 28 days.**
   - **20/8.19mg: #80 per 28 days.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRIFLURIDINE/TIPIRACIL (Lonsurf)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Metastatic colorectal cancer (a type of digestive system cancer that has spread to other parts of the body)
      2. Metastatic gastric or gastroesophageal junction adenocarcinoma (a type of digestive system cancer that has spread to other parts of the body)

   B. If you have metastatic colorectal cancer, approval also requires:
      1. You are 18 years of age or older
      2. Lonsurf will be used as a single agent OR in combination with bevacizumab
      3. You had previous treatment with fluoropyrimidine-, oxaliplatin- and irinotecan-based chemotherapy (drugs used to treat cancer) in combination with an anti-VEGF biological therapy such as Zaltrap (ziv-aflibercept) or Cyramza (ramucirumab)
      4. If your metastatic colorectal cancer is RAS wild-type (a type of gene), you also had a previous treatment with an anti-EGFR agent such as Erbitux (cetuximab), Vectibix (panitumumab)

   C. If you have metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:
      1. You are 18 years of age or older
      2. You had previous treatment with at least two prior lines of chemotherapy (drugs used to treat cancer) that included a fluoropyrimidine, a platinum, either a taxane or irinotecan, and if appropriate, HER2 (type of gene)/neu-targeted therapy

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

TRIHEPTANOIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TRIHEPTANOIN	DOJOLVI	46676		GPI-10 (8020008000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of a long-chain fatty acid oxidation disorder (LC-FAOD) (ICD-10 Group E71.31)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's diagnosis confirmed by **TWO** of the following?
   - Disease-specific elevations of acylcarnitines on a newborn blood spot or in plasma
   - Low enzyme activity in cultured fibroblasts
   - One or more known pathogenic mutations in CPT2, ACADVL, HADHA, or HADHB

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ALL** of the following criteria?
   - The patient is symptomatic (e.g., rhabdomyolysis, cardiomyopathy) for LC-FAOD
   - Therapy is prescribed by or in consultation with a gastroenterologist or physician specialist in medical genetics/inherited metabolic disorders
   - The patient had a trial of or contraindication to the clinical standard of care agent: commercial MCT oil (medical food product)

   If yes, **approve for 4 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

TRIHEPTANOIN

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRIHEPTANOIN (Dojolvi)** requires the following rule(s) be met for approval:

A. You have a long-chain fatty acid oxidation disorder (LC-FAOD: rare, genetic disorder that affects how the body breaks down fat)
B. Your diagnosis is confirmed by TWO of the following:
    1. Disease-specific elevations of acylcarnitines on a newborn blood spot or in plasma
    2. Low enzyme activity in cultured fibroblasts (a type of cell found in the body)
    3. One or more known pathogenic mutations (abnormal changes) in *CPT2, ACADVL, HADHA, or HADHB* (types of genes)
C. You are symptomatic for LC-FAOD (for example you have rhabdomyolysis [break down of muscle tissue] or cardiomyopathy [a type of heart condition])
D. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions) or physician specialist in medical genetics/inherited metabolic disorders
E. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: commercial MCT oil (a medical food product)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TRILACICLIB DIHYDROCHLORIDE	COSELA	47121		GPI-10 (2175657020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of extensive-stage small cell lung cancer (ES-SCLC) and meet **ALL** of the following?
   - The patient is 18 years of age or older
   - Cosela is being used to decrease the incidence of chemotherapy-induced myelosuppression
   - Cosela will be administered prior to a platinum/etoposide-containing regimen or topotecan-containing regimen

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 fill per 21 days.** If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRILACICLIB (Cosela)** requires the following rule(s) be met for approval:
   A. You have extensive-stage small cell lung cancer
   B. You are 18 years of age or older
   C. Cosela is being used to decrease the incidence of chemotherapy-induced myelosuppression (decreased bone marrow activity causing fewer red blood cells, white blood cells, and platelets)
   D. Cosela will be given prior to a platinum/etoposide-containing regimen or topotecan-containing regimen

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TRIPTORELIN-TRELSTAR (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TRIPTORELIN PAMOATE	TRELSTAR	23164		GPI-10 (2140505020)	BRAND ≠ TRIPTODUR

GUIDELINES FOR USE

1. Is the requested medication for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, continue to #2.

2. Does the patient who have a diagnosis of advanced prostate cancer (ICD-10 C61)?

   If yes, **approve for 12 months by GPID or GPI-14 for the requested strength with the following quantity limits:**
   - **3.75 mg: #1 per 4 weeks.**
   - **11.25 mg: #1 per 12 weeks.**
   - **22.5 mg: #1 per 24 weeks.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRIPTORELIN-TRELSTAR** requires the following rule(s) be met for approval:

   A. You have ONE of the following diagnoses:
      1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
      2. Advanced prostate cancer (prostate cancer that has spread to nearby tissue or organs)

   B. If you have gender dysphoria, approval also requires:
      1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

RATIONALE

TRIPTORELIN-TRIPTODUR (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TRIPTORELIN PAMOATE	TRIPTODUR		43603	GPI-10 (3008007040)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for gender dysphoria?

   If yes, **approve for 12 months by HICL or GPI-10 and override quantity limits.**
   If no, continue to #2.

2. Is the request for a female patient who has a diagnosis of central precocious puberty (CPP) and meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a pediatric endocrinologist
   - The patient has elevated levels of follicle-stimulating hormone (FSH) (level >4.0 mIU/mL) and luteinizing hormone (LH) (level > 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 8 years of age at the onset of CPP
   - There is documentation of pubertal staging using the Tanner scale for breast development (stage 2 or above) AND pubic hair growth (stage 2 or above)

   If yes, **approve for 12 months by GPID or GPI-10 with a quantity limit of #1 per 24 weeks.**
   If no, continue to #4.

3. Is the request for a male patient who has a diagnosis of central precocious puberty (CPP) and meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a pediatric endocrinologist
   - The patient has elevated levels of follicle-stimulating hormone (FSH) (level >5.0 mIU/mL) and luteinizing hormone (LH) (level > 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 9 years of age at the onset of CPP
   - There is documentation of pubertal staging using the Tanner scale for genital development (stage 2 or above) AND pubic hair growth (stage 2 or above)

   If yes, **approve for 12 months by GPID or GPI-10 with a quantity limit of #1 per 24 weeks.**
   If no, do not approve.

TRIPTORELIN-TRIPTODUR (NSA)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TRIPTORELIN-TRIPTODUR** requires the following rule(s) be met for approval:

A. You have ONE of the following diagnoses:
   1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
   2. Central precocious puberty (CPP: early sexual development in girls and boys)

B. If you are female and have central precocious puberty, approval also requires:
   1. You are 2 years of age or older
   2. Therapy is prescribed by or in consultation with a pediatric endocrinologist (a type of hormone doctor)
   3. You have high levels of follicle-stimulating hormone (FSH) (level greater than 4.0 mIU/mL) and luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   4. You are/were younger than 8 years of age when your condition started
   5. There is documentation of pubertal staging using the Tanner scale (scale of physical measurements of development based on external sex characteristics) for breast development (stage 2 or above) AND pubic hair growth (stage 2 or above)

C. If you are male and have central precocious puberty, approval also requires:
   1. You are 2 years of age or older
   2. Therapy is prescribed by or in consultation with a pediatric endocrinologist (a type of hormone doctor)
   3. You have high levels of follicle-stimulating hormone (FSH) (level greater than 5.0 mIU/mL) and luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   4. You are/were younger than 9 years of age when your condition started

TRIPTORELIN-TRIPTODUR (NSA)

GUIDELINES FOR USE (CONTINUED)

RENEWAL CRITERIA

NOTE: For the diagnosis of gender dysphoria, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of central precocious puberty (CPP) and meet **ALL** of the following criteria?
   - The Tanner scale staging at initial diagnosis of CPP has stabilized or regressed during three separate medical visits in the previous year
   - The patient has not reached the actual age which corresponds to their current pubertal age

   If yes, **approve for 12 months by GPID or GPI-10 with a quantity limit of #1 per 24 weeks.**
   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **TRIPTORELIN-TRIPTODUR** requires the following rule(s) be met for renewal:
   A. You have central precocious puberty (CPP: early sexual development in girls and boys)
   B. Your Tanner scale staging (scale of physical measurements of development based on external sex characteristics) at initial diagnosis of CPP has stabilized or regressed (lowered) during three separate medical visits in the previous year
   C. You have not reached the actual age which corresponds to your current pubertal age

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

TUCATINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
TUCATINIB	TUKYSA	46459		GPI-10 (2117008000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of advanced unresectable or metastatic breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient's breast cancer is human epidermal growth factor receptor 2 (HER2)-positive
   - The patient has received at least one anti-HER2-based regimens (i.e., trastuzumab or trastuzumab with pertuzumab) in the metastatic setting
   - Tukysa will be used in combination with trastuzumab and capecitabine

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **50mg: #10 per day.**
   - **150mg: #4 per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of unresectable or metastatic colorectal cancer (ICD-10 C19) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's colorectal cancer is RAS wild-type, human epidermal growth factor receptor 2 (HER2)-positive
   - The patient's cancer has progressed following treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy
   - Tukysa will be used in combination with trastuzumab

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **50mg: #10 per day.**
   - **150mg: #4 per day.**

   If no, do not approve.

TUCATINIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **TUCATINIB (Tukysa)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Advanced unresectable or metastatic breast cancer (cancer that cannot be removed with surgery or has spread to other parts of the body)
   2. Unresectable or metastatic colorectal cancer (a type of digestive cancer that cannot be removed with surgery or has spread to other parts of the body)

B. If you have advanced unresectable or metastatic breast cancer, approval also requires:
   1. Your breast cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive
   2. You have received at least one anti-HER2-based treatment (trastuzumab or trastuzumab with pertuzumab) for metastatic (has spread to other parts of the body) disease
   3. Tukysa will be used in combination with trastuzumab and capecitabine

C. If you have unresectable or metastatic colorectal cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your colorectal cancer is RAS wild-type (a type of gene), human epidermal growth factor receptor 2 (HER2: a type of protein)-positive
   3. Your cancer has progressed (worsened) following treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy (medications used to treat cancer)
   4. Tukysa will be used in combination with trastuzumab

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Tukysa.

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
UBLITUXIMAB-XIIY	BRIUMVI	48560		GPI-10 (6240508505)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to the preferred agent: Kesimpta (ofatumumab)

   If yes, **approve for a total of 12 months by HICL or GPI-10 as follows:**
   INITIAL REQUESTS:
   - **FIRST APPROVAL: Approve for 1 month with a quantity limit of #24 mL (four 150 mg/6 mL vials) per 28 days.**
   - **SECOND APPROVAL: Approve for 11 months with a quantity limit of #18 mL (three 150 mg/6 mL vials) per 24 weeks. (Please enter a start date of 5 months AFTER the START date of the first approval.)**

   SUBSEQUENT REQUESTS:
   - **Approve for 12 months with a quantity limit of #18 mL (three 150 mg/6 mL vials) per 24 weeks.**

   If no, do not approve.

   DENIAL TEXT: **Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **UBLITUXIMAB-XIIY (Briumvi)** requires the following rules be met for approval:
   A. You have a relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (occurs once), relapsing-remitting disease (symptoms or disease returns and goes away) or active secondary progressive disease (advanced disease)
   B. You are 18 years of age or older
   C. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Kesimpta (ofatumumab)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

UBROGEPANT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
UBROGEPANT	UBRELVY	46273		GPI-10 (6770108000)	

GUIDELINES FOR USE

1. Is the request for the acute treatment of migraines (ICD-10 Group G43 except G43.7 and G43.E) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Ubrelvy will NOT be used concurrently with other cGRP inhibitors (e.g., Zavzpret [zavegepant]) for the acute treatment of migraines
   - The patient had a trial of or contraindication to the clinical standard of care agent: ONE triptan (e.g., Imitrex [sumatriptan], Maxalt [rizatriptan])

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **UBROGEPANT (Ubrelvy)** requires the following rule(s) be met for approval:
   A. The request is for the acute (quick onset) treatment of migraines (a type of headache)
   B. You are 18 years of age or older
   C. You will NOT use Ubrelvy concurrently (at the same time) with other calcitonin gene-related peptide (cGRP) inhibitors (such as Zavzpret [zavegepant]) for the acute (quick onset) treatment of migraines (a type of headache)
   D. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: ONE triptan (such as Imitrex [sumatriptan], Maxalt [rizatriptan])

RATIONALE

PRIOR AUTHORIZATION GUIDELINES

UPADACITINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
UPADACITINIB	RINVOQ	45955		GPI-10 (6660307200)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   - The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
   - The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., Enbrel [etanercept])

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths as follows:**
   - **15mg: #1 per day.**
   - **1mg/mL: #12mL per day.**

   If no, continue to #3.

UPADACITINIB

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist, allergist, or immunologist
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Opzelura (ruxolitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

   If yes, continue to #4.
   If no, continue to #6.

4. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic (e.g., Adbry [tralokinumab-ldrm], Dupixent [dupilumab]) and is switching to Rinvoq
   - The patient has atopic dermatitis involving at least 10 percent of body surface area (BSA)
   - The patient has atopic dermatitis affecting the face, head, neck, hands, feet, groin, or intertriginous areas

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See initial denial text at the end of the guideline.

5. Has the patient had a trial of or contraindication to **ONE** of the following clinical standard of care therapies?
   - Topical corticosteroid (e.g., hydrocortisone, clobetasol propionate, halobetasol propionate)
   - Topical calcineurin inhibitor (e.g., Elidel [pimecrolimus], Protopic [tacrolimus])
   - Topical PDE-4 inhibitor (e.g., Eucrisa [crisaborole], Adquey [difamilast], Zoryve [roflumilast])
   - Topical AhR agonist (e.g., Vtama [tapinarof])
   - Topical JAK inhibitor (e.g., Opzelura [ruxolitinib])
   - Phototherapy

   IF YES, APPROVE FOR 6 MONTHS BY HICL OR GPI-10 WITH A QUANTITY LIMIT OF #1 PER DAY.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

UPADACITINIB

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of UC
   - The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., adalimumab-ryvk/adalimumab-aaty), OR has received at least one approved systemic therapy (e.g., Skyrizi [risankizumab-rzaa]) if TNF blockers are clinically inadvisable

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #7.

7. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CD
   - The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., adalimumab-ryvk/adalimumab-aaty), OR has received at least one approved systemic therapy (e.g., Skyrizi [risankizumab-rzaa]) if TNF blockers are clinically inadvisable

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #8.

UPADACITINIB

INITIAL CRITERIA (CONTINUED)

8. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)
   - The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #9.

9. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of nr-axSpA
   - The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., Cimzia [certolizumab])
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)

   If yes, continue to #10.
   If no, continue to #11.

10. Does the patient meet **ONE** of the following criteria?
    - The patient was previously stable on another biologic and is switching to Rinvoq
    - The patient has C-reactive protein (CRP) levels above the upper limit of normal
    - The patient has sacroiliitis on magnetic resonance imaging (MRI)

    If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day.**
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

UPADACITINIB

INITIAL CRITERIA (CONTINUED)

11. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
    - The patient is 2 years of age or older
    - Therapy is prescribed by or in consultation with a rheumatologist
    - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of pJIA
    - The patient had an inadequate response or intolerance to at least ONE tumor necrosis factor (TNF) blocker (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

    If yes, **approve for 6 months by GPID or GPI-14 for all strengths as follows:**
    - **15mg: #1 per day.**
    - **1mg/mL: #12mL per day.**

    If no, continue to #12.

12. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has completed, started, or will soon start a tapering course of glucocorticoids (e.g., prednisone)
    - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Actemra [tocilizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GCA

    If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day.**
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

UPADACITINIB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **UPADACITINIB (Rinvoq)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe atopic dermatitis (AD: a type of skin condition)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
   5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   6. Ankylosing spondylitis (AS: a type of joint condition)
   7. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
   8. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition)
   9. Giant cell arteritis (GCA: a type of inflammatory condition)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   4. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   5. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

UPADACITINIB

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
4. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as Enbrel [etanercept])

D. If you have moderate to severe atopic dermatitis, approval also requires:
1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
3. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Opzelura (ruxolitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis (a type of skin condition)
4. You meet ONE of the following:
   a. You were previously stable on another biologic (such as Adbry [tralokinumab-ldrm], Dupixent [dupilumab]) and are switching to Rinvoq
   b. You have atopic dermatitis (a type of skin condition) involving at least 10 percent of body surface area (BSA)
   c. You have atopic dermatitis (a type of skin condition) affecting the face, head, neck, hands, feet, groin, or intertriginous areas (between skin folds)
5. You have tried or have a contraindication to (harmful for you to use) ONE of the following clinical standard of care therapies: topical corticosteroid (such as hydrocortisone, clobetasol propionate, halobetasol propionate), topical calcineurin inhibitor (such as Elidel [pimecrolimus], Protopic [tacrolimus]), topical phosphodiesterase-4 (PDE-4) inhibitor (such as Eucrisa [crisaborole], Adquey [difamilast], Zoryve [roflumilast]), topical aryl hydrocarbon receptor (AhR) agonist (such as Vtama [tapinarof]), topical Janus kinase (JAK) inhibitor (such as Opzelura [ruxolitinib]), phototherapy (light therapy)

UPADACITINIB

INITIAL CRITERIA (CONTINUED)

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
4. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as adalimumab-ryvk/adalimumab-aaty), OR you have received at least one approved systemic therapy (treatment that targets the entire body such as Skyrizi [risankizumab-rzaa]) if TNF blockers are clinically inadvisable (not recommended)

F. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
4. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as adalimumab-ryvk/adalimumab-aaty), OR you have received at least one approved systemic therapy (treatment that targets the entire body such as Skyrizi [risankizumab-rzaa]) if TNF blockers are clinically inadvisable (not recommended)

G. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (nonsteroidal anti-inflammatory drug such as ibuprofen, naproxen, meloxicam)
5. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

(Initial denial text continued on next page)

UPADACITINIB

INITIAL CRITERIA (CONTINUED)

H. If you have non-radiographic axial spondyloarthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis (a type of joint condition)
4. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as Cimzia [certolizumab])
5. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)
6. You meet ONE of the following:
   a. You were previously stable on another biologic and are switching to Rinvoq
   b. You have C-reactive protein (CRP: a measure of how much inflammation is in the body) levels above the upper limit of normal
   c. You have sacroiliitis (a type of inflammation where lower spine and pelvis connect) on magnetic resonance imaging (MRI: a type of imaging lab)

I. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
4. You had an inadequate response (medication did not work) or intolerance (side effect) to at least ONE tumor necrosis factor (TNF) blocker (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept])

J. If you have giant cell arteritis, approval also requires:
1. You are 18 years of age or older
2. You have completed, started, or will soon start a tapering course (slowly lowering the dose to stop use) of glucocorticoids (such as prednisone)
3. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Actemra [tocilizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)

UPADACITINIB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths as follows:**
   - **15mg: #1 per day.**
   - **1mg/mL: #12mL per day.**

   If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient has shown improvement while on therapy
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Opzelura (ruxolitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #4.

UPADACITINIB

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #6.

6. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) score while on therapy
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #7.

UPADACITINIB

RENEWAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) score while on therapy
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Taltz [ixekizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of nr-axSpA

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #8.

8. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Xeljanz (tofacitinib)], PDE-4 inhibitor) for the treatment of pJIA

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths as follows:**
   - **15mg: #1 per day.**
   - **1mg/mL: #12mL per day.**

   If no, continue to #9.

9. Does the patient have a diagnosis of giant cell arteritis (GCA) (ICD-10 M31.6, M31.5) **AND** meet the following criterion?
   - Rinvoq will NOT be used concurrently with another systemic biologic (e.g., Actemra [tocilizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of GCA

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

UPADACITINIB

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: Our guideline named **UPADACITINIB (Rinvoq)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe atopic dermatitis (AD: a type of skin condition)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
   5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   6. Ankylosing spondylitis (AS: a type of joint condition)
   7. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)
   8. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition)
   9. Giant cell arteritis (GCA: a type of inflammatory condition)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
   1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)

C. If you have psoriatic arthritis, renewal also requires:
   1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

D. If you have moderate to severe atopic dermatitis, renewal also requires:
   1. You have shown improvement while on therapy
   2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Opzelura (ruxolitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis (a type of skin condition)

(Renewal denial text continued on next page)

UPADACITINIB

RENEWAL CRITERIA (CONTINUED)

E. If you have moderate to severe ulcerative colitis, renewal also requires:
1. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

F. If you have moderate to severe Crohn's disease, renewal also requires:
1. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)

G. If you have ankylosing spondylitis, renewal also requires:
1. You have experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI: a type of disease evaluation tool) score while on therapy
2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)

H. If you have non-radiographic axial spondyloarthritis, renewal also requires:
1. You have experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI: a type of disease evaluation tool) score while on therapy
2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Taltz [ixekizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis (a type of joint condition)

I. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:
1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Xeljanz (tofacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)

J. If you have giant cell arteritis, renewal also requires:
1. You will NOT use Rinvoq concurrently (at the same time) with another systemic biologic (such as Actemra [tocilizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of giant cell arteritis (a type of inflammatory condition)

URIDINE TRIACETATE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
URIDINE TRIACETATE	XURIDEN		39481	GPI-10 (3090387520)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary orotic aciduria (HOA) (ICD-10 E79.89) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a prescriber specializing in inherited metabolic diseases

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at end of the guideline.

2. Is the patient's HOA diagnosis confirmed by **ALL** of the following criteria?
   - The patient has a genetic mutation in the uridine monophosphate synthase (UMPS) gene
   - The patient has an elevated urine orotic acid level according to an age-specific reference range

   If yes, **approve for 6 months by GPID or GPI-10 with a quantity limit of #4 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **URIDINE TRIACETATE (Xuriden)** requires the following rule(s) be met for approval:
   A. You have hereditary orotic aciduria (HOA a type of rare genetic disorder)
   B. Therapy is prescribed by or in consultation with a doctor specializing in inherited metabolic diseases (genetic diseases that result in metabolism problems)
   C. Your HOA diagnosis is confirmed by ALL of the following:
      1. You have a genetic mutation (abnormal change in gene) in the uridine monophosphate synthase (UMPS) gene
      2. You have elevated urine orotic acid levels (high levels of a type of substance in the rune) according to your age-specific reference range

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

URIDINE TRIACETATE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary orotic aciduria (HOA) (ICD-10 E79.89) **AND** meet the following criterion?
   - The patient has had improvement from baseline or stabilization of age dependent hematologic parameters (e.g., neutrophil count, neutrophil percent, white blood cell count, mean corpuscular volume) while on treatment with Xuriden

   If yes, **approve for 12 months by GPID or GPI-10 with a quantity limit of #4 per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **URIDINE TRIACETATE (Xuriden)** requires the following rule(s) to be met for renewal:
   A. You have hereditary orotic aciduria (HOA: a type of rare genetic disorder)
   B. You have had improvement from baseline (before treatment) or stabilization of age dependent hematologic parameters (blood lab tests such as neutrophil count, neutrophil percent, white blood cell count, mean corpuscular volume) while on treatment with Xuriden

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

USTEKINUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
USTEKINUMAB	STELARA	36187		GPI-10 (9025058500, 5250407000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a dermatologist
   - The patient has psoriasis covering 3 percent or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, genital area, or scalp
   - Stelara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #6.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
   - The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

USTEKINUMAB

INITIAL CRITERIA (CONTINUED)

3. Is the patient 6 to 11 years of age and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Tremfya (guselkumab), Skyrizi (risankizumab-rzaa), Enbrel (etanercept), Otezla (apremilast), Taltz (ixekizumab)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**
     - **(NOTE: Enter a proactive PA for 6 months by HICL or GPI-10 as stated above for ALL of the following: Yesintek, ustekinumab-aekn, and Steqeyma)**

     If no, continue to #4.

4. Is the patient 12 to 17 years of age and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Tremfya (guselkumab), Skyrizi (risankizumab-rzaa), Enbrel (etanercept), Otezla (apremilast), Taltz (ixekizumab), Icotyde (icotrokinra)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**
     - **(NOTE: Enter a proactive PA for 6 months by HICL or GPI-10 as stated above for ALL of the following: Yesintek, ustekinumab-aekn, and Steqeyma)**

     If no, continue to #5.

USTEKINUMAB

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Stelara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, continue to #7.
If no, continue to #9.

7. Is the patient 6 to 17 years of age and meet **ALL** of the following criteria?
- The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Otezla (apremilast)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**
- **(NOTE: Enter a proactive PA for 6 months by HICL or GPI-10 as stated above for ALL of the following: Yesintek, ustekinumab-aekn, and Steqeyma)**

If no, continue to #8.

        - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.)**

    If no, continue to #12.

12. Is the patient 18 years of age or older and meet **ALL** of the following criteria?
    - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
    - The patient had a trial of or contraindication to TWO of the following preferred agents:
        - Skyrizi (risankizumab-rzaa)
        - Tremfya (guselkumab)
        - Omvoh (mirikizumab-mrkz)
        - Adalimumab-ryvk/adalimumab-aaty
        - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

    [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

    If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
    - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.**
    - **(NOTE: Enter a proactive PA for Yesintek, ustekinumab-aekn, and Steqeyma for 6 months by HICL or GPI-10 with a quantity limit of #1 per 56 days.**
        - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.)**

    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

USTEKINUMAB

INITIAL CRITERIA (CONTINUED)

13. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
    - Therapy is prescribed by or in consultation with a gastroenterologist
    - Stelara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

    If yes, continue to #14.
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

14. Is the patient 2 to 4 years of age **AND** meets the following criterion?
    - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
      [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

    If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
    - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.**
    - **(NOTE: Enter a proactive PA for Yesintek, ustekinumab-aekn, and Steqeyma for 6 months by HICL or GPI-10 with a quantity limit of #1 per 56 days.**
      - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.)**

    If no, continue to #15.

USTEKINUMAB

INITIAL CRITERIA (CONTINUED)

15. Is the patient 5 to 17 years of age and meets **ALL** of the following criteria?
    - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
    - The patient had a trial of or contraindication to the following preferred agent: adalimumab-ryvk/adalimumab-aaty
      [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

      If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
      - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.**
      - **(NOTE: Enter a proactive PA for Yesintek, ustekinumab-aekn, and Steqeyma for 6 months by HICL or GPI-10 with a quantity limit of #1 per 56 days.**
        - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.)**

      If no, continue to #16.

16. Is the patient 18 years of age or older and meets **ALL** of the following criteria?
    - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
    - The patient had a trial of or contraindication to TWO of the following preferred agents:
      - Skyrizi (risankizumab-rzaa)
      - Tremfya (guselkumab)
      - Omvoh (mirikizumab-mrkz)
      - Adalimumab-ryvk/adalimumab-aaty
      - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
      - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
        [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

      If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
      - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.**
      - **(NOTE: Enter a proactive PA for Yesintek, ustekinumab-aekn, and Steqeyma for 6 months by HICL or GPI-10 with a quantity limit of #1 per 56 days.**
        - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.)**

      If no, do not approve.
      DENIAL TEXT: See the initial denial text at the end of the guideline.

USTEKINUMAB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **USTEKINUMAB (Stelara)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe plaque psoriasis, approval also requires:
   1. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
   2. You have psoriasis (a type of skin condition) covering 3 percent or more of body surface area (BSA) OR you have psoriatic lesions (rashes) affecting the hands, feet, face, genital area, or scalp
   3. You will NOT use Stelara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
   4. You meet ONE of the following:
      a. You have had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
      b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of medication that decreases the body's immune response) and PUVA (phototherapy) for the treatment of plaque psoriasis (a type of skin condition)
      c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

(Initial denial text continued on next page)

USTEKINUMAB

INITIAL CRITERIA (CONTINUED)

5. You meet ONE of the following:
   a. You are 6 to 11 years of age and meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Tremfya (guselkumab), Skyrizi (risankizumab- rzaa), Enbrel (etanercept), Otezla (apremilast), Taltz (ixekizumab)
   b. You are 12 to 17 years of age and meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Tremfya (guselkumab), Skyrizi (risankizumab- rzaa), Enbrel (etanercept), Otezla (apremilast), Taltz (ixekizumab), Icotyde (icotrokinra)
   c. You are 18 years of age or older and meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you use) TWO of the following preferred medications:
         1. Tremfya (guselkumab)
         2. Skyrizi (risankizumab-rzaa)
         3. Enbrel (etanercept)
         4. Otezla (apremilast)
         5. Taltz (ixekizumab)
         6. Sotyktu (deucravacitinib)
         7. Bimzelx (bimekizumab-bkzx)
         8. Adalimumab-ryvk/adalimumab-aaty
         9. Icotyde (icotrokinra)

C. If you have psoriatic arthritis, approval also requires:

1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
2. You will NOT use Stelara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

USTEKINUMAB

INITIAL CRITERIA (CONTINUED)

3. You meet ONE of the following:
   a. You are 6 to 17 years of age and meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab- aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         1. Enbrel (etanercept)
         2. Otezla (apremilast)
         3. Tremfya (guselkumab)
         4. Skyrizi (risankizumab-rzaa)
         5. Xeljanz IR (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
         6. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
   b. You are 18 years of age or older and meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab- aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         1. Enbrel (etanercept)
         2. Otezla (apremilast)
         3. Tremfya (guselkumab)
         4. Skyrizi (risankizumab-rzaa)
         5. Taltz (ixekizumab)
         6. Bimzelx (bimekizumab-bkzx)
         7. Sotyktu (deucravacitinib)
         8. Adalimumab-ryvk/adalimumab-aaty
         9. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
         10. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

USTEKINUMAB

INITIAL CRITERIA (CONTINUED)

D. If you have moderate to severe Crohn's disease, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
2. You will NOT use Stelara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
3. You meet ONE of the following:
   a. You are 2 to 5 years of age AND meet the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   b. You are 6 to 17 years of age AND meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) the following preferred medication: adalimumab-ryvk/adalimumab-aaty
   c. You are 18 years of age or older and meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         1. Skyrizi (risankizumab-rzaa)
         2. Tremfya (guselkumab)
         3. Omvoh (mirikizumab-mrkz)
         4. Adalimumab-ryvk/adalimumab-aaty
         5. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab- aaty])

(Initial denial text continued on next page)

USTEKINUMAB

INITIAL CRITERIA (CONTINUED)

E. If you have moderate to severe ulcerative colitis, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
2. You will NOT use Stelara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
3. You meet ONE of the following:
   a. You are 2 to 4 years of age AND meet the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab- aekn, Steqeyma (ustekinumab-stba)
   b. You are 5 to 17 years of age AND meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab- aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) the following preferred medication: adalimumab-ryvk/adalimumab-aaty
   c. You are 18 years of age or older and meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab- aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         1. Skyrizi (risankizumab-rzaa)
         2. Tremfya (guselkumab)
         3. Omvoh (mirikizumab-mrkz)
         4. Adalimumab-ryvk/adalimumab-aaty
         5. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
         6. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

USTEKINUMAB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more
   - Stelara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #5.

2. Is the patient 6 to 11 years of age and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Tremfya (guselkumab), Skyrizi (risankizumab-rzaa), Enbrel (etanercept), Otezla (apremilast), Taltz (ixekizumab)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, continue to #3.

3. Is the patient 12 to 17 years of age and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Tremfya (guselkumab), Skyrizi (risankizumab-rzaa), Enbrel (etanercept), Otezla (apremilast), Taltz (ixekizumab), Icotyde (icotrokinra)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, continue to #4.

USTEKINUMAB

RENEWAL CRITERIA (CONTINUED)

4. Is the patient 18 years of age or older and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - o Tremfya (guselkumab)
     - o Skyrizi (risankizumab-rzaa)
     - o Enbrel (etanercept)
     - o Otezla (apremilast)
     - o Taltz (ixekizumab)
     - o Sotyktu (deucravacitinib)
     - o Bimzelx (bimekizumab-bkzx)
     - 0 Adalimumab-ryvk/adalimumab-aaty
     - 0 Icotyde (icotrokinra)

     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
     If no, do not approve.
     DENIAL TEXT: See the renewal denial text at the end of the guideline.

5. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Stelara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

     If yes, continue to #6.
     If no, continue to #8.

USTEKINUMAB

RENEWAL CRITERIA (CONTINUED)

6. Is the patient 6 to 17 years of age and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Otezla (apremilast)
     - Tremfya (guselkumab)
     - Skyrizi (risankizumab-rzaa)
     - Xeljanz IR (tofacitinib IR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, continue to #7.

7. Is the patient 18 years of age or older and meet **ALL** of the following criteria?
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Otezla (apremilast)
     - Tremfya (guselkumab)
     - Skyrizi (risankizumab-rzaa)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Sotyktu (deucravacitinib)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

USTEKINUMAB

RENEWAL CRITERIA (CONTINUED)

8. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Stelara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #9.
   If no, continue to #12.

9. Is the patient 2 to 5 years of age **AND** meet the following criterion?
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days**.
   If no, continue to #10.

10. Is the patient 6 to 17 years of age and meet **ALL** of the following criteria?
    - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
    - The patient had a trial of or contraindication to the following preferred agent: adalimumab-ryvk/adalimumab-aaty
      [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

    If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days**.
    If no, continue to #11.

USTEKINUMAB

RENEWAL CRITERIA (CONTINUED)

11. Is the patient 18 years of age or older and meet **ALL** of the following criteria?
    - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
    - The patient had a trial of or contraindication to TWO of the following preferred agents:
      - Skyrizi (risankizumab-rzaa)
      - Tremfya (guselkumab)
      - Omvoh (mirikizumab-mrkz)
      - Adalimumab-ryvk/adalimumab-aaty
      - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

    [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

    If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
    If no, do not approve.
    DENIAL TEXT: See the renewal denial text at the end of the guideline.

12. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
    - Stelara will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

    If yes, continue to #13.
    If no, do not approve.
    DENIAL TEXT: See the renewal denial text at the end of the guideline.

13. Is the patient 2 to 4 years of age **AND** meets the following criterion?
    - The patient had a trial of or contraindication to ONE of the following preferred agents: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)

    [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

    If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
    If no, continue to #14.

USTEKINUMAB

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: Our guideline named **USTEKINUMAB (Stelara)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe plaque psoriasis, renewal also requires:
   1. You have achieved or maintained clear or minimal disease OR a decrease in Psoriasis Area and Severity Index (PASI: used to measure the severity and extent of psoriasis) of at least 50 percent or more
   2. You will NOT use Stelara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
   3. You meet ONE of the following:
      a. You are 6 to 11 years of age and meet ALL of the following:
         i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
         ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Tremfya (guselkumab), Skyrizi (risankizumab- rzaa), Enbrel (etanercept), Otezla (apremilast), Taltz (ixekizumab)
      b. You are 12 to 17 years of age and meet ALL of the following:
         i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
         ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Tremfya (guselkumab), Skyrizi (risankizumab- rzaa), Enbrel (etanercept), Otezla (apremilast), Taltz (ixekizumab), Icotyde (icotrokinra)

(Renewal denial text continued on next page)

USTEKINUMAB

RENEWAL CRITERIA (CONTINUED)

c. You are 18 years of age or older and meet ALL of the following:
   i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   ii. You have tried or have a contraindication to (harmful for you use) TWO of the following preferred medications:
      1. Tremfya (guselkumab)
      2. Skyrizi (risankizumab-rzaa)
      3. Enbrel (etanercept)
      4. Otezla (apremilast)
      5. Taltz (ixekizumab)
      6. Sotyktu (deucravacitinib)
      7. Bimzelx (bimekizumab-bkzx)
      8. Adalimumab-ryvk/adalimumab-aaty
      9. Icotyde (icotrokinra)

C. If you have psoriatic arthritis, renewal also requires:

1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Stelara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
3. You meet ONE of the following:
   a. You are 6 to 17 years of age and meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         1. Enbrel (etanercept)
         2. Otezla (apremilast)
         3. Tremfya (guselkumab)
         4. Skyrizi (risankizumab-rzaa)
         5. Xeljanz IR (tofacitinib immediate-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
         6. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])

RENEWAL CRITERIA (CONTINUED)

b. You are 18 years of age or older and meet ALL of the following:
   i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      1. Enbrel (etanercept)
      2. Otezla (apremilast)
      3. Tremfya (guselkumab)
      4. Skyrizi (risankizumab-rzaa)
      5. Taltz (ixekizumab)
      6. Bimzelx (bimekizumab-bkzx)
      7. Sotyktu (deucravacitinib)
      8. Adalimumab-ryvk/adalimumab-aaty
      9. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      10. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab- aaty, Enbrel])

USTEKINUMAB

RENEWAL CRITERIA (CONTINUED)

D. If you have moderate to severe Crohn's disease, renewal also requires:

1. You will NOT use Stelara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
2. You meet ONE of the following:
   a. You are 2 to 5 years of age AND meet the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   b. You are 6 to 17 years of age AND meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) the following preferred medication: adalimumab-ryvk/adalimumab-aaty
   c. You are 18 years of age or older and meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         1. Skyrizi (risankizumab-rzaa)
         2. Tremfya (guselkumab)
         3. Omvoh (mirikizumab-mrkz)
         4. Adalimumab-ryvk/adalimumab-aaty
         5. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab- aaty])

USTEKINUMAB

RENEWAL CRITERIA (CONTINUED)

E. If you have moderate to severe ulcerative colitis, renewal also requires:

1. You will NOT use Stelara concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
2. You meet ONE of the following:
   a. You are 2 to 4 years of age AND meet the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
   b. You are 5 to 17 years of age AND meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab-aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) the following preferred medication: adalimumab-ryvk/adalimumab-aaty
   c. You are 18 years of age or older and meet ALL of the following:
      i. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Yesintek (ustekinumab-kfce), ustekinumab- aekn, Steqeyma (ustekinumab-stba)
      ii. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         1. Skyrizi (risankizumab-rzaa)
         2. Tremfya (guselkumab)
         3. Omvoh (mirikizumab-mrkz)
         4. Adalimumab-ryvk/adalimumab-aaty
         5. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
         6. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
   - The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

USTEKINUMAB-AEKN

INITIAL CRITERIA (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic and is switching to the requested medication
   - The patient has psoriasis covering 3 percent or more of body surface area (BSA)
   - The patient has psoriatic lesions affecting the hands, feet, face, genital area, or scalp

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**
   - **(NOTE: Enter a proactive PA for 6 months by HICL or GPI-10 as stated above for ALL of the following: Yesintek and Steqeyma)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**
   - **(NOTE: Enter a proactive PA for 6 months by HICL or GPI-10 as stated above for ALL of the following: Yesintek and Steqeyma)**

   If no, continue to #5.

USTEKINUMAB-AEKN

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.**
   - **(NOTE: Enter a proactive PA for Yesintek and Steqeyma for 6 months by HICL or GPI- 10 with a quantity limit of #1 per 56 days.**
     - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.)**

   If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.**
   - **(NOTE: Enter a proactive PA for Yesintek and Steqeyma for 6 months by HICL or GPI- 10 with a quantity limit of #1 per 56 days.**
     - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

USTEKINUMAB-AEKN

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **USTEKINUMAB-AEKN (Selarsdi)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe plaque psoriasis, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
   3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
   4. You meet ONE of the following:
      a. You have had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
      b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy) for the treatment of plaque psoriasis (a type of skin condition)
      c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication
   5. You meet ONE of the following:
      a. You were previously stable on another biologic and are switching to the requested medication
      b. You have psoriasis covering 3 percent or more of body surface area (BSA)
      c. You have psoriatic lesions (rashes) affecting your hands, feet, face, genital area, or scalp

(Initial denial text continued on next page)

USTEKINUMAB-AEKN

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

D. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

USTEKINUMAB-AEKN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   If no, continue to #4.

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

USTEKINUMAB-AEKN

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **USTEKINUMAB-AEKN (Selarsdi)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe plaque psoriasis, renewal also requires:
   1. You have achieved or maintained clear or minimal disease OR a decrease in Psoriasis Area and Severity Index (PASI: used to measure the severity and extent of psoriasis) of at least 50 percent or more
   2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)

C. If you have psoriatic arthritis, renewal also requires:
   1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

D. If you have moderate to severe Crohn's disease, renewal also requires:
   1. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)

E. If you have moderate to severe ulcerative colitis, renewal also requires:
   1. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
   - The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

USTEKINUMAB-KFCE

INITIAL CRITERIA (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic and is switching to Yesintek
   - The patient has psoriasis covering 3 percent or more of body surface area (BSA)
   - The patient has psoriatic lesions affecting the hands, feet, face, genital area, or scalp

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**
   - **(NOTE: Enter a proactive PA for 6 months by HICL or GPI-10 as stated above for ALL of the following: Ustekinumab-aekn and Steqeyma)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**
   - **(NOTE: Enter a proactive PA for 6 months by HICL or GPI-10 as stated above for ALL of the following: Ustekinumab-aekn and Steqeyma)**

   If no, continue to #5.

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.**
   - **(NOTE: Enter a proactive PA for ustekinumab-aekn and Steqeyma for 6 months by HICL or GPI-10 with a quantity limit of #1 per 56 days.**
     - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.)**

   If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.**
   - **(NOTE: Enter a proactive PA for ustekinumab-aekn and Steqeyma for 6 months by HICL or GPI-10 with a quantity limit of #1 per 56 days.**
     - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

USTEKINUMAB-KFCE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **USTEKINUMAB-KFCE (Yesintek)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe plaque psoriasis, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
   3. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
   4. You meet ONE of the following:
      a. You have had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
      b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy) for the treatment of plaque psoriasis (a type of skin condition)
      c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication
   5. You meet ONE of the following:
      a. You were previously stable on another biologic and are switching to Yesintek
      b. You have psoriasis covering 3 percent or more of body surface area (BSA)
      c. You have psoriatic lesions (rashes) affecting your hands, feet, face, genital area, or scalp

USTEKINUMAB-KFCE

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

D. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

USTEKINUMAB-KFCE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more
   - Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   If no, continue to #4.

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Yesintek will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

USTEKINUMAB-KFCE

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **USTEKINUMAB-KFCE (Yesintek)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe plaque psoriasis, renewal also requires:
   1. You have achieved or maintained clear or minimal disease OR a decrease in Psoriasis Area and Severity Index (PASI: used to measure the severity and extent of psoriasis) of at least 50 percent or more
   2. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)

C. If you have psoriatic arthritis, renewal also requires:
   1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   2. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

D. If you have moderate to severe Crohn's disease, renewal also requires:
   1. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)

E. If you have moderate to severe ulcerative colitis, renewal also requires:
   1. You will NOT use Yesintek concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - Steqeyma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
   - The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INITIAL CRITERIA (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic and is switching to Steqeyma
   - The patient has psoriasis covering 3 percent or more of body surface area (BSA)
   - The patient has psoriatic lesions affecting the hands, feet, face, genital area, or scalp

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**
   - **(NOTE: Enter a proactive PA for 6 months by HICL or GPI-10 as stated above for ALL of the following: Yesintek and ustekinumab-aekn)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - Steqeyma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #1mL per 28 days.)**
   - **(NOTE: Enter a proactive PA for 6 months by HICL or GPI-10 as stated above for ALL of the following: Yesintek and ustekinumab-aekn)**

   If no, continue to #5.

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Steqeyma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.**
   - **(NOTE: Enter a proactive PA for Yesintek and ustekinumab-aekn for 6 months by HICL or GPI-10 with a quantity limit of #1 per 56 days.**
     - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.)**

   If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Steqeyma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.**
   - **(NOTE: Enter a proactive PA for Yesintek and ustekinumab-aekn for 6 months by HICL or GPI-10 with a quantity limit of #1 per 56 days.**
     - **Enter a one fill approval for 130mg/26mL for 1 month by GPID or GPI-14 with a quantity limit of #104mL per 56 days.)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

USTEKINUMAB-STBA

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **USTEKINUMAB-STBA (Steqeyma)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe plaque psoriasis, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
   3. You will NOT use Steqeyma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
   4. You meet ONE of the following:
      a. You have had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
      b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of medication that decreases the body's immune response) and PUVA (phototherapy) for the treatment of plaque psoriasis (a type of skin condition)
      c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication
   5. You meet ONE of the following:
      a. You were previously stable on another biologic and are switching to Steqeyma
      b. You have psoriasis covering 3 percent or more of body surface area (BSA)
      c. You have psoriatic lesions (rashes) affecting your hands, feet, face, genital area, or scalp

(Initial denial text continued on next page)

USTEKINUMAB-STBA

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Steqeyma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis a type of skin and joint condition)

D. If you have moderate to severe Crohn's disease, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Steqeyma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)

E. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Steqeyma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

USTEKINUMAB-STBA

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more
   - Steqeyma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Steqeyma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 84 days.**
   If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Steqeyma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   If no, continue to #4.

4. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Steqeyma will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1mL per 56 days.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

USTEKINUMAB-STBA

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **USTEKINUMAB-STBA (Steqeyma)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe plaque psoriasis, renewal also requires:
   1. You have achieved or maintained clear or minimal disease OR a decrease in Psoriasis Area and Severity Index (PASI: used to measure the severity and extent of psoriasis) of at least 50 percent or more
   2. You will NOT use Steqeyma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)

C. If you have psoriatic arthritis, renewal also requires:
   1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   2. You will NOT use Steqeyma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

D. If you have moderate to severe Crohn's disease, renewal also requires:
   1. You will NOT use Steqeyma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)

E. If you have moderate to severe ulcerative colitis, renewal also requires:
   1. You will NOT use Steqeyma concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

VADADUSTAT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VADADUSTAT	VAFSEO	49335		GPI-10 (8240258000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of anemia due to chronic kidney disease (CKD) (ICD-10 D63.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has been receiving dialysis for at least 3 months
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient has an eGFR of less than 60 mL/min/1.73m(2) corresponding to stage 3, 4, or 5 chronic kidney disease (CKD)
   - The patient has a hemoglobin level of less than 12 g/dL while treated with an erythropoiesis-stimulating agent (ESA) (e.g., Epogen [epoetin alfa], Procrit [epoetin alfa]), and will discontinue ESA therapy prior to starting Vafseo
   - Vafseo will NOT be used concurrently with other hypoxia-inducible factor-prolyl hydroxylase inhibitors (HIF-PHIs) (e.g., Jesduvroq [daprodustat]) OR erythropoiesis-stimulating agents (ESAs) (e.g., Epogen [epoetin alfa], Procrit [epoetin alfa], Retacrit [epoetin alfa-epbx], Aranesp [darbepoetin alfa], Mircera [methoxy polyethylene glycol-epoetin beta])

   If yes, **approve all strengths for 6 months by GPID or GPI-14 with a quantity limit as follows:**
   - **150mg: #4 per day.**
   - **300mg: #2 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

VADADUSTAT

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **VADADUSTAT (Vafseo)** requires the following rule(s) be met for approval:

A. You have anemia (a type of blood condition) due to chronic (long-term) kidney disease (CKD)
B. You are 18 years of age or older
C. You have been receiving dialysis (process of removing excess water, toxins from the blood) for at least 3 months
D. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
E. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of less than 60 mL/min/1.73m(2), confirming stage 3, 4, or 5 chronic (long-term) kidney disease (CKD)
F. You have a hemoglobin level (a type of blood test) of less than 12 g/dL while treated with an erythropoiesis-stimulating agent (ESA) (such as Epogen [epoetin alfa], Procrit [epoetin alfa]), and you will discontinue ESA therapy before starting Vafseo
G. You will NOT use Vafseo concurrently (at the same time) with other hypoxia-inducible factor-prolyl hydroxylase inhibitors (HIF-PHIs) (such as Jesduvroq [daprodustat]) OR erythropoiesis-stimulating agents (ESAs) (such as Epogen [epoetin alfa], Procrit [epoetin alfa], Retacrit [epoetin alfa-epbx], Aranesp [darbepoetin alfa], Mircera [methoxy polyethylene glycol-epoetin beta])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

VAMOROLONE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VAMOROLONE	AGAMREE	49283		GPI-10 (2210007500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Duchenne muscular dystrophy (DMD) (ICD-10 G71.01) and meet **ALL** of the following criteria?
   - The patient is 2 years of age and older
   - Therapy is prescribed by or in consultation with a neurologist specializing in the treatment of Duchenne muscular dystrophy (DMD) at a DMD treatment center
   - The patient's diagnosis of DMD is confirmed by genetic testing

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Has the patient tried prednisone or prednisolone for at least 6 months?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Did the patient experience lack of efficacy with prednisone or prednisolone and meet **ALL** of the following criteria?
   - The patient is not in Stage 1 of the disease (the pre-symptomatic phase)
   - Steroid myopathy has been ruled out
   - The patient has experienced deterioration in ambulation, functional status, or pulmonary function while on prednisone or prednisolone that is consistent with advancing disease (stage 2 or higher) and assessed using standard measures over time (e.g., 6-minute walking distance [6MWD], ascending or descending 4 stairs, rise from floor time, 10-meter run/walk time, North Star Ambulatory Assessment [NSAA])

   If yes, **approve for 6 months by HICL with a quantity limit of #7.69mL per day.**
   If no, continue to #4.

4. Did the patient experience a significant adverse effect (e.g., weight gain) on prednisone or prednisolone that is negatively impacting a comorbid condition (e.g., diabetes)?

   If yes, **approve for 6 months by HICL with a quantity limit of #7.69mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

VAMOROLONE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **VAMOROLONE (Agamree)** requires the following rules be met for approval:

A. You have Duchenne muscular dystrophy (DMD: a type of muscle disorder)
B. You are 2 years of age and older
C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nerve system doctor) specializing in the treatment of Duchenne muscular dystrophy (DMD) at a DMD treatment center
D. Your diagnosis of DMD is confirmed by genetic testing
E. You have tried prednisone or prednisolone for at least 6 months
F. You meet ONE of the following:
    1. Prednisone or prednisolone did not work for you, and you meet ALL of the following:
        a. You are not in Stage 1 of the disease (the pre-symptomatic phase)
        b. There is no steroid myopathy (muscle disease due to steroid use)
        c. You have experienced a decrease in ambulation (walking), functional status, or pulmonary (lung) function, while treated with prednisone or prednisolone, that is consistent with advancing disease (stage 2 or higher) and that is assessed by standard measures over time (such as, the 6-minute walking distance [6MWD], going up or down 4 stairs, time to rise from the floor, 10-meter run/walk time, North Star Ambulatory Assessment [NSAA: a tool for evaluating Duchenne muscular dystrophy])
    2. You have experienced a significant adverse effect (side effects such as weight gain) on prednisone or prednisolone that is negatively impacting a co-existing comorbid condition (such as diabetes [a disorder with high blood sugar])

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VAMOROLONE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Duchenne muscular dystrophy (DMD) (ICD-10 G71.01)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient currently ambulatory **AND** meets the following criterion?
   - The patient has shown improvement while on Agamree, as assessed by a standard set of ambulatory or functional status measures (e.g., 6-minute walking distance [6MWD], ascending or descending 4 stairs, rise from floor time [Gower's maneuver], 10-meter (30 feet) run/walk time, North Star Ambulatory Assessment [NSAA])

   If yes, **approve for 12 months by HICL with a quantity limit of #7.69mL per day.**
   If no, continue to #3.

3. Is the patient currently non-ambulatory **AND** meets the following criterion?
   - The patient has maintained or demonstrated a less than expected decline in pulmonary function or upper limb strength while on Agamree, as assessed by standard measures (e.g., pulmonary function [FVC, PFTs], upper limb strength)

   If yes, **approve for 12 months by HICL with a quantity limit of #7.69mL per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VAMOROLONE (Agamree)** requires the following rules be met for renewal:
   A. You have Duchenne muscular dystrophy (DMD: a type of muscle disorder)
   B. If you are currently ambulatory (can walk), approval also requires:
      1. You have shown improvement while on Agamree as measured by a standard set of ambulatory or functional status measures (such as, the 6-minute walking distance [6MWD], going up or down 4 stairs, time to rise from the floor [Gower's maneuver], 10-meter (30 feet) run/walk time, North Star Ambulatory Assessment [NSAA: a tool for evaluating Duchenne muscular dystrophy])
   C. If you are currently non-ambulatory (cannot walk), approval also requires:
      1. You have maintained or had a less than expected decrease in pulmonary (lung) function or upper limb strength while on Agamree as assessed by standard measures (such as pulmonary function [forced vital capacity, pulmonary function tests], upper limb strength)

VANDETANIB	CAPRELSA	37531		GPI-10 (2153308500)	

GUIDELINES FOR USE

1. Is the patient currently stable on the requested medication?

   If yes, **approve for 12 months by GPID or GPI-14 as follows:**
   - **100mg: #2 per day.**
   - **300mg: #1 per day.**

   If no, continue to #2.

2. Does the patient have diagnosis of symptomatic or progressive medullary thyroid cancer (ICD-10 C73) AND meet the following criterion?
   - The patient's cancer is unresectable locally advanced or metastatic disease

   If yes, **approve for 12 months by GPID or GPI-14 as follows:**
   - **100mg: #2 per day.**
   - **300mg: #1 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline for **VANDETANIB (Caprelsa)** requires **ONE** of the following rule(s) be met for approval:
   A. You are currently stable on the requested medication
   B. You have symptomatic or progressive medullary thyroid cancer with unresectable locally advanced or metastatic disease (advanced thyroid cancer that cannot be removed with surgery and has spread to nearby tissue, lymph nodes, or other parts of the body)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VANZACAFTOR/ TEZACAF/ DEUTIVACAF	ALYFTREK	50120		GPI-10 (4530990385)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or cystic fibrosis expert
   - Alyftrek will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
   - The patient has at least ONE variant in the cystic fibrosis transmembrane conductance regulator (CFTR) gene that is either responsive to Alyftrek based on clinical or in vitro data or that results in the production of CFTR protein

   If yes, **approve all strengths for 6 months by GPID or GPI-14 with the following quantity limits:**
   - **4-20-50mg: #3 per day.**
   - **10-50-125mg: #2 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

VEDOLIZUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VEDOLIZUMAB	ENTYVIO	41146		GPI-10 (5250308000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Entyvio will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for a total of 6 months by GPID or GPI-14. Please enter two authorizations as follows:**
   - **FIRST APPROVAL: Approve the 300 mg vial for 1 month with a quantity limit of #2.**
   - **SECOND APPROVAL: Approve the requested strength for 5 months as follows (enter a start date of ONE WEEK after the last date of the first approval):**
     - **300 mg vial: #1 per 56 days.**
     - **108 mg/0.68 mL pen: #1.36 mL per 28 days.**

   If no, continue to #2.

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Entyvio will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for a total of 6 months by GPID or GPI-14. Please enter two authorizations as follows:**
   - **FIRST APPROVAL: Approve the 300 mg vial for 1 month with a quantity limit of #2.**
   - **SECOND APPROVAL: Approve the requested strength for 5 months as follows (enter a start date of ONE WEEK after the last date of the first approval):**
     - **300 mg vial: #1 per 56 days.**
     - **108 mg/0.68 mL pen: #1.36 mL per 28 days.**

   If no, do not approve.

VEDOLIZUMAB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **VEDOLIZUMAB (Entyvio)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   2. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe Crohn's disease, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
   3. You will NOT use Entyvio concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
   4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      b. Skyrizi (risankizumab-rzaa)
      c. Tremfya (guselkumab)
      d. Omvoh (mirikizumab-mrkz)
      e. Adalimumab-ryvk/adalimumab-aaty
      f. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

(Initial denial text continued on next page)

VEDOLIZUMAB

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

Our guideline named **VEDOLIZUMAB (Entyvio)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   2. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe Crohn's disease, renewal also requires:
   1. You will NOT use Entyvio concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
   2. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      b. Skyrizi (risankizumab-rzaa)
      c. Tremfya (guselkumab)
      d. Omvoh (mirikizumab-mrkz)
      e. Adalimumab-ryvk/adalimumab-aaty
      f. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

(Renewal denial text continued on next page)

VEDOLIZUMAB

RENEWAL CRITERIA (CONTINUED)

C. If you have moderate to severe ulcerative colitis, renewal also requires:

1. You will NOT use Entyvio concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
2. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. Skyrizi (risankizumab-rzaa)
   c. Tremfya (guselkumab)
   d. Omvoh (mirikizumab-mrkz)
   e. Adalimumab-ryvk/adalimumab-aaty
   f. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
   g. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Entyvio.

PRIOR AUTHORIZATION GUIDELINES

VELAGLUCERASE ALFA

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VELAGLUCERASE ALFA	VPRIV	36874		GPI-10 (8270008510)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of type 1 (non-neuronopathic) Gaucher disease (ICD-10 E75.22) and meet the following criteria?
   - The patient is 4 years of age or older
   - The patient had a trial of or contraindication to Elelyso

   If yes, **approve for up to 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VELAGLUCERASE ALFA (Vpriv)** requires the following rule(s) be met for approval:
   A. You have type 1 Gaucher disease (genetic disorder where a type of fatty substance builds up in the body)
   B. You are 4 years of age or older
   C. You had a trial of or contraindication to (harmful for you to use) Elelyso

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Vpriv.

VEMURAFENIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VEMURAFENIB	ZELBORAF	37837		GPI-10 (2153208000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient has a BRAF V600E mutation as detected by an FDA-approved test
   - Zelboraf will be used alone or in combination with Cotellic (cobimetinib)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #8 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of Erdheim-Chester Disease (E88.89) **AND** meet the following criterion?
   - The patient has a BRAF V600 mutation

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #8 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VEMURAFENIB (Zelboraf)** requires the following rules be met for approval:
   A. You have ONE of the following:
      1. Unresectable or metastatic melanoma (a type of skin cancer that cannot be completely removed with surgery or has spread to other parts of the body)
      2. Erdheim-Chester Disease (a type of multisystem mutation)

   B. If you have unresectable or metastatic melanoma, approval also requires:
      1. You have a BRAF V600E mutation (a type of abnormal change in a gene) as detected by a Food and Drug Administration (FDA)-approved test
      2. Zelboraf will be used alone or in combination with Cotellic (cobimetinib)

   C. If you have Erdheim-Chester Disease, approval also requires:
      1. You have a BRAF V600 mutation (a type of abnormal change in a gene)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VENETOCLAX

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VENETOCLAX	VENCLEXTA	43284		GPI-10 (2147008000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) OR small lymphocytic lymphoma (SLL) (ICD-10 Group C83.0) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months for all strengths by GPID or GPI-14 with the following quantity limits:**
   - **Starting Pack: #42 (1 pack) per 28 days.**
   - **10mg: #2 per day.**
   - **50mg: #1 per day.**
   - **100mg: #4 per day.**

   If no, continue to #2.

2. Does the patient have acute myeloid leukemia (AML) (ICD-10 Group C92.0) **AND** meet the following criterion?
   - The patient is newly diagnosed (e.g., starting or previously started Venclexta treatment at the time of diagnosis)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient is 75 years of age or older
   - The patient is 18 years of age or older with comorbidities that preclude the use of intensive induction chemotherapy

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

VENETOCLAX

GUIDELINES FOR USE (CONTINUED)

4. Will Venclexta be used in combination with azacitidine, decitabine, or Inqovi (decitabine/cedazuridine)?

   If yes, **approve for 12 months for all strengths by GPID or GPI-14 with the following quantity limits:**
   - **10mg: #2 per day.**
   - **50mg: #1 per day.**
   - **100mg: #4 per day.**

   If no, continue to #5.

5. Will Venclexta be used in combination with low-dose cytarabine?

   If yes, **approve for 12 months for all strengths by GPID or GPI-14 with the following quantity limits:**
   - **10mg: #2 per day.**
   - **50mg: #1 per day.**
   - **100mg: #6 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VENETOCLAX (Venclexta)** requires that the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
      2. Small lymphocytic lymphoma (SLL: a type of blood cancer)
      3. Acute myeloid leukemia (AML: a type of blood and bone marrow cancer)

   B. If you have chronic lymphocytic leukemia or small lymphocytic lymphoma, approval also requires:
      1. You are 18 years of age or older

   C. If you have acute myeloid leukemia, approval also requires:
      1. You are newly diagnosed (such as you are starting or previously started Venclexta treatment at the time your condition was identified)
      2. Venclexta will be used in combination with azacitidine, decitabine, Inqovi (decitabine/cedazuridine), or low-dose cytarabine
      3. You meet ONE of the following:
         a. You are 75 years of age or older
         b. You are 18 years of age or older with comorbidities (additional diseases) that prevent the use of intensive induction chemotherapy (a type of therapy to treat cancer)

PRIOR AUTHORIZATION GUIDELINES

VEPDEGESTRANT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VEPDEGESTRANT	VEPPANU	51300		GPI-10 (2140378000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of advanced or metastatic breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient's cancer is estrogen receptor (ER)-positive, human epidermal growth factor receptor 2 (HER2)-negative with estrogen receptor-1 (ESR1) gene mutation(s), as detected by an FDA- authorized test
   - The patient has had disease progression following at least ONE line of endocrine therapy (e.g., anastrozole, letrozole)
   - Therapy is prescribed by or in consultation with an oncology specialist
   - Veppanu will NOT be used concurrently with another selective estrogen receptor degrader (SERD) (e.g., Orserdu [elacestrant], Faslodex [fulvestrant], Inluriyo [imlunestrant])

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT:

   Our guideline named **VEPDEGESTRANT (Veppanu)** requires the following rule(s) be met for approval:
   A. You have advanced or metastatic breast cancer (a type of cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
   B. Your cancer is estrogen receptor (ER: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative with estrogen receptor-1 (ESR1) gene mutation(s) (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-authorized test
   C. You have had disease progression (worsening) following at least ONE line of endocrine therapy (a type of hormone therapy such as anastrozole, letrozole)
   D. Therapy is prescribed by or in consultation with an oncology specialist (a type of cancer doctor)
   E. You will NOT use Veppanu concurrently (at the same time) with a selective estrogen receptor degrader (SERD: a type of hormone therapy such as Orserdu [elacestrant], Faslodex [fulvestrant], Inluriyo [imlunestrant])

VEPDEGESTRANT

RENEWAL CRITERIA

1. Does the patient have a diagnosis of advanced or metastatic breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient's cancer is estrogen receptor (ER)-positive, human epidermal growth factor receptor 2 (HER2)-negative with estrogen receptor-1 (ESR1) gene mutation(s), as detected by an FDA- authorized test
   - The patient has demonstrated clinical benefit while on therapy as shown by a partial or complete response OR stable disease
   - Veppanu will NOT be used concurrently with another selective estrogen receptor degrader (SERD) (e.g., Orserdu [elacestrant], Faslodex [fulvestrant], Inluriyo [imlunestrant])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT:

   Our guideline named **VEPDEGESTRANT (Veppanu)** requires the following rule(s) be met for renewal:
   A. You have advanced or metastatic breast cancer (a type of cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
   B. Your cancer is estrogen receptor (ER: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative with estrogen receptor-1 (ESR1) gene mutation(s) (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-authorized test
   C. You have experienced clinical benefit while on therapy as shown by a partial (cancer has shrunk but did not go away) or complete response (cancer went away completely) OR stable disease (disease has stopped growing or spreading)
   D. You will NOT use Veppanu concurrently (at the same time) with a selective estrogen receptor degrader (SERD: a type of hormone therapy such as Orserdu [elacestrant], Faslodex [fulvestrant], Inluriyo [imlunestrant])

VERICIGUAT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VERICIGUAT	VERQUVO	47075		GPI-10 (4090008500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of chronic heart failure (HF) (ICD-10 Group I50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has an ejection fraction of less than 45 percent
   - Therapy is prescribed by or in consultation with a cardiologist
   - Verquvo will NOT be used concurrently with Adempas (riociguat) or PDE-5 inhibitors (e.g. vardenafil, tadalafil)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient have a history of and will continue on, or has a contraindication to **ONE** agent from EACH of the following Guideline-Directed Medical Therapy (GDMT) medication classes?
   - ACE inhibitor (e.g., enalapril, lisinopril), ARB (e.g., valsartan, candesartan), or angiotensin receptor-neprilysin inhibitor (ARNI) (e.g., Entresto [sacubitril/valsartan])
   - Beta-blocker (e.g., bisoprolol, carvedilol, metoprolol succinate)
   - Aldosterone antagonist (spironolactone or eplerenone)
   - SGLT2 inhibitor indicated for heart failure (e.g., Farxiga [dapagliflozin], Jardiance [empagliflozin], Inpefa [sotagliflozin])

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the patient high-risk with worsening heart failure, as evidenced by a hospitalization for heart failure or requirement for intravenous (IV) diuretics?

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

VERICIGUAT

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **VERICIGUAT (Verquvo)** requires the following rule(s) be met for approval:

A. You have chronic heart failure (HF: a type of heart condition)
B. You are 18 years of age or older
C. You have an ejection fraction (heart function) of less than 45 percent
D. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor)
E. You will NOT use Verquvo concurrently (at the same time) with Adempas (riociguat) or phosphodiesterase-5 (PDE-5) inhibitors (such as vardenafil, tadalafil)
F. You have tried and will continue use, or you have a contraindication to (harmful for you to use) ONE medication from EACH of the following Guideline-Directed Medical Therapy (GDMT: a type of medical treatment) medication classes:
    1. Angiotensin converting enzyme (ACE) inhibitor (such as enalapril, lisinopril), angiotensin II receptor blocker (ARB) (such as valsartan, candesartan), or angiotensin receptor- neprilysin inhibitor (ARNI) (such as Entresto [sacubitril/valsartan])
    2. Beta-blocker (such as bisoprolol, carvedilol, metoprolol succinate)
    3. Aldosterone antagonist (spironolactone or eplerenone)
    4. Sodium-glucose transporter-2 (SGLT2) inhibitor indicated for heart failure (a type of heart condition) (such as Farxiga [dapagliflozin], Jardiance [empagliflozin], Inpefa [sotagliflozin])
G. You are high-risk with worsening heart failure (a type of heart condition), as shown by hospitalization for heart failure or the need for intravenous (IV: injection into the veins) diuretics (type of medication)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VESTRONIDASE ALFA-VJBK (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VESTRONIDASE ALFA-VJBK	MEPSEVII	44653		GPI-10 (3090768020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Mucopolysaccharidosis VII (MPS VII, Sly syndrome) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or given in consultation with a physician specializing in genetic or metabolic disorders
   - The patient has a documented urinary GAG (glycosaminoglycan) level of greater than three times the upper level of normal based on the laboratory assay
   - MPS VII diagnosis confirmed by documentation of beta-glucuronidase enzyme activity deficiency or genetic testing
   - The patient has at least one of the following clinical signs of MPS VII: enlarged liver and spleen, joint limitations, airway obstructions or pulmonary dysfunction
   - The patient has NOT undergone successful bone marrow or stem cell treatment for MPS VII
   - The patient has limitation in mobility, but remains sufficiently ambulatory for the six-minute walk test (6MWT) to be measured and evaluated

   If yes, **approve for 6 months by HICL or GPI-10.**
   APPROVAL TEXT: Renewal requires the patient has improved, maintained, or demonstrated less than expected decline in ambulatory ability based on 6MWT compared to baseline.

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VESTRONIDASE ALFA-VJBK (Mepsevii)** requires the following rule(s) be met for approval:
   A. You have Mucopolysaccharidosis VII (MPS VII, Sly syndrome: genetic metabolism disorder that does not allow the body to break down a certain chemical)
   B. The requested medication is prescribed by or given in consultation with a physician specializing in genetic or metabolic disorders
   C. You have a documented urinary GAG (glycosaminoglycan: type of chemical that builds up when your body cannot break it down) level of greater than three times the upper level of normal based on the laboratory test
   D. Your diagnosis of Mucopolysaccharidosis VII is confirmed by documentation of beta-glucuronidase enzyme activity deficiency (you don't have a protein that breaks down a chemical) or genetic testing

   (Initial denial text continued on next page.)

VESTRONIDASE ALFA-VJBK (NSA)

INITIAL CRITERIA (CONTINUED)

E. You have at least ONE of the following clinical signs of Mucopolysaccharidosis VII:
   1. Enlarged liver and spleen
   2. Joint limitations
   3. Airway obstructions or pulmonary (lung/breathing) dysfunction

F. You have not undergone successful bone marrow or stem cell treatment for Mucopolysaccharidosis VII

G. You have limitation in mobility, but you still have ambulatory (walking) capacity for the six-minute walk test (6MWT) to be measured and evaluated

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Mucopolysaccharidosis VII (MPS VII, Sly syndrome) **AND** meet the following criterion?

- Patient has improved, maintained, or demonstrated less than expected decline in ambulatory ability based on 6MWT compared to baseline

If yes, **approve for 12 months by HICL or GPI-10.**
If no, do not approve.
RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **VESTRONIDASE ALFA-VJBK (Mepsevii)** requires the following rule(s) be met for renewal:

A. You have Mucopolysaccharidosis VII (MPS VII, Sly syndrome: genetic metabolism disorder that does not allow the body to break down a certain chemical)

B. You have improved, maintained, or demonstrated less than expected decline in ambulatory (walking) ability based on a six-minute walk test compared to baseline

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

VIGABATRIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VIGABATRIN	SABRIL, VIGABATRIN, VIGADRONE, VIGPODER		64315 64314	GPI-14 (72170085000320, 72170085003020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of refractory complex partial seizures (CPS) (ICD-10 Group G40.2) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The requested medication will be used as adjunctive therapy
   - The potential benefits outweigh the potential risk of vision loss
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient had a trial of or contraindication to THREE antiepileptic medications, at least two of which must be generic (e.g., carbamazepine, divalproex, valproic acid, oxcarbazepine, levetiracetam IR/ER, gabapentin, zonisamide, topiramate, lamotrigine)

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #6 per day for all formulations: tablet and powder packet.**

   If no, continue to #2.

2. Does the patient have a diagnosis of infantile spasms (ICD-10 Group G40.82) and meet **ALL** of the following criteria?
   - The patient is 1 month to 2 years of age
   - The requested medication will be used as monotherapy
   - The potential benefits outweigh the potential risk of vision loss
   - Therapy is prescribed by or in consultation with a neurologist

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #6 per day for the powder packet.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

VIGABATRIN

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **VIGABATRIN (Sabril, Vigadrone, Vigpoder)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Refractory complex partial seizures (a type of seizure)
   2. Infantile spasms (a type of seizure disorder in infancy and childhood)

B. If you have refractory complex partial seizures, approval also requires:
   1. You are 2 years of age or older
   2. The requested medication will be used as adjunctive (add-on) therapy
   3. The potential benefits outweigh the potential risk of vision loss
   4. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
   5. You have tried or have a contraindication to (harmful for you to use) THREE antiepileptic medications, at least two of which must be generic (medications used to treat seizures such as carbamazepine, divalproex, valproic acid, oxcarbazepine, levetiracetam immediate-release or extended-release, gabapentin, zonisamide, topiramate, lamotrigine)

C. If you have infantile spasms, approval also requires:
   1. You are 1 month to 2 years of age
   2. The requested medication will be used as monotherapy (one drug treatment)
   3. The potential benefits outweigh the potential risk of vision loss
   4. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VILTOLARSEN (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VILTOLARSEN	VILTEPSO	46773		GPI-10 (7460008000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Duchenne muscular dystrophy (DMD) and meets **ALL** of the following criteria?
   - The patient has documentation of genetic testing that confirms mutation in the DMD gene is amenable to exon 53 skipping
   - Therapy is prescribed by or given in consultation with a neurologist specializing in treatment of DMD at a DMD treatment center
   - The patient is ambulatory
   - The patient is currently receiving treatment with or has a contraindication to corticosteroids (e.g., prednisone or prednisolone)

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 fill per 7 days. APPROVAL TEXT:** Renewal requires the patient has maintained or demonstrated less than expected decline in ONE of the following: 1) ambulatory ability based on muscle function assessments (e.g., 6-minute walk test), or 2) other muscle function (i.e. pulmonary or cardiac function).

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VILTOLARSEN (Viltepso)** requires the following rule(s) be met for approval:
   A. You have Duchenne muscular dystrophy (DMD: inherited disorder where your muscles get weaker over time)
   B. You have documented genetic testing that confirms you have a mutation (change in DNA that make up your gene) in the DMD gene that is responsive to exon 53 skipping (a process that allows a protein to still function with sections of faulty genetic code)
   C. Therapy is prescribed by or given in consultation with a neurologist (brain, spinal cord, nervous system doctor) specializing in treatment of Duchenne muscular dystrophy at a DMD treatment center
   D. You are ambulatory (able to move and walk)
   E. You are currently receiving treatment with corticosteroids (such as prednisone or prednisolone) unless there is a medical reason why you cannot (contraindication)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

VONOPRAZAN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VONOPRAZAN/AMOXICILLIN	VOQUEZNA DUAL PAK	47981		GPI-10 (4999320220)	
VONOPRAZAN/AMOXICILLIN /CLARITH	VOQUEZNA TRIPLE PAK	47983		GPI-10 (4999320320)	
VONOPRAZAN FUMARATE	VOQUEZNA	48007		GPI-10 (4927508710)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of *Helicobacter pylori (H. pylori)* infection (ICD-10 B96.81) **AND** meet the following criterion?
- The patient is 18 years of age or older

If yes, continue to #2.
If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
- The request is for Voquezna 20mg and will be used in combination with amoxicillin
- The request is for Voquezna 20mg and will be used in combination with amoxicillin and clarithromycin
- The request is for Voquezna Dual Pak
- The request is for Voquezna Triple Pak

If yes, **approve for 30 days by HICL or GPI-10 for the requested agent as follows:**
- **20mg: #28 per 14 days for #1 fill (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**
- **Dual Pak: #1 fill.**
- **Triple Pak: #1 fill.**

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

VONOPRAZAN

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of erosive esophagitis (ICD-10 Group K20) and meet **ALL** of the following criteria?
   - The request is for Voquezna
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to the clinical standard of care agent: ONE proton pump inhibitor (e.g., omeprazole, lansoprazole, pantoprazole) at the maximum dose for 8 weeks

   If yes, **approve for 8 weeks by HICL or GPI-10.**
   If no, continue to #4.

4. Does the patient have a diagnosis of non-erosive gastroesophageal reflux disease (ICD-10 Group K21 except for K21.01) and meet **ALL** of the following criteria?
   - The request is for Voquezna 10mg
   - The patient is 18 years of age or older
   - The patient does not have a previous treatment failure with Voquezna in the last 12 months
   - The patient had a trial of or contraindication to the clinical standard of care agent: ONE proton pump inhibitor (e.g., omeprazole, lansoprazole, pantoprazole) at the maximum dose for 8 weeks

   If yes, **approve for 4 weeks by GPID or GPI-14.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VONOPRAZAN (Voquezna Dual Pak, Voquezna Triple Pak, Voquezna)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. *Helicobacter pylori (H. pylori*: a type of bacteria*)* infection
      2. Erosive esophagitis (a type of digestive disorder)
      3. Non-erosive gastroesophageal reflux disease (a type of digestive disorder)

(Initial denial text continued on the next page)

VONOPRAZAN

INITIAL CRITERIA (CONTINUED)

B. If you have a *Helicobacter pylori* infection, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your request is for Voquezna 20mg in combination with amoxicillin
   b. Your request is for Voquezna 20mg in combination with amoxicillin and clarithromycin
   c. Your request is for Voquezna Dual Pak
   d. Your request is for Voquezna Triple Pak

C. If you have erosive esophagitis, approval also requires:
1. Your request is for Voquezna
2. You are 18 years of age or older
3. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: ONE proton pump inhibitor (such as omeprazole, lansoprazole, pantoprazole) at a maximum dose for 8 weeks

D. If you have non-erosive gastroesophageal reflux disease, approval also requires:
1. Your request is for Voquezna 10mg
2. You are 18 years of age or older
3. You do not have a previous treatment failure (medication did not work) with Voquezna in the last 12 months
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: ONE proton pump inhibitor (such as omeprazole, lansoprazole, pantoprazole) at the maximum dose for 8 weeks

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VONOPRAZAN

RENEWAL CRITERIA

NOTE: For the diagnosis of *Helicobacter pylori* (*H. pylori*) infection or non-erosive gastroesophageal reflux disease, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of erosive esophagitis (ICD-10 Group K20) **AND** the request is for Voquezna?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the request for a continuation of treatment (the patient recently received an initial prior authorization approval for 8 weeks)?

   If yes, continue to #3.
   If no, refer to the Initial Criteria.

3. Has the patient maintained a clinical response while on Voquezna?

   If yes, **approve for 24 weeks by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VONOPRAZAN (Voquezna)** requires the following rule(s) be met for renewal:
   A. You have erosive esophagitis (a type of digestive disorder)
   B. Your request is for Voquezna
   C. You have maintained a clinical response on Voquezna (the treatment is working)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

VORASIDENIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VORASIDENIB CITRATE	VORANIGO	49796		GPI-10 (2153518000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of Grade 2 astrocytoma or oligodendroglioma (ICD-10 C71.9) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient's cancer has a susceptible isocitrate dehydrogenase-1 (IDH1) or isocitrate dehydrogenase-2 (IDH2) mutation
   - Voranigo will be used following surgery, including biopsy, sub-total resection, or gross total resection

   If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **40mg: #1 per day.**
   - **10mg: #2 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VORASIDENIB (Voranigo)** requires the following rule(s) be met for approval:
   A. You have Grade 2 astrocytoma or oligodendroglioma (types of brain cancer)
   B. You are 12 years of age or older
   C. Your cancer has a susceptible isocitrate dehydrogenase-1 (IDH1) or isocitrate dehydrogenase-2 (IDH2) mutation (abnormal changes in types of genes that increase the risk of certain diseases)
   D. Voranigo will be used following surgery, including biopsy (removal of cells or tissue from the body for examination), sub-total resection (partial removal of tumor), or gross total resection (complete removal of tumor)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

VOSORITIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VOSORITIDE	VOXZOGO	47677		GPI-10 (3095008000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of achondroplasia (ICD-10 Q77.4) and meet **ALL** of the following criteria?
   - The patient has open epiphyses
   - Therapy is prescribed by or in consultation with an endocrinologist, orthopedist, or medical geneticist
   - Voxzogo will NOT be used concurrently with another C-type natriuretic peptide (CNP) (e.g., Yuviwel [navepegritide]) for the treatment of achondroplasia

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 vial per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VOSORITIDE (Voxzogo)** requires the following rule(s) be met for approval:
   A. You have achondroplasia (a type of bone condition)
   B. You have open epiphyses (the end part of a long bone)
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), orthopedist (a type of doctor who specializes in bones, joints, muscles, ligaments, tendons and nerves), or medical geneticist (doctor who treats gene disorders)
   D. You will NOT use Voxzogo concurrently (at the same time) with another C-type natriuretic peptide (CNP) (such as Yuviwel [navepegritide]) for the treatment of achondroplasia (a type of bone condition)

PRIOR AUTHORIZATION GUIDELINES

VUTRISIRAN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
VUTRISIRAN SODIUM	AMVUTTRA	48059		GPI-10 (6270609010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN) (ICD-10 E85.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, cardiologist, hATTR specialist, or medical geneticist
   - The patient is ambulatory (i.e., Familial Amyloid Polyneuropathy [FAP] stage 1 - 2 OR Polyneuropathy Disability [PND] stage I - IIIb polyneuropathy)
   - Amvuttra will NOT be used concurrently with other hATTR-PN agents (e.g., Wainua [eplontersen], Tegsedi [inotersen], Onpattro [patisiran])

   If yes, continue to #2.
   If no, continue to #3.

2. Is the patient's diagnosis confirmed by **ONE** of the following?
   - Biopsy of tissue/organ to confirm amyloid presence AND chemical typing to confirm presence of TTR (transthyretin) protein
   - DNA genetic sequencing to confirm hATTR mutation

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #0.5mL per 3 months.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of cardiomyopathy of wild-type transthyretin-mediated amyloidosis (ICD-10 E85.82) or hereditary transthyretin-mediated amyloidosis (ATTR-CM) (ICD-10 E85.4) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist, transthyretin amyloidosis (ATTR) specialist, or medical geneticist
   - The patient has New York Heart Association (NYHA) Class I, II, or III heart failure
   - Amvuttra will NOT be used concurrently with a transthyretin stabilizer (acoramidis [Attruby], tafamidis [Vyndamax], tafamidis meglumine [Vyndaqel]) for the treatment of ATTR-CM

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

VUTRISIRAN

INITIAL CRITERIA (CONTINUED)

4. Is the patient's diagnosis confirmed by **ONE** of the following?
   - Bone scan (scintigraphy) strongly positive for myocardial uptake of TC-99m-PYP
     (Note: Strongly positive defined as Grade 2 or 3 uptake using the Perugini Grade 1-3 scoring system)
   - Biopsy of tissue of affected organ(s) (cardiac and possibly non-cardiac sites) to confirm amyloid presence AND chemical typing to confirm presence of transthyretin (TTR) protein

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.5mL per 3 months.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VUTRISIRAN (Amvuttra)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN: a rare genetic disorder with widespread nerve pain/damage)
      2. Cardiomyopathy of wild-type or hereditary transthyretin-mediated amyloidosis (ATTR-CM: heart disease caused by a build-up of a type of protein)

   B. If you have hereditary transthyretin-mediated amyloidosis with polyneuropathy, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nerve doctor), cardiologist (a type of heart doctor), hATTR (a rare genetic disorder with widespread nerve pain/damage) specialist, or medical geneticist (doctor who treats gene disorders)
      3. You are ambulatory (able to walk) (you have Familial Amyloid Polyneuropathy [FAP: a tool used to evaluate disease severity] stage 1 to 2 OR Polyneuropathy Disability [PND: a tool used to evaluate disease severity] stage I to IIIb polyneuropathy)
      4. You will NOT use Amvuttra concurrently (at the same time) with other hATTR-PN medications (such as Wainua [eplontersen], Tegsedi [inotersen], Onpattro [patisiran])
      5. Your diagnosis is confirmed by ONE of the following:
         a. Biopsy (removal of cells from the body for examination) of tissue/organ to confirm amyloid (a type of abnormal protein) presence AND chemical typing to confirm presence of TTR (transthyretin) protein
         b. DNA (deoxyribonucleic acid) genetic sequencing (a type of lab test) to confirm hATTR mutation (a type of abnormal gene)

VUTRISIRAN

INITIAL CRITERIA (CONTINUED)

C. If you have cardiomyopathy of wild-type or hereditary transthyretin-mediated amyloidosis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor), transthyretin amyloidosis (ATTR) specialist, or medical geneticist (doctor who treats gene disorders)
3. You have New York Heart Association (NYHA) Class I, II, or III heart failure (classification of heart failure symptoms)
4. Your diagnosis is confirmed by ONE of the following:
   a. Bone scan (scintigraphy) strongly positive for myocardial uptake of TC-99m-PYP (a type of imaging test) (Note: Strongly positive defined as Grade 2 or 3 uptake using the Perugini Grade 1-3 scoring system)
   b. Biopsy of tissue of the affected organ(s) (removal of cells or tissue from the body for examination) (can be heart or non-heart related organs) to confirm amyloid (type of protein) presence AND chemical typing to confirm presence of transthyretin (TTR) protein
5. You will NOT use Amvuttra concurrently (at the same time) with a transthyretin stabilizer (acoramidis [Attruby], tafamidis [Vyndamax], tafamidis meglumine [Vyndaqel]) for the treatment of cardiomyopathy of wild-type or hereditary transthyretin-mediated amyloidosis (heart disease caused by a build-up of a type of protein)

VUTRISIRAN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN) (ICD-10 E85.1) and meet **ALL** of the following criteria?
   - The patient has NOT progressed to Familial Amyloid Polyneuropathy (FAP) stage 3 or Polyneuropathy Disability (PND) stage 4 polyneuropathy, as evidenced by functional decline (e.g., wheelchair-bound, bedridden)
   - Amvuttra will NOT be used concurrently with other hATTR-PN agents (e.g., Wainua [eplontersen], Tegsedi [inotersen], Onpattro [patisiran])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.5mL per 3 months.**

   If no, continue to #2.

2. Does the patient have a diagnosis of cardiomyopathy of wild-type transthyretin-mediated amyloidosis (ICD-10 E85.82) or hereditary transthyretin-mediated amyloidosis (ATTR-CM) (ICD-10 E85.4) **AND** meet the following criterion?
   - Amvuttra will NOT be used concurrently with a transthyretin stabilizer (acoramidis [Attruby], tafamidis [Vyndamax], tafamidis meglumine [Vyndaqel]) for the treatment of ATTR-CM

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.5mL per 3 months.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **VUTRISIRAN (Amvuttra)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN: a rare genetic disorder with widespread nerve pain/damage)
      2. Cardiomyopathy of wild-type or hereditary transthyretin-mediated amyloidosis (ATTR-CM: heart disease caused by a build-up of a type of protein)

ZANIDATAMAB-HRII	ZIIHERA	50014		GPI-10 (2117009001)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of previously treated, unresectable or metastatic biliary tract cancer (BTC) (ICD-10 Group C24) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is human epidermal growth factor receptor 2 (HER2)-positive (IHC 3+), as detected by an FDA-authorized test

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of gastric, gastroesophageal junction, or esophageal adenocarcinoma (GEA) (ICD-10 Groups C15, C16) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is unresectable locally advanced or metastatic

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient's cancer is HER2-positive (IHC 3+ or IHC 2+/ISH+), as detected by an FDA-authorized test, AND Ziihera will be used in combination with fluoropyrimidine- (e.g., fluorouracil, capecitabine) and platinum-containing chemotherapy (e.g., cisplatin, oxaliplatin) and Tevimbra (tislelizumab-jsgr)
   - The patient's cancer is HER2-positive (IHC 3+), as detected by an FDA-authorized test, AND Ziihera will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

ZANIDATAMAB-HRII

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ZANIDATAMAB-HRII (Ziihera)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Biliary tract cancer (BTC: a type of bile duct or gallbladder cancer)
   2. Gastric, gastroesophageal junction, or esophageal adenocarcinoma (GEA: a type of digestive system cancer)

B. If you have biliary tract cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer is previously treated, unresectable (unable to remove by surgery) or metastatic (cancer that has spread to other parts of the body)
   3. Your cancer is human epidermal growth factor receptor 2 (HER2)-positive immunohistochemistry 3+ (IHC 3+), as detected by a Food and Drug Administration (FDA)-authorized test

C. If you have gastric, gastroesophageal junction, or esophageal adenocarcinoma, approval also requires:
   1. You are 18 years of age or older
   2. Your cancer is unresectable (cannot be removed by surgery) locally advanced (cancer that has spread from where it started to nearby tissue or lymph nodes) or metastatic (has spread to other parts of the body)
   3. You meet ONE of the following:
      a. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive (IHC 3+ or IHC 2+/ISH+), as detected by a Food and Drug Administration (FDA)-authorized test, AND Ziihera will be used in combination with fluoropyrimidine- (such as fluorouracil, capecitabine) and platinum-containing chemotherapy (such as cisplatin, oxaliplatin) and Tevimbra (tislelizumab-jsgr)
      b. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive (IHC 3+), as detected by a Food and Drug Administration (FDA)-authorized test, AND Ziihera will be used in combination with fluoropyrimidine- (such as fluorouracil, capecitabine) and platinum-containing chemotherapy (such as cisplatin, oxaliplatin)

RATIONALE

ZANUBRUTINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ZANUBRUTINIB	BRUKINSA	46212		GPI-10 (2153219500)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of mantle cell lymphoma (MCL) (ICD-10 Group C83.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received at least ONE prior therapy (e.g., R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine, prednisone])
   - The patient had a trial of or contraindication to the preferred agent: Calquence (acalabrutinib) If yes, **approve for 12 months by GPID or GPI-14 for all the of the following:**
     - **80mg: #4 per day.**
     - **160mg: #2 per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of Waldenstrom's macroglobulinemia (WM) (ICD-10 C88.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to the preferred agent: Imbruvica (ibrutinib)

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **80mg: #4 per day.**
   - **160mg: #2 per day.**

   If no, continue to #3.

3. Does the patient have a diagnosis of relapsed or refractory marginal zone lymphoma (MZL) (ICD-10 Group C83.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received at least ONE anti-CD20-based regimen (e.g., rituximab)

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **80mg: #4 per day.**
   - **160mg: #2 per day.**

   If no, continue to #4.

ZANUBRUTINIB

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) or small lymphocytic lymphoma (SLL) (ICD-10 Group C83.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Calquence (acalabrutinib), Imbruvica (ibrutinib)

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **80mg: #4 per day.**
   - **160mg: #2 per day.**

   If no, continue to #5.

5. Does the patient have a diagnosis of relapsed or refractory follicular lymphoma (FL) (ICD-10 Group C82) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Brukinsa will be used in combination with Gazyva (obinutuzumab)
   - Brukinsa will be used after at least TWO lines of systemic therapy (e.g., lenalidomide with rituximab)

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **80mg: #4 per day.**
   - **160mg: #2 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ZANUBRUTINIB (Brukinsa)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Mantle cell lymphoma (MCL: a type of blood cancer)
      2. Waldenstrom's macroglobulinemia (WM: a type of blood cancer)
      3. Relapsed or refractory marginal zone lymphoma (MZL: a type of blood cancer that has returned or did not respond to treatment)
      4. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
      5. Small lymphocytic lymphoma (SLL: a type of blood cancer)
      6. Relapsed or refractory follicular lymphoma (FL: a type of blood cancer that has returned or did not respond to treatment)

ZANUBRUTINIB

GUIDELINES FOR USE (CONTINUED)

B. If you have mantle cell lymphoma, approval also requires:
1. You are 18 years of age or older
2. You have received at least ONE prior therapy (such as R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine, prednisone])
3. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Calquence (acalabrutinib)

C. If you have Waldenstrom's macroglobulinemia, approval also requires:
1. You are 18 years of age or older
2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Imbruvica (ibrutinib)

D. If you have relapsed or refractory marginal zone lymphoma, approval also requires:
1. You are 18 years of age or older
2. You have received at least ONE anti-CD20-based regimen (a type of blood cancer treatment plan, such as rituximab)

E. If you have chronic lymphocytic leukemia or small lymphocytic lymphoma, approval also requires:
1. You are 18 years of age or older
2. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Calquence (acalabrutinib), Imbruvica (ibrutinib)

F. If you have relapsed or refractory follicular lymphoma, approval also requires:
1. You are 18 years of age or older
2. Brukinsa will be used in combination with Gazyva (obinutuzumab)
3. Brukinsa will be used after at least TWO lines of systemic therapy (such as lenalidomide with rituximab)

ZAVEGEPANT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ZAVEGEPANT HCL	ZAVZPRET	48771		GPI-10 (6770109020)	

GUIDELINES FOR USE

1. Is the request for the acute treatment of migraines (ICD-10 Group G43 except G43.7 and G43.E) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Zavzpret will NOT be used concurrently with other cGRP inhibitors (e.g., Ubrelvy [ubrogepant]) for the acute treatment of migraines
   - The patient had a trial of or contraindication to the clinical standard of care agent: ONE triptan (e.g., Imitrex [sumatriptan], Maxalt [rizatriptan])
   - The patient had a trial of or contraindication to TWO of the following preferred agents: Reyvow (lasmiditan), Nurtec ODT (rimegepant), Ubrelvy (ubrogepant)
   - The patient is unable to tolerate oral medications

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ZAVEGEPANT (Zavzpret)** requires the following rule(s) be met for approval:
   A. The request is for the acute (quick onset) treatment of migraines (a type of headache)
   B. You are 18 years of age or older
   C. You will NOT use Zavzpret concurrently (at the same time) with other calcitonin gene-related peptide (cGRP) inhibitors (such as Ubrelvy [ubrogepant]) for the acute (quick onset) treatment of migraines (a type of headache)
   D. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: ONE triptan (such as Imitrex [sumatriptan], Maxalt [rizatriptan])
   E. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Reyvow (lasmiditan), Nurtec ODT (rimegepant), Ubrelvy (ubrogepant)
   F. You are NOT able to tolerate oral medications

ZERO COPAY OVERRIDE - ASPIRIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ASPIRIN	ASPIRIN, ASPIRIN EC, VARIOUS		161 16713	GPI-14 (64100010000510, 64100010000601)	

GUIDELINES FOR USE

1. Does the plan cover the requested medication at zero cost share (i.e., the plan follows Affordable Care Act [ACA] recommendations and is linked to MedImpact's Essential Health Benefit Tables)?

   If yes, continue to #2.
   If no, guideline does not apply.

2. Is the request for a generic medication?

   If yes, **approve for 12 months by GPID or GPI-14 at zero copay.**
   If no, continue to #3.

3. Is the request for a MSB or SSB medication **AND** the patient meets the following criterion?
   - The prescriber has provided medical justification why the generic equivalent cannot be used

   If yes, **approve for 12 months by GPID or GPI-14 at zero copay.**
   APPROVAL TEXT (applies to multi-source brand agents only): Although your cost share has been reduced to zero-dollar, you may incur a dispense-as-written (DAW) penalty fee if you choose to fill a brand prescription instead of its generic equivalent.

   If no, do not approve.

   DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

   Our guideline named **ZERO COPAY OVERRIDE - ASPIRIN** requires the following rule(s) be met for approval:
   A. You meet ONE of the following:
      1. Your request is for a generic medication
      2. Your request is for a multi-source or single source brand medication (a brand name medication) and your doctor provided a medical reason why you cannot use the generic equivalent of the requested medication

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ZERO COPAY OVERRIDE - ASPIRIN

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Aspirin medications listed.

This guideline applies to plans where the pharmacy benefit allows for coverage of aspirin for preventative use at zero copay. The override criteria allow patients a zero copay by waiving the applicable cost-sharing on FDA-approved aspirin medications that are included in the MedImpact EHB Zero Dollar Copay List.

   - **Tamoxifen 10mg and 20mg: Approve <u>both</u> by GPID or GPI-14.**

   APPROVAL TEXT (applies to multi-source brand agents only): Although your cost share has been reduced to zero-dollar, you may incur a dispense-as-written (DAW) penalty fee if you choose to fill a brand prescription instead of its generic equivalent.

   If no, do not approve.

   DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

   Our guideline named **ZERO COPAY OVERRIDE - BREAST CANCER PREVENTION** requires the following rule(s) be met for approval:
   A. The requested medication is being used for prevention (risk reduction) of breast cancer
   B. You are 35 years of age or older
   C. You are requesting a quantity of #1 per day
   D. You meet ONE of the following:
      1. Your request is for a generic medication
   E. Your request is for a multi-source or single source brand medication (a brand name medication with or without a generic available) and your doctor provided a medical reason why you cannot use the generic equivalent of the requested medication

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ZERO COPAY OVERRIDE - BREAST CANCER PREVENTION

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for breast cancer prevention medications listed.

This guideline applies to plans where the pharmacy benefit allows for coverage of medications for breast cancer prevention at zero copay. The override criteria allow patients a zero copay by waiving the applicable cost-sharing on FDA-approved medications for breast cancer prevention that are included in the MedImpact EHB Zero Dollar Copay List.

ZERO COPAY OVERRIDE - CONTRACEPTIVE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ZERO COPAY OVERRIDE - CONTRACEPTIVE** requires that the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. Your request is for a generic or a single source brand medication (a brand name medication without a generic available)
   2. Your request is for a multi-source brand medication (a brand name medication with a generic available) and your doctor provided a medical reason why you cannot use the generic equivalent of the requested medication

B. If your request is for an oral contraceptive, approval also requires ONE of the following:
   1. Your request is for a quantity of #1 per day
   2. Your request is for a quantity greater than #1 per day AND your doctor has provided medical justification as to why the requested quantity is needed for contraception (such as continuous therapy, skipping placebo pills)

C. If your request is for a condom, approval also requires ONE of the following:
   1. Your request is for a quantity of #60 per prescription fill
   2. Your request is for a quantity greater than #60 per fill AND your doctor has provided medical justification as to why the requested quantity is needed for contraception

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for contraceptive medications listed.

This guideline applies to plans where the pharmacy benefit allows for coverage of contraceptives at zero copay. The override criteria allow patients a zero copay by waiving the applicable cost-sharing on FDA-approved contraceptive methods that are included in the MedImpact EHB Zero Dollar Copay List.

GUIDELINES FOR USE

1. Does the plan cover the requested medication at zero cost share (i.e., the plan follows Affordable Care Act [ACA] recommendations and is linked to MedImpact's Essential Health Benefit Tables)?

   If yes, continue to #2.
   If no, guideline does not apply.

ZERO COPAY OVERRIDE - STATIN

GUIDELINES FOR USE (CONTINUED)

2. Does the patient meet **ALL** of the following criteria?
   - The patient is between 40 to 75 years old
   - The patient is not concurrently taking any of the below secondary prevention medications for cardiovascular disease:
     - Aspirin/dipyridamole (Aggrenox)
     - Clopidogrel (Plavix)
     - Dipyridamole
     - Nitroglycerin (oral, sublingual, transdermal, translingual dosage forms)
     - Prasugrel (Effient)
     - Ticagrelor (Brilinta)
     - Ticlopidine
     - Vorapaxar (Zontivity)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Is the requested quantity within the low to moderate intensity daily dosage as shown below?
   - Atorvastatin (Lipitor): 10 - 20 mg
   - Fluvastatin (Lescol): 20 - 80 mg (40 mg twice daily)
   - Fluvastatin ER (Lescol XL): 80 mg
   - Lovastatin: 10 - 40 mg
   - Pitavastatin calcium (Livalo): 1 - 4 mg
   - Pravastatin (Pravachol): 10 - 80 mg
   - Rosuvastatin (Crestor): 5 - 10 mg
   - Simvastatin (Zocor): 5 - 40 mg

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Is the request for a generic medication?

   If yes, **approve the requested medication for 12 months by GPID-G or GPI-14-G at zero copay.**

   If no, continue to #5.

ZERO COPAY OVERRIDE - STATIN

GUIDELINES FOR USE (CONTINUED)

5. Is the request for a MSB medication **AND** the patient meets the following criterion?
   - The prescriber has provided medical justification as to why the generic equivalent cannot be used

   If yes, **approve the requested medication for 12 months by GPID or GPI-14 at zero copay. APPROVAL TEXT (applicable to multi-source brand agents only):** Although your cost share has been reduced to zero-dollar, you may incur a dispense-as-written (DAW) penalty fee if you choose to fill a brand prescription instead of its generic equivalent.

   If no, do not approve.

   DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

   Our guideline named **ZERO COPAY OVERRIDE - STATIN** requires the following rule(s) be met for approval:

   A. You are between 40 to 75 years old
   B. You are not concurrently (at the same time) taking any of the below secondary prevention medications for cardiovascular disease (heart disease):
      1. Aspirin/dipyridamole (Aggrenox)
      2. Clopidogrel (Plavix)
      3. Dipyridamole
      4. Nitroglycerin (oral, sublingual, transdermal, translingual dosage forms)
      5. Prasugrel (Effient)
      6. Ticagrelor (Brilinta)
      7. Ticlopidine
      8. Vorapaxar (Zontivity)
   C. The requested quantity is within the low to moderate intensity daily dosage as shown below:
      1. Atorvastatin (Lipitor): 10 - 20 mg
      2. Fluvastatin (Lescol): 20 - 80 mg (40 mg twice daily)
      3. Fluvastatin ER (Lescol XL): 80 mg
      4. Lovastatin: 10 - 40 mg
      5. Pitavastatin calcium (Livalo): 1 - 4 mg
      6. Pravastatin (Pravachol): 10 - 80 mg
      7. Rosuvastatin (Crestor): 5 - 10 mg

ZERO COPAY OVERRIDE - STATIN

GUIDELINES FOR USE (CONTINUED)

D. You meet ONE of the following:
   1. Your request is for a generic medication
   2. Your request is for a multi-source brand medication (a brand name medication with a generic available) and your doctor provided a medical reason why you cannot use the generic equivalent of the requested medication

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for statin medications listed.

This guideline applies to plans where the pharmacy benefit allows for coverage of low-to-moderate intensity statins at zero copay. The override criteria allow patient a zero copay by waiving the applicable cost-sharing to all FDA-approved low-to-moderate intensity statins that are included in the MedImpact EHB Zero Dollar Copay List.

ZIFTOMENIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ZIFTOMENIB	KOMZIFTI	51002		GPI-10 (2148009000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory acute myeloid leukemia (AML) (ICD-10 C92.02, C92.00) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a susceptible nucleophosmin 1 (NPM1) mutation
   - The patient has no satisfactory alternative treatment options

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ZIFTOMENIB (Komzifti)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory acute myeloid leukemia (AML) (a type of blood cancer that has returned or did not respond to treatment)
   B. You are 18 years of age or older
   C. You have a susceptible nucleophosmin 1 (NPM1) mutation (an abnormal change in a type of gene)
   D. You have no satisfactory alternative treatment options

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Komzifti.

ZILUCOPLAN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ZILUCOPLAN SODIUM	ZILBRYSQ	49273		GPI-10 (8580509520)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient has a positive serologic test for anti-acetylcholine receptor antibody (AChR-Ab+)
   - The patient is Myasthenia Gravis Foundation of America class II, III, or IV
   - The patient had a trial of or contraindication to ONE corticosteroid (e.g., prednisone)
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Rystiggo (rozanolixizumab-noli), Vyvgart (efgartigimod alfa-fcab)/Vyvgart Hytrulo (efgartigimod- hyaluronidase-qvfc)
   - Zilbrysq will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]), complement inhibitor (e.g., Soliris [eculizumab], Ultomiris [ravulizumab-cwvz]), or CD-19 antibody (e.g., Uplizna [inebilizumab- cdon]) for the treatment of gMG

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO non-steroidal immunosuppressive therapies (e.g., azathioprine, cyclophosphamide, methotrexate)
   - The patient had a trial of or contraindication to ONE non-steroidal immunosuppressive therapy if on chronic plasmapheresis or plasma exchange

   If yes, **approve the requested strength for 6 months by GPID or GPI-14 with the following quantity limits:**
   - **16.6mg syringe: #0.416mL per day.**
   - **23mg syringe: #0.574mL per day.**
   - **32.4mg syringe: #0.81mL per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ZILUCOPLAN

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ZILUCOPLAN (Zilbrysq)** requires the following rule(s) be met for approval:

A. You have generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
D. You have a positive serologic test for the anti-acetylcholine receptor antibody (AChR-Ab+: a type of blood test that shows you have myasthenia gravis)
E. You have Myasthenia Gravis Foundation of America class II, III, or IV (types of severity of disease)
F. You have tried or have a contraindication to (harmful for you to use) ONE corticosteroid (such as prednisone)
G. You have tried or have a contraindication to ONE of the following preferred medications: Rystiggo (rozanolixizumab-noli), Vyvgart (efgartigimod alfa-fcab)/Vyvgart Hytrulo (efgartigimod-hyaluronidase-qvfc)
H. You will NOT use Zilbrysq concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]), complement inhibitor (such as Soliris [eculizumab], Ultomiris [ravulizumab-cwvz]), or CD-19 antibody (such as Uplizna [inebilizumab-cdon]) for the treatment of generalized myasthenia gravis
I. You meet ONE of the following:
    1. You have tried or have a contraindication to (harmful for you to use) TWO non-steroidal immunosuppressive therapies (such as azathioprine, cyclophosphamide, methotrexate)
    2. You have tried or have a contraindication to ONE non-steroidal immunosuppressive therapy if you are on chronic plasmapheresis or plasma exchange (types of blood therapy)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ZILUCOPLAN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient has had clinical benefit compared to baseline according to validated gMG instruments (e.g., Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   - Zilbrysq will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]), complement inhibitor (e.g., Soliris [eculizumab], Ultomiris [ravulizumab-cwvz]), or CD-19 antibody (e.g., Uplizna [inebilizumab- cdon]) for the treatment of gMG

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **16.6mg syringe: #0.416mL per day.**
   - **23mg syringe: #0.574mL per day.**
   - **32.4mg syringe: #0.81mL per day.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ZILUCOPLAN (Zilbrysq)** requires the following rule(s) be met for renewal:
   A. You have generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
   B. You have had clinical benefit compared to baseline (before treatment) according to validated gMG instruments (such as the Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   C. You will NOT use Zilbrysq concurrently (at the same time) with another neonatal Fc receptor blocker (such as Rystiggo [rozanolixizumab-noli], Vyvgart [efgartigimod alfa-fcab]), complement inhibitor (such as Soliris [eculizumab], Ultomiris [ravulizumab-cwvz]), or CD-19 antibody (such as Uplizna [inebilizumab-cdon]) for the treatment of generalized myasthenia gravis

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

ZONISAMIDE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of partial-onset seizures (ICD-10 Groups G40.1, G40.2)?

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #30 mL per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ZONISAMIDE (Zonisade)** requires the following rule(s) be met for renewal:
   A. You have partial-onset seizures (a type of seizure)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Zonisade.
