- Mavyret will be used concurrently with any medication with drug interactions that are contraindicated or not recommended per the prescribing information (e.g., rifampin, atazanavir, carbamazepine, phenytoin, efavirenz, darunavir, lopinavir, ritonavir, atorvastatin, lovastatin, simvastatin, rosuvastatin at doses greater than 10mg, cyclosporine at doses greater than 100mg/day, medications containing more than 20mcg of ethinyl estradiol, St. John's wort)
- Mavyret will be used concurrently with Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Vosevi (velpatasvir/sofosbuvir/voxilaprevir), or Zepatier (elbasvir/grazoprevir)

If yes, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

If no, continue to #7.

7. Is the patient treatment-naïve?

If yes, continue to #8.
If no, continue to #10.

GUIDELINES FOR USE (CONTINUED)

8. Does the patient have compensated cirrhosis (Child-Pugh A) or does not have cirrhosis?

   If yes, **approve for 8 weeks by GPID or GPI-14 for all strengths as follows:**
   - **100mg-40mg tablet: #3 per day.**
   - **50mg-20mg pellets: #5 per day.**

   If no, continue to #9.

9. Is the patient post-liver or post-kidney transplant?

   If yes, **approve for 12 weeks by GPID or GPI-14 for all strengths as follows:**
   - **100mg-40mg tablet: #3 per day.**
   - **50mg-20mg pellets: #5 per day.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

10. Is the patient treatment-experienced and meets **ALL** of the following criteria?
    - The patient is less than 18 years of age
    - The patient is interferon-experienced

    If yes, **approve for 8 weeks by GPID or GPI-14 for all strengths as follows:**
    - **100mg-40mg tablet: #3 per day.**
    - **50mg-20mg pellets: #5 per day.**

    If no continue to #11.

GLECAPREVIR/PIBRENTASVIR

GUIDELINES FOR USE (CONTINUED)

11. Is the patient treatment-experienced and meets **ALL** of the following criteria?
    - The patient has genotype 1 OR genotype 2, 3, 4, 5, or 6 and is less than 18 years of age
    - The patient has compensated cirrhosis (Child-Pugh A) OR does not have cirrhosis
    - The patient has prior treatment experience with an NS5A inhibitor (e.g., Harvoni [ledipasvir/sofosbuvir], Epclusa [velpatasvir/sofosbuvir])
    - The patient has NO prior treatment experience with an NS3/4A protease inhibitor (e.g., Olysio [simeprevir], Zepatier [grazoprevir/elbasvir])

    If yes, **approve for 16 weeks by GPID or GPI-14 for all strengths as follows:**
    - **100mg-40mg tablet: #3 per day.**
    - **50mg-20mg pellets: #5 per day.**

    If no, continue to #12.

12. Is the patient treatment-experienced and meets **ONE** of the following criteria?
    - The patient has failed prior treatment with a sofosbuvir-based regimen with no NS3/4A protease inhibitor (e.g., Epclusa [velpatasvir/sofosbuvir], Harvoni [ledipasvir/sofosbuvir], Sovaldi [sofosbuvir])
    - The patient has previously failed Mavyret AND Mavyret will be used with Sovaldi (sofosbuvir) and ribavirin
    - The patient has previously failed Vosevi (sofosbuvir/velpatasvir/voxilaprevir) AND Mavyret will be used with Sovaldi (sofosbuvir) and ribavirin
    - The patient is less than 18 years of age, has genotype 3, AND is interferon-experienced

    If yes, **approve for 16 weeks by GPID or GPI-14 for all strengths as follows:**
    - **100mg-40mg tablet: #3 per day.**
    - **50mg-20mg pellets: #5 per day.**

    If no, continue to #13.

GLECAPREVIR/PIBRENTASVIR

GUIDELINES FOR USE (CONTINUED)

13. Is the patient treatment-experienced and meets **ALL** of the following criteria?
    - The patient has genotype 1, 2, 4, 5, or 6
    - The patient does not have cirrhosis
    - The patient has prior treatment experience with regimens containing interferon/peginterferon, ribavirin, and/or Sovaldi (sofosbuvir)
    - The patient has NO prior treatment experience with an NS3/4A protease inhibitor (e.g., Olysio [simeprevir], Zepatier [elbasvir/grazoprevir]) or an NS5A inhibitor (e.g., Harvoni [ledipasvir/sofosbuvir], Epclusa [velpatasvir/sofosbuvir])

    If yes, **approve for 8 weeks by GPID or GPI-14 for all strengths as follows:**
    - **100mg-40mg tablet: #3 per day.**
    - **50mg-20mg pellets: #5 per day.**

    If no, continue to #14.

14. Is the patient treatment-experienced and meets **ALL** of the following criteria?
    - The patient has genotype 1, 2, 4, 5, or 6
    - The patient has compensated cirrhosis (Child-Pugh A)
    - The patient has prior treatment experience with regimens containing interferon/peginterferon, ribavirin, and/or Sovaldi (sofosbuvir)
    - The patient has NO prior treatment experience with an NS3/4A protease inhibitor (e.g., Olysio [simeprevir], Zepatier [elbasvir/grazoprevir]) or an NS5A inhibitor (e.g., Harvoni [ledipasvir/sofosbuvir], Epclusa [velpatasvir/sofosbuvir])

    If yes, **approve for 12 weeks for by GPID or GPI-14 for all strengths as follows:**
    - **100mg-40mg tablet: #3 per day.**
    - **50mg-20mg pellets: #5 per day.**

    If no, continue to #15.

GLECAPREVIR/PIBRENTASVIR

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GLECAPREVIR/PIBRENTASVIR (Mavyret)** requires the following rule(s) be met for approval:

A. You have acute (short-term) or chronic (long-term) hepatitis C virus (HCV: liver inflammation caused by a type of virus)
B. You are 3 years of age or older
C. You have a genotype 1, 2, 3, 4, 5, or 6 infection (types of hepatitis C virus)
D. You have an HCV RNA level (a measure of the amount of hepatitis C virus in your blood) within the past 6 months
E. You do NOT have a limited life expectancy (less than 12 months) due to non-liver related comorbid conditions (having two or more diseases at the same time)
F. You do NOT have moderate or severe liver impairment (decompensated cirrhosis [a condition where there is liver damage and scarring with major symptoms]; Child-Pugh B or C [a score that evaluates the severity of liver damage])
G. You will NOT use Mavyret concurrently (at the same time) with any medication with drug interactions that are contraindicated (harmful for you to use) or not recommended per the prescribing information (such as rifampin, atazanavir, carbamazepine, phenytoin, efavirenz, darunavir, lopinavir, ritonavir, atorvastatin, lovastatin, simvastatin, rosuvastatin at doses greater than 10mg, cyclosporine at doses greater than 100mg/day, medications containing more than 20mcg of ethinyl estradiol, St. John's wort)
H. You will NOT use Mavyret concurrently (at the same time) with Epclusa (velpatasvir/sofosbuvir), Harvoni (ledipasvir/sofosbuvir), Vosevi (velpatasvir/sofosbuvir/voxilaprevir), or Zepatier (elbasvir/grazoprevir)
I. If you have chronic hepatitis C virus and are treatment naive (no prior treatment), approval also requires ALL of the following:
    1. You meet ONE of the following:
        a. You do not have cirrhosis (liver damage or scarring)
        b. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage)
        c. You received a liver transplant (replaced your liver)
        d. You received a kidney transplant (replaced your kidney)

(Denial text continued on next page)

GLECAPREVIR/PIBRENTASVIR

GUIDELINES FOR USE (CONTINUED)

J. If you have chronic hepatitis C virus, are treatment-experienced (failed prior treatment) and prior therapy did not contain an NS5A inhibitor, approval also requires ONE of the following:

1. You have a genotype 1, 2, 4, 5, or 6 infection, and you have compensated cirrhosis (a condition where there is liver damage and scarring without major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) or you do not have cirrhosis (liver damage and scarring), and you have prior treatment experience with regimens containing interferon/peginterferon, ribavirin and/or Sovaldi (sofosbuvir), and you do not have prior treatment experience with an NS3/4A protease inhibitor (such as Olysio [simeprevir], Zepatier [elbasvir/grazoprevir]) or an NS5A inhibitor (such as Harvoni [ledipasvir/sofosbuvir], Epclusa [velpatasvir/sofosbuvir])
2. You have genotype 1 OR genotype 2, 3, 4, 5, or 6 and are less than 18 years of age, and you have compensated cirrhosis (Child-Pugh A) OR you do not have cirrhosis, and you have prior treatment experience with an NS3/4A protease inhibitor (such as Olysio [simeprevir], Zepatier [elbasvir/grazoprevir]), and you do not have prior treatment experience with an NS5A inhibitor (such as Harvoni [ledipasvir/sofosbuvir], Epclusa [velpatasvir/sofosbuvir])
3. You have a genotype 3 infection, and you have compensated cirrhosis (Child-Pugh A) OR you do not have cirrhosis, and you have prior treatment experience with regimens containing interferon/peginterferon, ribavirin, and/or Sovaldi (sofosbuvir), and you do not have prior treatment experience with an NS3/4A protease inhibitor (such as Olysio [simeprevir], Zepatier [elbasvir/grazoprevir]) or an NS5A inhibitor (such as Harvoni [ledipasvir/sofosbuvir], Epclusa [velpatasvir/sofosbuvir])

GLECAPREVIR/PIBRENTASVIR

GUIDELINES FOR USE (CONTINUED)

K. If you have chronic hepatitis C virus and are treatment-experienced (failed prior treatment), approval also requires ALL of the following:

1. You meet ONE of the following:
   a. You are less than 18 years of age AND had prior treatment with an interferon
   b. You have genotype 1 OR genotype 2, 3, 4, 5, or 6 and are less than 18 years of age, and you have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) OR you do not have cirrhosis (liver damage and scarring), and you have prior treatment experience with an NS5A inhibitor (such as Harvoni [ledipasvir/sofosbuvir], Epclusa [velpatasvir/sofosbuvir]), and you do not have prior treatment experience with an NS3/4A protease inhibitor (such as Olysio [simeprevir], Zepatier [elbasvir/grazoprevir])
   c. You have failed prior treatment with a sofosbuvir-based regimen with no NS3/4A protease inhibitor (such as Epclusa [velpatasvir/sofosbuvir], Harvoni [ledipasvir/sofosbuvir], Sovaldi [sofosbuvir])
   d. You have failed Mavyret AND Mavyret will be used with Sovaldi (sofosbuvir) and ribavirin
   e. You have failed Vosevi (sofosbuvir/velpatasvir/voxilaprevir) AND Mavyret will be used with Sovaldi (sofosbuvir) and ribavirin
   f. You are less than 18 years of age, have genotype 3, AND you had prior treatment with an interferon

L. Mavyret will also be approved for any other regimen/condition not listed above that is recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment

---

GLOFITAMAB-GXBM (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
GLOFITAMAB-GXBM	COLUMVI	49012		GPI-10 (2135203500)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory diffuse large B-cell lymphoma, not otherwise specified (DLBCL, NOS), OR large B-cell lymphoma (LBCL) arising from follicular lymphoma, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient previously received at least two lines of systemic therapy (e.g., R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine and prednisone], GemOx [gemcitabine, oxaliplatin])
   - The patient will receive or has received a single dose of Gazyva (obinutuzumab) as a pretreatment prior to initiating Columvi
   - The patient has NOT previously received more than 12 cycles of Columvi

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1.43 mL per day for 12 fills.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GLOFITAMAB-GXBM (Columvi)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory diffuse large B-cell lymphoma (DLBCL: a type of white blood cell cancer that has returned or is not responding to treatment), not otherwise specified (NOS), or large B-cell lymphoma (LBCL) arising from follicular lymphoma (a type of blood cancer)
   B. You are 18 years of age or older
   C. You previously received at least two lines of systemic therapy (treatment that travels throughout the body) (such as R-CHOP [rituximab, cyclophosphamide, doxorubicin, vincristine and prednisone], GemOx [gemcitabine, oxaliplatin])
   D. You will receive or have received a single dose of Gazyva (obinutuzumab) as a pretreatment prior to initiating Columvi
   E. You have NOT previously received more than 12 cycles of Columvi

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GLYCEROL PHENYLBUTYRATE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
GLYCEROL PHENYLBUTYRATE	RAVICTI, GLYCEROL PHENYLBUTYRATE	39990		GPI-10 (3090803000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of a urea cycle disorder (UCD) (ICD-10 Group E72.2) and meet **ALL** of the following criteria?
   - The patient's disorder cannot be managed by dietary protein restriction and/or amino acid supplementation alone
   - The patient's UCD is confirmed by enzymatic, biochemical, or genetic testing
   - The requested medication will be used as adjunctive therapy along with dietary protein restriction
   - The patient does NOT have N-acetylglutamate synthetase (NAGS) deficiency or acute hyperammonemia
   - The patient had a trial of or contraindication to Buphenyl (sodium phenylbutyrate)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #17.5mL per day.** If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GLYCEROL PHENYLBUTYRATE (Ravicti)** requires the following rule(s) be met for approval:
   A. You have a urea cycle disorder (UCD: a genetic disorder that causes high ammonia levels in the blood)
   B. Your disorder cannot be managed by dietary protein restriction and/or amino acid supplementation alone
   C. Your disorder is confirmed by enzymatic, biochemical, or genetic testing (types of lab tests)
   D. The requested medication will be used as adjunctive (add-on) therapy along with dietary protein restriction
   E. You do NOT have a deficiency (low level) of N-acetylglutamate synthetase (NAGS: a type of enzyme) or acute hyperammonemia (sudden and short-term increase in ammonia levels to a critical level)
   F. You have tried or have a contraindication to (harmful for you to use) Buphenyl (sodium phenylbutyrate)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GLYCEROL PHENYLBUTYRATE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of a urea cycle disorder (UCD) (ICD-10 Group E72.2) **AND** meet the following criterion?
   - The patient had a clinical benefit compared to baseline (e.g., normal fasting glutamine, low-normal fasting ammonia levels, mental status clarity)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #17.5mL per day.** If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GLYCEROL PHENYLBUTYRATE (Ravicti)** requires the following rule(s) be met for renewal:
   A. You have a urea cycle disorder (UCD: a genetic disorder that causes high ammonia levels in the blood)
   B. You had a clinical benefit compared to baseline (such as normal fasting glutamine, low-normal fasting ammonia levels, mental status clarity)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

GLYCOPYRRONIUM TOPICAL

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
GLYCOPYRRONIUM TOSYLATE	QBREXZA	45086		GPI-10 (9097003020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of primary axillary hyperhidrosis (ICD-10 L74.510) and meet **ALL** of the following criteria?
- The patient is 9 years of age or older
- Qbrexza will NOT be used concurrently with other topical anticholinergics indicated for primary axillary hyperhidrosis (e.g., Sofdra [sofpironium bromide])

If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 packet per day.** If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GLYCOPYRRONIUM TOPICAL (Qbrexza)** requires the following rule(s) be met for approval:
A. You have primary axillary hyperhidrosis (excessive underarm sweating)
B. You are 9 years of age or older
C. You will NOT use Qbrexza concurrently (at the same time) with other topical anticholinergics indicated for primary axillary hyperhidrosis (such as Sofdra [sofpironium bromide])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Qbrexza.

PRIOR AUTHORIZATION GUIDELINES

GOLIMUMAB - IV

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
GOLIMUMAB	SIMPONI ARIA		34983	GPI-14 (66270040002015)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient is concurrently using or has a contraindication to methotrexate
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a ONE conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

     If yes, continue to #2.
     If no, continue to #3.

GOLIMUMAB - IV

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for a total of 6 months by GPID or GPI-14. Please enter two authorizations as follows:**
     - **FIRST APPROVAL: Approve for 1 month with a total fill count of 1. (PAC NOTE: Enter a Min Day Supply of 28 days).**
     - **SECOND APPROVAL: Approve for 5 months for 1 fill per 56 days. (total fill count = 3; start date is 2 days before the end of the first approval) (PAC NOTE: Enter a Min Day Supply of 56 days).**

     If no, do not approve.
     DENIAL TEXT: See initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

     If yes, continue to #4.
     If no, continue to #6.

GOLIMUMAB - IV

INITIAL CRITERIA (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient is 2 to 5 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Xeljanz IR (tofacitinib IR)
     - Rinvoq (upadacitinib)

     [**NOTE:** Xeljanz and Rinvoq require additional criteria of inadequate response or intolerance to a TNF blocker (e.g., Enbrel)]
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Enbrel (etanercept)
     - Otezla (apremilast)
     - Tremfya (guselkumab)
     - Skyrizi (risankizumab-rzaa)
     - Xeljanz IR (tofacitinib IR)
     - Rinvoq (upadacitinib)

     [**NOTE:** Xeljanz and Rinvoq require additional criteria of inadequate response or intolerance to a TNF blocker (e.g., Enbrel)]
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 6 months by GPID or GPI-14. Enter two authorizations as follows:**
     - **FIRST APPROVAL: Approve for 1 month for 1 fill count. (Enter Min Day Supply of 28 days).**
     - **SECOND APPROVAL: Approve for 5 months for 1 fill per 56 days. (fill count = 3; start date is 2 days before the end of the first approval) (Enter Min Day Supply of 56 days).**

     If no, continue to #5.

GOLIMUMAB - IV

INITIAL CRITERIA (CONTINUED)

5. Is the patient 18 years of age or older **AND** meets the following criterion?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - o Enbrel (etanercept)
     - o Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - o Otezla (apremilast)
     - o Tremfya (guselkumab)
     - o Skyrizi (risankizumab-rzaa)
     - o Taltz (ixekizumab)
     - o Bimzelx (bimekizumab-bkzx)
     - o Sotyktu (deucravacitinib)
     - o Adalimumab-ryvk/adalimumab-aaty
     - o Xeljanz (tofacitinib IR or XR)
     - o Rinvoq (upadacitinib)

     [**NOTE:** Xeljanz and Rinvoq require additional criteria of inadequate response or intolerance to a TNF blocker (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel)]
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 6 months by GPID or GPI-14. Enter two authorizations as follows:**
     - **FIRST APPROVAL: Approve for 1 month for 1 fill count. (Enter Min Day Supply of 28 days).**
     - **SECOND APPROVAL: Approve for 5 months for 1 fill per 56 days. (fill count = 3; start date is 2 days before the end of the first approval) (Enter Min Day Supply of 56 days).**

     If no, do not approve.
     DENIAL TEXT: See initial denial text at the end of the guideline.

GOLIMUMAB - IV

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for a total of 6 months by GPID or GPI-14. Please enter two authorizations as follows:**
   - **FIRST APPROVAL: Approve for 1 month with a total fill count of 1. (PAC NOTE: Enter a Min Day Supply of 28 days).**
   - **SECOND APPROVAL: Approve for 5 months for 1 fill per 56 days. (total fill count = 3; start date is 2 days before the end of the first approval) (PAC NOTE: Enter a Min Day Supply of 56 days).**

   If no, continue to #7.

GOLIMUMAB - IV

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for a total of 6 months by GPID or GPI-14. Please enter two authorizations as follows:**
   - **FIRST APPROVAL: Approve for 1 month with a total fill count of 1. (PAC NOTE: Enter a Min Day Supply of 28 days).**
   - **SECOND APPROVAL: Approve for 5 months for 1 fill per 56 days. (total fill count = 3; start date is 2 days before the end of the first approval) (PAC NOTE: Enter a Min Day Supply of 56 days).**

   If no, do not approve.

   INITIAL DENIAL TEXT: Our guideline named **GOLIMUMAB - IV (Simponi Aria)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)

   (Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

GOLIMUMAB - IV

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You are concurrently (at the same time) using or have a contraindication to (harmful for you to use) methotrexate
4. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
5. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
6. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated you cannot use a JAK inhibitor (Janus kinase inhibitor such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

C. If you have psoriatic arthritis, approval also requires:
1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
2. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

GOLIMUMAB - IV

INITIAL CRITERIA (CONTINUED)

3. You meet ONE of the following:
   a. You are 2 to 5 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Xeljanz IR (tofacitinib immediate-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
      iii. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
   b. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Enbrel (etanercept)
      iii. Otezla (apremilast)
      iv. Tremfya (guselkumab)
      v. Skyrizi (risankizumab-rzaa)
      vi. Xeljanz IR (tofacitinib immediate-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
      vii. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
   c. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      iii. Otezla (apremilast)
      iv. Tremfya (guselkumab)
      v. Skyrizi (risankizumab-rzaa)
      vi. Taltz (ixekizumab)
      vii. Bimzelx (bimekizumab-bkzx)
      viii. Sotyktu (deucravacitinib)
      ix. Adalimumab-ryvk/adalimumab-aaty
      x. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      xi. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

GOLIMUMAB - IV

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (non-steroidal anti-inflammatory drug such as ibuprofen, naproxen, meloxicam)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

GOLIMUMAB - IV

INITIAL CRITERIA (CONTINUED)

E. If you have polyarticular juvenile idiopathic arthritis, approval also requires:

1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GOLIMUMAB - IV

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
   - The patient is concurrently using or has a contraindication to methotrexate
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14 for 1 fill per 56 days (total fill count = 6) (PAC NOTE: Enter a Min Day Supply of 56 days).**

   If no, do not approve.
   DENIAL TEXT: See renewal denial text at the end of the guideline.

GOLIMUMAB - IV

RENEWAL CRITERIA (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient is 2 to 5 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Enbrel (etanercept)
     - Xeljanz IR (tofacitinib IR)
     - Rinvoq (upadacitinib)

     [**NOTE:** Xeljanz and Rinvoq require additional criteria of inadequate response or intolerance to a TNF blocker (e.g., Enbrel)]
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Enbrel (etanercept)
     - Otezla (apremilast)
     - Tremfya (guselkumab)
     - Skyrizi (risankizumab-rzaa)
     - Xeljanz IR (tofacitinib IR)
     - Rinvoq (upadacitinib)

     [**NOTE:** Xeljanz and Rinvoq require additional criteria of inadequate response or intolerance to a TNF blocker (e.g., Enbrel)]
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Otezla (apremilast)
     - Tremfya (guselkumab)
     - Skyrizi (risankizumab-rzaa)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Sotyktu (deucravacitinib)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR)
     - Rinvoq (upadacitinib)

     [**NOTE:** Xeljanz and Rinvoq require additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel)]
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve for 12 months by GPID or GPI-14 for 1 fill per 56 days (total fill count = 6) (PAC NOTE: Enter a Min Day Supply of 56 days).**

     If no, do not approve.
     DENIAL TEXT: See the renewal denial text at the end of the guideline.

GOLIMUMAB - IV

RENEWAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50% or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) while on therapy
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14 for 1 fill per 56 days (total fill count = 6) (PAC NOTE: Enter a Min Day Supply of 56 days).**

   If no, continue to #6.

GOLIMUMAB - IV

RENEWAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (PJIA) (ICD-10 M08.3, Group M08.0) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
   - Simponi Aria will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of PJIA
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz IR (tofacitinib IR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14 for 1 fill per 56 days (total fill count = 6) (PAC NOTE: Enter a Min Day Supply of 56 days).**

   If no, do not approve.

   RENEWAL DENIAL TEXT: Our guideline named **GOLIMUMAB - IV (Simponi Aria)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Polyarticular juvenile idiopathic arthritis (PJIA: a type of joint condition)

   B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
      1. You have experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
      2. You are concurrently (at the same time) using or have a contraindication to (harmful for you to use) methotrexate

   (Renewal denial text continued on next page)

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

RENEWAL CRITERIA (CONTINUED)

3. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
4. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated you cannot use a JAK inhibitor (Janus kinase inhibitor such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

C. If you have psoriatic arthritis, renewal also requires:

1. You have experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
3. You meet ONE of the following:
   a. You are 2 to 5 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Xeljanz IR (tofacitinib immediate-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
      iii. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])

(Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

b. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   ii. Enbrel (etanercept)
   iii. Otezla (apremilast)
   iv. Tremfya (guselkumab)
   v. Skyrizi (risankizumab-rzaa)
   vi. Xeljanz IR (tofacitinib immediate-release) (NOTE: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])
   vii. Rinvoq (upadacitinib) (NOTE: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as Enbrel])

c. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   i. Enbrel (etanercept)
   ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   iii. Otezla (apremilast)
   iv. Tremfya (guselkumab)
   v. Skyrizi (risankizumab-rzaa)
   vi. Taltz (ixekizumab)
   vii. Bimzelx (bimekizumab-bkzx)
   viii. Sotyktu (deucravacitinib)
   ix. Adalimumab-ryvk/adalimumab-aaty
   x. Xeljanz (tofacitinib immediate-release or extended-release) (NOTE: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   xi. Rinvoq (upadacitinib) (NOTE: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

D. If you have ankylosing spondylitis, renewal also requires:

1. You have experienced or maintained an improvement of at least 50% or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI: diagnostic test which allows a physician to determine the effectiveness of a current medication) while on therapy
2. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)

RENEWAL CRITERIA (CONTINUED)

3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

E. If you have polyarticular juvenile idiopathic arthritis, renewal also requires:

1. You have experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Simponi Aria concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of polyarticular juvenile idiopathic arthritis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Adalimumab-ryvk/adalimumab-aaty
   c. Xeljanz IR (tofacitinib immediate-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   d. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient is concurrently using or has a contraindication to methotrexate
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

   If yes, continue to #2.
   If no, continue to #3.

GOLIMUMAB - SQ

INITIAL CRITERIA (CONTINUED)

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

     If yes, **approve all formulations of the 50mg/0.5mL strength for 6 months by GPID or GPI-14 with a quantity limit of #0.5 mL per 28 days.**

     If no, do not approve.
     DENIAL TEXT: See the initial denial text at the end of the guideline.

GOLIMUMAB - SQ

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Otezla (apremilast)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Taltz (ixekizumab)
  - Bimzelx (bimekizumab-bkzx)
  - Sotyktu (deucravacitinib)
  - Adalimumab-ryvk/adalimumab-aaty
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve all formulations of the 50mg/0.5mL strength for 6 months by GPID or GPI-14 with a quantity limit of #0.5 mL per 28 days.**

If no, continue to #4.

CONTINUED ON NEXT PAGE

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 50mg/0.5mL strength for 6 months by GPID or GPI-14 with a quantity limit of #0.5 mL per 28 days.**

   If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient weighs at least 15 kg (33 lbs)
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

GOLIMUMAB - SQ

INITIAL CRITERIA (CONTINUED)

6. Does the patient meet **ONE** of the following criteria?
   - The patient is less than 5 years of age
   - The patient is 5 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to ONE of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for a total of 6 months by GPID or GPI-14. Please enter two authorizations as follows:**
   - **FIRST APPROVAL: Approve all formulations and strengths for 1 month as follows:**
     - **100mg/mL: #3 mL per 28 days.**
     - **50mg/0.5mL: #1.5 mL per 28 days.**
   - **SECOND APPROVAL: Approve all formulations of the requested strength for 5 months as follows (please enter a start date of 1 week AFTER the end date of the first approval):**
     - **100mg/mL: #1 mL per 28 days.**
     - **50mg/0.5mL: #0.5 mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

GOLIMUMAB - SQ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GOLIMUMAB-SQ (Simponi)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe ankylosing spondylitis (AS: a type of joint condition)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

(Initial denial text continued on next page)

GOLIMUMAB - SQ

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You are concurrently (at the same time) using or have a contraindication to (harmful for you to use) methotrexate
4. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
5. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
6. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

(Initial denial text continued on next page)

GOLIMUMAB - SQ

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. Otezla (apremilast)
   d. Tremfya (guselkumab)
   e. Skyrizi (risankizumab-rzaa)
   f. Taltz (ixekizumab)
   g. Bimzelx (bimekizumab-bkzx)
   h. Sotyktu (deucravacitinib)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   k. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

GOLIMUMAB - SQ

INITIAL CRITERIA (CONTINUED)

D. If you have moderate to severe ankylosing spondylitis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (non-steroidal anti-inflammatory drug such as ibuprofen, naproxen, meloxicam)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

GOLIMUMAB - SQ

INITIAL CRITERIA (CONTINUED)

E. If you have moderate to severe ulcerative colitis, approval also requires:

1. You weigh at least 15 kilograms (33 pounds)
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
4. You meet ONE of the following:
   a. You are less than 5 years of age
   b. You are 5 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GOLIMUMAB - SQ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
   - The patient is concurrently using or has a contraindication to methotrexate
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 50mg/0.5mL strength for 12 months by GPID or GPI-14 with a quantity limit of #0.5 mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

GOLIMUMAB - SQ

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient has experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
- Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Otezla (apremilast)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Taltz (ixekizumab)
  - Bimzelx (bimekizumab-bkzx)
  - Sotyktu (deucravacitinib)
  - Adalimumab-ryvk/adalimumab-aaty
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve all formulations of the 50mg/0.5mL strength for 12 months by GPID or GPI-14 with a quantity limit of #0.5 mL per 28 days.**

If no, continue to #4.

GOLIMUMAB - SQ

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50% or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) score while on therapy
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 50mg/0.5mL strength for 12 months by GPID or GPI-14 with a quantity limit of #0.5 mL per 28 days.**

   If no, continue to #5.

GOLIMUMAB - SQ

RENEWAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Simponi will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

6. Does the patient meet **ONE** of the following criteria?
   - The patient is less than 5 years of age
   - The patient is 5 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to ONE of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the requested strength for 12 months by GPID or GPI-14 as follows:**
   - **100mg/mL: #1 mL per 28 days.**
   - **50mg/0.5mL: #0.5 mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

GOLIMUMAB - SQ

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GOLIMUMAB-SQ (Simponi)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Moderate to severe ankylosing spondylitis (AS: a type of joint condition)
   4. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:
   1. You have experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
   2. You are concurrently (at the same time) using or have a contraindication to (harmful for you to use) methotrexate
   3. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   4. You meet ONE of the following:
      a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         i. Enbrel (etanercept)
         ii. Adalimumab-ryvk/adalimumab-aaty
         iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
         iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

(Renewal denial text continued on next page)

GOLIMUMAB - SQ

RENEWAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, renewal also requires:

1. You have experienced or maintained a 20% or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. Otezla (apremilast)
   d. Tremfya (guselkumab)
   e. Skyrizi (risankizumab-rzaa)
   f. Taltz (ixekizumab)
   g. Bimzelx (bimekizumab-bkzx)
   h. Sotyktu (deucravacitinib)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   k. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

GOLIMUMAB - SQ

RENEWAL CRITERIA (CONTINUED)

D. If you have moderate to severe ankylosing spondylitis, renewal also requires:

1. You have experienced or maintained an improvement of at least 50% or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI: a type of disease evaluation tool) score while on therapy
2. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Renewal denial text continued on next page)

GOLIMUMAB - SQ

RENEWAL CRITERIA (CONTINUED)

E. If you have moderate to severe ulcerative colitis, renewal also requires:

1. You will NOT use Simponi concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
2. You meet ONE of the following:
   a. You are less than 5 years of age
   b. You are 5 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Simponi.

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
GOLODIRSEN	VYONDYS-53	46254		GPI-10 (7460004200)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Duchenne muscular dystrophy (DMD) (ICD-10 G71.01) and meet **ALL** of the following criteria?
   - The patient has a confirmed mutation of the DMD gene that is amenable to exon 53 skipping therapy
   - Therapy is prescribed by or in consultation with a neurologist specializing in the treatment of DMD at a DMD treatment center
   - The patient is ambulatory
   - The patient is currently receiving treatment with or has a contraindication to corticosteroids (e.g., prednisone, prednisolone)

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GOLODIRSEN (Vyondys 53)** requires the following rule(s) be met for approval:
   A. You have Duchenne muscular dystrophy (DMD: a type of inherited muscle disorder)
   B. You have a confirmed mutation (abnormal change in a type of gene) in the DMD gene that will respond to exon 53 skipping therapy (a type of therapy to treat DMD)
   C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor) specializing in the treatment of DMD at a DMD treatment center
   D. You are ambulatory (able to walk)
   E. You are currently receiving treatment with or you have a contraindication to (harmful for you to use) corticosteroids (such as prednisone, prednisolone)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

GOLODIRSEN

RENEWAL CRITERIA

1. Does the patient meet **ONE** of the following criteria?
   - The patient has maintained or demonstrated a less than expected decline in ambulatory ability based on muscle function assessments (e.g., 6-minute walk test)
   - The patient has maintained or demonstrated a less than expected decline in other muscle function (i.e., pulmonary or cardiac function)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GOLODIRSEN (Vyondys 53)** requires ONE of the following rule(s) be met for renewal:
   A. You have maintained or demonstrated a less than expected decline in ambulatory ability (ability to walk) based on muscle function assessments (such as the 6-minute walk test)
   B. You have maintained or demonstrated a less than expected decline in other muscle function (pulmonary [lung] or cardiac [heart] function)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Vyondys 53.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

GOSERELIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
GOSERELIN ACETATE	ZOLADEX	21114		GPI-10 (2140500510)	

GUIDELINES FOR USE

1. Is the requested medication being used for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, continue to #2.

2. Does the patient have a diagnosis of locally confined carcinoma of the prostate (ICD-10 C61) **AND** meet the following criterion?
   - Zoladex will be used in combination with Eulexin (flutamide)

   If yes, **approve for 4 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **3.6 mg: #1 per 4 weeks.**
   - **10.8 mg: #1 (one time fill).**

   If no, continue to #3.

3. Does the patient have a diagnosis of advanced prostate cancer (ICD-10 C61)?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **3.6 mg: #1 per 4 weeks.**
   - **10.8 mg: #1 per 12 weeks.**

   If no, continue to #4.

GOSERELIN

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe pain from endometriosis (ICD-10 Groups N80 and R52) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an obstetrician/gynecologist
   - The patient had a trial of or contraindication to the clinical standard of care agents: a nonsteroidal anti-inflammatory drug (NSAID) AND a progestin-containing contraceptive preparation (e.g., combination hormonal contraceptive preparation, progestin-only contraceptive preparation)
   - Zoladex will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa [elagolix], Myfembree [relugolix-estradiol-norethindrone], Lupron Depot [leuprolide])
   - The patient has NOT received more than 6 months of treatment with Zoladex per lifetime

   If yes, **approve 3.6 mg for 6 months by GPID or GPI-14 with a quantity limit of #1 per 4 weeks.**

   If no, continue to #5.

5. Does the patient have a diagnosis of dysfunctional uterine bleeding (ICD-10 N93.8) **AND** meet the following criterion?
   - Zoladex will be used as an endometrial-thinning agent prior to endometrial ablation

   If yes, **approve 3.6 mg for 12 months by GPID or GPI-14 with a quantity limit of #1 per 4 weeks.**

   If no, continue to #6.

6. Does the patient have a diagnosis of advanced breast cancer (ICD-10 Group C50) **AND** meet the following criterion?
   - The patient is a premenopausal or perimenopausal female

   If yes, **approve 3.6 mg for 12 months by GPID or GPI-14 with a quantity limit of #1 per 4 weeks.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

GOSERELIN

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **GOSERELIN (Zoladex)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
   2. Locally confined carcinoma (cancer) of the prostate
   3. Advanced prostate cancer (prostate cancer that has spread to nearby tissue or organs)
   4. Moderate to severe pain from endometriosis (condition affecting the uterus)
   5. Dysfunctional uterine bleeding (abnormal uterine bleeding)
   6. Advanced breast cancer (breast cancer that has spread to nearby tissue or organs)

B. If you have gender dysphoria, approval also requires:
   1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

C. If you have locally confined carcinoma of the prostate, approval also requires:
   1. Zoladex will be used in combination with Eulexin (flutamide)

D. If you have moderate to severe pain from endometriosis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an obstetrician/gynecologist (a type of women's health doctor)
   3. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medications: a nonsteroidal anti-inflammatory drug (NSAID: such as ibuprofen, meloxicam, naproxen) AND a progestin-containing contraceptive preparation (such as combination hormonal contraceptive preparation, progestin-only contraceptive preparation)
   4. You will NOT use Zoladex concurrently (at the same time) with another gonadotropin-releasing hormone (GnRH)-modulating agent (such as Orilissa [elagolix], Myfembree [relugolix-estradiol-norethindrone], Lupron Depot [leuprolide])
   5. You have NOT received more than 6 months of treatment with Zoladex per lifetime

E. If you have dysfunctional uterine bleeding, approval also requires:
   1. Zoladex will be used as an endometrial-thinning agent prior to endometrial ablation (a type of surgical procedure)

F. If you have advanced breast cancer, approval also requires:
   1. You are a premenopausal (before menopause) or perimenopausal (time around menopause) female

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

GUSELKUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
GUSELKUMAB	TREMFYA	44418		GPI-10 (5250402500, 9025054200)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of one clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
   - The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic and is switching to Tremfya
   - The patient has psoriasis covering 3 percent or more of body surface area (BSA)
   - The patient has psoriatic lesions affecting the hands, feet, genital area, face, or scalp

   If yes, **approve all formulations of the 100mg/mL strength for a total of 6 months. Please enter TWO approvals by GPID or GPI-14 as follows:**
   - **FIRST APPROVAL: Approve for 1 month with a quantity limit of #1mL per 28 days.**
   - **SECOND APPROVAL: Approve for 5 months with a quantity limit of #1mL per 56 days (please enter a start date of 3 WEEKS AFTER the START date of the first approval).**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

GUSELKUMAB

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
- The patient is 6 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

If yes, **approve all formulations of the 100mg/mL strength for a total of 6 months. Please enter TWO approvals by GPID or GPI-14 as follows:**
- **FIRST APPROVAL: Approve for 1 month with a quantity limit of #1mL per 28 days.**
- **SECOND APPROVAL: Approve for 5 months with a quantity limit of #1mL per 56 days (please enter a start date of 3 WEEKS AFTER the START date of the first approval).**

If no, continue to #5.

5. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a gastroenterologist
- Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

If yes, **approve for a total of 6 months by GPID or GPI-14 as follows:**
- **FIRST APPROVAL: Approve the requested formulation for 2 months with the following quantity limits:**
  - **200mg/20mL vial: #20mL per 28 days.**
  - **200mg/2mL pen/syringe: #4mL per 28 days.**
- **SECOND APPROVAL: Approve all formulations of the requested strength for 4 months with the following quantity limits (please enter a start date of 3 WEEKS AFTER the END date of the first approval):**
  - **100mg/mL: #1mL per 56 days.**
  - **200mg/2mL: #2mL per 28 days.**

If no, continue to #6.

GUSELKUMAB

INITIAL CRITERIA (CONTINUED)

6. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for a total of 6 months by GPID or GPI-14 as follows:**
   - **FIRST APPROVAL: Approve the requested formulation for 2 months with the following quantity limits:**
     - **200mg/20mL vial: #20mL per 28 days.**
     - **200mg/2mL pen/syringe: #4mL per 28 days.**
   - **SECOND APPROVAL: Approve all formulations of the requested strength for 4 months with the following quantity limits (please enter a start date of 3 WEEKS AFTER the END date of the first approval):**
     - **100mg/mL: #1mL per 56 days.**
     - **200mg/2mL: #2mL per 28 days.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GUSELKUMAB (Tremfya)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
      4. Moderate to severe Crohn's disease (CD: a type of bowel disorder)

GUSELKUMAB

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe plaque psoriasis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
3. You will NOT use Tremfya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type skin condition)
4. You meet ONE of the following:
   a. You have had at least a 3-month trial of one clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy) for the treatment of plaque psoriasis (a type of skin condition)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication
5. You meet ONE of the following:
   a. You were previously stable on another biologic and are switching to Tremfya
   b. You have psoriasis covering 3 percent or more of body surface area (BSA)
   c. You have psoriatic lesions (rashes) affecting the hands, feet, genital area, face, or scalp

C. If you have psoriatic arthritis, approval also requires:
1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Tremfya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

D. If you have moderate to severe ulcerative colitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
3. You will NOT use Tremfya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

GUSELKUMAB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more
   - Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve all formulations of the 100mg/mL strength for 12 months by GPID or GPI-14 with a quantity limit of #1mL per 56 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender or swollen joint count while on therapy
   - Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve all formulations of the 100mg/mL strength for 12 months by GPID or GPI-14 with a quantity limit of #1mL per 56 days.**

   If no, continue to #3.

3. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve all formulations of the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **100mg/mL: #1mL per 56 days.**
   - **200mg/2mL: #2mL per 28 days.**

   If no, continue to #4.

GUSELKUMAB

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Tremfya will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve all formulations of the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **100mg/mL: #1mL per 56 days.**
   - **200mg/2mL: #2mL per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **GUSELKUMAB (Tremfya)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
      4. Moderate to severe Crohn's disease (CD: a type of bowel disorder)

   B. If you have moderate to severe plaque psoriasis, renewal also requires:
      1. You have achieved or maintained clear or minimal disease or a decrease in PASI (Psoriasis Area and Severity Index: used to measure the severity and extent of psoriasis) of at least 50 percent or more while on therapy
      2. You will NOT use Tremfya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)

   C. If you have psoriatic arthritis, renewal also requires:
      1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
      2. You will NOT use Tremfya concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

HIGH CONCENTRATION OPIOID ORAL SOLUTIONS

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MORPHINE SULFATE	MORPHINE SULFATE		16063	GPI-14 (65100055102090)	
OXYCODONE HCL	OXYCODONE HCL		16281	GPI-14 (65100075101320)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of pain severe enough to require an opioid analgesic and for which alternative treatments are inadequate?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following?
   - The patient is enrolled in hospice
   - The patient is receiving palliative care or end-of-life care

   If yes, **approve the requested drug for a lifetime approval by GPID or GPI-14.**
   If no, continue to #3.

3. Does the patient meet **ALL** of the following criteria?
   - The patient has previous use of at least 60 mg oral morphine per day, 25 mcg transdermal fentanyl per hour, 30 mg oral oxycodone per day, 8 mg oral hydromorphone per day, 25 mg oral oxymorphone per day, 60 mg oral hydrocodone per day, or an equianalgesic dose of another opioid
   - The patient has trouble swallowing opioid tablets, capsules, or large volumes of liquid

   If yes, **approve the requested drug for 3 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **HIGH CONCENTRATION OPIOID ORAL SOLUTIONS (morphine sulfate, oxycodone hydrochloride)** requires the following rule(s) be met for approval:
   A. You have pain severe enough to require opioid analgesic and for which alternative treatments are inadequate

HISTRELIN-SUPPRELIN LA (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
HISTRELIN ACETATE	SUPPRELIN LA	21104		GPI-10 (3008004510)	BRAND = SUPPRELIN LA

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for gender dysphoria?

   If yes, **approve for 12 months by HICL or GPI-10 and override quantity limits.**
   If no, continue to #2.

2. Is the request for a female patient who has a diagnosis of central precocious puberty (CPP) and meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a pediatric endocrinologist
   - The patient has elevated levels of follicle-stimulating hormone (FSH) (level >4.0 mIU/mL) and luteinizing hormone (LH) (level > 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 8 years of age at the onset of CPP
   - There is documentation of pubertal staging using the Tanner scale for breast development (stage 2 or above) AND pubic hair growth (stage 2 or above)

   If yes, **approve for 12 months by NDC with a quantity limit of #1 per 12 months.**
   If no, continue to #3.

3. Is the request for a male patient who has a diagnosis of central precocious puberty (CPP) and meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a pediatric endocrinologist
   - The patient has elevated levels of follicle-stimulating hormone (FSH) (level >5.0 mIU/mL) and luteinizing hormone (LH) (level > 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 9 years of age at the onset of CPP
   - There is documentation of pubertal staging using the Tanner scale for genital development (stage 2 or above) AND pubic hair growth (stage 2 or above)

   If yes, **approve for 12 months by NDC with a quantity limit of #1 per 12 months.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

HISTRELIN-SUPPRELIN LA (NSA)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **HISTRELIN-SUPPRELIN LA** requires the following rule(s) be met for approval:

A. You have ONE of the following diagnoses:
   1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
   2. Central precocious puberty (CPP: early sexual development in girls and boys)

B. If you are female and have central precocious puberty, approval also requires:
   1. You are 2 years of age or older
   2. Therapy is prescribed by or in consultation with a pediatric endocrinologist (a type of hormone doctor)
   3. You have high levels of follicle-stimulating hormone (FSH: a type of hormone) (level greater than 4.0 mIU/mL) and luteinizing hormone (LH: a type of hormone) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   4. You are/were younger than 8 years of age when your condition started
   5. There is documentation of pubertal staging using the Tanner scale (scale of physical measurements of development based on external sex characteristics) for breast development (stage 2 or above) AND pubic hair growth (stage 2 or above)

C. If you are male and have central precocious puberty, approval also requires:
   1. You are 2 years of age or older
   2. Therapy is prescribed by or in consultation with a pediatric endocrinologist (a type of hormone doctor)
   3. You have high levels of follicle-stimulating hormone (FSH: a type of hormone) (level greater than 5.0 mIU/mL) and luteinizing hormone (LH: a type of hormone) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   4. You are/were younger than 9 years of age when your condition started
   5. There is documentation of pubertal staging using the Tanner scale (scale of physical measurements of development based on external sex characteristics) for genital development (stage 2 or above) AND pubic hair growth (stage 2 or above)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

HISTRELIN-SUPPRELIN LA (NSA)

GUIDELINES FOR USE (CONTINUED)

RENEWAL CRITERIA

NOTE: For the diagnosis of gender dysphoria, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of central precocious puberty (CPP) and meet **ALL** of the following criteria?
   - The Tanner scale staging at initial diagnosis of CPP has stabilized or regressed during three separate medical visits in the previous year
   - The patient has not reached the actual age which corresponds to their current pubertal age

   If yes, **approve for 12 months by NDC with a quantity limit of #1 per 12 months.**
   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **HISTRELIN-SUPPRELIN LA** requires the following rule(s) be met for renewal:
   A. You have central precocious puberty (CPP: early sexual development in girls and boys)
   B. Your Tanner scale staging (scale of physical measurements of development based on external sex characteristics) at initial diagnosis of CPP has stabilized or regressed (lowered) during three separate medical visits in the previous year
   C. You have not reached the actual age which corresponds to your current pubertal age

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

HYALURONATE

INITIAL CRITERIA (CONTINUED)

2. Is the request for Euflexxa, Synvisc, or Synvisc-One and the patient meets **ONE** of the following criteria?
   - The patient had a trial of or contraindication to an intra-articular steroid (e.g., methylprednisolone acetate, triamcinolone acetonide)
   - The patient had a trial of or contraindication to a topical NSAID (e.g., diclofenac)
   - The patient had a trial of or contraindication to an oral NSAID (e.g., meloxicam, diclofenac)
   - The patient had a trial of or contraindication to acetaminophen

   If yes, **approve the requested medication for 6 months as follows:**
   - **Euflexxa: Approve by NDC.**
   - **Synvisc, Synvisc-One: Approve by HICL or GPI-10.**

   If no, continue to #3.

3. Is the request for Durolane, Gel-One, Gelsyn-3, Genvisc 850, Hyalgan, Hymovis, Hymovis One, Monovisc, Orthovisc, Supartz FX, Triluron, Trivisc, Visco-3, Synojoynt, or Sodium Hyaluronate **AND** the patient meets the following criterion?
   - The patient had a trial of or contraindication to Euflexxa AND Synvisc or Synvisc-One

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to an intra-articular steroid (e.g., methylprednisolone acetate, triamcinolone acetonide)
   - The patient had a trial of or contraindication to a topical NSAID (e.g., diclofenac)
   - The patient had a trial of or contraindication to an oral NSAID (e.g., meloxicam, diclofenac)
   - The patient had a trial of or contraindication to acetaminophen

   If yes, **approve for 6 months by HICL or GPI-10.**If no, do not approve.

HYALURONATE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **HYALURONATE (Euflexxa, Gel-One, Gelsyn-3, Hyalgan, Hymovis, Hymovis One, Monovisc, Orthovisc, Supartz FX, Synojoynt, Synvisc, Synvisc-One, Genvisc 850, Visco-3, Trivisc, Durolane, Triluron, Sodium Hyaluronate)** requires the following rule(s) be met for approval:

A. You have osteoarthritis (a type of joint condition) of the knee
B. You are 21 years of age or older
C. You have failed a 6-week trial of non-pharmacologic (non-drug) therapy (such as education, exercise, use of insoles or braces, weight loss, physical therapy [exercises to restore health])
D. If the request is for Euflexxa, Synvisc, or Synvisc-One, approval also requires ONE of the following:
    1. You have tried or have a contraindication to (harmful for you to use) an intra-articular (injected within the joint) steroid (such as methylprednisolone acetate, triamcinolone acetonide)
    2. You have tried or have a contraindication to (harmful for you to use) a topical non- steroidal anti-inflammatory drug (NSAID) (such as diclofenac)
    3. You have tried or have a contraindication to (harmful for you to use) an oral non- steroidal anti-inflammatory drug (NSAID) (such as meloxicam, diclofenac)
    4. You have tried or have a contraindication to (harmful for you to use) acetaminophen
E. If the request is for Durolane, Gel-One, Gelsyn-3, Genvisc 850, Hyalgan, Hymovis, Hymovis One, Monovisc, Orthovisc, Supartz FX, Triluron, Trivisc, Visco-3, Synojoynt, or Sodium Hyaluronate, approval also requires:
    1. You have tried or have a contraindication to (harmful for you to use) Euflexxa AND Synvisc or Synvisc-One
    2. You meet ONE of the following:
        a. You have tried or have a contraindication to (harmful for you to use) an intra-articular (injected within the joint) steroid (such as methylprednisolone acetate, triamcinolone acetonide)
        b. You have tried or have a contraindication to (harmful for you to use) a topical non- steroidal anti-inflammatory drug (NSAID) (such as diclofenac)
        c. You have tried or have a contraindication to (harmful for you to use) an oral non- steroidal anti-inflammatory drug (NSAID) (such as meloxicam, diclofenac)
        d. You have tried or have a contraindication to (harmful for you to use) acetaminophen

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

HYALURONATE

RENEWAL CRITERIA

1. Has the patient received previous treatment on the same knee with Synvisc, Synvisc-One, Hyalgan, Euflexxa, Supartz FX, Synojoynt, Gel-One, Monovisc, Orthovisc, Hymovis, Hymovis One, Gelsyn-3, Genvisc 850, Visco-3, Trivisc, Triluron, Sodium Hyaluronate, OR Durolane?

   If yes, continue to #2.
   If no, refer to Initial Criteria.

2. Has it been at least 6 months since the last treatment with the requested medication?

   If yes, **approve for 6 months by HICL or GPI-10.**If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **HYALURONATE (Euflexxa, Gel-One, Gelsyn-3, Hyalgan, Hymovis, Hymovis One, Monovisc, Orthovisc, Supartz FX, Synojoynt, Synvisc, Synvisc-One, Genvisc 850, Visco-3, Trivisc, Durolane, Triluron, Sodium Hyaluronate)** requires the following rule(s) be met for renewal:
   A. It has been at least 6 months since your last treatment on the same knee

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

HYDROXYUREA-XROMI

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
HYDROXYUREA	XROMI	03897		GPI-10 (8280303000)	BRAND = XROMI

GUIDELINES FOR USE

1. Does the patient have a diagnosis of sickle cell anemia (ICD-10 Group D57.0) and meet **ALL** of the following criteria?
   - The patient is 6 months to 17 years of age
   - The patient has recurrent moderate to severe painful crises
   - The patient has a contraindication to or is unable to swallow generic hydroxyurea capsules

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **HYDROXYUREA-XROMI** requires the following rule(s) be met for approval:
   A. You have sickle cell anemia (a type of blood disorder)
   B. You are 6 months to 17 years of age
   C. You have recurrent moderate to severe painful crises (repeated episodes of extreme pain)
   D. You have a contraindication to (harmful for you to use) or are unable to swallow generic hydroxyurea capsules

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Xromi.

STANDARD COMMERCIAL DRUG FORMULARY PRIOR AUTHORIZATION GUIDELINES

IBALIZUMAB-UIYK (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IBALIZUMAB-UIYK	TROGARZO	44791		GPI-10 (1210224030)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of human immunodeficiency virus type 1 (HIV-1) infection and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The requested medication will be used in combination with other antiretroviral(s)
   - The patient is treatment experienced
   - The patient has multidrug-resistant HIV-1 infection
   - The patient is failing their current antiretroviral regimen

   If yes, **approve for 12 months by HICL or GPI-10 as follows:**
   INITIAL REQUEST:
   - **FIRST APPROVAL: Approve for 1 month with a quantity limit of #18.62 mL per 28 days.**
   - **SECOND APPROVAL: Approve for 11 months with a quantity limit of #10.64mL per 28 days. (Please enter start date 3 WEEKS AFTER the START date of first approval).**

   SUBSEQUENT/CONTINUATION REQUEST:
   - **Approve for 12 months by HICL or GPI-10 with a quantity limit of #10.64mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IBALIZUMAB-UIYK (Trogarzo)** requires the following rule(s) be met for approval:
   A. You have human immunodeficiency virus type 1 (HIV-1) infection (a virus that attacks the body's immune system and if untreated, can lead to AIDS [acquired immunodeficiency syndrome])
   B. You are 18 years of age or older
   C. The requested medication will be used in combination with other antiretroviral(s) (class of medication used to treat HIV)
   D. You are treatment experienced (previously treated)
   E. You have multidrug-resistant HIV-1 infection (your virus is resistant to more than one HIV medication)
   F. You are failing your current antiretroviral regimen

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

IBREXAFUNGERP

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IBREXAFUNGERP CITRATE	BREXAFEMME	47416		GPI-10 (1150704010)	

GUIDELINES FOR USE

1. Is the request for the treatment of vulvovaginal candidiasis (VVC) and the patient meets **ALL** of the following criteria?
   - The patient is a post-menarchal female
   - The patient had a trial of or contraindication to oral fluconazole AND an intravaginal azole (e.g., terconazole cream)

   If yes, **approve for 30 days by HICL or GPI-10 for one fill with a quantity limit of #4.**
   If no, continue to #2.

2. Is the request for the reduction in the incidence of recurrent vulvovaginal candidiasis (RVVC) and the patient meets **ALL** of the following criteria?
   - The patient is a post-menarchal female
   - The patient had a trial of or contraindication to oral fluconazole (the patient had a breakthrough episode of VVC while taking fluconazole 150 mg weekly)
   - The patient is NOT currently on oteseconazole for RVVC

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Has the patient previously received Brexafemme?

   If yes, continue to #5.
   If no, continue to #4.

4. Has the patient had 3 or more episodes of VVC in the past 12 months?

   If yes, **approve for 6 months by HICL or GPI-10 for 6 fills total with a quantity limit of #4 per 30 days.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

GUIDELINES FOR USE (CONTINUED)

5. Does the patient meet **ALL** of the following criteria?
   - The patient has successfully completed a course of Brexafemme for prevention of RVVC
   - The patient is either being treated or has just completed treatment for a new recurrence of VVC

   If yes, **approve for 6 months by HICL or GPI-10 for 6 fills total with a quantity limit of #4 per 30 days.**

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IBREXAFUNGERP (Brexafemme)** requires the following rule(s) be met for approval:

   A. The request is for ONE of the following:
      1. Treatment of vulvovaginal candidiasis (VVC: vaginal yeast infection)
      2. Reduction in the incidence of recurrent vulvovaginal candidiasis (RVVC: repeated vaginal yeast infection)

   B. If you are using Brexafemme for the treatment of vulvovaginal candidiasis, approval also requires:
      1. You are a post-menarchal (you have started having your period) female
      2. You have tried or have a contraindication to (harmful for) oral fluconazole AND an intravaginal azole (type of drug that is inserted into the vagina and used to treat yeast infections such as terconazole cream)

   C. If you are using Brexafemme for the reduction in the incidence of recurrent vulvovaginal candidiasis, approval also requires:
      1. You are a post-menarchal (you have started having your period) female
      2. You have tried or have a contraindication to (harmful for) oral fluconazole (you had a breakthrough episode of VVC while taking fluconazole 150 mg weekly)
      3. You are NOT currently on oteseconazole for RVVC
      4. You meet ONE of the following:
         a. You have not previously received Brexafemme AND you had 3 or more episodes of RVVC in the past 12 months
         b. You have been previously treated with Brexafemme and meet ALL of the following:
            i. You have successfully completed a course of Brexafemme for prevention of RVVC
            ii. You are either being treated or have just completed treatment for a new recurrence of VVC

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IBRUTINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IBRUTINIB	IMBRUVICA	40745		GPI-10 (2153213300)	

GUIDELINES FOR USE

1. Is the request for Imbruvica (ibrutinib) 560 mg tablet?

   If yes, do not approve. (**NOTE:** This strength does not have an FDA-approved indication.)
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) or small lymphocytic lymphoma (SLL) (ICD-10 Group C83.0) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **70 mg capsule: #1 per day.**
   - **140 mg capsule: #2 per day.**
   - **140 mg tablet: #1 per day.**
   - **280 mg tablet: #1 per day.**
   - **420 mg tablet: #1 per day.**
   - **70 mg/mL oral suspension: #7.2 mL per day.**

   If no, continue to #3.

3. Does the patient have a diagnosis of Waldenstrom's macroglobulinemia (WM) (ICD-10 C88.0) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **70 mg capsule: #1 per day.**
   - **140 mg capsule: #2 per day.**
   - **140 mg tablet: #1 per day.**
   - **280 mg tablet: #1 per day.**
   - **420 mg tablet: #1 per day.**
   - **70 mg/mL oral suspension: #7.2 mL per day.**

   If no, continue to #4.

IBRUTINIB

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have a diagnosis of chronic graft-versus-host disease (cGVHD) (ICD-10 D89.811, D89.812) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has failed at least ONE line of systemic therapy (e.g., prednisone, methotrexate, mycophenolate mofetil)
   - Imbruvica will NOT be used concurrently with Jakafi (ruxolitinib), Niktimvo (axatilimab-csfr), or Rezurock (belumosudil)

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **70 mg capsule: #1 per day.**
   - **140 mg capsule: #2 per day.**
   - **140 mg tablet: #1 per day.**
   - **280 mg tablet: #1 per day.**
   - **420 mg tablet: #1 per day.**
   - **70 mg/mL oral suspension: #7.2 mL per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IBRUTINIB (Imbruvica)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Chronic lymphocytic leukemia (CLL: a type of blood cancer)
      2. Small lymphocytic lymphoma (SLL: a type of blood cancer)
      3. Waldenstrom's macroglobulinemia (WM: a type of blood cancer)
      4. Chronic graft-versus-host disease (cGVHD: a type of long-term immune disorder)

   B. If you have chronic lymphocytic leukemia, small lymphocytic lymphoma, or Waldenstrom's macroglobulinemia, approval also requires:
      1. You are 18 years of age or older

   C. If you have chronic graft-versus-host disease, approval also requires:
      1. You are 1 year of age or older
      2. You have failed at least ONE line of systemic therapy (treatment that targets the entire body, such as prednisone, methotrexate, mycophenolate mofetil)
      3. You will NOT use Imbruvica concurrently (at the same time) with Jakafi (ruxolitinib), Niktimvo (axatilimab-csfr), or Rezurock (belumosudil)

   NOTE: Requests for Imbruvica (ibrutinib) 560 mg tablet will not be approved. This strength does not have a Food and Drug Administration (FDA)-approved indication.

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

ICATIBANT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ICATIBANT ACETATE	FIRAZYR, SAJAZIR, ICATIBANT	35962		GPI-10 (8582004010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The requested medication will be used for the treatment of acute attacks of hereditary angioedema
- Therapy is prescribed by or in consultation with an allergist, immunologist, hematologist, or pulmonologist
- The requested medication will NOT be used concurrently with other agents used for the treatment of acute HAE attacks (e.g., Berinert [C1 esterase inhibitor], Ruconest [C1 esterase inhibitor], Kalbitor [ecallantide])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient have Type I or II HAE **AND** meet the following criterion?
- The diagnosis is confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q

If yes, **approve for 12 months (up to 12 fills) by HICL or GPI-10 with a quantity limit of #18mL (#6 syringes) per fill.**
If no, continue to #3.

3. Does the patient have HAE-nC1INH (Type III HAE) as confirmed by **ALL** of the following criteria?
- The patient has recurrent, non-urticarial angioedema involving the skin, gastrointestinal tract, or airway, consistent with bradykinin-mediated HAE AND the attacks cannot be explained by histaminergic/urticarial angioedema
- Other causes of angioedema have been excluded, including ACE-inhibitor/ARB-associated angioedema, acquired C1-INH deficiency, and mast-cell/histaminergic angioedema

If yes, **approve for 12 months (up to 12 fills) by HICL or GPI-10 with a quantity limit of #18mL (#6 syringes) per fill.**

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

ICATIBANT

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ICATIBANT (Firazyr, Sajazir)** requires the following rule(s) be met for approval:

A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
B. You are 18 years of age or older
C. The requested medication will be used for the treatment of acute (sudden and severe) attacks of hereditary angioedema (HAE: a type of gene condition with severe body swelling)
D. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), immunologist (a type of immune system doctor), hematologist (a type of blood doctor), or pulmonologist (lung/breathing doctor)
E. You will NOT use the requested medication concurrently (at the same time) with other medications used for the treatment of acute hereditary angioedema (HAE: a type of gene condition with severe body swelling) attacks (such as Berinert [C1 esterase inhibitor], Ruconest [C1 esterase inhibitor], Kalbitor [ecallantide])
F. You meet ONE of the following:
    1. You have Type I or II hereditary angioedema (a type of gene condition with severe body swelling), as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q (types of lab tests)
    2. You have HAE-nC1INH (hereditary angioedema with normal C1 inhibitor) (Type III hereditary angioedema: a type of gene condition with severe body swelling) as confirmed by ALL of the following:
        a. You have recurrent (condition continues to return), non-urticarial angioedema (a type of swelling without hives) involving the skin, gastrointestinal tract, or airway, consistent with bradykinin-mediated hereditary angioedema (a type of gene condition with severe body swelling) AND the attacks cannot be explained by histaminergic/urticarial angioedema (a type of swelling due to an allergic reaction)
        b. Other causes of angioedema (a type of swelling) have been ruled out, including angiotensin-converting enzyme (ACE)-inhibitor/angiotensin receptor blocker (ARB)-associated angioedema (a type of swelling due to types of medications), acquired C1-INH deficiency (a type of condition that causes swelling), and mast-cell/histaminergic angioedema (a type of swelling due to an allergic reaction)

ICATIBANT

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?
- The patient has experienced a reduction in the severity or duration of HAE attacks
- The requested medication will NOT be used concurrently with other agents used for the treatment of acute HAE attacks (e.g., Berinert [C1 esterase inhibitor], Ruconest [C1 esterase inhibitor], Kalbitor [ecallantide])

If yes, **approve for 12 months (up to 12 fills) by HICL or GPI-10 with a quantity limit of #18mL (#6 syringes) per fill.**

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ICATIBANT (Firazyr, Sajazir)** requires the following rule(s) be met for renewal:
A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
B. You have experienced a reduction (decrease) in the severity or duration of hereditary angioedema (HAE: a type of gene condition with severe body swelling) attacks
C. You will NOT use the requested medication concurrently (at the same time) with other medications used for the treatment of acute hereditary angioedema (HAE: a type of gene condition with severe body swelling) attacks (such as Berinert [C1 esterase inhibitor], Ruconest [C1 esterase inhibitor], Kalbitor [ecallantide])

ICOTROKINRA

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ICOTROKINRA HCL	ICOTYDE	51213		GPI-10 (9025055020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - Icotyde will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, TYK2 inhibitor [e.g., Sotyktu [deucravacitinib], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
   - The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic and is switching to Icotyde
   - The patient has psoriasis covering 3 percent or more of body surface area (BSA)
   - The patient has psoriatic lesions affecting the hands, feet, genital area, face, or scalp

   If yes, **approve for 4 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ICOTROKINRA

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ICOTROKINRA (Icotyde)** requires the following rule(s) be met for approval:

A. You have moderate to severe plaque psoriasis (PsO: a type of skin condition)
B. You are 12 years of age or older
C. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
D. You will NOT use Icotyde concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, TYK2 [tyrosine kinase 2] inhibitor [such as Sotyktu (deucravacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
E. You meet ONE of the following:
    1. You have had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
    2. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of medication that decreases the body's immune response) AND PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
    3. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication
F. You meet ONE of the following:
    1. You were previously stable on another biologic and are switching to Icotyde
    2. You have psoriasis (a type of skin condition) covering 3 percent or more of body surface area (BSA)
    3. You have psoriatic lesions (rashes) affecting the hands, feet, genital area, face, or scalp

ICOTROKINRA

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more while on therapy
   - Icotyde will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, TYK2 inhibitor [e.g., Sotyktu [deucravacitinib], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ICOTROKINRA (Icotyde)** requires the following rule(s) be met for renewal:
   A. You have moderate to severe plaque psoriasis (PsO: a type of skin condition)
   B. You have achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index: a tool for evaluating the severity of psoriasis [a type of skin condition]) of at least 50 percent or more while on therapy
   C. You will NOT use Icotyde concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, TYK2 [tyrosine kinase 2] inhibitor [such as Sotyktu (deucravacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)

RATIONALE

ILOPROST TROMETHAMINE	VENTAVIS	26287		GPI-10 (4017006000)	BRAND = VENTAVIS

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pulmonary arterial hypertension (PAH) (WHO Group 1) (ICD- 10 I27.0, Group I27.2) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a cardiologist or pulmonologist

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's PAH diagnosis confirmed by right heart catheterization with **ALL** of the following parameters?
   - Mean pulmonary artery pressure (PAP) of greater than 20 mmHg
   - Pulmonary capillary wedge pressure (PCWP) of less than or equal to 15 mmHg
   - Pulmonary vascular resistance (PVR) of greater than 2 Wood units (WU)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Has the patient had a trial of or contraindication to **TWO** of the following clinical standard of care agents from different drug classes?
   - Oral endothelin receptor antagonist (e.g., Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
   - Oral phosphodiesterase-5 inhibitor (e.g., Revatio [sildenafil], Adcirca [tadalafil])
   - Oral cGMP stimulator (e.g., Adempas [riociguat])
   - IV/SQ prostacyclin (e.g., Flolan [epoprostenol], Remodulin [treprostinil])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ILOPROST

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ILOPROST (Ventavis)** requires the following rule(s) be met for approval:

A. You have pulmonary arterial hypertension (PAH: a type of heart and lung condition) (World Health Organization [WHO] Group 1)
B. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor) or pulmonologist (lung/breathing doctor)
C. Your pulmonary arterial hypertension is confirmed by ALL of the following lab values by putting a catheter (narrow flexible tube) into the right side of your heart:
    1. Mean pulmonary artery pressure (PAP) greater than 20 mmHg
    2. Pulmonary capillary wedge pressure (PCWP) less than or equal to 15 mmHg
    3. Pulmonary vascular resistance (PVR) greater than 2 Wood units
D. You have tried or have a contraindication to (harmful for you to use) TWO of the following clinical standard of care medications from different drug classes:
    1. Oral endothelin receptor antagonist (such as Letairis [ambrisentan], Tracleer [bosentan], Opsumit [macitentan])
    2. Oral phosphodiesterase-5 inhibitor for PAH (such as Revatio [sildenafil], Adcirca [tadalafil])
    3. Oral cGMP stimulator (such as Adempas [riociguat])
    4. Intravenous or subcutaneous prostacyclin (such as Flolan [epoprostenol], Remodulin [treprostinil])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IMATINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IMATINIB MESYLATE	GLEEVEC, IMKELDI, IMATINIB MESYLATE	22096		GPI-10 (2153183510)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of Philadelphia chromosome positive chronic myeloid leukemia (Ph+ CML) (ICD-10 Group C92.1) and meet **ONE** of the following criteria?
   - The Ph+ CML is in chronic phase AND the patient is newly diagnosed (e.g., starting or previously started the requested treatment at the time of diagnosis)
   - The Ph+ CML is in blast crisis (BC), accelerated phase (AP), or chronic phase (CP), AND the patient has failed interferon-alpha therapy

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ALL** of the following criteria?
   - The patient has NOT received previous treatment with another tyrosine kinase inhibitor [e.g., Tasigna (nilotinib), Sprycel (dasatinib), Bosulif (bosutinib), Iclusig (ponatinib)]
   - The patient had a mutational analysis prior to initiation of therapy AND the requested medication is appropriate based on the NCCN guideline table for treatment recommendations based on BCR-ABL1 mutation profile *(Please see header CML-5 of the current NCCN guidelines)*

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Is the request for Gleevec (imatinib) tablet?

   If yes, **approve Gleevec (imatinib) for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **400mg: #2 per day.**
   - **100mg: #6 per day.**

   If no, continue to #20.

4. Does the patient have a diagnosis of Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL) (ICD-10 Group C91.0)?

   If yes, continue to #5.
   If no, continue to #7.

GUIDELINES FOR USE (CONTINUED)

5. Does the patient meet **ONE** of the following criteria?
   - The patient is 18 years of age or older AND has relapsed or refractory Ph+ ALL
   - The patient is newly diagnosed (e.g., starting or previously started the requested treatment at the time of diagnosis) AND the requested medication will be used in combination with chemotherapy

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Is the request for Gleevec (imatinib) tablet?

   If yes, **approve Gleevec (imatinib) for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **400mg: #1 per day.**
   - **100mg: #6 per day.**

   If no, continue to #20.

7. Does the patient have a diagnosis of a myelodysplastic/myeloproliferative disease (MDS/MPD) (ICD-10 C94.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's disease is associated with PDGFR (platelet-derived growth factor receptor) gene re-arrangements

   If yes, continue to #8.
   If no, continue to #9.

8. Is the request for Gleevec (imatinib) tablet?

   If yes, **approve Gleevec (imatinib) 400mg for 12 months by GPID or GPI-14 with a quantity limit of #1 per day.**

   If no, continue to #20.

IMATINIB

GUIDELINES FOR USE (CONTINUED)

9. Does the patient have a diagnosis of aggressive systemic mastocytosis (ASM) (ICD-10 C96.21) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's disease is without the D816V c-Kit mutation or the c-Kit mutational status is unknown

   If yes, continue to #10.
   If no, continue to #11.

10. Is the request for Gleevec (imatinib) tablet?

    If yes, **approve Gleevec (imatinib) for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
    - **400mg: #1 per day.**
    - **100mg: #3 per day.**

    If no, continue to #20.

11. Does the patient have a diagnosis of hypereosinophilic syndrome (HES) (ICD-10 Group D72.11) and/or chronic eosinophilic leukemia (CEL) (ICD-10 C94.8) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #12.
    If no, continue to #13.

12. Is the request for Gleevec (imatinib) tablet?

    If yes, **approve Gleevec (imatinib) for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
    - **400mg: #1 per day.**
    - **100mg: #3 per day.**

    If no, continue to #20.

13. Does the patient have a diagnosis of unresectable, recurrent, and/or metastatic dermatofibrosarcoma protuberans (DFSP) (ICD-10 C44.99) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #14.
    If no, continue to #15.

IMATINIB

GUIDELINES FOR USE (CONTINUED)

14. Is the request for Gleevec (imatinib) tablet?

    If yes, **approve Gleevec (imatinib) for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
    - **400mg: #2 per day.**
    - **100mg: #6 per day.**

    If no, continue to #20.

15. Does the patient have a diagnosis of gastrointestinal stromal tumor (GIST) (ICD-10 Group C49.A) **AND** meet the following criterion?
    - The patient's tumor is Kit (CD117) positive

    If yes, continue to #16.
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

16. Does the patient meet **ONE** of the following criteria?
    - The patient's cancer is unresectable and/or metastatic malignant
    - The patient is 18 years of age or older AND the requested medication will be used as adjuvant treatment following complete gross resection

    If yes, continue to #17.
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

17. Is the request for Gleevec (imatinib) tablet?

    If yes, continue to #18.
    If no, continue to #20.

18. Is the request for a dosage of 400mg twice daily?

    If yes, continue to #19.
    If no, **approve Gleevec (imatinib) as follows:**
    - **Adjuvant GIST treatment: approve 400mg for 36 months by GPID or GPI-14 with a quantity limit of #1 per day.**
    - **Unresectable and/or metastatic malignant GIST: approve 400mg for 12 months by GPID or GPI-14 with a quantity limit of #1 per day.**

IMATINIB

GUIDELINES FOR USE (CONTINUED)

19. Has the patient tried Gleevec (imatinib) 400mg once daily **OR** does the patient have GIST tumor expressing a KIT exon 9 mutation?

    If yes, **approve Gleevec (imatinib) as follows:**
    - **Adjuvant GIST treatment: approve 400mg for 36 months by GPID or GPI-14 with a quantity limit of #2 per day.**
    - **Unresectable and/or metastatic malignant GIST: approve 400mg for 12 months by GPID or GPI-14 with a quantity limit of #2 per day.**

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

20. Is the request for Imkeldi 80mg/mL solution **AND** the patient meets the following criterion?
    - The patient is unable to swallow generic imatinib tablets

    If yes, **approve Imkeldi by GPID or GPI-14 with a quantity limit of #280mL per 28 days as follows:**
    - **Adjuvant GIST treatment: approve for 36 months.**
    - **All other indications: approve for 12 months.**

    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **IMATINIB (Gleevec, Imkeldi)** requires the following rule(s) be met for approval:
    A. You have ONE of the following:
        1. Philadelphia chromosome positive chronic myeloid leukemia (Ph+ CML: a type of blood cancer)
        2. Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL: a type of blood cancer)
        3. Myelodysplastic/myeloproliferative disease (MDS/MPD: a type of blood cancer)
        4. Aggressive systemic mastocytosis (ASM: a type of blood disorder)
        5. Hypereosinophilic syndrome (HES) and/or chronic eosinophilic leukemia (CEL) (types of inflammatory cancer)
        6. Dermatofibrosarcoma protuberans (DFSP: a type of rare skin tumor)
        7. Gastrointestinal stromal tumor (GIST: type of digestive tumor)
    B. If the request is for Imkeldi solution, approval also requires that you are unable to swallow generic imatinib tablets

    (Denial text continued on next page)

IMATINIB

GUIDELINES FOR USE (CONTINUED)

C. If you have Philadelphia chromosome positive chronic myeloid leukemia (Ph+ CML), approval also requires:
1. You meet ONE of the following:
   a. Your Ph+ CML is in chronic phase AND you are newly diagnosed (such as you are starting or previously started the requested treatment at the time your condition was identified)
   b. Your Ph+ CML is in blast crisis, accelerated phase, or chronic phase after failure of interferon-alpha therapy
2. You have NOT received previous treatment with another tyrosine kinase inhibitor (such as Tasigna [nilotinib], Sprycel [dasatinib], Bosulif [bosutinib], Iclusig [ponatinib])
3. You had a mutational analysis (a type of lab test) prior to the start of therapy AND the requested medication is appropriate based on the National Comprehensive Cancer Network (NCCN) guideline table for treatment recommendations based on BCR-ABL1 mutation (breakpoint cluster region-Abelson murine leukemia 1: a type of abnormal gene) profile

D. If you have Philadelphia chromosome positive acute lymphoblastic leukemia (Ph+ ALL), approval also requires:
1. You meet ONE of the following:
   a. You are 18 years of age or older, AND your Ph+ ALL has relapsed or is refractory (cancer that has returned or has not responded to treatment)
   b. You are newly diagnosed (such as you are starting or previously started the requested treatment at the time your condition was identified) AND the requested medication will be used in combination with chemotherapy (a type of cancer treatment)

E. If you have myelodysplastic/myeloproliferative disease, approval also requires:
1. You are 18 years of age or older
2. Your disease is associated with PDGFR (platelet-derived growth factor receptor) gene re-arrangements (a type of gene mutation)

F. If you have aggressive systemic mastocytosis, approval also requires:
1. You are 18 years of age or older
2. Your disease is without the D816V c-Kit mutation (abnormal change in a type of gene) or the c-Kit mutational status is unknown

G. If you have hypereosinophilic syndrome and/or chronic eosinophilic leukemia, approval also requires:
1. You are 18 years of age or older

H. If you have dermatofibrosarcoma protuberans, approval also requires:
1. You are 18 years of age or older
2. Your cancer is unresectable, recurrent, and/or metastatic (cancer that cannot be completely removed by surgery, has returned, and/or has spread to other parts of the body)

(Denial text continued on next page)

CONTINUED ON NEXT PAGE

IMATINIB

GUIDELINES FOR USE (CONTINUED)

I. If you have gastrointestinal stromal tumor (GIST), approval also requires:
1. Your tumor is Kit (CD117: a type of protein) positive
2. You meet ONE of the following:
   a. Your cancer is unresectable and/or metastatic malignant (cannot be completely removed by surgery and/or has spread to other parts of the body)
   b. You are 18 years of age or older AND the requested medication will be used as adjuvant (additional) treatment following complete gross resection (removal by surgery)
3. For requests of Gleevec 400mg twice daily, approval requires a trial of Gleevec 400mg once daily OR a gastrointestinal stromal tumor (GIST: type of digestive tumor) expressing a KIT exon 9 mutation (abnormal change in a type of gene)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of advanced or metastatic breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The disease is estrogen receptor (ER)-positive, human epidermal growth factor receptor 2 (HER2)-negative with estrogen receptor-1 (ESR1) gene mutation(s)
   - The patient has had disease progression following at least ONE line of endocrine therapy (e.g., anastrozole, letrozole)
   - Therapy is prescribed by or in consultation with an oncology specialist
   - Inluriyo will NOT be used concurrently with another selective estrogen receptor degrader (SERD) (e.g., Orserdu [elacestrant], Faslodex [fulvestrant], Veppanu [vepdegestrant])

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT:

   Our guideline named **IMLUNESTRANT (Inluriyo)** requires the following rule(s) be met for approval:
   A. You have advanced or metastatic breast cancer (a type of cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
   B. Your disease is estrogen receptor (ER: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative with estrogen receptor-1 (ESR1) gene mutation(s) (abnormal changes in a type of gene)
   C. You have had disease progression (worsening) following at least ONE line of endocrine therapy (a type of hormone therapy such as anastrozole, letrozole)
   D. Therapy is prescribed by or in consultation with an oncology specialist (a type of cancer doctor)
   E. You will NOT use Inluriyo concurrently (at the same time) with a selective estrogen receptor degrader (SERD: a type of hormone therapy such as Orserdu [elacestrant], Faslodex [fulvestrant], Veppanu [vepdegestrant])

IMLUNESTRANT

RENEWAL CRITERIA

1. Does the patient have a diagnosis of advanced or metastatic breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The disease is estrogen receptor (ER)-positive, human epidermal growth factor receptor 2 (HER2)-negative with estrogen receptor-1 (ESR1) gene mutation(s)
   - The patient has demonstrated clinical benefit while on therapy as shown by a partial or complete response OR stable disease
   - Inluriyo will NOT be used concurrently with another selective estrogen receptor degrader (SERD) (e.g., Orserdu [elacestrant], Faslodex [fulvestrant], Veppanu [vepdegestrant])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT:

   Our guideline named **IMLUNESTRANT (Inluriyo)** requires the following rule(s) be met for renewal:
   A. You have advanced or metastatic breast cancer (a type of cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
   B. Your disease is estrogen receptor (ER: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative with estrogen receptor-1 (ESR1) gene mutation(s) (abnormal changes in a type of gene)
   C. You have experienced clinical benefit while on therapy as shown by a partial (cancer has shrunk but did not go away) or complete response (cancer went away completely) OR stable disease (disease has stopped growing or spreading)
   D. You will NOT use Inluriyo concurrently (at the same time) with a selective estrogen receptor degrader (SERD: a type of hormone therapy such as Orserdu [elacestrant], Faslodex [fulvestrant], Veppanu [vepdegestrant])

IMMUNE GLOBULIN - GAMASTAN (S-D)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IMMUNE GLOBUL G (IGG)/GLYCINE	GAMASTAN, GAMASTAN S-D		43715	GPI-10 (1910002000)	

GUIDELINES FOR USE

1. Is the requested medication being used for the prophylaxis or passive immunization of hepatitis A, measles, varicella, or rubella?

   If yes, **approve the requested agent for 12 months by GPID or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IMMUNE GLOBULIN - GAMASTAN (S-D)** requires the following rule(s) be met for approval:
   A. You are using the requested drug for prophylaxis (prevention) or passive immunization (immune response where antibodies are obtained from outside the body) of hepatitis A, measles, varicella, or rubella (types of viral infections)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Gamastan, Gamastan S-D.

GUIDELINES FOR USE

1. Does the patient have **ONE** of the following diagnoses?
   - Primary immunodeficiency disease (PID) (ICD-10 Group D80, Group D81 except Group D81.3 and Group D81.81; ICD-10 D81.82, ICD-10 D81.89, Group D82 except ICD-10 D82.3; Group D83)
   - Immune (idiopathic) thrombocytopenic purpura (ITP) (ICD-10 D69.3)
   - Chronic inflammatory demyelinating polyneuropathy (CIDP) (ICD-10 G61.81)
   - Multifocal motor neuropathy (MMN) (ICD-10 G61.82)
   - Kawasaki syndrome (ICD-10 M30.3)
   - B-cell chronic lymphocytic leukemia (CLL) with hypogammaglobulinemia
   - Autoimmune hemolytic anemia (AIHA) (ICD-10 Group D59.1)
   - Pure red cell aplasia (PRCA) (ICD-10 D61.01)
   - Guillain-Barre syndrome (GBS) (ICD-10 G61.0)
   - Myasthenia gravis (ICD-10 Group G70.0)
   - Autoimmune Graves' ophthalmopathy (ICD-10 E05.00)
   - Cytomegalovirus-induced pneumonitis (ICD-10 B25.0) related to a solid organ transplant
   - Prevention of bacterial infection in an HIV-infected child
   - Reduction of secondary infections in pediatric HIV infections
   - Dermatomyositis or polymyositis (ICD-10 M36.0, Group M33)
   - Autoimmune uveitis (birdshot retinochoroidopathy)
   - Lambert-Eaton myasthenic syndrome (ICD-10 G70.80)

IMMUNE GLOBULIN - IV

GUIDELINES FOR USE (CONTINUED)

- IgM anti-myelin-associated glycoprotein paraprotein-associated peripheral neuropathy
- Stiff-man syndrome (ICD-10 G25.82)
- Neonatal sepsis (ICD-10 Group P36)
- Rotaviral enterocolitis (ICD-10 A08.0)
- Toxic shock syndrome (ICD-10 A48.3)
- Enteroviral meningoencephalitis (ICD-10 A87.0, A85.0)
- Toxic epidermal necrolysis (ICD-10 L51.2) or Stevens-Johnson syndrome (ICD-10 L51.1, L51.3)
- Autoimmune mucocutaneous blistering disease (AMBD) (such as pemphigus vulgaris, bullous pemphigoid, mucous membrane pemphigoid, or epidermolysis bullosa acquisita)

  If yes, continue to #2.
  If no, do not approve.
  DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the request for Gammagard S-D, Octagam or Privigen?

   If yes, **approve the requested medication for 12 months as follows:**
   - **Gammagard S-D: Approve all strengths by GPID or GPI-14.**
   - **Octagam: Approve by HICL or NDC (Medi-Span).**
   - **Privigen: Approve by NDC (FDB or Medi-Span).**

   If no, continue to #3.

3. Is the request for Alyglo, Asceniv, Bivigam, Flebogamma DIF, Gammaplex, Panzyga, Qivigy, or Yimmugo?

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

IMMUNE GLOBULIN - IV

GUIDELINES FOR USE (CONTINUED)

4. Has the patient had a trial of or contraindication to **TWO** of the following preferred agents: Gammagard S-D, Gammagard (Liquid), Gammagard Liquid ERC, Gamunex-C, Octagam, Privigen?

   If yes, **approve the requested medication for 12 months as follows:**
   - **Alyglo: Approve by HICL or GPI-10.**
   - **Asceniv: Approve by HICL or GPI-10.**
   - **Bivigam: Approve by GPID or GPI-10.**
   - **Flebogamma DIF: Approve by GPID or GPI-10.**
   - **Gammaplex: Approve by GPID or GPI-10.**
   - **Panzyga: Approve by HICL or GPI-10.**
   - **Qivigy: Approve by HICL or GPI-10.**
   - **Yimmugo: Approve by HICL or GPI-10.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IMMUNE GLOBULIN - IV (Alyglo, Asceniv, Bivigam, Flebogamma DIF, Gammagard S-D, Gammaplex, Octagam, Panzyga, Privigen, Qivigy, Yimmugo)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Primary immunodeficiency disease (genetic disease where the immune system is weak)
      2. Immune (idiopathic) thrombocytopenic purpura (a type of blood disorder)
      3. Chronic inflammatory demyelinating polyneuropathy (a nerve disorder with increasing weakness and loss of sensory function in the legs and arms)
      4. Multifocal motor neuropathy (MMN: a nerve disorder with increasing muscle weakness)
      5. Kawasaki syndrome (inflammation in the walls of blood vessels in the body)
      6. B-cell chronic lymphocytic leukemia (CLL: blood and bone marrow cancer of immune cells) with hypogammaglobulinemia (low levels of immunoglobulins)
      7. Autoimmune hemolytic anemia (AIHA: body destroys red blood cells more rapidly than it produces them)
      8. Pure red cell aplasia (PRCA: bone marrow stops making red blood cells)
      9. Guillain-Barre syndrome (GBS: immune system attacks the nerves)
      10. Myasthenia gravis (a type of chronic autoimmune disorder)

   (Denial text continued on next page)

CONTINUED ON NEXT PAGE

GUIDELINES FOR USE (CONTINUED)

11. Autoimmune Graves' ophthalmopathy (a type of eye disease)
12. Cytomegalovirus-induced pneumonitis (lung tissue inflammation caused by a virus) related to a solid organ transplant
13. Prevention of bacterial infection in an HIV (human immunodeficiency virus: an immune system disease caused by a virus)- infected child
14. Reduction of secondary infections in pediatric HIV (human immunodeficiency virus: an immune system disease caused by a virus) infections
15. Dermatomyositis (a type of muscle and skin disorder) or polymyositis (a type of inflammatory muscle disease)
16. Autoimmune uveitis (birdshot retinochoroidopathy; inflammation of the middle layer of the eye)
17. Lambert-Eaton myasthenic syndrome (a type of muscle disorder)
18. IgM (immunoglobulin M) anti-myelin-associated glycoprotein paraprotein-associated peripheral neuropathy (a type of nerve damage)
19. Stiff-man syndrome (a nerve disorder with increasing muscle stiffness [rigidity] and repeated episodes of painful muscle spasms)
20. Neonatal sepsis (blood infection in infants)
21. Rotaviral enterocolitis (severe diarrhea among infants and young children)
22. Toxic shock syndrome (a life-threatening complication of certain bacterial infections)
23. Enteroviral meningoencephalitis (inflammation of the brain and surrounding tissues caused by a virus)
24. Toxic epidermal necrolysis or Stevens-Johnson syndrome (types of serious bacterial skin infections)
25. Autoimmune mucocutaneous blistering disease (AMBD) (group of serious skin conditions that start with blisters on the skin such as pemphigus vulgaris, bullous pemphigoid, mucous membrane pemphigoid, or epidermolysis bullosa acquisita)

B. If the request is for Alyglo, Asceniv, Bivigam, Flebogamma DIF, Gammaplex, Panzyga, Qivigy, or Yimmugo approval also requires:

1. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Gammagard S-D, Gammagard (Liquid), Gammagard Liquid ERC, Gamunex-C, Octagam, Privigen

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IMMUNE GLOBULIN - IV/SQ

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IMMUNE GLOBULIN - IV/SQ (Gammagard [Liquid], Gamunex-C, Gammaked, Gammagard Liquid ERC)** requires the following rule(s) be met for approval:

A. For subcutaneous (SQ) injection, approval requires:

1. You have ONE of the following:
   a. Primary immunodeficiency disease (genetic disease where the immune system is weak)
   b. Chronic inflammatory demyelinating polyneuropathy (a nerve disorder with increasing weakness and loss of sensory function in the legs and arms)
2. If the request is for Gammaked, approval also requires:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Gamunex-C, Gammagard (Liquid), Gammagard Liquid ERC, Xembify

B. For intravenous (IV) injection, approval requires:

1. You have ONE of the following:
   a. Primary immunodeficiency disease (genetic disease where the immune system is weak)
   b. Immune (idiopathic) thrombocytopenic purpura (a type of blood disorder)
   c. Chronic inflammatory demyelinating polyneuropathy (a nerve disorder with increasing weakness and loss of sensory function in the legs and arms)
   d. Multifocal motor neuropathy (MMN: a nerve disorder with increasing muscle weakness)
   e. Kawasaki syndrome (inflammation in the walls of blood vessels in the body)
   f. B-cell chronic lymphocytic leukemia (CLL: blood and bone marrow cancer of immune cells) with hypogammaglobulinemia (low levels of immunoglobulins)
   g. Autoimmune hemolytic anemia (AIHA: body destroys red blood cells more rapidly than it produces them)
   h. Pure red cell aplasia (PRCA: bone marrow stops making red blood cells)
   i. Guillain-Barre syndrome (GBS: immune system attacks the nerves)
   j. Myasthenia gravis (a type of chronic autoimmune disorder)
   k. Autoimmune Graves' ophthalmopathy (a type of eye disease)
   l. Cytomegalovirus-induced pneumonitis (lung tissue inflammation caused by a virus) related to a solid organ transplant
   m. Prevention of bacterial infection in an HIV (human immunodeficiency virus: an immune system disease caused by a virus)- infected child
   n. Reduction of secondary infections in pediatric HIV (human immunodeficiency virus: an immune system disease caused by a virus) infections

(Denial text continued on next page)

CONTINUED ON NEXT PAGE

GUIDELINES FOR USE (CONTINUED)

o. Dermatomyositis (a type of muscle and skin disorder) or polymyositis (a type of inflammatory muscle disease)
p. Autoimmune uveitis (birdshot retinochoroidopathy; inflammation of the middle layer of the eye)
q. Lambert-Eaton myasthenic syndrome (a type of muscle disorder)
r. IgM (immunoglobulin M) anti-myelin-associated glycoprotein paraprotein-associated peripheral neuropathy (a type of nerve damage)
s. Stiff-man syndrome (a nerve disorder with increasing muscle stiffness [rigidity] and repeated episodes of painful muscle spasms)
t. Neonatal sepsis (blood infection in infants)
u. Rotaviral enterocolitis (severe diarrhea among infants and young children)
v. Toxic shock syndrome (a life-threatening complication of certain bacterial infections)
w. Enteroviral meningoencephalitis (inflammation of the brain and surrounding tissues caused by a virus)
x. Toxic epidermal necrolysis or Stevens-Johnson syndrome (types of serious bacterial skin infections)
y. Autoimmune mucocutaneous blistering disease (AMBD) (group of serious skin conditions that start with blisters on the skin such as pemphigus vulgaris, bullous pemphigoid, mucous membrane pemphigoid, or epidermolysis bullosa acquisita)

2. If the request is for Gammaked, approval also requires:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Gammagard S-D, Gammagard (Liquid), Gammagard Liquid ERC, Gamunex-C, Octagam, Privigen

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

IMMUNE GLOBULIN - SQ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IMMUNE GLOBULIN (HUMAN) SUBCUTANEOUS	CUTAQUIG	45734		GPI-10 (1910002057)	
	CUVITRU	41796		GPI-10 (1910002020)	
	HIZENTRA	04202 41798			FDB: BRAND = HIZENTRA
	HYQVIA	41391		GPI-10 (1999000235)	
	XEMBIFY	45891		GPI-10 (1910002064)	

GUIDELINES FOR USE

1. Does the patient have **ONE** of the following diagnoses?
   - Primary immunodeficiency disease (PID) (ICD-10 Group D80, Group D81 except Group D81.3 and Group D81.81; ICD-10 D81.82, ICD-10 D81.89, Group D82 except ICD-10 D82.3; Group D83)
   - Chronic inflammatory demyelinating polyneuropathy (CIDP) (ICD-10 G61.81)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the request for Xembify?

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Is the request for Cutaquig, Cuvitru, Hizentra, or Hyqvia?

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Has the patient had a trial of or contraindication to **TWO** of the following preferred agents: Gamunex-C, Gammagard (Liquid), Gammagard Liquid ERC, Xembify?

   If yes, **approve the requested medication for 12 months as follows:**
   - **Cutaquig: Approve by HICL or GPI-10.**
   - **Cuvitru: Approve by HICL or GPI-10.**
   - **Hizentra: Approve by GPID for all strengths or by GPI-10.**
   - **Hyqvia: Approve by HICL or GPI-10.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

IMMUNE GLOBULIN - SQ

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IMMUNE GLOBULIN - SQ (Cutaquig, Cuvitru, Hizentra, Hyqvia, Xembify)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Primary immunodeficiency disease (genetic disease where the immune system is weak)
   2. Chronic inflammatory demyelinating polyneuropathy (a nerve disorder with increasing weakness and loss of sensory function in the legs and arms)

B. If the request is for Cutaquig, Cuvitru, Hizentra, or Hyqvia, approval also requires:
   1. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Gamunex-C, Gammagard (Liquid), Gammagard Liquid ERC, Xembify

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Cutaquig, Cuvitru, Hizentra, Hyqvia, or Xembify.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

INAVOLISIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INAVOLISIB	ITOVEBI	49923		GPI-10 (2153804500)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient's cancer is hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative
   - The patient's tumor has a PIK3CA mutation as detected by an FDA-approved test
   - Itovebi will be used in combination with palbociclib (Ibrance) and fulvestrant (Faslodex)
   - The patient has experienced disease recurrence on or after completing adjuvant endocrine therapy (e.g., letrozole, anastrozole, tamoxifen)

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **3mg: #2 per day.**
   - **9mg: #1 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INAVOLISIB (Itovebi)** requires the following rule(s) be met for approval:
   A. You have locally advanced or metastatic breast cancer (cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
   B. Your cancer is hormone receptor (HR: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative
   C. Your tumor has a PIK3CA mutation (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
   D. Itovebi will be used in combination with palbociclib (Ibrance) and fulvestrant (Faslodex)
   E. You have experienced disease recurrence (disease has returned) on or after completing adjuvant (add-on) endocrine (hormone) therapy (such as letrozole, anastrozole, tamoxifen)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INCOBOTULINUM TOXIN A

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INCOBOTULINUM TOXIN A	XEOMIN	36687		GPI-10 (7440002020)	

GUIDELINES FOR USE

1. Is the request for a cosmetic indication (e.g., wrinkles - glabellar lines, lateral canthal lines, forehead lines) (ICD-10 L98.8)?

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of chronic sialorrhea (drooling or excessive salivation) (ICD-10 K11.7) **AND** meet the following criterion?
   - The patient is 2 years of age or older

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **50 unit: #2 vials every 4 months.**
   - **100 unit: #1 vial every 4 months.**

   If no, continue to #3.

3. Does the patient have a diagnosis of cervical dystonia (spasmodic torticollis or involuntary contracting of the neck muscles) (ICD-10 G24.3) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **50 unit: #3 vials every 3 months.**
   - **100 unit: #2 vials every 3 months.**
   - **200 unit: #2 vials every 3 months.**

   If no, continue to #4.

INCOBOTULINUM TOXIN A

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have a diagnosis of blepharospasm (involuntary forcible closure of the eyelid) (ICD-10 G24.5) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **50 unit: #3 vials every 3 months.**
   - **100 unit: #2 vials every 3 months.**
   - **200 unit: #2 vials every 3 months.**

   If no, continue to #5.

5. Does the patient have a diagnosis of upper limb spasticity (ICD-10 G04.1, G11.4, G80.0, G80.1, G80.2; Group G81.1) **AND** meet the following criterion?
   - The patient is 2 years of age or older

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **50 unit: #3 vials every 3 months.**
   - **100 unit: #2 vials every 3 months.**
   - **200 unit: #2 vials every 3 months.**

   If no, do not approve.

   DENIAL TEXT: Our guideline named **INCOBOTULINUM TOXIN A (Xeomin)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Chronic sialorrhea (drooling or excessive salivation)
      2. Cervical dystonia (a type of muscle condition)
      3. Blepharospasm (a type of eye disease)
      4. Upper limb spasticity (stiffness or tightness of your muscles)

   B. If you have chronic sialorrhea or upper limb spasticity, approval also requires:
      1. You are 2 years of age or older

   C. If you have cervical dystonia or blepharospasm, approval also requires:
      1. You are 18 years of age or older

   NOTE: This medication will not be approved for a cosmetic indication (for example wrinkles - glabellar lines [wrinkle between the eyebrows], lateral canthal lines [wrinkles in outer corner of eye], forehead lines).

PRIOR AUTHORIZATION GUIDELINES

INEBILIZUMAB-CDON

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INEBILIZUMAB-CDON	UPLIZNA	46617		GPI-10 (9940504020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist or ophthalmologist
   - The patient has a positive serologic test for anti-aquaporin-4 (AQP4) antibodies
   - Uplizna will NOT be used concurrently with another NMOSD agent (e.g., Rituxan [rituximab], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient have at least **ONE** of the following core clinical characteristics?
   - Optic neuritis
   - Acute myelitis
   - Area postrema syndrome
   - Acute brainstem syndrome
   - Symptomatic narcolepsy or acute diencephalic clinical syndrome with NMOSD-typical diencephalic MRI lesions
   - Symptomatic cerebral syndrome with NMOSD-typical brain lesions

   If yes, **approve for a total of 12 months by HICL or GPI-10 as follows:**
   - **FIRST APPROVAL: Approve for 1 month with a quantity limit of #60mL per 28 days.**
   - **SECOND APPROVAL: Approve for 11 months with a quantity limit of #30mL per 6 months (Enter a start date 5 months AFTER THE END DATE of the first approval).**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INEBILIZUMAB-CDON

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of Immunoglobulin G4-related disease (IgG4-RD) (ICD-10 D89.84) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for a total of 12 months by HICL or GPI-10 as follows:**
   - **FIRST APPROVAL: Approve for 1 month with a quantity limit of #60mL per 28 days.**
   - **SECOND APPROVAL: Approve for 11 months with a quantity limit of #30mL per 6 months (Enter a start date 5 months AFTER THE END DATE of the first approval).**

   If no, continue to #4.

4. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient's diagnosis is confirmed by a positive serologic test for anti-acetylcholine receptor antibody (AChR-Ab+) OR anti-muscle-specific tyrosine kinase antibody (MuSK-Ab+)
   - The patient is Myasthenia Gravis Foundation of America class II, III, or IV
   - Uplizna will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]) or complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of gMG
   - The patient had a trial of or contraindication to ONE standard of care corticosteroid (e.g., prednisone)
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Rystiggo (rozanolixizumab-noli), Vyvgart (efgartigimod alfa-fcab)/Vyvgart Hytrulo (efgartigimod- hyaluronidase-qvfc)

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INEBILIZUMAB-CDON

INITIAL CRITERIA (CONTINUED)

5. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO standard of care non-steroidal immunosuppressive therapies (e.g., azathioprine, cyclophosphamide, methotrexate)
   - The patient had a trial of or contraindication to ONE standard of care non-steroidal immunosuppressive therapy if on chronic plasmapheresis or plasma exchange

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #60mL per 28 days for one fill.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INEBILIZUMAB-CDON (Uplizna)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)
      2. Immunoglobulin G4-related disease (IgG4-RD: a type of inflammatory disorder)
      3. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)

   B. If you have neuromyelitis optica spectrum disorder, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor) or ophthalmologist (a type of eye doctor)
      3. You have a positive serologic (blood) test for the anti-aquaporin-4 (AQP4: a type of protein) antibody
      4. You will NOT use Uplizna concurrently (at the same time) with another NMOSD medication (such as Rituxan [rituximab], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])
      5. You have at least ONE of the following core clinical characteristics:
         a. Optic neuritis (a type of brain disorder)
         b. Acute myelitis (a type of brain disorder)
         c. Area postrema syndrome (a type of brain disorder)
         d. Acute brainstem syndrome (a type of brain disorder)
         e. Symptomatic narcolepsy (a type of sleep condition) or acute diencephalic clinical syndrome (a type of brain disorder) with NMOSD-typical diencephalic magnetic resonance imaging (MRI: a type of imaging lab) lesions (affected areas)
         f. Symptomatic cerebral syndrome with NMOSD-typical brain lesions

   (Initial denial text continued on next page)

INEBILIZUMAB-CDON

INITIAL CRITERIA (CONTINUED)

C. If you have Immunoglobulin G4-related disease, approval also requires:
1. You are 18 years of age or older

D. If you have generalized myasthenia gravis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
3. Your diagnosis is confirmed by a positive serologic test (a type of blood test) for anti-acetylcholine receptor antibody (AChR-Ab+: an indicator of myasthenia gravis) OR anti-muscle-specific tyrosine kinase antibody (MuSK-Ab+: an indicator of myasthenia gravis)
4. You have Myasthenia Gravis Foundation of America class II, III, or IV (types of severity of disease)
5. You will NOT use Uplizna concurrently (at the same time) with another neonatal Fc receptor blocker (such as Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]) or complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis (a chronic autoimmune disorder)
6. You have tried or have a contraindication to (harmful for you to use) ONE standard of care corticosteroid (such as prednisone)
7. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Rystiggo (rozanolixizumab-noli), Vyvgart (efgartigimod alfa-fcab)/Vyvgart Hytrulo (efgartigimod-hyaluronidase-qvfc)
8. You meet ONE of the following criteria:
   a. You have tried or have a contraindication to (harmful for you to use) TWO standard of care non-steroidal immunosuppressive therapies (such as azathioprine, cyclophosphamide, methotrexate)
   b. You have tried or have a contraindication to (harmful for you to use) ONE standard of care non-steroidal immunosuppressive therapy if on chronic plasmapheresis or plasma exchange (types of blood therapy)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INEBILIZUMAB-CDON

RENEWAL CRITERIA

NOTE: For the diagnosis of Immunoglobulin G4-related disease, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of neuromyelitis optica spectrum disorder (NMOSD) (ICD-10 G36.0) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit (reduction in relapse frequency from baseline or a decrease in NMOSD-related hospitalizations)
   - Uplizna will NOT be used concurrently with another NMOSD agent (e.g., Rituxan [rituximab], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #30mL per 6 months.**

   If no, continue to #2.

2. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline according to validated gMG instruments (e.g., Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   - Uplizna will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]) or complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of gMG

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #30mL per 6 months.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

INEBILIZUMAB-CDON

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INEBILIZUMAB-CDON (Uplizna)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Neuromyelitis optica spectrum disorder (NMOSD: a type of brain disorder)
   2. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)

B. If you have neuromyelitis optica spectrum disorder, renewal also requires:
   1. You have experienced a clinical benefit (reduction in relapse frequency from baseline [before treatment] or a decrease in NMOSD-related hospitalizations)
   2. You will NOT use Uplizna concurrently (at the same time) with another NMOSD medication (such as Rituxan [rituximab], Enspryng [satralizumab-mwge], Ultomiris [ravulizumab-cwvz], Soliris [eculizumab])

C. If you have generalized myasthenia gravis, renewal also requires:
   1. You have shown a clinical benefit compared to baseline according to validated gMG instruments (such as Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   2. You will NOT use Uplizna concurrently (at the same time) with another neonatal Fc receptor blocker (such as Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]) or complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]) for the treatment of generalized myasthenia gravis (a chronic autoimmune disorder)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Uplizna.

INFLIXIMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INFLIXIMAB	REMICADE, INFLIXIMAB	18747		GPI-10 (5250504000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient is currently using or has a contraindication to methotrexate
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Otezla (apremilast)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Taltz (ixekizumab)
  - Bimzelx (bimekizumab-bkzx)
  - Sotyktu (deucravacitinib)
  - Adalimumab-ryvk/adalimumab-aaty
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve for 6 months by HICL or GPI-10.**
If no, continue to #4.

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #5.

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The patient has psoriasis covering 3 percent or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, genital area, or scalp
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Enbrel (etanercept)
  - Otezla (apremilast)
  - Taltz (ixekizumab)
  - Sotyktu (deucravacitinib)
  - Bimzelx (bimekizumab-bkzx)
  - Adalimumab-ryvk/adalimumab-aaty
  - Icotyde (icotrokinra)

  [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

  If yes, continue to #6.
  If no, continue to #7.

6. Does the patient meet **ONE** of the following criteria?
- The patient has had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
- The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
- The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

  If yes, **approve for 6 months by HICL or GPI-10.**
  If no, do not approve.
  DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #8.
   If no, continue to #9.

8. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

9. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #10.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

10. Does the patient meet **ONE** of the following criteria?
    - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
      - Adalimumab-ryvk/adalimumab-aaty
      - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
    - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
      - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      - Skyrizi (risankizumab-rzaa)
      - Tremfya (guselkumab)
      - Omvoh (mirikizumab-mrkz)
      - Adalimumab-ryvk/adalimumab-aaty
      - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
      - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

    [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

    If yes, **approve for 6 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INFLIXIMAB (Remicade)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Severe plaque psoriasis (PsO: a type of skin condition)
   5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   6. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You are currently using or have a contraindication to (harmful for you to use) methotrexate
4. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
5. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
6. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

(Initial denial text continued on next page)

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. Otezla (apremilast)
   d. Tremfya (guselkumab)
   e. Skyrizi (risankizumab-rzaa)
   f. Taltz (ixekizumab)
   g. Bimzelx (bimekizumab-bkzx)
   h. Sotyktu (deucravacitinib)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   k. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

E. If you have severe plaque psoriasis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
3. You have psoriasis (a type of skin condition) covering 3 percent or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, face, genital area, or scalp
4. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. Tremfya (guselkumab)
   c. Skyrizi (risankizumab-rzaa)
   d. Enbrel (etanercept)
   e. Otezla (apremilast)
   f. Taltz (ixekizumab)
   g. Sotyktu (deucravacitinib)
   h. Bimzelx (bimekizumab-bkzx)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Icotyde (icotrokinra)
6. You meet ONE of the following:
   a. You have had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of medication that decreases the body's immune response) and PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

(Initial denial text continued on next page)

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
3. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

(Initial denial text continued on next page)

INFLIXIMAB

INITIAL CRITERIA (CONTINUED)

G. If you have moderate to severe ulcerative colitis, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
3. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

INFLIXIMAB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The patient is currently using or has a contraindication to methotrexate
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

INFLIXIMAB

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Otezla (apremilast)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Taltz (ixekizumab)
  - Bimzelx (bimekizumab-bkzx)
  - Sotyktu (deucravacitinib)
  - Adalimumab-ryvk/adalimumab-aaty
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve for 12 months by HICL or GPI-10.**
If no, continue to #4.

INFLIXIMAB

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) score while on therapy
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

INFLIXIMAB

RENEWAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more while on therapy
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Enbrel (etanercept)
  - Otezla (apremilast)
  - Taltz (ixekizumab)
  - Sotyktu (deucravacitinib)
  - Bimzelx (bimekizumab-bkzx)
  - Adalimumab-ryvk/adalimumab-aaty
  - Icotyde (icotrokinra)

  [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

  If yes, **approve for 12 months by HICL or GPI-10.**
  If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
- The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

  If yes, continue to #7.
  If no, continue to #8.

INFLIXIMAB

RENEWAL CRITERIA (CONTINUED)

7. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

8. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - The requested medication will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #9.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

INFLIXIMAB

RENEWAL CRITERIA (CONTINUED)

9. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB (Remicade)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Severe plaque psoriasis (PsO: a type of skin condition)
      5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      6. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

INFLIXIMAB

RENEWAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:

1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You are currently using or have a contraindication to (harmful for you to use) methotrexate
3. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
4. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

(Renewal denial text continued on next page)

INFLIXIMAB

RENEWAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, renewal also requires:

1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. Otezla (apremilast)
   d. Tremfya (guselkumab)
   e. Skyrizi (risankizumab-rzaa)
   f. Taltz (ixekizumab)
   g. Bimzelx (bimekizumab-bkzx)
   h. Sotyktu (deucravacitinib)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   k. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Renewal denial text continued on next page)

INFLIXIMAB

RENEWAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, renewal also requires:

1. You have experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the BASDAI (Bath Ankylosing Spondylitis Disease Activity Index: diagnostic test which allows a physician to determine the effectiveness of a current medication) score while on therapy
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Renewal denial text continued on next page)

INFLIXIMAB

RENEWAL CRITERIA (CONTINUED)

E. If you have severe plaque psoriasis, renewal also requires:

1. You have achieved or maintained clear or minimal disease OR you have experienced a decrease in PASI (Psoriasis Area and Severity Index: used to measure the severity and extent of psoriasis [a type of skin condition]) of at least 50 percent or more while on therapy
2. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. Tremfya (guselkumab)
   c. Skyrizi (risankizumab-rzaa)
   d. Enbrel (etanercept)
   e. Otezla (apremilast)
   f. Taltz (ixekizumab)
   g. Sotyktu (deucravacitinib)
   h. Bimzelx (bimekizumab-bkzx)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Icotyde (icotrokinra)

INFLIXIMAB

RENEWAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, renewal also requires:

1. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
2. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

(Renewal denial text continued on next page)

INFLIXIMAB

RENEWAL CRITERIA (CONTINUED)

G. If you have moderate to severe ulcerative colitis, renewal also requires:

1. You will NOT use the requested medication concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase- 4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
2. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

INFLIXIMAB-ABDA

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INFLIXIMAB-ABDA	RENFLEXIS	44432		GPI-10 (5250504010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient is currently using or has a contraindication to methotrexate
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-ABDA

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Otezla (apremilast)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Taltz (ixekizumab)
  - Bimzelx (bimekizumab-bkzx)
  - Sotyktu (deucravacitinib)
  - Adalimumab-ryvk/adalimumab-aaty
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve for 6 months by HICL or GPI-10.**
If no, continue to #4.

INFLIXIMAB-ABDA

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #5.

INFLIXIMAB-ABDA

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The patient has psoriasis covering 3 percent or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, genital area, or scalp
- Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Enbrel (etanercept)
  - Otezla (apremilast)
  - Taltz (ixekizumab)
  - Sotyktu (deucravacitinib)
  - Bimzelx (bimekizumab-bkzx)
  - Adalimumab-ryvk/adalimumab-aaty
  - Icotyde (icotrokinra)

  [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

  If yes, continue to #6.
  If no, continue to #7.

6. Does the patient meet **ONE** of the following criteria?
- The patient has had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
- The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
- The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

  If yes, **approve for 6 months by HICL or GPI-10.**
  If no, do not approve.
  DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-ABDA

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #8.
   If no, continue to #9.

8. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-ABDA

INITIAL CRITERIA (CONTINUED)

9. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #10.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

10. Does the patient meet **ONE** of the following criteria?
    - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
      - Adalimumab-ryvk/adalimumab-aaty
      - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
    - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
      - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      - Skyrizi (risankizumab-rzaa)
      - Tremfya (guselkumab)
      - Omvoh (mirikizumab-mrkz)
      - Adalimumab-ryvk/adalimumab-aaty
      - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
      - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

    [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

    If yes, **approve for 6 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-ABDA

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INFLIXIMAB-ABDA (Renflexis)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Severe plaque psoriasis (PsO: a type of skin condition)
   5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   6. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You are currently using or have a contraindication to (harmful for you to use) methotrexate
   4. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   5. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
   6. You meet ONE of the following:
      a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         i. Enbrel (etanercept)
         ii. Adalimumab-ryvk/adalimumab-aaty
         iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
         iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

INITIAL CRITERIA (CONTINUED)

b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

C. If you have psoriatic arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. Otezla (apremilast)
   d. Tremfya (guselkumab)
   e. Skyrizi (risankizumab-rzaa)
   f. Taltz (ixekizumab)
   g. Bimzelx (bimekizumab-bkzx)
   h. Sotyktu (deucravacitinib)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   k. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

INFLIXIMAB-ABDA

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

INFLIXIMAB-ABDA

INITIAL CRITERIA (CONTINUED)

E. If you have severe plaque psoriasis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
3. You have psoriasis (a type of skin condition) covering 3 percent or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, face, genital area, or scalp
4. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. Tremfya (guselkumab)
   c. Skyrizi (risankizumab-rzaa)
   d. Enbrel (etanercept)
   e. Otezla (apremilast)
   f. Taltz (ixekizumab)
   g. Sotyktu (deucravacitinib)
   h. Bimzelx (bimekizumab-bkzx)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Icotyde (icotrokinra)
6. You meet ONE of the following:
   a. You have had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of medication that decreases the body's immune response) and PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

(Initial denial text continued on next page)

INFLIXIMAB-ABDA

INITIAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
2. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
3. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

(Initial denial text continued on next page)

INFLIXIMAB-ABDA

INITIAL CRITERIA (CONTINUED)

G. If you have moderate to severe ulcerative colitis, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
2. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
3. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

INFLIXIMAB-ABDA

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The patient is currently using or has a contraindication to methotrexate
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

INFLIXIMAB-ABDA

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
- Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Otezla (apremilast)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Taltz (ixekizumab)
  - Bimzelx (bimekizumab-bkzx)
  - Sotyktu (deucravacitinib)
  - Adalimumab-ryvk/adalimumab-aaty
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve for 12 months by HICL or GPI-10.**
If no, continue to #4.

INFLIXIMAB-ABDA

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) score while on therapy
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

INFLIXIMAB-ABDA

RENEWAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more while on therapy
- Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - o Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - o Tremfya (guselkumab)
  - o Skyrizi (risankizumab-rzaa)
  - o Enbrel (etanercept)
  - o Otezla (apremilast)
  - o Taltz (ixekizumab)
  - o Sotyktu (deucravacitinib)
  - o Bimzelx (bimekizumab-bkzx)
  - 0 Adalimumab-ryvk/adalimumab-aaty
  - 0 Icotyde (icotrokinra)

  [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

  If yes, **approve for 12 months by HICL or GPI-10.**
  If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #7.
   If no, continue to #8.

INFLIXIMAB-ABDA

RENEWAL CRITERIA (CONTINUED)

7. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

8. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Renflexis will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #9.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RENEWAL CRITERIA (CONTINUED)

9. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB-ABDA (Renflexis)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Severe plaque psoriasis (PsO: a type of skin condition)
      5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      6. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   (Renewal denial text continued on next page)

INFLIXIMAB-ABDA

RENEWAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:

1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You are currently using or have a contraindication to (harmful for you to use) methotrexate
3. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
4. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

(Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, renewal also requires:

1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. Otezla (apremilast)
   d. Tremfya (guselkumab)
   e. Skyrizi (risankizumab-rzaa)
   f. Taltz (ixekizumab)
   g. Bimzelx (bimekizumab-bkzx)
   h. Sotyktu (deucravacitinib)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   k. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, renewal also requires:

1. You have experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the BASDAI (Bath Ankylosing Spondylitis Disease Activity Index: diagnostic test which allows a physician to determine the effectiveness of a current medication) score while on therapy
2. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Renewal denial text continued on next page)

INFLIXIMAB-ABDA

RENEWAL CRITERIA (CONTINUED)

E. If you have severe plaque psoriasis, renewal also requires:

1. You have achieved or maintained clear or minimal disease OR you have experienced a decrease in PASI (Psoriasis Area and Severity Index: used to measure the severity and extent of psoriasis [a type of skin condition]) of at least 50 percent or more while on therapy
2. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. Tremfya (guselkumab)
   c. Skyrizi (risankizumab-rzaa)
   d. Enbrel (etanercept)
   e. Otezla (apremilast)
   f. Taltz (ixekizumab)
   g. Sotyktu (deucravacitinib)
   h. Bimzelx (bimekizumab-bkzx)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Icotyde (icotrokinra)

(Renewal denial text continued on next page)

INFLIXIMAB-ABDA

RENEWAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, renewal also requires:

1. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
2. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

(Renewal denial text continued on next page)

INFLIXIMAB-ABDA

RENEWAL CRITERIA (CONTINUED)

G. If you have moderate to severe ulcerative colitis, renewal also requires:

1. You will NOT use Renflexis concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
2. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

INFLIXIMAB-AXXQ	AVSOLA	46242		GPI-10 (5250504013)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient is currently using or has a contraindication to methotrexate
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-AXXQ

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Otezla (apremilast)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Taltz (ixekizumab)
  - Bimzelx (bimekizumab-bkzx)
  - Sotyktu (deucravacitinib)
  - Adalimumab-ryvk/adalimumab-aaty
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve for 6 months by HICL or GPI-10.**
If no, continue to #4.

INFLIXIMAB-AXXQ

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #5.

INFLIXIMAB-AXXQ

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The patient has psoriasis covering 3 percent or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, genital area, or scalp
- Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Enbrel (etanercept)
  - Otezla (apremilast)
  - Taltz (ixekizumab)
  - Sotyktu (deucravacitinib)
  - Bimzelx (bimekizumab-bkzx)
  - Adalimumab-ryvk/adalimumab-aaty
  - Icotyde (icotrokinra)

  [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

  If yes, continue to #6.
  If no, continue to #7.

6. Does the patient meet **ONE** of the following criteria?
- The patient has had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
- The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
- The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

  If yes, **approve for 6 months by HICL or GPI-10.**
  If no, do not approve.
  DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-AXXQ

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #8.
   If no, continue to #9.

8. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-AXXQ

INITIAL CRITERIA (CONTINUED)

9. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #10.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

10. Does the patient meet **ONE** of the following criteria?
    - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
      - Adalimumab-ryvk/adalimumab-aaty
      - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
    - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
      - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      - Skyrizi (risankizumab-rzaa)
      - Tremfya (guselkumab)
      - Omvoh (mirikizumab-mrkz)
      - Adalimumab-ryvk/adalimumab-aaty
      - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
      - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

    [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

    If yes, **approve for 6 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-AXXQ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INFLIXIMAB-AXXQ (Avsola)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Severe plaque psoriasis (PsO: a type of skin condition)
   5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   6. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You are currently using or have a contraindication to (harmful for you to use) methotrexate
   4. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   5. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

(Initial denial text continued on next page)

INFLIXIMAB-AXXQ

INITIAL CRITERIA (CONTINUED)

6. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

(Initial denial text continued on next page)

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. Otezla (apremilast)
   d. Tremfya (guselkumab)
   e. Skyrizi (risankizumab-rzaa)
   f. Taltz (ixekizumab)
   g. Bimzelx (bimekizumab-bkzx)
   h. Sotyktu (deucravacitinib)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   k. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

INFLIXIMAB-AXXQ

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

INFLIXIMAB-AXXQ

INITIAL CRITERIA (CONTINUED)

E. If you have severe plaque psoriasis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
3. You have psoriasis (a type of skin condition) covering 3 percent or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, face, genital area, or scalp
4. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. Tremfya (guselkumab)
   c. Skyrizi (risankizumab-rzaa)
   d. Enbrel (etanercept)
   e. Otezla (apremilast)
   f. Taltz (ixekizumab)
   g. Sotyktu (deucravacitinib)
   h. Bimzelx (bimekizumab-bkzx)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Icotyde (icotrokinra)
6. You meet ONE of the following:
   a. You have had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of medication that decreases the body's immune response) and PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

(Initial denial text continued on next page)

INFLIXIMAB-AXXQ

INITIAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
2. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
3. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

(Initial denial text continued on next page)

INFLIXIMAB-AXXQ

INITIAL CRITERIA (CONTINUED)

G. If you have moderate to severe ulcerative colitis, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
2. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
3. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

INFLIXIMAB-AXXQ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The patient is currently using or has a contraindication to methotrexate
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

INFLIXIMAB-AXXQ

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
- Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Otezla (apremilast)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Taltz (ixekizumab)
  - Bimzelx (bimekizumab-bkzx)
  - Sotyktu (deucravacitinib)
  - Adalimumab-ryvk/adalimumab-aaty
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve for 12 months by HICL or GPI-10.**
If no, continue to #4.

INFLIXIMAB-AXXQ

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) score while on therapy
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

INFLIXIMAB-AXXQ

RENEWAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more while on therapy
- Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - o Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - o Tremfya (guselkumab)
  - o Skyrizi (risankizumab-rzaa)
  - o Enbrel (etanercept)
  - o Otezla (apremilast)
  - o Taltz (ixekizumab)
  - 0 Sotyktu (deucravacitinib)
  - o Bimzelx (bimekizumab-bkzx)
  - 0 Adalimumab-ryvk/adalimumab-aaty
  - 0 Icotyde (icotrokinra)

  [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

  If yes, **approve for 12 months by HICL or GPI-10.**
  If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #7.
   If no, continue to #8.

INFLIXIMAB-AXXQ

RENEWAL CRITERIA (CONTINUED)

7. Does the patient meet ONE of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

8. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Avsola will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #9.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

INFLIXIMAB-AXXQ

RENEWAL CRITERIA (CONTINUED)

9. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB-AXXQ (Avsola)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Severe plaque psoriasis (PsO: a type of skin condition)
      5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      6. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

INFLIXIMAB-AXXQ

RENEWAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:

1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You are currently using or have a contraindication to (harmful for you to use) methotrexate
3. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
4. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

(Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, renewal also requires:

1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. Otezla (apremilast)
   d. Tremfya (guselkumab)
   e. Skyrizi (risankizumab-rzaa)
   f. Taltz (ixekizumab)
   g. Bimzelx (bimekizumab-bkzx)
   h. Sotyktu (deucravacitinib)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   k. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, renewal also requires:

1. You have experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the BASDAI (Bath Ankylosing Spondylitis Disease Activity Index: diagnostic test which allows a physician to determine the effectiveness of a current medication) score while on therapy
2. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

RENEWAL CRITERIA (CONTINUED)

E. If you have severe plaque psoriasis, renewal also requires:

1. You have achieved or maintained clear or minimal disease OR you have experienced a decrease in PASI (Psoriasis Area and Severity Index: used to measure the severity and extent of psoriasis [a type of skin condition]) of at least 50 percent or more while on therapy
2. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. Tremfya (guselkumab)
   c. Skyrizi (risankizumab-rzaa)
   d. Enbrel (etanercept)
   e. Otezla (apremilast)
   f. Taltz (ixekizumab)
   g. Sotyktu (deucravacitinib)
   h. Bimzelx (bimekizumab-bkzx)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Icotyde (icotrokinra)

(Renewal denial text continued on next page)

INFLIXIMAB-AXXQ

RENEWAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, renewal also requires:

1. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
2. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

(Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

G. If you have moderate to severe ulcerative colitis, renewal also requires:

1. You will NOT use Avsola concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
2. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

INFLIXIMAB-DYYB - IV

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INFLIXIMAB-DYYB	INFLECTRA		40977	GPI-14 (52505040202120)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - The patient is currently using or has a contraindication to methotrexate
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA
   - The patient had a trial of or contraindication to at least 3 months of treatment with ONE clinical standard of care agent: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-DYYB - IV

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
- Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Otezla (apremilast)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Taltz (ixekizumab)
  - Bimzelx (bimekizumab-bkzx)
  - Sotyktu (deucravacitinib)
  - Adalimumab-ryvk/adalimumab-aaty
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve for 6 months by GPID or GPI-14.**
If no, continue to #4.

INFLIXIMAB-DYYB - IV

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, continue to #5.

INFLIXIMAB-DYYB - IV

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- Therapy is prescribed by or in consultation with a dermatologist
- The patient has psoriasis covering 3 percent or more of body surface area (BSA) OR psoriatic lesions affecting the hands, feet, face, genital area, or scalp
- Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Enbrel (etanercept)
  - Otezla (apremilast)
  - Taltz (ixekizumab)
  - Sotyktu (deucravacitinib)
  - Bimzelx (bimekizumab-bkzx)
  - Adalimumab-ryvk/adalimumab-aaty
  - Icotyde (icotrokinra)

  [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

  If yes, continue to #6.
  If no, continue to #7.

6. Does the patient meet **ONE** of the following criteria?
- The patient has had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
- The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
- The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

  If yes, **approve for 6 months by GPID or GPI-14.**
  If no, do not approve.
  DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-DYYB - IV

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #8.
   If no, continue to #9.

8. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 6 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-DYYB - IV

INITIAL CRITERIA (CONTINUED)

9. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #10.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

10. Does the patient meet **ONE** of the following criteria?
    - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
      - Adalimumab-ryvk/adalimumab-aaty
      - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
    - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
      - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      - Skyrizi (risankizumab-rzaa)
      - Tremfya (guselkumab)
      - Omvoh (mirikizumab-mrkz)
      - Adalimumab-ryvk/adalimumab-aaty
      - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
      - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

    [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

    If yes, **approve for 6 months by GPID or GPI-14.**
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-DYYB - IV

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INFLIXIMAB-DYYB - IV (Inflectra)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Severe plaque psoriasis (PsO: a type of skin condition)
   5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   6. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have moderate to severe rheumatoid arthritis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
   3. You are currently using or have a contraindication to (harmful for you to use) methotrexate
   4. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
   5. You have tried at least 3 months of or have a contraindication to (harmful for you to use) ONE clinical standard of care medication: a conventional synthetic DMARD (disease-modifying anti-rheumatic drug), such as methotrexate dose of at least 20mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine

(Initial denial text continued on next page)

INFLIXIMAB-DYYB - IV

INITIAL CRITERIA (CONTINUED)

6. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. Otezla (apremilast)
   d. Tremfya (guselkumab)
   e. Skyrizi (risankizumab-rzaa)
   f. Taltz (ixekizumab)
   g. Bimzelx (bimekizumab-bkzx)
   h. Sotyktu (deucravacitinib)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   k. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

INITIAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Initial denial text continued on next page)

INFLIXIMAB-DYYB - IV

INITIAL CRITERIA (CONTINUED)

E. If you have severe plaque psoriasis, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
3. You have psoriasis (a type of skin condition) covering 3 percent or more of body surface area (BSA) OR psoriatic lesions (rashes) affecting the hands, feet, face, genital area, or scalp
4. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
5. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. Tremfya (guselkumab)
   c. Skyrizi (risankizumab-rzaa)
   d. Enbrel (etanercept)
   e. Otezla (apremilast)
   f. Taltz (ixekizumab)
   g. Sotyktu (deucravacitinib)
   h. Bimzelx (bimekizumab-bkzx)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Icotyde (icotrokinra)
6. You meet ONE of the following:
   a. You have had at least a 3-month trial of ONE clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
   b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of medication that decreases the body's immune response) and PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis (a type of skin condition)
   c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication

(Initial denial text continued on next page)

INITIAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, approval also requires:
1. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
2. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
3. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

(Initial denial text continued on next page)

INFLIXIMAB-DYYB - IV

INITIAL CRITERIA (CONTINUED)

G. If you have moderate to severe ulcerative colitis, approval also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
2. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
3. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

INFLIXIMAB-DYYB - IV

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe rheumatoid arthritis (RA) (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - The patient is currently using or has a contraindication to methotrexate
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of RA

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
   - The patient has tried a TNF inhibitor (e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND the physician has indicated the patient cannot use a JAK inhibitor (e.g., Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality, malignancies, and serious cardiovascular events
     [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

INFLIXIMAB-DYYB - IV

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?

- The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
- Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - Enbrel (etanercept)
  - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - Otezla (apremilast)
  - Tremfya (guselkumab)
  - Skyrizi (risankizumab-rzaa)
  - Taltz (ixekizumab)
  - Bimzelx (bimekizumab-bkzx)
  - Sotyktu (deucravacitinib)
  - Adalimumab-ryvk/adalimumab-aaty
  - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
  - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

[**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

If yes, **approve for 12 months by GPID or GPI-14.**
If no, continue to #4.

INFLIXIMAB-DYYB - IV

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) score while on therapy
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Enbrel (etanercept)
     - Taltz (ixekizumab)
     - Bimzelx (bimekizumab-bkzx)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty, Enbrel])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, continue to #5.

INFLIXIMAB-DYYB - IV

RENEWAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
- The patient has achieved or maintained clear or minimal disease OR a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more while on therapy
- Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO
- The patient had a trial of or contraindication to TWO of the following preferred agents:
  - o Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
  - o Tremfya (guselkumab)
  - o Skyrizi (risankizumab-rzaa)
  - o Enbrel (etanercept)
  - o Otezla (apremilast)
  - o Taltz (ixekizumab)
  - o Sotyktu (deucravacitinib)
  - o Bimzelx (bimekizumab-bkzx)
  - 0 Adalimumab-ryvk/adalimumab-aaty
  - 0 Icotyde (icotrokinra)

  [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

  If yes, **approve for 12 months by GPID or GPI-14.**
  If no, continue to #6.

6. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
- Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

  If yes, continue to #7.
  If no, continue to #8.

INFLIXIMAB-DYYB - IV

RENEWAL CRITERIA (CONTINUED)

7. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

8. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Inflectra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #9.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RENEWAL CRITERIA (CONTINUED)

9. Does the patient meet **ONE** of the following criteria?
   - The patient is 6 to 17 years of age AND had a trial of or contraindication to ONE of the following preferred agents:
     - Adalimumab-ryvk/adalimumab-aaty
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   - The patient is 18 years of age or older AND had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INFLIXIMAB-DYYB - IV (Inflectra)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe rheumatoid arthritis (RA: a type of joint condition)
      2. Psoriatic arthritis (PsA: a type of skin and joint condition)
      3. Ankylosing spondylitis (AS: a type of joint condition)
      4. Severe plaque psoriasis (PsO: a type of skin condition)
      5. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      6. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

   (Renewal denial text continued on next page)

INFLIXIMAB-DYYB - IV

RENEWAL CRITERIA (CONTINUED)

B. If you have moderate to severe rheumatoid arthritis, renewal also requires:

1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You are currently using or have a contraindication to (harmful for you to use) methotrexate
3. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of rheumatoid arthritis (a type of joint condition)
4. You meet ONE of the following:
   a. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Enbrel (etanercept)
      ii. Adalimumab-ryvk/adalimumab-aaty
      iii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
      iv. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   b. You have tried a tumor necrosis factor (TNF) inhibitor (such as adalimumab-ryvk/adalimumab-aaty, Enbrel [etanercept]) AND your physician has indicated that you cannot use a Janus kinase (JAK) inhibitor (such as Rinvoq [upadacitinib], Xeljanz [tofacitinib]) due to the black box warning for increased risk of mortality (death), malignancies (cancer), and serious cardiovascular (heart-related) events

(Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, renewal also requires:

1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
2. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis (a type of skin and joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   c. Otezla (apremilast)
   d. Tremfya (guselkumab)
   e. Skyrizi (risankizumab-rzaa)
   f. Taltz (ixekizumab)
   g. Bimzelx (bimekizumab-bkzx)
   h. Sotyktu (deucravacitinib)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   k. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

(Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

D. If you have ankylosing spondylitis, renewal also requires:

1. You have experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the BASDAI (Bath Ankylosing Spondylitis Disease Activity Index: diagnostic test which allows a physician to determine the effectiveness of a current medication) score while on therapy
2. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis (a type of joint condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Enbrel (etanercept)
   b. Taltz (ixekizumab)
   c. Bimzelx (bimekizumab-bkzx)
   d. Adalimumab-ryvk/adalimumab-aaty
   e. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])
   f. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty, Enbrel])

INFLIXIMAB-DYYB - IV

RENEWAL CRITERIA (CONTINUED)

E. If you have severe plaque psoriasis, renewal also requires:

1. You have achieved or maintained clear or minimal disease OR you have experienced a decrease in PASI (Psoriasis Area and Severity Index: used to measure the severity and extent of psoriasis [a type of skin condition]) of at least 50 percent or more while on therapy
2. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis (a type of skin condition)
3. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. Tremfya (guselkumab)
   c. Skyrizi (risankizumab-rzaa)
   d. Enbrel (etanercept)
   e. Otezla (apremilast)
   f. Taltz (ixekizumab)
   g. Sotyktu (deucravacitinib)
   h. Bimzelx (bimekizumab-bkzx)
   i. Adalimumab-ryvk/adalimumab-aaty
   j. Icotyde (icotrokinra)

RENEWAL CRITERIA (CONTINUED)

F. If you have moderate to severe Crohn's disease, renewal also requires:

1. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
2. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

(Renewal denial text continued on next page)

RENEWAL CRITERIA (CONTINUED)

G. If you have moderate to severe ulcerative colitis, renewal also requires:

1. You will NOT use Inflectra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
2. You meet ONE of the following:
   a. You are 6 to 17 years of age AND have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications:
      i. Adalimumab-ryvk/adalimumab-aaty
      ii. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
      vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

INFLIXIMAB-DYYB - SQ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INFLIXIMAB-DYYB	ZYMFENTRA		55099 55098	GPI-14 (5250504020F530, 5250504020F830)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Zymfentra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had prior treatment with an intravenous infliximab or infliximab biosimilar (e.g., Remicade [infliximab], Renflexis [infliximab-abda], Avsola [infliximab-axxq], Inflectra [infliximab-dyyb])
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 120mg/mL strength for 6 months by GPID or GPI-14 with a quantity limit of #2 per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-DYYB - SQ

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Zymfentra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient meet **ONE** of the following criteria?
   - The patient had prior treatment with an intravenous infliximab or infliximab biosimilar (e.g., Remicade [infliximab], Renflexis [infliximab-abda], Avsola [infliximab-axxq], Inflectra [infliximab-dyyb])
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 120mg/mL strength for 6 months by GPID or GPI-14 with a quantity limit of #2 per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INFLIXIMAB-DYYB - SQ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INFLIXIMAB-DYYB - SQ (Zymfentra)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
   2. Moderate to severe Crohn's disease (CD: a type of bowel disorder)

B. If you have moderate to severe ulcerative colitis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
   3. You will NOT use Zymfentra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
   4. You meet ONE of the following:
      a. You had prior treatment with an intravenous (injection into the vein) infliximab or infliximab biosimilar (such as Remicade [infliximab], Renflexis [infliximab-abda], Avsola [infliximab-axxq], Inflectra [infliximab-dyyb])
      b. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
         ii. Skyrizi (risankizumab-rzaa)
         iii. Tremfya (guselkumab)
         iv. Omvoh (mirikizumab-mrkz)
         v. Adalimumab-ryvk/adalimumab-aaty
         vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
         vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

(Initial denial text continued on the next page)

INFLIXIMAB-DYYB - SQ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Zymfentra will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had prior treatment with an intravenous infliximab or infliximab biosimilar (e.g., Remicade [infliximab], Renflexis [infliximab-abda], Avsola [infliximab-axxq], Inflectra [infliximab-dyyb])
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE**: Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
     - Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance program do not qualify]

   If yes, **approve all formulations of the 120mg/mL strength for 12 months by GPID or GPI-14 with a quantity limit of #2 per 28 days.**

   If no, do not approve.

INFLIXIMAB-DYYB - SQ

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INFLIXIMAB-DYYB - SQ (Zymfentra)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
   2. Moderate to severe Crohn's disease (CD: a type of bowel disorder)

B. If you have moderate to severe ulcerative colitis, renewal also requires:
   1. You will NOT use Zymfentra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
   2. You meet ONE of the following:
      a. You had prior treatment with an intravenous (injection into the vein) infliximab or infliximab biosimilar (such as Remicade [infliximab], Renflexis [infliximab-abda], Avsola [infliximab-axxq], Inflectra [infliximab-dyyb])
      b. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
         ii. Skyrizi (risankizumab-rzaa)
         iii. Tremfya (guselkumab)
         iv. Omvoh (mirikizumab-mrkz)
         v. Adalimumab-ryvk/adalimumab-aaty
         vi. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE**: Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
         vii. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

INFLIXIMAB-DYYB - SQ

RENEWAL CRITERIA (CONTINUED)

C. If you have moderate to severe Crohn's disease, renewal also requires:

1. You will NOT use Zymfentra concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
2. You meet ONE of the following:
   a. You had prior treatment with an intravenous (injection into the vein) infliximab or infliximab biosimilar (such as Remicade [infliximab], Renflexis [infliximab-abda], Avsola [infliximab-axxq], Inflectra [infliximab-dyyb])
   b. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      i. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      ii. Skyrizi (risankizumab-rzaa)
      iii. Tremfya (guselkumab)
      iv. Omvoh (mirikizumab-mrkz)
      v. Adalimumab-ryvk/adalimumab-aaty
      vi. Rinvoq (upadacitinib) (**NOTE**: Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient meet **ONE** of the following criteria?
   - The patient has chronic lung disease (i.e., asthma or chronic obstructive pulmonary disease)
   - The patient has active lung cancer
   - The patient is currently in diabetic ketoacidosis
   - The patient smokes or has quit smoking within the past 6 months

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of type 1 diabetes mellitus (ICD-10 Group E10) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - The patient had a baseline spirometry performed to measure FEV1
   - The patient is concurrently using a long-acting insulin (e.g., Toujeo, Tresiba, Semglee)
   - The patient had a trial of ONE of the following preferred rapid-acting insulins: insulin lispro (Humalog), Lyumjev

   If yes, **approve for 12 months by GPID or GPI-14 for the requested agent with the following quantity limits:**
   - **90-4 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
   - **90-8 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
   - **90-12 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
   - **90-4 Unit + 90-8 Unit Titration pack: #180 cartridges (1 kit) per 28 days.**
   - **90-8 Unit + 90-12 Unit Cartridges: #180 cartridges (1 kit) per 28 days.**
   - **30-4 Unit + 60-8 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
   - **60-4 Unit + 30-8 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
   - **60-8 Unit + 30-12 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
   - **60-4 Unit + 60-8 Unit + 60-12 Unit Cartridges: #180 cartridges (1 kit) per 28 days.**

   If no, continue to #3.

INHALED INSULIN

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of type 2 diabetes mellitus (ICD-10 Groups E08, E09, E11, E13) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - The patient had a baseline spirometry performed to measure FEV1
   - The patient had a trial of ONE of the following preferred rapid-acting insulins: insulin lispro (Humalog), Lyumjev
   - The prescriber has indicated that the patient is physically unable to or unwilling to administer injectable insulin

   If yes, **approve for 12 months by GPID or GPI-14 for the requested agent with the following quantity limits:**
   - **90-4 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
   - **90-8 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
   - **90-12 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
   - **90-4 Unit + 90-8 Unit Titration pack: #180 cartridges (1 kit) per 28 days.**
   - **90-8 Unit + 90-12 Unit Cartridges: #180 cartridges (1 kit) per 28 days.**
   - **30-4 Unit + 60-8 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
   - **60-4 Unit + 30-8 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
   - **60-8 Unit + 30-12 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
   - **60-4 Unit + 60-8 Unit + 60-12 Unit Cartridges: #180 cartridges (1 kit) per 28 days.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INHALED INSULIN (Afrezza)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Type 1 diabetes mellitus (a disorder with high blood sugar)
      2. Type 2 diabetes mellitus (a disorder with high blood sugar)

   B. If you have type 1 diabetes mellitus, approval also requires:
      1. You are 6 years of age or older
      2. You had a baseline spirometry (a type of breathing test) to measure forced expiratory volume (FEV1: amount of air exhaled in one second)
      3. Afrezza will be used concurrently (at the same time) with a long-acting insulin (such as Toujeo, Tresiba, Semglee)
      4. You have tried ONE of the following preferred rapid-acting insulins: insulin lispro (Humalog), Lyumjev

   (Initial denial text continued on next page)

INHALED INSULIN

INITIAL CRITERIA (CONTINUED)

C. If you have type 2 diabetes mellitus, approval also requires:

1. You are 6 years of age or older
2. You had a baseline spirometry (a type of breathing test) to measure forced expiratory volume (FEV1: amount of air exhaled in one second)
3. You have tried ONE of the following preferred rapid-acting insulins: insulin lispro (Humalog), Lyumjev
4. Your prescriber has indicated that you are physically unable to or unwilling to use injectable insulin

NOTE: Afrezza will NOT be approved if you have any of the following conditions: chronic lung disease (type of long-term lung disease), active lung cancer, currently in diabetic ketoacidosis (condition where body breaks down fat too fast), you are currently smoking or you quit smoking within the past 6 months.

INHALED INSULIN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of type 1 diabetes mellitus (ICD-10 Group E10) **AND** is currently on a long-acting insulin (e.g., Toujeo, Tresiba, Semglee)?

   If yes, continue to #3.
   If no, continue to #2.

2. Does the patient have a diagnosis of type 2 diabetes mellitus (ICD-10 Groups E08, E09, E11, E13)?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Was follow-up spirometry to measure FEV1 performed after 6 months of treatment and then annually thereafter?

   If yes, continue to #4.
   If no, **approve for 1 month by GPID or GPI-14 (to allow for follow-up spirometry evaluation) with the following quantity limits:**
   - **90-4 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
   - **90-8 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
   - **90-12 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
   - **90-4 Unit + 90-8 Unit Titration pack: #180 cartridges (1 kit) per 28 days.**
   - **90-8 Unit + 90-12 Unit Cartridges: #180 cartridges (1 kit) per 28 days.**
   - **30-4 Unit + 60-8 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
   - **60-4 Unit + 30-8 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
   - **60-8 Unit + 30-12 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
   - **60-4 Unit + 60-8 Unit + 60-12 Unit Cartridges: #180 cartridges (1 kit) per 28 days.**

INHALED INSULIN

RENEWAL CRITERIA (CONTINUED)

4. Has the patient's FEV1 declined by 20% or more from baseline?

If yes, do not approve.
DENIAL TEXT: See the renewal denial text at the end of the guideline.

If no, **approve for 12 months by GPID or GPI-14 for the requested agent with the following quantity limits:**

- **90-4 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
- **90-8 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
- **90-12 Unit Cartridges: #180 cartridges (2 kits) per 28 days.**
- **90-4 Unit + 90-8 Unit Titration pack: #180 cartridges (1 kit) per 28 days.**
- **90-8 Unit + 90-12 Unit Cartridges: #180 cartridges (1 kit) per 28 days.**
- **30-4 Unit + 60-8 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
- **60-4 Unit + 30-8 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
- **60-8 Unit + 30-12 Unit Cartridges: #360 cartridges (4 kits) per 28 days.**
- **60-4 Unit + 60-8 Unit + 60-12 Unit Cartridges: #180 cartridges (1 kit) per 28 days.**

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INHALED INSULIN (Afrezza)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Type 1 diabetes mellitus (a disorder with high blood sugar)
   2. Type 2 diabetes mellitus (a disorder with high blood sugar)

B. If you have type 1 diabetes, renewal also requires:
   1. You have had a follow up spirometry (a type of breathing test) to measure your forced expiratory volume (FEV1: amount of air exhaled in one second) after 6 months of treatment and then annually (every year)
   2. Your FEV1 has NOT declined by 20 percent or more from baseline (before treatment)
   3. Afrezza will be used concurrently (at the same time) with a long-acting insulin (such as Toujeo, Tresiba, Semglee)

C. If you have type 2 diabetes, renewal also requires:
   1. You have had a follow up spirometry (a type of breathing test) to measure your forced expiratory volume (FEV1: amount of air exhaled in one second) after 6 months of treatment and then annually (every year)
   2. Your FEV1 has NOT declined by 20 percent or more from baseline (before treatment)

(Renewal denial text continued on next page)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INOTERSEN SODIUM	TEGSEDI	45353		GPI-10 (6270104010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN) (ICD-10 E85.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, cardiologist, hATTR specialist, or medical geneticist
   - The patient is ambulatory (i.e., Familial Amyloid Polyneuropathy [FAP] stage 1 - 2 or Polyneuropathy Disability [PND] Stage I - IIIb polyneuropathy)
   - Tegsedi will NOT be used concurrently with other hATTR-PN agents (e.g., Wainua [eplontersen], Amvuttra [vutrisiran], Onpattro [patisiran])
   - The patient had a trial of or contraindication to the preferred agent: Amvuttra (vutrisiran)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the hATTR diagnosis confirmed by **ONE** of the following?
   - Biopsy of tissue/organ to confirm amyloid presence AND chemical typing to confirm the presence of TTR (transthyretin) protein
   - DNA genetic sequencing to confirm hATTR mutation

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #6mL per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INOTERSEN

INTIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INOTERSEN (Tegsedi)** requires the following rule(s) be met for approval:

A. You have hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN: a rare genetic disorder with widespread nerve pain/damage)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nerve doctor), cardiologist (a type of heart doctor), hATTR specialist, or medical geneticist (doctor who treats gene disorders)
D. You are ambulatory (able to walk) (you have Familial Amyloid Polyneuropathy [FAP: a tool used to evaluate disease severity] stage 1 to 2 or Polyneuropathy Disability [PND: a tool used to evaluate disease severity] Stage I to IIIb polyneuropathy)
E. You will NOT use Tegsedi concurrently (at the same time) with other hATTR-PN medications (such as Wainua [eplontersen], Amvuttra [vutrisiran], Onpattro [patisiran])
F. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Amvuttra
G. Your diagnosis is confirmed by ONE of the following:
    1. Biopsy (removal of cells from the body for examination) of tissue/organ to confirm amyloid (a type of abnormal protein) presence AND chemical typing to confirm the presence of TTR (transthyretin) protein
    2. DNA genetic sequencing (a type of lab test) to confirm hATTR mutation (a type of abnormal gene)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INSULIN DEVICES

INITIAL CRITERIA (CONTINUED)

2. Is the patient on a multiple daily insulin injection regimen and meets **ONE** of the following criteria?
   - The patient has a glycosylated hemoglobin level (HbA1c) that is greater than 7%
   - The patient has a history of recurring hypoglycemia
   - The patient has wide fluctuations in blood glucose before mealtime
   - The patient experiences the dawn phenomenon with fasting blood glucose levels frequently exceeding 200 mg/dL
   - The patient has a history of severe glycemic excursions (sudden spikes in blood sugar levels)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the request for more than 10 cartridges per month?

   If yes, continue to #4.
   If no, **approve for 12 months by NDC for ALL of the following:**
   - **MODD1 Patient Welcome Kit: #4 per year.**
   - **MODD1 Supply Kit: #40 per 30 days.**
   - **Pivot Insulin Pump Starter kit.**
   - **Pivot Supply Kit.**

4. Is the patient using more than 300 units of insulin per 72 hours?

   If yes, **approve for 12 months by NDC for ALL of the following:**
   - **MODD1 Patient Welcome Kit: #4 per year.**
   - **MODD1 Supply Kit: Approve the requested quantity per 30 days.**
   - **Pivot Insulin Pump Starter kit.**
   - **Pivot Supply Kit: Approve the requested quantity per 30 days (Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INSULIN DEVICES

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INSULIN DEVICES (MODD1, Pivot)** requires the following rule(s) be met for approval:

A. You have diabetes mellitus (type 1 or type 2) (a disorder with high blood sugar)
B. You are 18 years of age or older
C. The requested device is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
D. You have completed a comprehensive diabetes education program within the previous 24 months
E. You follow a maintenance program of at least 3 injections of insulin per day and have required frequent self-adjustments of your insulin dose for the past 6 months
F. You have required glucose self-testing of at least 4 times per day on average in the previous 2 months
G. You have tried ONE of the following preferred devices: CeQur, Omnipod 5, Omnipod DASH, V-Go, Twiist
H. You are on a multiple daily insulin injection regimen and meet ONE of the following:
    1. You have a glycosylated hemoglobin level (HbA1c: a type of lab test) that is greater than 7%
    2. You have a history of recurring hypoglycemia (low blood sugar)
    3. You have wide fluctuations (variations) in blood sugar before mealtime
    4. You experience the dawn phenomenon (abnormal early morning increase in blood sugar, usually between 2 a.m. and 8 a.m.) with fasting blood glucose levels frequently exceeding 200 mg/dL
    5. You have a history of severe glycemic excursions (sudden spikes in blood sugar levels)
I. If you are requesting more than 10 cartridges per month, approval also requires:
    1. You are using more than 300 units of insulin per 72 hours

INSULIN DEVICES

RENEWAL CRITERIA

1. Does the patient have a diagnosis of diabetes mellitus (type 1 or type 2) (ICD-10 Groups E08, E09, E10, E11, E13) **AND** meet the following criterion?
   - The patient has shown a positive response to therapy
   - The patient is adherent to physician follow-up visits

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the request for more than 10 cartridges per month?

   If yes, continue to #3.
   If no, **approve for 12 months by NDC for ALL of the following:**
   - **MODD1 Patient Welcome Kit: #4 per year.**
   - **MODD1 Supply Kit: #40 per 30 days.**
   - **Pivot Insulin Pump Starter kit.**
   - **Pivot Supply Kit.**

3. Is the patient using more than 300 units of insulin per 72 hours?

   If yes, **approve for 12 months by NDC for ALL of the following:**
   - **MODD1 Patient Welcome Kit: #4 per year.**
   - **MODD1 Supply Kit: Approve the requested quantity per 30 days.**
   - **Pivot Insulin Pump Starter kit.**
   - **Pivot Supply Kit: Approve the requested quantity per 30 days (Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.
   NOTE: Enter proactive PAs for 12 months by NDC for ALL of the following:
   - **MODD1 Patient Welcome Kit: #4 per year.**
   - **MODD1 Supply Kit: #40 per 30 days.**
   - **Pivot Insulin Pump Starter kit.**
   - **Pivot Supply Kit.**

INSULIN DEVICES

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INSULIN DEVICES (MODD1, Pivot)** requires the following rule(s) be met for renewal:

A. You have diabetes mellitus (type 1 or type 2) (a disorder with high blood sugar)
B. You have shown a positive response to therapy
C. You are adherent (keeping up with) your doctor follow-up visits
D. If you are requesting more than 10 cartridges per month, approval also requires:
   1. You are using more than 300 units of insulin per 72 hours

PRIOR AUTHORIZATION GUIDELINES

INSULIN PUMPS

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
SUBCUTANEOUS INSULIN PUMP	T:SLIM X2, T:SLIM X2 CONTROL-IQ, T:SLIM X2 WITH BASAL-IQ, TANDEM T:SLIM STARTER KIT, TANDEM MOBI SYSTEM, MINIMED 670G, MINIMED 770G, MINIMED 780G, MINIMED 630G, ILET INSULIN PUMP	35487		GPI-10 (9720103000)	
INSULIN INFUSION PUMP	MINIMED FLEX				

GUIDELINES FOR USE

1. Is the claim rejecting for the following POS message: "***Coverage of this product should be provided through medical benefit, available manufacturer programs, or patient assistance programs"*****?**

If yes, guideline does not apply.
If no, continue to #2.

2. Does the patient meet **ALL** of the following criteria?
   - The insulin pump is prescribed by or in consultation with an endocrinologist
   - The patient has completed a comprehensive diabetes education program within the preceding 24 months
   - The patient follows a maintenance program of at least 3 injections of insulin per day and has required frequent self-adjustments of insulin dose for the past 6 months
   - The patient has required glucose self-testing at least 4 times per day on average in the preceding 2 months
   - The patient has NOT received an insulin pump within the last 4 years (Exception: pump is malfunctioning, not repairable, and not under warranty)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

INSULIN PUMPS

GUIDELINES FOR USE (CONTINUED)

3. Does the patient meet **ONE** of the following criteria while on a multiple daily insulin injection regimen?
   - The patient's glycosylated hemoglobin level (HbA1c) is greater than 7%
   - The patient has a history of recurring hypoglycemia
   - The patient has wide fluctuations in blood glucose before mealtime
   - The patient experiences the dawn phenomenon with fasting blood glucose levels frequently exceeding 200 mg/dL
   - The patient has a history of severe glycemic excursions (sudden spikes in blood sugar levels)

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Is the request for T:Slim X2, Tandem T:Slim Starter Kit (T:Slim X2 Starter 7.10), or Tandem Mobi **AND** the patient meets the following criterion?
   - The patient is 2 years of age or older

   If yes, **approve for 1 month by NDC with a quantity limit of #1 fill.**
   If no, continue to #5.

5. Is the request for T:Slim X2 with Basal-IQ **AND** the patient meets the following criterion?
   - The patient is 6 years of age or older

   If yes, **approve for 1 month by NDC with a quantity limit of #1 fill.**
   If no, continue to #6.

6. Is the request for T:Slim X2 with Control-IQ?

   If yes, continue to #7.
   If no, continue to #9.

7. Does the patient have a diagnosis of type 1 diabetes mellitus **AND** meet the following criterion?
   - The patient is 2 years of age or older

   If yes, **approve for 1 month by NDC with a quantity limit of #1 fill.**
   If no, continue to #8.

INSULIN PUMPS

GUIDELINES FOR USE (CONTINUED)

8. Does the patient have a diagnosis of type 2 diabetes mellitus **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 1 month by NDC with a quantity limit of #1 fill.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

9. Is the request for MiniMed 670G and the patient meets **ALL** of the following criteria?
   - The patient has a diagnosis of type 1 diabetes mellitus
   - The patient is 7 years of age or older

   If yes, **approve for 1 month by NDC with a quantity limit of #1 fill.**
   If no, continue to #10.

10. Is the request for MiniMed 770G and the patient meets **ALL** of the following criteria?
    - The patient has a diagnosis of type 1 diabetes mellitus
    - The patient is 2 years of age or older

    If yes, **approve for 1 month by NDC with a quantity limit of #1 fill.**
    If no, continue to #11.

11. Is the request for MiniMed 780G and the patient meets **ALL** of the following criteria?
    - The patient has a diagnosis of type 1 diabetes mellitus
    - The patient is 7 years of age or older

    If yes, **approve for 1 month by NDC with a quantity limit of #1 fill.**
    If no, continue to #12.

12. Is the request for MiniMed 630G and the patient meets **ALL** of the following criteria?
    - The patient has a diagnosis of type 1 diabetes mellitus
    - The patient is 14 years of age or older

    If yes, **approve for 1 month by NDC with a quantity limit of #1 fill.**
    If no, continue to #13.

13. Is the request for iLet Bionic Pancreas insulin pump and the patient meets **ALL** of the following criteria?
    - The patient has a diagnosis of type 1 diabetes mellitus
    - The patient is 6 years of age or older

    If yes, **approve for 1 month by NDC with a quantity limit of #1 fill.**
    If no, continue to #14.

INSULIN PUMPS

GUIDELINES FOR USE (CONTINUED)

14. Is the request for MiniMed Flex starter kit (infusion pump) and the patient meets **ONE** of the following criteria?
    - The patient has a diagnosis of type 1 diabetes mellitus AND is 7 years of age and older
    - The patient has a diagnosis of type 2 diabetes mellitus, is 18 years of age and older, AND requires insulin

    If yes, **approve for 1 month for all NDCs with a quantity limit of #1 fill.**
    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **INSULIN PUMPS** requires the following rule(s) be met for approval:
    A. The requested insulin pump is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
    B. You have completed a comprehensive diabetes education program within the previous 24 months
    C. You follow a maintenance program of at least 3 injections of insulin per day and have required frequent self-adjustments of your insulin dose for the past 6 months
    D. You have required glucose self-testing at least 4 times per day on average in the previous 2 months
    E. You have NOT received an insulin pump within the last 4 years (Exception: your pump is malfunctioning, not repairable, and not under warranty)
    F. You are on a multiple daily insulin injection regimen and meet ONE of the following:
        1. You have a glycosylated hemoglobin level (HbA1c: a type of lab test) greater than 7 percent
        2. You have a history of recurring hypoglycemia (low blood sugar)
        3. You have wide fluctuations in blood sugar before mealtime
        4. You experience the dawn phenomenon (abnormal early morning increase in blood sugar, usually between 2 a.m. and 8 a.m.) with fasting blood glucose levels frequently exceeding 200 mg/dL
        5. You have a history of severe glycemic excursions (sudden spikes in blood sugar levels)

INSULIN PUMPS

GUIDELINES FOR USE (CONTINUED)

G. If you are requesting the T:Slim X2, Tandem T:Slim Starter Kit (T:Slim X2 Starter 7.10), OR Tandem Mobi, approval also requires:
1. You are 2 years of age or older

H. If you are requesting the T:Slim X2 with Basal-IQ, approval also requires:
1. You are 6 years of age or older

I. If you are requesting the T:Slim X2 with Control-IQ, approval also requires ONE of the following:
1. You have type 1 diabetes mellitus (a disorder with high blood sugar) AND you are 2 years of age or older
2. You have type 2 diabetes mellitus (a disorder with high blood sugar) AND you are 18 years of age or older

J. If you are requesting the MiniMed 670G, approval also requires:
1. You have type 1 diabetes mellitus (a disorder with high blood sugar)
2. You are 7 years of age or older

K. If you are requesting the MiniMed 770G, approval also requires:
1. You have type 1 diabetes mellitus (a disorder with high blood sugar)
2. You are 2 years of age or older

L. If you are requesting the MiniMed 780G, approval also requires:
1. You have type 1 diabetes mellitus (a disorder with high blood sugar)
2. You are 7 years of age or older

M. If you are requesting the MiniMed 630G, approval also requires:
1. You have type 1 diabetes mellitus (a disorder with high blood sugar)
2. You are 14 years of age or older

N. If you are requesting the iLet Bionic Pancreas insulin pump, approval also requires:
1. You have type 1 diabetes mellitus (a disorder with high blood sugar)
2. You are 6 years of age or older

O. If you are requesting the MiniMed Flex starter kit (infusion pump), approval also requires ONE of the following:
1. You have type 1 diabetes mellitus (a disorder with high blood sugar) AND are 7 years of age and older
2. You have type 2 diabetes mellitus (a disorder with high blood sugar), are 18 years of age and older, AND require insulin

PRIOR AUTHORIZATION GUIDELINES

INTERFERON ALFA-2B

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INTERFERON ALFA-2B,RECOMB.	INTRON A	04528		GPI-10 (2170006020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have **ONE** of the following diagnoses?
   - Hairy cell leukemia (ICD-10 Group C91.4)
   - Condylomata acuminata (ICD-10 A63.0)
   - AIDS-related Kaposi's sarcoma (ICD-10 C46.9)
   - Chronic hepatitis B (ICD-10 B18.0, B18.1)
   - Non-Hodgkin's lymphoma (ICD-10 Group C85)
   - Malignant melanoma (ICD-10 Group C43)
   - Chronic phase, Philadelphia chromosome positive (Ph+) chronic myelogenous leukemia (CML) (ICD-10 Group C92.1) patients who are minimally treated (within 1 year of diagnosis)
   - Follicular lymphoma (ICD-10 Group C82)
   - Angioblastoma
   - Carcinoid tumor (ICD-10 C7A.00)
   - Chronic myeloid leukemia (ICD-10 C92.1, C92.2)
   - Laryngeal papillomatosis (ICD-10 D14.1)
   - Multiple myeloma (ICD-10 Group C90.0)
   - Neoplasm of conjunctiva-neoplasm of cornea (ICD-10 C69.00)
   - Ovarian cancer (ICD-10 C56.9)
   - Polycythemia vera (ICD-10 D45)
   - Renal cell carcinoma (ICD-10 Groups C64, C65)
   - Skin cancer (ICD-10 C44.90)
   - Thrombocytosis (ICD-10 D75.83)
   - Vulvar vestibulitis (ICD-10 N94.810)

   If yes, **approve by HICL or GPI-10 for 24 weeks (6 months).**
   If no, continue to #2.

INTERFERON ALFA-2B

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of chronic hepatitis C (ICD-10 B18.2) and meet **ALL** of the following criteria?
   - The patient has genotype 1, 2, 3, 4, 5, or 6 infection
   - Therapy is prescribed by or in consultation with a gastroenterologist, infectious disease specialist or a physician specializing in the treatment of hepatitis (e.g., hepatologist)
   - The patient has a detectable pretreatment HCV RNA level/viral load of 50 IU/mL or higher
   - Intron A will be used with ribavirin or the patient has a contraindication to ribavirin
   - The patient had a trial of or contraindication to one clinical standard of care agent: peginterferon alfa-2a or peginterferon alfa-2b

   If yes, **approve by HICL or GPI-10 for 24 weeks (6 months).**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INTERFERON ALFA-2B (Intron A)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Chronic hepatitis C (a type of liver infection)
      2. Hairy cell leukemia (bone marrow cancer that makes too many white blood cells)
      3. Condylomata acuminate (genital warts)
      4. AIDS (acquired immunodeficiency syndrome)-related Kaposi's sarcoma (cancer in those with weak immune system that causes tumors of lymph nodes/skin)
      5. Chronic hepatitis B (a type of liver infection)
      6. Non-Hodgkin's lymphoma (a type of blood cancer)
      7. Malignant melanoma (a type of skin cancer)
      8. Chronic phase, Philadelphia chromosome (type of abnormal gene) positive chronic myelogenous leukemia (type of blood cancer) who are minimally treated (within 1 year of diagnosis)
      9. Follicular lymphoma (a type of blood cancer)
      10. Angioblastoma (certain blood-vessel tumors of the brain)
      11. Carcinoid tumor (a type of slow growing cancerous tumor)
      12. Chronic myeloid leukemia (a type of blood cancer)
      13. Laryngeal papillomatosis (tumors form along the pathways for breathing/digestion)

   (Initial denial text continued on next page)

INTERFERON ALFA-2B

INITIAL CRITERIA (CONTINUED)

14. Multiple myeloma (a type of blood cancer)
15. Neoplasm of conjunctiva-neoplasm of cornea (eye tumors)
16. Ovarian cancer (a type of reproductive system cancer)
17. Polycythemia vera (a type of blood cancer)
18. Renal cell carcinoma (a type of kidney cancer)
19. Skin cancer
20. Thrombocytosis (your body makes too many platelets)
21. Vulvar vestibulitis (type of pain around the female sex organ called the vulva)

B. If you have chronic hepatitis C, approval also requires:

1. You have genotype 1, 2, 3, 4, 5, or 6 infection (types of hepatitis C virus)
2. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive conditions), infectious disease specialist (a doctor who specializes in the treatment of infections), or a physician specializing in the treatment of hepatitis (such as a hepatologist: a type of liver doctor)
3. You have a detectable pretreatment HCV (hepatitis C virus) RNA level/viral load (amount of virus in your blood) of 50 IU/mL or higher
4. Intron A will be used with ribavirin or you have a contraindication to (harmful for you to use) ribavirin
5. You had a trial of or contraindication to one clinical standard of care medication: peginterferon alfa-2a or peginterferon alfa-2b

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INTERFERON ALFA-2B

RENEWAL CRITERIA

1. Does the patient have a diagnosis of chronic hepatitis C (ICD-10 B18.2) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a gastroenterologist, infectious disease specialist or a physician specializing in the treatment of hepatitis (e.g., hepatologist)

   If yes, continue to #2.
   If no, **approve by HICL or GPI-10 for 24 weeks (6 months).**

2. Has the patient already received 24 weeks or more of interferon during this treatment?

   If yes, continue to #3.
   If no, **approve by HICL or GPI-10 for 24 weeks (6 months).**

3. Is the patient's HCV RNA undetectable (less than 50 IU/mL) at 24 weeks?

   If yes, **approve by HICL or GPI-10 for 24 weeks (6 months).**
   If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **INTERFERON ALFA-2B (Intron A)** requires the following rule(s) be met for renewal:

A. The request is for continuation of current therapy or renewal with Intron A therapy

B. If you have chronic hepatitis C (type of liver infection), renewal also requires:

1. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions), infectious disease specialist (a doctor who specializes in the treatment of infections), or a physician specializing in the treatment of hepatitis (such as a hepatologist: a type of liver doctor)
2. If you already received 24 weeks or more of interferon treatment, your HCV (hepatitis C virus) RNA level (amount of virus in your blood) is undetectable (less than 50 IU/mL) at 24 weeks

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

INTERFERON FOR MS - PLEGRIDY

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEGINTERFERON BETA-1A	PLEGRIDY, PLEGRIDY PEN	41331		GPI-10 (6240307530)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease, and active secondary progressive disease **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by GPID or GPI-14 as follows:**
   INITIAL REQUESTS:
   - **FIRST APPROVAL: Plegridy Starter Pack Pen/Syringe: approve for 1 month with a quantity limit of #1mL (2 prefilled pens or syringes).**
   - **SECOND APPROVAL: Plegridy 125mcg Pen/Syringe: approve for 11 months (total approval duration of 12 months) with a quantity limit of #1mL (2 prefilled pens or syringes) per 28 days. (Please enter start date of 3 weeks AFTER the START date of the first approval).**

   SUBSEQUENT REQUESTS:
   - **Plegridy 125mcg Pen/Syringe: approve for 12 months with a quantity limit of #1mL (2 prefilled pens or syringes) per 28 days.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INTERFERON FOR MS - PLEGRIDY** requires the following rule(s) be met for approval:
   A. You have a relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), and active secondary progressive disease (advanced disease)
   B. You are 18 years of age or older

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

INTERFERON GAMMA-1B, RECOMB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
INTERFERON GAMMA-1B, RECOMB.	ACTIMMUNE	06068		GPI-10 (2170006070)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of chronic granulomatous disease (CGD) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a hematologist, infectious disease specialist, or immunologist

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of severe malignant osteopetrosis (SMO) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with an endocrinologist or hematologist

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **INTERFERON GAMMA-1B, RECOMB (Actimmune)** requires the following rules be met for approval:
   A. You have ONE of the following:
      1. Chronic granulomatous disease (CGD: a type of immune disorder)
      2. Severe malignant osteopetrosis (SMO: a type of bone condition)
   B. If you have chronic granulomatous disease, approval also requires:
      1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor), infectious disease specialist (a doctor that specializes in treating infections), or immunologist (a type of immune system doctor)
   C. If you have severe malignant osteopetrosis, approval also requires:
      1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor) or hematologist (a type of blood doctor)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

IOBENGUANE IODINE 131 (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IOBENGUANE I 131	AZEDRA	25483		GPI-10 (2160003520)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable, locally advanced or metastatic pheochromocytoma or paraganglioma and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient requires systemic anticancer therapy
   - The tumors are iobenguane scan positive
   - The patient has **NOT** previously received 1 dosimetric dose and 2 therapeutic doses of Azedra

   If yes, **approve for 12 months by GPID or GPI-14 for all dosages with the following quantity limits:**
   - **Azedra Dosimetric: #1 vial per 12 months.**
   - **Azedra Therapeutic: #4 vials per 12 months.**

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IOBENGUANE IODINE 131 (Azedra)** requires the following rule(s) be met for approval:
   A. You have unresectable (cannot be removed completely through surgery), locally advanced or metastatic pheochromocytoma (type of tumor that releases hormones) or paraganglioma (type of tumors)
   B. You are 12 years of age or older
   C. You require systemic anticancer therapy (cancer treatment that travels in the blood throughout the entire body)
   D. The tumors are iobenguane scan positive (type of test that detects a tumor)
   E. You have **NOT** previously received 1 dosimetric dose (measurement of how much radiation dose is absorbed by the body) and 2 therapeutic doses of Azedra

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

IPILIMUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IPILIMUMAB	YERVOY	37503		GPI-10 (2135523200)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Yervoy will be used as a single agent OR in combination with Opdivo (nivolumab)

   If yes, **approve for 4 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of cutaneous melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - Yervoy will be used for adjuvant treatment
   - There is pathologic involvement of regional lymph nodes of more than 1mm
   - The patient has undergone complete resection, including total lymphadenectomy

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
   - Yervoy will be used in combination with Opdivo (nivolumab)
   - The patient has intermediate or poor risk disease

   If yes, **approve for 3 months by HICL or GPI-10.**
   If no, continue to #4.

4. Does the patient have a diagnosis of unresectable or metastatic colorectal cancer (ICD-10 C19) and meet **ALL** the following criteria?
   - The patient is 12 years of age or older
   - Yervoy will be used in combination with Opdivo (nivolumab)
   - The patient's cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR)

   If yes, **approve for 3 months by HICL or GPI-10.**
   If no, continue to #5.

IPILIMUMAB

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of unresectable or metastatic hepatocellular carcinoma (ICD-10 C22.0) and meet **ONE** of the following criteria?
   - Yervoy will be used in combination with Opdivo (nivolumab) as first-line treatment
   - Yervoy will be used in combination with Opdivo (nivolumab), AND the patient has previously been treated with Nexavar (sorafenib)

   If yes, **approve for 3 months by HICL or GPI-10.**
   If no, continue to #6.

6. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumors express PD-L1 (at least 1%), as determined by an FDA-approved test
   - The tumor does NOT have EGFR or ALK genomic tumor aberrations
   - Yervoy will be used in combination with Opdivo (nivolumab)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #7.

7. Does the patient have a diagnosis of metastatic or recurrent non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The tumor does NOT have EGFR or ALK genomic tumor aberrations
   - Yervoy will be used in combination with Opdivo (nivolumab) and 2 cycles of platinum-doublet chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #8.

8. Does the patient have a diagnosis of unresectable malignant pleural mesothelioma (ICD-10 C45.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Yervoy will be used in combination with Opdivo (nivolumab)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #9.

IPILIMUMAB

INITIAL CRITERIA (CONTINUED)

9. Does the patient have a diagnosis of unresectable advanced or metastatic esophageal squamous cell carcinoma (ESCC) (ICD-10 Group C15) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Yervoy will be used in combination with Opdivo (nivolumab)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IPILIMUMAB (Yervoy)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Unresectable or metastatic melanoma (a type of skin cancer that cannot be completely removed by surgery or has spread to other parts of the body)
      2. Cutaneous melanoma (a type of skin cancer)
      3. Advanced renal cell carcinoma (a type of kidney cancer)
      4. Unresectable or metastatic colorectal cancer (type of digestive tract cancer that cannot be completely removed by surgery or has spread to other parts of the body)
      5. Unresectable or metastatic hepatocellular carcinoma (a type of liver cancer that cannot be completely removed by surgery or has spread to other parts of the body)
      6. Metastatic or recurrent non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to other parts of the body or has returned)
      7. Unresectable (cannot be removed by surgery) malignant pleural mesothelioma (a tumor of the tissue that has spread and lines the lungs, stomach, heart, and other organs)
      8. Unresectable advanced or metastatic esophageal squamous cell carcinoma (ESCC: a type of digestive cancer that cannot be removed by surgery or has spread to other parts of the body)

   B. If you have unresectable or metastatic melanoma, approval also requires:
      1. You are 12 years of age or older
      2. Yervoy will be used as a single medication OR in combination with Opdivo (nivolumab)

   C. If you have cutaneous melanoma, approval also requires:
      1. Yervoy will be used for adjuvant (add-on) treatment
      2. There is pathologic (disease) involvement of regional lymph nodes of more than 1mm
      3. You have undergone complete resection (surgery to completely remove cancer), including total lymphadenectomy (lymph glands are surgically removed)

   (Initial denial text continued on next page)

IPILIMUMAB

INITIAL CRITERIA (CONTINUED)

D. If you have advanced renal cell carcinoma, approval also requires:
1. Yervoy will be used in combination with Opdivo (nivolumab)
2. You have intermediate or poor risk disease

E. If you have unresectable or metastatic colorectal cancer, approval also requires:
1. You are 12 years of age or older
2. Yervoy will be used in combination with Opdivo (nivolumab)
3. Your cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities)

F. If you have unresectable or metastatic hepatocellular carcinoma, approval also requires ONE of the following:
1. Yervoy will be used in combination with Opdivo (nivolumab) as first-line treatment
2. Yervoy will be used in combination with Opdivo (nivolumab), AND you have previously been treated with Nexavar (sorafenib)

G. If you have metastatic or recurrent non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your tumor does NOT have epidermal growth factor receptor (EGFR: type of protein) or anaplastic lymphoma kinase (ALK: type of protein) genomic tumor aberrations (types of gene mutations)
3. You meet ONE of the following:
   a. **For metastatic NSCLC,** Yervoy will be used in combination with Opdivo (nivolumab) AND your tumor expresses programmed death-ligand 1 (PD-L1: type of protein) (at least 1%), as determined by an FDA (Food and Drug Administration)-approved test
   b. **For metastatic or recurrent NSCLC,** Yervoy will be used in combination with Opdivo (nivolumab) and 2 cycles of platinum-doublet chemotherapy (type of cancer medication)

H. If you have unresectable malignant pleural mesothelioma, approval also requires:
1. You are 18 years of age or older
2. Yervoy will be used in combination with Opdivo (nivolumab)

I. If you have unresectable advanced or metastatic esophageal squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. Yervoy will be used in combination with Opdivo (nivolumab)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IPILIMUMAB

RENEWAL CRITERIA

NOTE: For the diagnoses of unresectable or metastatic melanoma, advanced renal cell carcinoma, unresectable or metastatic colorectal cancer, unresectable or metastatic hepatocellular carcinoma, metastatic/recurrent non-small cell lung cancer (NSCLC), unresectable malignant pleural mesothelioma, or unresectable advanced or metastatic esophageal squamous cell carcinoma (ESCC), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of cutaneous melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - Yervoy will be used for adjuvant treatment
   - There is NO evidence of disease recurrence (defined as the appearance of one or more new melanoma lesions: local, regional or distant metastasis)

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IPILIMUMAB (Yervoy)** requires the following rule(s) be met for renewal:
   A. You have cutaneous melanoma (a type of skin cancer)
   B. Yervoy will be used for adjuvant (add-on) treatment
   C. You do NOT have any disease recurrence (defined as the appearance of one or more new melanoma lesions: local, regional or distant metastasis [cancer has spread from original site])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

IPTACOPAN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IPTACOPAN HCL	FABHALTA	49336		GPI-10 (8580753520)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - The patient's diagnosis is confirmed by flow cytometry that shows PNH granulocyte clone size of at least 10 percent AND at least 2 different GPI-protein deficiencies (e.g., CD55, CD59) on at least 2 cell lineages (e.g., erythrocytes, granulocytes)
   - Fabhalta will NOT be used concurrently with a C5 complement inhibitor (e.g., Ultomiris [ravulizumab-cwvz], Soliris [eculizumab], Piasky [crovalimab-akkz]), C3 complement inhibitor (e.g., Empaveli [pegcetacoplan]) or Factor D inhibitor (e.g., Voydeya [danicopan])

   If yes, **approve for 4 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is at risk of rapid disease progression (e.g., urine protein-to-creatinine ratio [UPCR] of at least 1.5 g/g)
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient's diagnosis is confirmed by a renal biopsy
   - The patient has an eGFR of at least 20 mL/min/1.73 m(2)
   - The patient has tried an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use, OR has a contraindication to both drug classes

   If yes, **approve for 9 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, continue to #3.

IPTACOPAN

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of complement 3 glomerulopathy (C3G) (ICD-10 N00.A, N01.A, N02.A, N03.A, N04.A, N05.A, N06.A, N07.A, N00.6, N01.6, N02.6, N03.6, N04.6, N05.6, N06.6, N07.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient's diagnosis is confirmed by a renal biopsy
   - The patient has a urine-protein creatine ratio (UPCR) of at least 1 g/g
   - The patient has an eGFR of at least 30mL/min/1.73m(2)
   - The patient has tried an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use, OR has a contraindication to both drug classes
   - Fabhalta will NOT be used concurrently with another complement inhibitor (e.g., Empaveli [pegcetacoplan]) for the treatment of C3G

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IPTACOPAN (Fabhalta)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
      2. Primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
      3. Complement 3 glomerulopathy (C3G: a type of kidney disease)

   B. If you have paroxysmal nocturnal hemoglobinuria, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
      3. Your paroxysmal nocturnal hemoglobinuria (PNH) diagnosis is confirmed by flow cytometry (a type of lab test) that shows ALL of the following:
         a. You have a PNH granulocyte clone size of at least 10%
         b. You have at least 2 different GPI-protein deficiencies (a certain type of protein is missing, such as CD55, CD59) on at least 2 cell lineages (types of cells, such as erythrocytes [red blood cells], granulocytes [a type of white blood cell])
      4. You will NOT use Fabhalta concurrently (at the same time) with a C5 complement inhibitor (such as Ultomiris [ravulizumab-cwvz], Soliris [eculizumab], Piasky [crovalimab-akkz]), C3 complement inhibitor (such as Empaveli [pegcetacoplan]) or Factor D inhibitor (such as Voydeya [danicopan])

IPTACOPAN

INITIAL CRITERIA (CONTINUED)

C. If you have primary immunoglobulin A nephropathy, approval also requires:
1. You are 18 years of age or older
2. You are at risk of rapid disease progression (such as a urine protein-to-creatinine ratio [UPCR: a test that measures the amount of protein in urine] of at least 1.5 g/g)
3. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
4. Your diagnosis is confirmed by a renal biopsy (removal of cells or tissue from the kidney for examination)
5. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 20 mL/min/1.73 m(2)
6. You have tried an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use, OR you have a contraindication to (harmful for you to use) both of these medication classes

D. If you have complement 3 glomerulopathy, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
3. Your diagnosis is confirmed by a renal biopsy (removal of cells or tissue from the kidney for examination)
4. You have a urine-protein creatine ratio (UPCR: a test that measures the amount of protein in urine) of at least 1g/g
5. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 30mL/min/1.73m(2)
6. You have tried an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use, OR you have a contraindication to (harmful for you to use) both of these medication classes
7. You will NOT use Fabhalta concurrently (at the same time) with another complement inhibitor (such as Empaveli [pegcetacoplan]) for the treatment of complement 3 glomerulopathy (a type of kidney disease)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IPTACOPAN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient has experienced a clinical benefit (e.g., reduction in number of blood transfusions, improvement/stabilization of lactate dehydrogenase [LDH] and hemoglobin levels) compared to baseline
   - Fabhalta will NOT be used concurrently with a C5 complement inhibitor (e.g., Ultomiris [ravulizumab-cwvz], Soliris [eculizumab], Piasky [crovalimab-akkz]), C3 complement inhibitor (e.g., Empaveli [pegcetacoplan]) or Factor D inhibitor (e.g., Voydeya [danicopan])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of primary immunoglobulin A nephropathy (IgAN) (ICD-10 Group N02.B) and meet **ONE** of the following criteria?
   - The patient has had a reduction in proteinuria
   - The patient has improved or stable kidney function compared to baseline

   If yes, **approve for 9 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, continue to #3.

3. Does the patient have a diagnosis of complement 3 glomerulopathy (C3G) (ICD-10 N00.A, N01.A, N02.A, N03.A, N04.A, N05.A, N06.A, N07.A, N00.6, N01.6, N02.6, N03.6, N04.6, N05.6, N06.6, N07.6) and meet **ALL** of the following criteria?
   - The patient has improved or stable kidney function compared to baseline OR has a reduction in proteinuria
   - Fabhalta will NOT be used concurrently with another complement inhibitor (e.g., Empaveli [pegcetacoplan]) for the treatment of C3G

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

IPTACOPAN

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IPTACOPAN (Fabhalta)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
   2. Primary immunoglobulin A nephropathy (IgAN: a type of kidney disease)
   3. Complement 3 glomerulopathy (C3G: a type of kidney disease)

B. If you have paroxysmal nocturnal hemoglobinuria, renewal also requires:
   1. You have experienced a clinical benefit (such as a reduction in the number of blood transfusions [adding blood to the body], improvement/stabilization of lactate dehydrogenase [LDH: a type of enzyme] levels and hemoglobin [type of protein in red blood cells] levels) compared to baseline (before treatment)
   2. You will NOT use Fabhalta concurrently (at the same time) with a C5 complement inhibitor (such as Ultomiris [ravulizumab-cwvz], Soliris [eculizumab], Piasky [crovalimab-akkz]), C3 complement inhibitor (such as Empaveli [pegcetacoplan]) or Factor D inhibitor (such as Voydeya [danicopan])

C. If you have primary immunoglobulin A nephropathy, renewal also requires:
   1. You meet ONE of the following:
      a. You have had a reduction (decrease) in proteinuria (a condition with high levels of protein in the urine)
      b. You have improved or stable kidney function compared to baseline (before starting Fabhalta)

D. If you have complement 3 glomerulopathy, renewal also requires:
   1. You have improved or stable kidney function compared to baseline (before treatment) OR you have a reduction (decrease) in proteinuria (a condition with high levels of protein in the urine)
   2. You will NOT use Fabhalta concurrently (at the same time) with another complement inhibitor (such as Empaveli [pegcetacoplan]) for the treatment of complement 3 glomerulopathy (a type of kidney disease)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

IRINOTECAN LIPOSOMAL	ONIVYDE	42715		GPI-10 (2155004020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic pancreatic adenocarcinoma **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - Onivyde will be used in combination with oxaliplatin, fluorouracil and leucovorin as first-line treatment
   - Onivyde will be used in combination with fluorouracil and leucovorin AND the patient has experienced disease progression following gemcitabine-based therapy

   If yes, **approve for 12 months by HICL or GPI-10 with a fill limit of #2 fills per 28 days.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IRINOTECAN LIPOSOMAL (Onivyde)** requires the following rule(s) be met for approval:
   A. You have metastatic pancreatic adenocarcinoma (a type of cancer of the pancreas that has spread to other parts of the body)
   B. You are 18 years of age or older
   C. You meet ONE of the following:
      1. Onivyde will be used in combination with oxaliplatin, fluorouracil and leucovorin as first-line treatment (used for initial treatment)
      2. Onivyde will be used in combination with fluorouracil and leucovorin AND you have experienced disease progression (disease has worsened) following gemcitabine-based therapy (a type of cancer drug)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ISATUXIMAB-IRFC (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ISATUXIMAB-IRFC	SARCLISA	46389		GPI-10 (2135403320)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of multiple myeloma (ICD-10 Group C90.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Sarclisa is used in combination with Pomalyst (pomalidomide) and dexamethasone
   - The patient has received at least two prior therapies including Revlimid (lenalidomide) and a proteasome inhibitor (e.g., Ninlaro [ixazomib], Kyprolis [carfilzomib])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of relapsed or refractory multiple myeloma (ICD-10 Group C90.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Sarclisa is used in combination with Kyprolis (carfilzomib) and dexamethasone
   - The patient has received one to three prior lines of therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have newly diagnosed multiple myeloma (ICD-10 Group C90.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Sarclisa is used in combination with Velcade (bortezomib), Revlimid (lenalidomide) and dexamethasone
   - The patient is not eligible for autologous stem cell transplant (ASCT)

   If yes, **approve for 12 months by HICL or GPI-10.**

   If no, do not approve.

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ISATUXIMAB-IRFC (Sarclisa)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Multiple myeloma (type of blood cancer)
   2. Relapsed or refractory multiple myeloma (type of blood cancer that has returned or no longer responds to treatment)

B. If you have multiple myeloma, approval also requires:
   1. You are 18 years of age or older
   2. Sarclisa will be used in combination with Pomalyst (pomalidomide) and dexamethasone
   3. You have received at least two prior therapies including Revlimid (lenalidomide) and a proteasome inhibitor (such as Ninlaro [ixazomib], Kyprolis [carfilzomib])

C. If you have relapsed or refractory multiple myeloma, approval also requires:
   1. You are 18 years of age or older
   2. Sarclisa will be used in combination with Kyprolis (carfilzomib) and dexamethasone
   3. You have received one to three prior lines of therapy

D. If you have newly diagnosed multiple myeloma, approval also requires:
   1. You are 18 years of age or older
   2. Sarclisa will be used in combination with Velcade (bortezomib), Revlimid (lenalidomide) and dexamethasone
   3. You are not eligible for autologous stem cell transplant (ASCT: a type of treatment that uses your own healthy blood cells)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

1. Is this request for continuation of therapy after the patient was started on Cresemba in the hospital?

   If yes, **approve the requested strength for 6 months by GPID or GPI-14 with a quantity limit as follows:**
   - **74.5 mg: #150 per 30 days.**
   - **186 mg: #60 per 30 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of invasive aspergillosis (ICD-10 Group B44) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older and weighs at least 16 kg (35.2 lb)
   - Therapy is prescribed by or in consultation with an infectious disease specialist
   - The patient had a trial of or contraindication to voriconazole

   If yes, **approve the requested strength for 6 months total by GPID or GPI-14 as follows:**
   INITIAL REQUESTS:
   - **FIRST APPROVAL: Approve for 1 month with a quantity limit as follows:**
     - **74.5 mg: #170 per 30 days for 1 fill.**
     - **186 mg: #68 per 30 days for 1 fill.**
   - **SECOND APPROVAL: Approve for 5 months with a quantity limit as follows (enter a start date of 3 days before the end date of the first approval):**
     - **74.5 mg: #150 per 30 days.**
     - **186 mg: #60 per 30 days.**

   SUBSEQUENT REQUESTS:
   - **Approve the requested strength for 6 months with a quantity limit as follows:**
     - **74.5 mg: #150 per 30 days.**
     - **186 mg: #60 per 30 days.**

   If no, continue to #3.

ITRACONAZOLE - TOLSURA

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ITRACONAZOLE - TOLSURA** requires the following rule(s) be met for approval:

A. You have ONE of the following fungal infections:
   1. Blastomycosis (pulmonary and extrapulmonary) (a type of fungal infection affecting in and outside of the lungs)
   2. Histoplasmosis (a type of fungal infection) (including chronic cavitary pulmonary [affecting the lungs] disease and disseminated, nonmeningeal [not affecting spinal cord and brain membranes] histoplasmosis)
   3. Aspergillosis (pulmonary and extrapulmonary) (a type of fungal infection in and outside of the lungs)

B. If you have blastomycosis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an infectious disease specialist (a doctor who specializes in the treatment of infections)
   3. You have tried a generic itraconazole formulation
   4. Tolsura is prescribed because you had a poor clinical response to other formulations of itraconazole due to poor bioavailability (amount of medication in the body that has an effect)

C. If you have histoplasmosis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an infectious disease specialist (a doctor who specializes in the treatment of infections)
   3. You have tried a generic itraconazole formulation
   4. Tolsura is prescribed because you had a poor clinical response to other formulations of itraconazole due to poor bioavailability (amount of medication in the body that has an effect)

D. If you have aspergillosis, approval also requires:
   1. You are 18 years of age or older
   2. You are intolerant or refractory (not responsive) to amphotericin B therapy
   3. Therapy is prescribed by or in consultation with an infectious disease specialist (a doctor who specializes in the treatment of infections)
   4. You have tried a generic itraconazole formulation
   5. Tolsura is prescribed because you had a poor clinical response to other formulations of itraconazole due to poor bioavailability (amount of medication in the body that has an effect)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

IVACAFTOR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IVACAFTOR	KALYDECO	38461		GPI-10 (4530203000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient is 1 month of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or cystic fibrosis expert
   - Kalydeco will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
   - The patient has a responsive mutation in the CFTR gene
   - The patient is NOT homozygous for the F508del mutation in the CFTR gene

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IVACAFTOR (Kalydeco)** requires the following rule(s) be met for approval:
   A. You have cystic fibrosis (CF: a type of lung disorder)
   B. You are 1 month of age or older
   C. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or cystic fibrosis expert
   D. You will NOT use Kalydeco concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
   E. You have a responsive mutation in the CFTR gene (abnormal change in a type of gene that can be treated with Kalydeco)
   F. You are NOT homozygous (have two copies of the same gene) for the F508del mutation (abnormal change) in the CFTR gene

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

IVACAFTOR

RENEWAL CRITERIA

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient has experienced an improvement in clinical status
   - Kalydeco will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)

   If yes, **approve for lifetime by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IVACAFTOR (Kalydeco)** requires the following rule(s) be met for renewal:
   A. You have cystic fibrosis (CF: a type of lung disorder)
   B. You have experienced an improvement in your clinical status
   C. You will NOT use Kalydeco concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

IVOSIDENIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IVOSIDENIB	TIBSOVO	45096		GPI-10 (2153494000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of acute myeloid leukemia (AML) (ICD-10 Group C92.0)?

   If yes, continue to #2.
   If no, continue to #5.

2. Is the patient newly diagnosed (e.g., starting or previously started Tibsovo treatment at the time of diagnosis) and meets **ALL** of the following criteria?
   - Tibsovo will be used in combination with azacitidine (Onureg) or as monotherapy
   - The patient's cancer has a susceptible isocitrate dehydrogenase-1 (IDH1) mutation, as detected by an FDA-approved test

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - The patient is 75 years of age or older
   - The patient is between 18 and 74 years of age with comorbidities that prevent the use of intensive induction chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Has the patient's cancer relapsed or is refractory and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has a susceptible isocitrate dehydrogenase-1 (IDH1) mutation, as detected by an FDA-approved test

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

IVOSIDENIB

GUIDELINES FOR USE (CONTINUED)

5. Does the patient have a diagnosis of myelodysplastic syndromes (MDS) (ICD-10 Group D46) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has relapsed or is refractory
   - The patient's cancer has a susceptible isocitrate dehydrogenase-1 (IDH1) mutation, as detected by an FDA-approved test

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, continue to #6.

6. Does the patient have a diagnosis of cholangiocarcinoma (ICD-10 C22.1, C24.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is locally advanced or metastatic
   - The patient's cancer has been previously treated
   - The patient's cancer has an isocitrate dehydrogenase-1 (IDH1) mutation, as detected by an FDA-approved test

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **IVOSIDENIB (Tibsovo)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Acute myeloid leukemia (AML: a type of blood and bone marrow cancer)
      2. Myelodysplastic syndromes (MDS: a type of blood cancer)
      3. Cholangiocarcinoma (bile duct cancer)

IVOSIDENIB

GUIDELINES FOR USE (CONTINUED)

B. If you have newly diagnosed acute myeloid leukemia (such as you are starting or previously started Tibsovo treatment at the time your condition was identified), approval also requires:
1. Tibsovo will be used in combination with azacitidine (Onureg) or as monotherapy (one drug treatment)
2. Your cancer has a susceptible (can be treated with the drug) isocitrate dehydrogenase-1 (IDH1: a type of enzyme) mutation (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
3. You meet ONE of the following:
   a. You are 75 years of age or older
   b. You are between 18 and 74 years of age AND you have comorbidities (additional diseases) that prevent the use of intensive induction chemotherapy (a type of initial therapy to treat cancer)

C. If you have relapsed or refractory acute myeloid leukemia (cancer that has returned or has not responded to treatment), approval also requires:
1. You are 18 years of age or older
2. Your cancer has a susceptible (can be treated with the drug) isocitrate dehydrogenase-1 (IDH1: a type of enzyme) mutation (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test

D. If you have myelodysplastic syndromes, approval also requires:
1. You are 18 years of age or older
2. Your cancer has relapsed or is refractory (cancer that has returned or has not responded to treatment)
3. Your cancer has a susceptible (can be treated with the drug) isocitrate dehydrogenase-1 (IDH1: a type of enzyme) mutation (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test

E. If you have cholangiocarcinoma, approval also requires:
1. You are 18 years of age or older
2. Your cancer is locally advanced or metastatic (cancer that has spread from where it started to nearby tissue/lymph nodes or to other parts of the body)
3. Your cancer has been previously treated
4. Your cancer has an isocitrate dehydrogenase-1 (IDH1: a type of enzyme) mutation (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IXABEPILONE	IXEMPRA	35083		GPI-10 (2150001100)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic or locally advanced breast cancer?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Has the patient tried a chemotherapy regimen containing an anthracycline (doxorubicin or epirubicin), a taxane (paclitaxel or docetaxel), and Xeloda (capecitabine)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Is the requested medication being used in combination with Xeloda (capecitabine)?

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Has the patient tried a chemotherapy regimen containing an anthracycline (doxorubicin or epirubicin) and a taxane (paclitaxel or docetaxel)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

IXEKIZUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
IXEKIZUMAB	TALTZ SYRINGE, TALTZ AUTOINJECTOR	43193		GPI-10 (9025055400)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has had at least a 3-month trial of one clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) OR PUVA (phototherapy) for the treatment of PsO
   - The patient has a contraindication or intolerance to both clinical standard of care therapies: an immunosuppressant AND PUVA (phototherapy) for the treatment of PsO
   - The patient is switching from a different biologic (e.g., Humira [adalimumab]), PDE-4 inhibitor (e.g., Otezla [apremilast]), or JAK inhibitor for the same indication

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

IXEKIZUMAB

INITIAL CRITERIA (CONTINUED)

3. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic and is switching to Taltz
   - The patient has psoriasis covering 3 percent or more of body surface area (BSA)
   - The patient has psoriatic lesions affecting the hands, feet, genital area, face, or scalp

   If yes, **approve as follows:**
   - **For patients who are 6 to 17 years of age, approve all formulations and strengths for 6 months by GPID or GPI-14 as follows:**
     - **80 mg/mL: #1 mL per 28 days**
     - **40 mg/0.5 mL: #0.5 mL per 28 days**
     - **20 mg/0.25 mL: #0.25 mL per 28 days**

     (Please also enter proactive PAs for all formulations of the 80 mg/mL strength for 1 month with a quantity limit of #2 mL per 28 days.)
   - **For patients who are 18 years of age or older, approve all formulations of the 80 mg/mL strength for 6 months by GPID or GPI-14 with a quantity limit of #1 mL per 28 days.**

     (Please also enter proactive PAs for all formulations of the 80 mg/mL strength by GPID or GPI-14 as follows:
     - **Approve for 1 month with a quantity limit of #3 mL per 28 days.**
     - **Approve for 2 months with a quantity limit of #2 mL per 28 days. Enter a start date of 1 WEEK BEFORE the END date of the above 1-month approval)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist or dermatologist
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve all formulations of the 80 mg/mL strength for 6 months by GPID or GPI-14 with a quantity limit of #1 mL per 28 days.**
   (Please also enter proactive PAs for all formulations of the 80 mg/mL strength for 1 month with a quantity limit of #2 mL per 28 days.)

   If no, continue to #5.

IXEKIZUMAB

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)

   If yes, **approve all formulations of the 80 mg/mL strength for 6 months by GPID or GPI-14 with a quantity limit of #1 mL per 28 days.**
   (Please also enter proactive PAs for all formulations of the 80 mg/mL strength for 1 month by GPID or GPI-14 with a quantity limit of #2 mL per 28 days.)

   If no, continue to #6.

6. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a rheumatologist
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Cimzia [certolizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA
   - The patient had a trial of or contraindication to the clinical standard of care agent: an NSAID (e.g., ibuprofen, naproxen, meloxicam)

   If yes, continue to #7.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic and is switching to Taltz
   - The patient has C-reactive protein (CRP) levels above the upper limit of normal
   - The patient has sacroiliitis on magnetic resonance imaging (MRI)

   If yes, **approve all formulations of the 80mg/mL strength for 6 months by GPID or GPI-14 with a quantity limit of #1mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

IXEKIZUMAB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IXEKIZUMAB (Taltz)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)

B. If you have moderate to severe plaque psoriasis, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor)
   3. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis
   4. You meet ONE of the following:
      a. You have had at least a 3-month trial of one clinical standard of care therapy: an oral immunosuppressant (cyclosporine, methotrexate, tacrolimus) or PUVA (phototherapy: a type of light therapy) for the treatment of plaque psoriasis
      b. You have a contraindication (harmful for you to use) or intolerance (side effect) to both clinical standard of care therapies: an immunosuppressant (a type of drug that decreases the body's immune response) and PUVA (phototherapy) for the treatment of plaque psoriasis
      c. You are switching from a different biologic (such as Humira [adalimumab]), PDE-4 (phosphodiesterase-4) inhibitor (such as Otezla [apremilast]), or JAK (Janus kinase) inhibitor for the same indication
   5. You meet ONE of the following:
      a. You were previously stable on another biologic and are switching to Taltz
      b. You have psoriasis covering 3 percent or more of body surface area (BSA)
      c. You have psoriatic lesions (rashes) affecting the hands, feet, genital area, face, or scalp

(Initial denial text continued on next page)

IXEKIZUMAB

INITIAL CRITERIA (CONTINUED)

C. If you have psoriatic arthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor) or dermatologist (a type of skin doctor)
3. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

D. If you have ankylosing spondylitis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)

E. If you have non-radiographic axial spondyloarthritis, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
3. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Cimzia [certolizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of non-radiographic axial spondyloarthritis
4. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: an NSAID (non-steroidal anti-inflammatory drug, such as ibuprofen, naproxen, meloxicam)
5. You meet ONE of the following:
   a. You were previously stable on another biologic and are switching to Taltz
   b. You have C-reactive protein (CRP: a measure of how much inflammation is in the body) levels above the upper limit of normal
   c. You have sacroiliitis (a type of inflammation where lower spine and pelvis connect) on magnetic resonance imaging (MRI: a type of imaging lab)

IXEKIZUMAB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe plaque psoriasis (PsO) (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient has achieved or maintained clear or minimal disease or a decrease in PASI (Psoriasis Area and Severity Index) of at least 50 percent or more
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsO

   If yes, **approve all strengths and formulations for 12 months by GPID or GPI-14 as follows:**
   - **80mg/mL: #1mL per 28 days.**
   - **40mg/0.5mL: #0.5mL per 28 days.**
   - **20mg/0.25mL: #0.25mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of psoriatic arthritis (PsA) (ICD-10 Group L40.5) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Otezla (apremilast)]) for the treatment of PsA

   If yes, **approve all formulations of the 80mg/mL strength for 12 months by GPID or GPI-14 with a quantity limit of #1mL per 28 days.**

   If no, continue to #3.

IXEKIZUMAB

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of ankylosing spondylitis (AS) (ICD-10 Group M45 except Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) score while on therapy
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of AS

   If yes, **approve all formulations of the 80mg/mL strength for 12 months by GPID or GPI-14 with a quantity limit of #1mL per 28 days.**

   If no, continue to #4.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

4. Does the patient have a diagnosis of non-radiographic axial spondyloarthritis (nr-axSpA) (ICD-10 Group M45.A) and meet **ALL** of the following criteria?
   - The patient has experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI) score while on therapy
   - Taltz will NOT be used concurrently with another systemic biologic (e.g., Cimzia [certolizumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of nr-axSpA

   If yes, **approve all formulations of the 80mg/mL strength for 12 months by GPID or GPI-14 with a quantity limit of #1mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

IXEKIZUMAB

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **IXEKIZUMAB (Taltz)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe plaque psoriasis (PsO: a type of skin condition)
   2. Psoriatic arthritis (PsA: a type of skin and joint condition)
   3. Ankylosing spondylitis (AS: a type of joint condition)
   4. Non-radiographic axial spondyloarthritis (nr-axSpA: a type of joint condition)

B. If you have moderate to severe plaque psoriasis, renewal also requires:
   1. You have achieved or maintained clear or minimal disease or a decrease in PASI (Psoriasis Area and Severity Index: used to measure the severity and extent of psoriasis) of at least 50 percent or more while on therapy
   2. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of plaque psoriasis

C. If you have psoriatic arthritis, renewal also requires:
   1. You have experienced or maintained a 20 percent or greater improvement in tender joint count or swollen joint count while on therapy
   2. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Otezla (apremilast)]) for the treatment of psoriatic arthritis

D. If you have ankylosing spondylitis, renewal also requires:
   1. You have experienced or maintained an improvement of at least 50 percent or 2 units (scale of 1-10) in the Bath Ankylosing Spondylitis Disease Activity Index (BASDAI: diagnostic test which allows a physician to determine the effectiveness of a current medication) score while on therapy
   2. You will NOT use Taltz concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ankylosing spondylitis

(Renewal denial text continued on next page)

LACOSAMIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LACOSAMIDE	MOTPOLY XR		54119 54121 54122	GPI-14 (72600036007030, 72600036007020, 72600036007025)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of partial-onset seizures (ICD-10 Groups G40.1, G40.2) and meet **ALL** of the following criteria?
   - The patient weighs at least 50 kg (110 lbs.)
   - The patient had a trial of or contraindication to THREE generic antiepileptic medications (e.g., carbamazepine, divalproex sodium, valproic acid, oxcarbazepine, levetiracetam IR or ER, gabapentin, zonisamide, topiramate, lamotrigine)
   - The patient is unable to tolerate lacosamide immediate-release

   If yes, **approve for a total of 12 months by GPID or GPI-14. Please enter two authorizations as follows:**
   - **FIRST APPROVAL: Approve all strengths for 1 month with the following quantity limits:**
     - **100 mg: #4 per day.**
     - **150 mg: #2 per day.**
     - **200 mg: #2 per day.**
   - **SECOND APPROVAL: Approve the requested strength for 11 months with the following quantity limits (please enter a start date of 3 days BEFORE the END date of the first approval):**
     - **100 mg: #1 per day.**
     - **150 mg: #2 per day.**
     - **200 mg: #2 per day.**

   If no, continue to #2.

LACOSAMIDE

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of primary generalized tonic-clonic seizures (ICD-10 Group G40.3) and meet **ALL** of the following criteria?
   - The patient weighs at least 50 kg (110 lbs)
   - Motpoly XR will be used as adjunctive treatment
   - The patient had a trial of or contraindication to THREE generic antiepileptic medications (e.g., carbamazepine, divalproex sodium, valproic acid, oxcarbazepine, levetiracetam IR or ER, gabapentin, zonisamide, topiramate, lamotrigine)
   - The patient is unable to tolerate lacosamide immediate-release

   If yes, **approve for a total of 12 months by GPID or GPI-14. Please enter two authorizations as follows:**
   - **FIRST APPROVAL: Approve all strengths for 1 month with the following quantity limits:**
     - **100 mg: #4 per day.**
     - **150 mg: #2 per day.**
     - **200 mg: #2 per day.**
   - **SECOND APPROVAL: Approve the requested strength for 11 months with the following quantity limits (please enter a start date of 3 days BEFORE the END date of the first approval):**
     - **100 mg: #1 per day.**
     - **150 mg: #2 per day.**
     - **200 mg: #2 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LACOSAMIDE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LACOSAMIDE (Motpoly XR)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Partial-onset seizures (a type of seizure)
   2. Primary generalized tonic-clonic seizures (a type of seizure)

B. If you have primary-onset seizures, approval also requires:
   1. You weigh at least 50 kilograms (110 pounds)
   2. You have tried or have a contraindication to (harmful for you to use) THREE generic anti-seizure medications (such as carbamazepine, divalproex sodium, valproic acid, oxcarbazepine, levetiracetam immediate-release or extended-release, gabapentin, zonisamide, topiramate, lamotrigine)
   3. You are not able to tolerate lacosamide immediate-release

C. If you have primary generalized tonic-clonic seizures, approval also requires:
   1. You weigh at least 50 kilograms (110 pounds)
   2. Motpoly XR will be used as adjunctive (add-on) treatment
   3. You have tried or have a contraindication to (harmful for you to use) THREE generic anti-seizure medications (such as carbamazepine, divalproex sodium, valproic acid, oxcarbazepine, levetiracetam immediate-release or extended-release, gabapentin, zonisamide, topiramate, lamotrigine)
   4. You are not able to tolerate lacosamide immediate-release

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LACOSAMIDE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of partial-onset seizures (ICD-10 Groups G40.1, G40.2)?

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **100 mg: #1 per day.**
   - **150 mg: #2 per day.**
   - **200 mg: #2 per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of primary generalized tonic-clonic seizures (ICD-10 Group G40.3)?

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **100 mg: #1 per day.**
   - **150 mg: #2 per day.**
   - **200 mg: #2 per day.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LACOSAMIDE (Motpoly XR)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Partial-onset seizures (a type of seizure)
      2. Primary generalized tonic-clonic seizures (a type of seizure)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LACTIC ACID/CITRIC/POTASSIUM

GUIDELINES FOR USE (CONTINUED)

CONTRACEPTIVE ZERO COST SHARE OVERRIDE CRITERIA

1. Is the patient requesting a cost share exception for the requested contraceptive agent **AND** does the plan cover contraceptives at zero cost share (i.e., the plan follows Affordable Care Act [ACA] recommendations and is linked to MedImpact's Essential Health Benefit Tables)?

   If yes, continue to #2.
   If no, guideline does not apply.

2. Do **ANY** of the following criteria apply?
   - The patient's plan has specific procedures, instructions, and/or policies for cost share exception processes or for multi-source brand agent overrides (DAW1 override)
   - The request is for an agent with an excluded route of administration, such that the agent will be covered on the medical benefit

   If yes, guideline does not apply.
   If no, continue to #3.

3. Is the request for a generic agent?

   If yes, **approve for 12 months by HICL or GPI-10 at zero copay.**
   If no, continue to #4.

4. Is the request for **ONE** of the following?
   - A single-source brand (SSB) contraceptive agent that has no preferred generic agents or therapeutically equivalent products available
   - A multi-source brand (MSB) contraceptive agent

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

LACTIC ACID/CITRIC/POTASSIUM

GUIDELINES FOR USE - CONTRACEPTIVE ZERO COST SHARE OVERRIDE CRITERIA (CONTINUED)

5. Does the patient meet **ONE** of the following criteria?
   - Two preferred medications are medically inappropriate for the patient (alternatively, one if only one agent is available)
   - The patient has tried or has a documented medical contraindication to two preferred medications (alternatively, a trial of one if only one agent is available)
   - The prescriber provided documentation confirming that the requested drug is considered medically necessary (considerations may include severity of side effects, differences in permanence and reversibility of contraceptives, and ability to adhere to the appropriate use of the item or service)

   If yes, **approve for 12 months by HICL or GPI-10 at zero copay.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **CONTRACEPTIVE ZERO COST SHARE OVERRIDE** requires that the following rules be met for approval:

   A. The request is for ONE of the following:
      1. A generic contraceptive agent
      2. A single-source brand (SSB) contraceptive agent that has no preferred generic agents or therapeutically equivalent products available
      3. A multi-source brand (MSB) contraceptive agent

   B. If the request is for a single-source brand or multi-source brand contraceptive medication, approval also requires ONE of the following:
      1. Two preferred medications are medically inappropriate for you (or one if only one agent is available)
      2. You have tried or have a documented medical contraindication (harmful for) to two preferred medications (or one if only one agent is available)
      3. Your doctor has provided documentation confirming that the requested drug is considered medically necessary for you (considerations may include severity of side effects, differences in durability and reversibility of contraceptive and ability to adhere to the appropriate use)

LACTIC ACID/CITRIC/POTASSIUM

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Phexx.

The Contraceptive Zero Cost Share Override criteria applies to plans where the pharmacy benefit allows for coverage of contraceptives at zero copay. The override criteria allow patient access to all FDA-approved contraceptive methods at zero copay by waiving the applicable cost-sharing for branded or non-preferred branded contraceptives.

The MedImpact standard Zero Copay list currently offers coverage of all methods at zero cost share. The zero cost share list offers a variety of contraceptives. Covered methods (zero cost share) include 1) specified barrier contraceptives (condoms, diaphragms, cervical caps, and nonoxynol-9) 2) generic oral hormonal contraceptives under STC 0248, including generic emergency contraceptives and Ella 3) generic transdermal patch contraceptive (currently marketed by Mylan as Xulane) 4) Nuvaring vaginal ring 5) Intrauterine devices – levonorgestrel IUDs and copper IUDs 6) Depo-Provera injections, 7) Nexplanon implant devices, and 8) Intravaginal contraceptives. The majority of the contraceptives on the EHB Zero cost share list are generic agents, which promotes a cost-effective formulary.
The healthcare.gov website (https://www.healthcare.gov/coverage/birth-control-benefits/) currently recommends: All approved contraceptive methods prescribed by a woman's doctor are covered, including:
Barrier methods (used during intercourse), like diaphragms and sponges
Hormonal methods, like birth control pills and vaginal rings
Implanted devices, like intrauterine devices (IUDs)
Emergency contraception, like Plan B® and Ella®
Sterilization procedures
Patient education and counseling

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

LAMOTRIGINE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LAMOTRIGINE	SUBVENITE	07378		GPI-10 (7260004000)	BRAND = SUBVENITE

GUIDELINES FOR USE

1. Does the patient have a diagnosis of partial-onset seizures (ICD-10 Group G40.1, Group G40.2)?

   If yes, continue to #2.
   If no, continue to #4.

2. Will Subvenite be used as adjunctive therapy and the patient meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient has a contraindication to or is unable to swallow lamotrigine tablets

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Will Subvenite be used as monotherapy and the patient meets **ALL** of the following criteria?
   - The patient is 16 years of age or older
   - The patient is receiving treatment with carbamazepine, phenytoin, phenobarbital, primidone, or valproate as the single antiepileptic drug (AED) but will be switched to Subvenite
   - The patient has a contraindication to or is unable to swallow lamotrigine tablets

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient have a diagnosis of primary generalized tonic-clonic (PGTC) seizures (ICD-10 Group G40.3) or generalized seizures of Lennox-Gastaut syndrome (ICD-10 Group G40.81), and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Subvenite will be used as adjunctive therapy
   - The patient has a contraindication to or is unable to swallow lamotrigine tablets

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

LAMOTRIGINE

GUIDELINES FOR USE (CONTINUED)

5. Does the patient have a diagnosis of bipolar I disorder (ICD-10 Group F31 except Group F31.8) and meet **ALL** of the following criteria?
   - Subvenite will be used for maintenance treatment
   - The patient is receiving treatment with standard therapy (e.g., olanzapine, valproate, lithium) for acute mood episodes (depression, mania, hypomania, mixed episodes)
   - The patient has a contraindication to or is unable to swallow lamotrigine tablets

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LAMOTRIGINE (Subvenite)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Partial-onset seizures (a type of seizure)
      2. Primary generalized tonic-clonic (PGTC) seizures (a type of seizure)
      3. Generalized seizures of Lennox-Gastaut syndrome (a type of seizure disorder in young children)
      4. Bipolar I disorder (a type of mood disorder)

   B. If you have partial-onset seizures, approval also requires ONE of the following:
      1. You will use Subvenite as adjunctive (add-on) therapy and meet ALL of the following:
         a. You are 2 years of age or older
         b. You have a contraindication to (harmful for you to use) or are unable to swallow lamotrigine tablets
      2. You will use Subvenite as monotherapy (one medication treatment) and meet ALL of the following:
         a. You are 16 years of age or older
         b. You are receiving treatment with carbamazepine, phenytoin, phenobarbital, primidone, or valproate as a single antiepileptic medication (a type of medication used to treat epilepsy or seizures) but you will switch to Subvenite
         c. You have a contraindication to (harmful for you to use) or are unable to swallow lamotrigine tablets

   C. If you have primary generalized tonic-clonic seizures or generalized seizures, approval also requires:
      1. You are 2 years of age or older
      2. You will use Subvenite as adjunctive (add-on) therapy
      3. You have a contraindication to (harmful for you to use) or are unable to swallow lamotrigine tablets

   (Denial text continued on the next page)

LAMOTRIGINE

GUIDELINES FOR USE (CONTINUED)

D. If you have bipolar I disorder, approval also requires:
1. You will use Subvenite for maintenance treatment
2. You are receiving treatment with standard therapy (such as olanzapine, valproate, lithium) for acute mood episodes (depression, mania, hypomania, mixed episodes [types of mood disorders])
3. You have a contraindication to (harmful for you to use) or are unable to swallow lamotrigine tablets

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Subvenite.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

LANADELUMAB-FLYO

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LANADELUMAB-FLYO	TAKHZYRO	45177		GPI-10 (8584204020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?
- The patient is 2 years of age or older
- Takhzyro will be used for prophylaxis against HAE attacks
- Therapy is prescribed by or in consultation with an allergist, immunologist, hematologist, or pulmonologist
- Takhzyro will NOT be used concurrently with an alternative prophylactic agent for HAE attacks (e.g., Cinryze [C1 esterase inhibitor], Haegarda [C1 esterase inhibitor], danazol, Orladeyo [berotralstat], Andembry [garadacimab-gxii], Dawnzera [donidalorsen])

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient have Type I or II HAE **AND** meet the following criterion?
- The diagnosis is confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q

If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4mL per 28 days.**
If no, continue to #3.

3. Does the patient have HAE-nC1INH (Type III HAE) as confirmed by **ALL** of the following criteria?
- The patient has recurrent, non-urticarial angioedema involving the skin, gastrointestinal tract, or airway, consistent with bradykinin-mediated HAE AND the attacks cannot be explained by histaminergic/urticarial angioedema
- Other causes of angioedema have been excluded, including ACE-inhibitor/ARB-associated angioedema, acquired C1-INH deficiency, and mast-cell/histaminergic angioedema

If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4mL per 28 days.**

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

LANADELUMAB-FLYO

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LANADELUMAB-FLYO (Takhzyro)** requires the following rule(s) be met for approval:

A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
B. You are 2 years of age or older
C. Takhzyro will be used for the prevention of hereditary angioedema (HAE: a type of gene condition with severe body swelling) attacks
D. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), immunologist (a type of immune system doctor), hematologist (a type of blood doctor), or pulmonologist (lung/breathing doctor)
E. You will NOT use Takhzyro concurrently (at the same time) with an alternative preventive medication for hereditary angioedema (HAE: a type of gene condition with severe body swelling) attacks (such as Cinryze [C1 esterase inhibitor], Haegarda [C1 esterase inhibitor], danazol, Orladeyo [berotralstat], Andembry [garadacimab-gxii], Dawnzera [donidalorsen])
F. You meet ONE of the following:
    1. You have Type I or II hereditary angioedema (a type of gene condition with severe body swelling), as confirmed by ONE of the following complement tests: C1-INH protein levels, C4 protein levels, C1-INH functional levels, C1q (types of lab tests)
    2. You have HAE-nC1INH (hereditary angioedema with normal C1 inhibitor) (Type III hereditary angioedema) (a type of gene condition with severe body swelling) as confirmed by ALL of the following:
        a. You have recurrent (condition continues to return), non-urticarial angioedema (a type of swelling without hives) involving the skin, gastrointestinal tract, or airway, consistent with bradykinin-mediated hereditary angioedema (a type of gene condition with severe body swelling) AND the attacks cannot be explained by histaminergic/urticarial angioedema (a type of swelling due to an allergic reaction)
        b. Other causes of angioedema (a type of swelling) have been ruled out, including angiotensin-converting enzyme (ACE)-inhibitor/angiotensin receptor blocker (ARB)-associated angioedema (a type of swelling due to types of medications), acquired C1-INH deficiency (a type of condition that causes swelling), and mast-cell/histaminergic angioedema (a type of swelling due to an allergic reaction)

LANADELUMAB-FLYO

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary angioedema (HAE) (ICD-10 D84.1) and meet **ALL** of the following criteria?

- The patient has experienced an improvement in HAE attacks (reductions in attack frequency or attack severity) compared to baseline
- Takhzyro will NOT be used concurrently with an alternative prophylactic agent for HAE attacks (e.g., Cinryze [C1 esterase inhibitor], Haegarda [C1 esterase inhibitor], danazol, Orladeyo [berotralstat], Andembry [garadacimab-gxii], Dawnzera [donidalorsen])

If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4mL per 28 days.** If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LANADELUMAB-FLYO (Takhzyro)** requires the following rule(s) be met for renewal:

A. You have hereditary angioedema (HAE: a type of gene condition with severe body swelling)
B. You have experienced an improvement in hereditary angioedema (a type of gene condition with severe body swelling) attacks (reductions in attack frequency or attack severity) compared to baseline (before treatment)
C. You will NOT use Takhzyro concurrently (at the same time) with an alternative preventive medication for hereditary angioedema (HAE: a type of gene condition with severe body swelling) attacks (such as Cinryze [C1 esterase inhibitor], Haegarda [C1 esterase inhibitor], danazol, Orladeyo [berotralstat], Andembry [garadacimab-gxii], Dawnzera [donidalorsen])

LANREOTIDE ACETATE	SOMATULINE DEPOT, LANREOTIDE ACETATE	10781		GPI-10 (3017005010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of acromegaly (ICD-10 E22.0) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient had an inadequate response to or cannot be treated with surgery or radiation therapy
   - The patient's serum insulin-like growth factor 1 (IGF-1) level (adjusted for the patient's age) is elevated or unequivocal with inadequate suppression of growth hormone after a glucose load
   - The patient had a trial of or contraindication to the preferred agent: Sandostatin LAR Depot (octreotide acetate ER)

   If yes, **approve for 12 months by GPID or GPI-14 for the requested strength with the following quantity limits:**
   - **60mg/0.2mL: #0.2mL per 28 days.**
   - **90mg/0.3mL: #0.3mL per 28 days.**
   - **120mg/0.5mL: #0.5mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of gastroenteropancreatic neuroendocrine tumors (GEP-NETs) (ICD-10 Group C7A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has unresectable, well or moderately differentiated, locally advanced or metastatic GEP-NETs

   If yes, **approve for 12 months by GPID or GPI-14 for the requested strength with the following quantity limits:**
   - **60mg/0.2mL: #0.2mL per 28 days.**
   - **90mg/0.3mL: #0.3mL per 28 days.**
   - **120mg/0.5mL: #0.5mL per 28 days.**

   If no, continue to #3.

LANREOTIDE

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of carcinoid syndrome (ICD-10 E34.0) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by GPID or GPI-14 for the requested strength with the following quantity limits:**
   - **60mg/0.2mL: #0.2mL per 28 days.**
   - **90mg/0.3mL: #0.3mL per 28 days.**
   - **120mg/0.5mL: #0.5mL per 28 days.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LANREOTIDE (Somatuline Depot)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Acromegaly (a type of hormone disorder)
      2. Gastroenteropancreatic neuroendocrine tumors (GEP-NETs: a rare type of tumor)
      3. Carcinoid syndrome (a set of symptoms caused by a type of tumor that releases substances into the body)

   B. If you have acromegaly, approval also requires:
      1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
      2. You had an inadequate response (did not work) to or cannot be treated with surgery or radiation therapy
      3. Your serum insulin-like growth factor 1 (IGF-1: a type of hormone) level (adjusted for your age) is elevated (higher than normal) or unequivocal with inadequate suppression (reduction) of growth hormone after a glucose load (a type of test used to diagnose acromegaly [a type of hormone disorder])
      4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Sandostatin LAR Depot (octreotide acetate ER)

   (Initial denial text continued on next page)

LANREOTIDE

RENEWAL CRITERIA

NOTE: For the diagnoses of gastroenteropancreatic neuroendocrine tumors (GEP-NETs) or carcinoid syndrome, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of acromegaly (ICD-10 E22.0) and meet **ALL** of the following criteria?
   - The patient has had a reduction, normalization, or maintenance of IGF-1 levels based on age and gender
   - The patient has shown improvement or has sustained remission of clinical symptoms of acromegaly

   If yes, **approve for 12 months by GPID or GPI-14 for the requested strength with the following quantity limits:**
   - **60mg/0.2mL: #0.2mL per 28 days.**
   - **90mg/0.3mL: #0.3mL per 28 days.**
   - **120mg/0.5mL: #0.5mL per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LANREOTIDE (Somatuline Depot)** requires the following rule(s) be met for renewal:
   A. You have acromegaly (a type of hormone disorder)
   B. You have had a reduction, normalization, or maintenance of insulin-like growth factor 1 (IGF-1: a type of hormone) levels based on your age and gender
   C. You have shown improvement or have sustained remission (reduction or disappearance) of clinical symptoms of acromegaly (a type of hormone disorder)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

PRIOR AUTHORIZATION GUIDELINES

LAPATINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LAPATINIB DITOSYLATE	TYKERB, LAPATINIB	34541		GPI-10 (2153302610)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of advanced or metastatic breast cancer (ICD-10 C79.81, Group C50) and meet **ALL** of the following criteria?
   - The patient's breast cancer is human epidermal growth factor receptor 2 (HER2) positive
   - The requested medication will be used in combination with Xeloda (capecitabine)
   - The patient has received prior therapy with Herceptin (trastuzumab), an anthracycline (e.g., daunorubicin, doxorubicin, epirubicin, idarubicin), AND a taxane (e.g., paclitaxel, docetaxel)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #5 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic breast cancer (ICD-10 C79.81, Group C50) and meet **ALL** of the following criteria?
   - The patient's breast cancer is human epidermal growth factor receptor 2 (HER2) positive
   - The patient's tumor is hormone receptor-positive
   - The requested medication will be used in combination with Femara (letrozole)
   - The patient is a postmenopausal woman

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #6 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LAPATINIB (Tykerb)** requires the following rule(s) be met for approval:
   A. You have advanced or metastatic breast cancer (breast cancer that has progressed or has spread to other parts of the body)
   B. Your breast cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive
   C. If you have advanced breast cancer, approval also requires:
      1. The requested medication will be used in combination with Xeloda (capecitabine)
      2. You have previously received treatment with Herceptin (trastuzumab), an anthracycline (such as daunorubicin, doxorubicin, epirubicin, idarubicin), AND a taxane (such as paclitaxel, docetaxel)

   (Denial text continued on the next page)

PRIOR AUTHORIZATION GUIDELINES

LAROTRECTINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LAROTRECTINIB	VITRAKVI	45494		GPI-10 (2153383520)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of a solid tumor and meet **ALL** of the following criteria?
   - The tumor has a neurotrophic receptor tyrosine kinase (*NTRK*) gene fusion without a known acquired resistance mutation
   - The tumor is metastatic or surgical resection is likely to result in severe morbidity
   - There are no satisfactory alternative treatments, or the patient has progressed following treatment

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the request for Vitrakvi oral capsules?

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths as follows:**
   - **Vitrakvi 25mg: #6 capsules per day.**
   - **Vitrakvi 100mg: #2 capsules per day.**

   If no, continue to #3.

3. Is the request for Vitrakvi oral solution and the patient meets **ONE** of the following criteria?
   - The request is for a pediatric patient
   - The patient is unable to take Vitrakvi capsules due to difficulty swallowing or dysphagia
   - The patient has other medical need for the oral solution

   If yes, **approve for 12 months by GPID or GPI-14 as follows:**
   - **Vitrakvi 20mg/mL oral solution: #10mL per day.**

   If no, do not approve Vitrakvi oral suspension. **Please enter a proactive PA for Vitrakvi capsules and approve for 12 months by GPID or GPI-14 for all strengths as follows:**
   - **Vitrakvi 25mg: #6 capsules per day.**
   - **Vitrakvi 100mg: #2 capsules per day.**

LAROTRECTINIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LAROTRECTINIB (Vitrakvi)** requires the following rule(s) be met for approval:

A. You have a solid tumor (abnormal mass of tissue that usually does not contain cysts or liquid)
B. Your tumor has a neurotrophic receptor tyrosine kinase (*NTRK)* gene fusion without a known acquired resistance mutation (you have a type of enzyme that doesn't have a mutation)
C. Your tumor is metastatic (spreads to other parts of body) or surgical resection (removal) is likely to result in severe morbidity (illness)
D. There are no satisfactory alternative treatments, or your tumor has gotten worse after treatment
E. Requests for Vitrakvi oral solution also require ONE of the following:
    1. You are a pediatric patient (less than 18 years of age)
    2. You are unable to take Vitrakvi capsules due to difficulty swallowing (or dysphagia)
    3. You have other medical need for the oral solution

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Vitrakvi.

LASMIDITAN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LASMIDITAN SUCCINATE	REYVOW	46082		GPI-10 (6740654060)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for the acute treatment of migraines (ICD-10 Group G43 except G43.7 and G43.E) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to ONE triptan (e.g., Imitrex [sumatriptan], Maxalt [rizatriptan])

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LASMIDITAN (Reyvow)** requires the following rule(s) be met for approval:
   A. The request is for acute (quick onset) treatment of migraines (a type of headache)
   B. You are 18 years of age or older
   C. You have tried or have a contraindication to (harmful for you to use) ONE triptan (such as Imitrex [sumatriptan], Maxalt [rizatriptan])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

LASMIDITAN

RENEWAL CRITERIA

1. Is the request for the acute treatment of migraines (ICD-10 Group G43 except G43.7 and G43.E) and the patient meets **ONE** of the following criteria?
   - The patient has experienced an improvement from baseline in a validated acute treatment patient-reported outcome questionnaire (e.g., Migraine Assessment of Current Therapy [Migraine-ACT])
   - The patient has experienced clinical improvement defined as ability to function normally within 2 hours of dose, headache pain disappears within 2 hours of dose, OR therapy works consistently in majority of migraine attacks

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LASMIDITAN (Reyvow)** requires the following rule(s) be met for renewal:
   A. The request is for acute (quick onset) treatment of migraines (a type of headache)
   B. You meet ONE of the following:
      1. You have experienced an improvement from baseline (before treatment) in a validated acute treatment patient-reported outcome questionnaire (such as Migraine Assessment of Current Therapy [MIGRAINE-ACT: assessment tool used to help guide treatment])
      2. You have experienced clinical improvement as defined by ONE of the following:
         a. Ability to function normally within 2 hours of dose
         b. Headache pain disappears within 2 hours of dose
         c. Treatment works consistently in majority of migraine attacks

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

LAZERTINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LAZERTINIB MESYLATE	LAZCLUZE	49822		GPI-10 (2136004830)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Lazcluze will be used in combination with Rybrevant (amivantamab-vmjw) or Rybrevant Faspro (amivantamab-hyaluronidase-lpuj)
   - The patient's tumor has epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R substitution mutations, as detected by an FDA-approved test

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **80mg: #2 per day.**
   - **240mg: #1 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LAZERTINIB (Lazcluze)** requires the following rule(s) be met for approval:
   A. You have locally advanced or metastatic non-small cell lung cancer (NSCLC: a type of lung cancer that has spread to nearby tissue or lymph nodes or that has spread to other parts of the body)
   B. You are 18 years of age or older
   C. Lazcluze will be used in combination with Rybrevant (amivantamab-vmjw) or Rybrevant Faspro (amivantamab-hyaluronidase-lpuj)
   D. Your tumor has epidermal growth factor receptor (EGFR: a type of protein) exon 19 deletions or exon 21 L858R substitution mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LEBRIKIZUMAB-LBKZ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LEBRIKIZUMAB-LBKZ	EBGLYSS	49658		GPI-10 (9027304010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist, allergist, or immunologist
   - Ebglyss will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic (e.g., Adbry [tralokinumab-ldrm], Dupixent [dupilumab]) and is switching to Ebglyss
   - The patient has atopic dermatitis involving at least 10% of body surface area (BSA)
   - The patient has atopic dermatitis affecting the face, head, neck, hands, feet, groin, or intertriginous areas

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LEBRIKIZUMAB-LBKZ

INITIAL CRITERIA (CONTINUED)

3. Has the patient had a trial of or contraindication to **ONE** of the following clinical standard of care therapies?
   - Topical corticosteroid (e.g., hydrocortisone, clobetasol propionate, halobetasol propionate)
   - Topical calcineurin inhibitor (e.g., Protopic [tacrolimus], Elidel [pimecrolimus])
   - Topical PDE-4 inhibitor (e.g., Eucrisa [crisaborole], Adquey [difamilast], Zoryve [roflumilast])
   - Topical AhR agonist (e.g., Vtama [tapinarof])
   - Topical JAK inhibitor (e.g., Opzelura [ruxolitinib])
   - Phototherapy

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #4mL per 28 days. (Please enter a 1 month approval by HICL or GPI-10 with a quantity limit of #8mL per 28 days.)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LEBRIKIZUMAB-LBKZ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **LEBRIKIZUMAB-LBKZ (Ebglyss)** requires the following rule(s) be met for approval:

A. You have moderate to severe atopic dermatitis (AD: a type of skin condition)
B. You are 12 years of age or older
C. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
D. You will NOT use Ebglyss concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis (a type of skin condition)
E. You meet ONE of the following:
    1. You were previously stable on another biologic (such as Adbry [tralokinumab-ldrm], Dupixent [dupilumab]) and are switching to Ebglyss
    2. You have atopic dermatitis (a type of skin condition) involving at least 10 percent of body surface area (BSA)
    3. You have atopic dermatitis (a type of skin condition)affecting the face, head, neck, hands, feet, groin, or intertriginous areas (areas between skin folds)
F. You have tried or have a contraindication to (harmful for you to use) ONE of the following clinical standard of care therapies:
    1. Topical corticosteroid (such as hydrocortisone, clobetasol propionate, halobetasol propionate)
    2. Topical calcineurin inhibitor (such as Protopic [tacrolimus], Elidel [pimecrolimus])
    3. Topical PDE-4 (phosphodiesterase-4) inhibitor (such as Eucrisa [crisaborole], Adquey [difamilast], Zoryve [roflumilast])
    4. Topical aryl hydrocarbon receptor (AhR) agonist (such as Vtama [tapinarof])
    5. Topical JAK (Janus kinase) inhibitor (such as Opzelura [ruxolitinib])
    6. Phototherapy (a type of light therapy)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

LEBRIKIZUMAB-LBKZ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient has shown improvement while on Ebglyss
   - Ebglyss will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2mL per 28 days.** If no, do not approve.

   RENEWAL DENIAL TEXT: Our guideline named **LEBRIKIZUMAB-LBKZ (Ebglyss)** requires the following rule(s) be met for renewal:
   A. You have moderate to severe atopic dermatitis (AD: a type of skin condition)
   B. You have shown improvement while on Ebglyss
   C. You will NOT use Ebglyss concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis (a type of skin condition)

LECANEMAB-IRMB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LECANEMAB-IRMB	LEQEMBI, LEQEMBI IQLIK	48590		GPI-10 (6205054530)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Alzheimer's disease (ICD-10 Group G30) and meet **ALL** of the following criteria?
   - The patient is 50 years of age or older
   - The patient has mild cognitive impairment or mild dementia
   - Therapy is prescribed by or in consultation with a neurologist or psychiatrist
   - The patient had an amyloid pathology confirmed by positron emission tomography (PET) or detected by CSF-based testing (e.g., Aβ42, total tau [T-tau], phosphorylated tau [P-tau])
   - The patient has a Clinical Dementia Rating (CDR) global score of 0.5 or 1.0, OR a Mini Mental Status Exam (MMSE) score of 20-28 at baseline
   - The patient has Alzheimer's Association Workgroup Clinical Stage 3 (cognitive impairment but mostly maintains independence on activities of daily living [ADL]) or Clinical Stage 4 (cognitive impairment with mild functional impairments on instrumental ADLs but independence in basic ADLs) Alzheimer's disease
   - The patient had a baseline brain MRI within one year prior to treatment
   - The patient had genotype testing to determine apolipoprotein E ε4 (ApoE ε4) status prior to initiation of treatment OR the patient/caregiver has been counseled on the risk of treatment and has waived genotype testing
   - The patient is NOT at an increased risk of cerebral bleeding (e.g., evidence of cerebral micro- or macrohemorrhages, superficial siderosis, vasogenic edema, aneurysms or vascular malformations, lacunar infarcts or severe small vessel or white matter disease on screening MRI, uncontrolled bleeding disorder, platelet count less than 50,000 or international normalized ratio greater than 1.5)
   - The requested medication will NOT be used concurrently with any other anti-amyloid agent (e.g., Kisunla [donanemab-azbt]), anticoagulant (e.g., warfarin, Xarelto [rivaroxaban], Pradaxa [dabigatran], Eliquis [apixaban], Savaysa [edoxaban]), or dual therapy antiplatelet (e.g. Plavix [clopidogrel] with aspirin) (monotherapy antiplatelet is acceptable)

   If yes, **approve for 7 months by GPID or GPI-14 for ALL of the following:**
   - **200mg/2mL vial: #1 fill per 14 days.**
   - **500mg/5mL vial: #1 fill per 14 days.**
   - **500mg/2.5mL autoinjector: #10mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LECANEMAB-IRMB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LECANEMAB-IRMB (Leqembi, Leqembi IQLIK)** requires the following rule(s) be met for approval:

A. You have Alzheimer's disease (a progressive brain disorder that slowly destroys memory and thinking skills)
B. You are 50 years of age or older
C. You have mild cognitive impairment (decreased ability to process, understand, store and remember information) or mild dementia (a type of memory disorder) due to Alzheimer's disease (a progressive brain disorder that slowly destroys memory and thinking skills)
D. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor) or psychiatrist (a type of mental health doctor)
E. You had an amyloid pathology (abnormal buildup of a type protein) confirmed by positron emission tomography (PET: a type of imaging test) or detected by cerebrospinal fluid (CSF: a type of liquid in the brain and spinal cord)-based testing (such as amyloid-beta 42 [Aβ42], total tau [T-tau], phosphorylated tau [P-tau]) (types of lab tests)
F. You have a Clinical Dementia Rating (CDR: a tool for evaluating memory loss) global score of 0.5 or 1.0, OR a Mini Mental Status Exam (MMSE: a test used to evaluate memory, thinking, and understanding) score of 20 to 28 at baseline (before treatment)
G. You have Alzheimer's Association Workgroup Clinical Stage 3 (cognitive impairment [decreased ability to process, understand, store and remember information] but mostly maintains independence on activities of daily living [ADL: basic everyday tasks]) or Clinical Stage 4 (cognitive impairment with mild functional impairments on instrumental ADLs but independence in basic ADLs) Alzheimer's disease (a progressive brain disorder that slowly destroys memory and thinking skills)
H. You have had a baseline brain MRI (magnetic resonance imaging: a type of imaging lab) within one year prior to treatment
I. You had genotype testing (a type of lab test) to determine apolipoprotein E ε4 (ApoE ε4: a type of gene) status prior to initiation of treatment OR you/your caregiver have been counseled on the risk of treatment and have waived genotype testing

(Initial denial text continued on next page)

LECANEMAB-IRMB

INITIAL CRITERIA (CONTINUED)

J. You are NOT at an increased risk of cerebral bleeding (such as evidence of cerebral microhemorrhages [small amount of bleeding in the brain] or macrohemorrhages [large amount of bleeding in the brain], superficial siderosis [a type of small bleeds in the brain], vasogenic edema [a type of brain swelling], aneurysms [weak bulging spot in the blood vessel] or vascular malformations [abnormal blood vessels], lacunar infarcts [brain stroke] or severe small vessel [damaged small blood vessels in the brain] or white matter disease [damaged nerve fibers in the brain] on screening magnetic resonance imaging [MRI: a type of imaging lab], uncontrolled bleeding disorder, platelet [a type of blood cell] count less than 50,000 or international normalized ratio [a blood test to check how long it takes your blood to clot] greater than 1.5)

K. You will NOT use the requested medication concurrently (at the same time) with any other anti-amyloid medication (such as Kisunla [donanemab-azbt]), anticoagulant (such as warfarin, Xarelto [rivaroxaban], Pradaxa [dabigatran], Eliquis [apixaban], Savaysa [edoxaban]), or dual therapy antiplatelet (such as Plavix [clopidogrel] with aspirin) (monotherapy [one medication treatment] antiplatelet is acceptable)

LECANEMAB-IRMB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Alzheimer's disease (ICD-10 Group G30)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is this a first renewal request? (**NOTE:** Renewal request after the Initial approval of 7 months.)

   If yes, continue to #3.
   If no, continue to #6.

3. Does the patient meet **ALL** of the following criteria?
   - The patient has NOT progressed to moderate or severe Alzheimer's disease (dementia with moderate to severe functional impairment) as assessed by Mini Mental Status Exam or Clinical Dementia Rating (CDR-SB) scale and functional status (ADL impairment)
   - The requested medication will NOT be used concurrently with any other anti-amyloid agent (e.g., Kisunla [donanemab-azbt]), anticoagulant (e.g., warfarin, Xarelto [rivaroxaban], Pradaxa [dabigatran], Eliquis [apixaban], Savaysa [edoxaban]), or dual therapy antiplatelet (e.g. Plavix [clopidogrel] with aspirin) (monotherapy antiplatelet is acceptable)

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

4. Has the patient shown evidence of amyloid-related imaging abnormalities (ARIA) on an MRI scan?

   If yes, continue to #5.
   If no, **approve for 12 months by GPID or GPI-14 for ALL of the following:**
   - **200mg/2mL vial: #1 fill per 14 days.**
   - **500mg/5mLvial : #1 fill per 14 days.**
   - **360mg/1.8mL autoinjector: #7.2mL per 28 days.**
   - **500mg/2.5mL autoinjector: #10mL per 28 days.**

LECANEMAB-IRMB

RENEWAL CRITERIA (CONTINUED)

5. Does the patient have amyloid-related imaging abnormalities with edema/effusion (ARIA-E) or amyloid-related imaging abnormalities with hemorrhage or superficial siderosis (ARIA-H) and meet **ALL** of the following criteria?
   - The patient does NOT have severe symptoms (e.g., multiple ARIA episodes, macrohemorrhages, 10 or more microhemorrhages since the start of treatment, 3 or more superficial siderosis since the start of treatment, severe ARIA, need for anticoagulation)
   - The patient has moderate ARIA (with or without symptoms) and the provider has suspended infusions until a repeat MRI shows ARIA-E has resolved or ARIA-H has stabilized, OR the patient has asymptomatic mild ARIA with continued MRI monitoring until ARIA-E has resolved or ARIA-H has stabilized

   If yes, **approve for 12 months by GPID or GPI-14 for ALL of the following:**
   - **200mg/2mLvial: #1 fill per 14 days.**
   - **500mg/5mL vial: #1 fill per 14 days.**
   - **360mg/1.8mL autoinjector: #7.2mL per 28 days.**
   - **500mg/2.5mL autoinjector: #10mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

6. Is this a subsequent renewal request? (**NOTE**: Renewal request after the first renewal approval of 12 months.)

   If yes, continue to #7.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

CONTINUED ON NEXT PAGE

LECANEMAB-IRMB

RENEWAL CRITERIA (CONTINUED)

7. Does the patient meet **ALL** of the following criteria?
   - The patient has NOT progressed to moderate or severe Alzheimer's disease (dementia with moderate to severe functional impairment) as assessed by Mini Mental Status Exam or Clinical Dementia Rating (CDR-SB) scale and functional status (ADL impairment)
   - The requested medication will NOT be used concurrently with any other anti-amyloid agent (e.g., Kisunla [donanemab-azbt]), anticoagulant (e.g., warfarin, Xarelto [rivaroxaban], Pradaxa [dabigatran], Eliquis [apixaban], Savaysa [edoxaban]), or dual therapy antiplatelet (e.g. Plavix [clopidogrel] with aspirin) (monotherapy antiplatelet is acceptable)

   If yes, **approve for 12 months by GPID or GPI-14 for ALL of the following:**
   - **200mg/2mL vial: #1 fill per 14 days.**
   - **500mg/5mL vial: #1 fill per 14 days.**
   - **360mg/1.8mL autoinjector: #7.2mL per 28 days.**
   - **500mg/2.5mL autoinjector: #10mL per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LECANEMAB-IRMB (Leqembi, Leqembi IQLIK)** requires the following rule(s) be met for renewal:

   A. You have Alzheimer's disease (a progressive brain disorder that slowly destroys memory and thinking skills)

   B. If the request is for the first renewal request, renewal also requires:
      1. You have NOT progressed to moderate or severe Alzheimer's disease (dementia [a type of memory disorder] with moderate to severe functional impairment) as assessed by Mini Mental Status Exam (a test used to evaluate memory, thinking, and understanding) or Clinical Dementia Rating (CDR-SB: a tool for evaluating memory loss) scale and functional status (activities of daily living [ADL: basic everyday tasks] impairment)
      2. You will NOT use the requested medication concurrently (at the same time) with any other anti-amyloid medication (such as Kisunla [donanemab-azbt]), anticoagulant (such as warfarin, Xarelto [rivaroxaban], Pradaxa [dabigatran], Eliquis [apixaban], Savaysa [edoxaban]), or dual therapy antiplatelet (such as Plavix [clopidogrel] with aspirin) (monotherapy [one medication treatment] antiplatelet is acceptable)

   (Renewal denial text continued on next page)

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

RENEWAL CRITERIA (CONTINUED)

3. You meet ONE of the following:
   a. You do NOT have evidence of amyloid-related imaging abnormalities (ARIA: abnormal differences in the brain) on a magnetic resonance imaging (MRI: a type of imaging) scan
   b. You have a magnetic resonance imaging (MRI: a type of imaging) scan showing amyloid-related imaging abnormalities with edema/effusion (ARIA-E: a type of brain swelling) or amyloid-related imaging abnormalities with hemorrhage or superficial siderosis (ARIA-H: a type of small bleeds in the brain) and meet ALL of the following:
      i. You do NOT have severe symptoms (such as multiple amyloid-related imaging abnormalities [ARIA: abnormal differences in the brain] episodes, macrohemorrhages [large amount of bleeding in the brain], 10 or more microhemorrhages [small amount of bleeding in the brain] since the start of treatment, 3 or more superficial siderosis [a type of small bleeds in the brain] since the start of treatment, severe ARIA, need for anticoagulation [a type of treatment to thin the blood])
      ii. You have moderate amyloid-related imaging abnormalities (ARIA: abnormal differences in the brain) (with or without symptoms) and your doctor has suspended (stopped) infusions until a repeat magnetic resonance imaging (MRI: a type of imaging) scan shows amyloid-related imaging abnormalities with edema/effusion (ARIA-E: a type of brain swelling) has resolved or amyloid-related imaging abnormalities with hemorrhage or superficial siderosis (ARIA-H: a type of small bleeds in the brain) has stabilized, OR you have asymptomatic (showing no symptoms) mild ARIA with continued MRI monitoring until ARIA-E has resolved or ARIA-H has stabilized

C. If the request is a subsequent renewal request, renewal also requires:

1. You have NOT progressed to moderate or severe Alzheimer's disease (dementia [a type of memory disorder] with moderate to severe functional impairment) as assessed by Mini Mental Status Exam (a test used to evaluate memory, thinking, and understanding) or Clinical Dementia Rating (CDR-SB: a tool for evaluating memory loss) scale and functional status (activities of daily living [ADL: basic everyday tasks] impairment)
2. You will NOT use the requested medication concurrently (at the same time) with any other anti-amyloid medication (such as Kisunla [donanemab-azbt]), anticoagulant (such as warfarin, Xarelto [rivaroxaban], Pradaxa [dabigatran], Eliquis [apixaban], Savaysa [edoxaban]), or dual therapy antiplatelet (such as Plavix [clopidogrel] with aspirin) (monotherapy [one medication treatment] antiplatelet is acceptable)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

LEDIPASVIR/SOFOSBUVIR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LEDIPASVIR/ SOFOSBUVIR	HARVONI, LEDIPASVIR/ SOFOSBUVIR	41457		GPI-10 (1235990240)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chronic hepatitis C virus (HCV) (ICD-10 B18.2) and meet **ALL** of the following criteria?
- The patient is 3 years of age or older
- The patient has genotype 1, 4, 5, or 6 infection

If yes, continue to #2.
If no, continue to #10.

2. Does the patient have an HCV RNA level within the past 6 months?

If yes, continue to #3.
If no, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ANY** of the following criteria?
- The patient has a limited life expectancy (less than 12 months) due to non-liver related comorbid conditions
- Harvoni will be used concurrently with any medication with drug interactions that are contraindicated or not recommended per the prescribing information (e.g., amiodarone, carbamazepine, phenytoin, phenobarbital, rifampin, rifabutin, Priftin [rifapentine], rosuvastatin, Olysio [simeprevir], Stribild [elvitegravir/cobicistat/emtricitabine/tenofovir], Aptivus [tipranavir]/ritonavir, St. John's wort)
- Harvoni will be used concurrently with Sovaldi (sofosbuvir; as a single agent), Mavyret (pibrentasvir/glecaprevir), Epclusa (velpatasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir), or Vosevi (velpatasvir/sofosbuvir/voxilaprevir)

If yes, do not approve.
DENIAL TEXT: See the denial text at the end of the guideline.

If no, continue to #4.

LEDIPASVIR/SOFOSBUVIR

GUIDELINES FOR USE (CONTINUED)

4. Is the patient treatment-naïve and meets **ALL** of the following criteria?
   - The patient has genotype 1 or 4 infection
   - The patient does not have cirrhosis
   - The patient has an HCV RNA level of less than 6 million IU/mL

   If yes, **approve for 8 weeks by GPID or GPI-14 for the requested strength as follows:**
   - **90mg-400mg tablet: #1 per day.**
   - **45mg-200mg tablet: #1 per day.**
   - **33.75mg-150mg pellets: #1 per day.**
   - **45mg-200mg pellets: #2 per day.**

   If no, continue to #5.

5. Is the patient treatment-naïve and meets **ONE** of the following criteria?
   - The patient does not have cirrhosis
   - The patient has compensated cirrhosis (Child-Pugh A)
   - The patient has decompensated cirrhosis (Child-Pugh B or C) AND Harvoni will be used with ribavirin
   - The patient has genotype 1 or 4 infection, is post-liver transplant, does not have cirrhosis, AND Harvoni will be used with ribavirin
   - The patient has genotype 1 or 4 infection, is post-liver transplant, has compensated cirrhosis (Child-Pugh A), AND Harvoni will be used with ribavirin

   If yes, **approve for 12 weeks by GPID or GPI-14 for the requested strength as follows:**
   - **90mg-400mg tablet: #1 per day.**
   - **45mg-200mg tablet: #1 per day.**
   - **33.75mg-150mg pellets: #1 per day.**
   - **45mg-200mg pellets: #2 per day.**

   If no, continue to #6.

LEDIPASVIR/SOFOSBUVIR

GUIDELINES FOR USE (CONTINUED)

6. Does the patient have genotype 1 infection and meet **ALL** of the following criteria?
   - The patient is treatment-experienced (previously failed a peginterferon alfa-based regimen)
   - The patient has compensated cirrhosis (Child-Pugh A)

   If yes, **approve for 24 weeks by GPID or GPI-14 for the requested strength as follows:**
   - **90mg-400mg tablet: #1 per day.**
   - **45mg-200mg tablet: #1 per day.**
   - **33.75mg-150mg pellets: #1 per day.**
   - **45mg-200mg pellets: #2 per day.**

   If no, continue to #7.

7. Is the patient treatment-experienced (previously failed a peginterferon alfa-based regimen) and meets **ONE** of the following criteria?
   - The patient does not have cirrhosis
   - The patient has genotype 4, 5, or 6 infection AND has compensated cirrhosis (Child-Pugh A)
   - The patient has genotype 1 or 4 infection, is post-liver transplant, does not have cirrhosis, AND Harvoni will be used with ribavirin
   - The patient has genotype 1 or 4 infection, is post-liver transplant, has compensated cirrhosis (Child-Pugh A), AND Harvoni will be used with ribavirin

   If yes, **approve for 12 weeks by GPID or GPI-14 for the requested strength as follows:**
   - **90mg-400mg tablet: #1 per day.**
   - **45mg-200mg tablet: #1 per day.**
   - **33.75mg-150mg pellets: #1 per day.**
   - **45mg-200mg pellets: #2 per day.**

   If no, continue to #8.

8. Is the patient treatment-experienced and meets **ALL** of the following criteria?
   - The patient has decompensated cirrhosis (Child-Pugh B or C)
   - Harvoni will be used with ribavirin

   If yes, **approve for 12 weeks by GPID or GPI-14 for the requested strength as follows:**
   - **90mg-400mg tablet: #1 per day.**
   - **45mg-200mg tablet: #1 per day.**
   - **33.75mg-150mg pellets: #1 per day.**
   - **45mg-200mg pellets: #2 per day.**

   If no, continue to #9.

LEDIPASVIR/SOFOSBUVIR

GUIDELINES FOR USE (CONTINUED)

9. Does the patient have decompensated cirrhosis and meet **ONE** of the following criteria?
   - The patient has a contraindication to ribavirin (ribavirin ineligible)
   - The patient failed prior treatment with a sofosbuvir-based regimen (e.g., Epclusa [sofosbuvir/velpatasvir]) AND Harvoni will be used with ribavirin
   - The patient is post-liver transplant, treatment-experienced, AND Harvoni will be used with ribavirin

   If yes, **approve for 24 weeks by GPID or GPI-14 for the requested strength as follows:**
   - **90mg-400mg tablet: #1 per day.**
   - **45mg-200mg tablet: #1 per day.**
   - **33.75mg-150mg pellets: #1 per day.**
   - **45mg-200mg pellets: #2 per day.**

   If no, continue to #10.

10. Is the requested regimen recommended by the American Association for the Study of Liver Diseases (AASLD)/Infectious Diseases Society of America (IDSA) guidance for Hepatitis C Treatment?

    If yes, **approve as indicated per guidance in AASLD/IDSA.**
    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **LEDIPASVIR/SOFOSBUVIR (Harvoni)** requires the following rule(s) be met for approval:
    A. You have chronic hepatitis C virus (HCV: liver inflammation caused by a type of virus)
    B. You are 3 years of age or older
    C. You have genotype 1, 4, 5, or 6 hepatitis C infection (types of hepatitis C virus)
    D. You have an HCV RNA level (a measure of the amount of hepatitis C virus in the blood) within the past 6 months
    E. You do NOT have a limited life expectancy (less than 12 months) due to non-liver related comorbid conditions (having two or more diseases at the same time)
    F. You will NOT use Harvoni concurrently (at the same time) with any medication with drug interactions that are contraindicated (harmful for you to use) or not recommended per the prescribing information (such as amiodarone, carbamazepine, phenytoin, phenobarbital, rifampin, rifabutin, Priftin [rifapentine], rosuvastatin, Olysio [simeprevir], Stribild [elvitegravir/cobicistat/emtricitabine/tenofovir], Aptivus [tipranavir]/ritonavir, St. John's wort)

    (Denial text continued on next page)

LEDIPASVIR/SOFOSBUVIR

GUIDELINES FOR USE (CONTINUED)

G. You will NOT use Harvoni concurrently (at the same time) with Sovaldi (sofosbuvir; as a single agent), Mavyret (pibrentasvir/glecaprevir), Epclusa (velpatasvir/sofosbuvir), Zepatier (elbasvir/grazoprevir), or Vosevi (velpatasvir/sofosbuvir/voxilaprevir)

H. If you are treatment-naïve (no prior treatment), approval also requires ONE of the following:

1. You do not have cirrhosis (liver damage and scarring)
2. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage)
3. You have decompensated cirrhosis (a condition where there is liver damage and scarring with major symptoms) (Child-Pugh B or C: a score that evaluates the severity of liver damage) AND Harvoni will be used with ribavirin, unless you have a contraindication to (harmful for you to use) ribavirin
4. You have genotype 1 or 4 infection, received a liver transplant (replaced your liver), do not have cirrhosis, AND Harvoni will be used with ribavirin
5. You have genotype 1 or 4 infection, received a liver transplant, have compensated cirrhosis (Child-Pugh A), AND Harvoni will be used with ribavirin

I. If you are treatment-experienced (failed prior treatment), approval also requires ONE of the following:

1. You do not have cirrhosis (liver damage and scarring) AND were previously treated with a peginterferon alfa-based regimen
2. You have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) (Child-Pugh A: a score that evaluates the severity of liver damage) AND were previously treated with a peginterferon alfa-based regimen
3. You have decompensated cirrhosis (a condition where there is liver damage and scarring with major symptoms) (Child-Pugh B or C: a score that evaluates the severity of liver damage) AND Harvoni will be used with ribavirin, unless you have a contraindication to (harmful for you to use) ribavirin
4. You have genotype 1 or 4 infection, received a liver transplant (replaced your liver), do not have cirrhosis, had prior treatment with a peginterferon alfa-based regimen, AND Harvoni will be used with ribavirin
5. You have genotype 1 or 4 infection, received a liver transplant, have compensated cirrhosis (Child-Pugh A), had prior treatment with a peginterferon alfa-based regimen, AND Harvoni will be used with ribavirin
6. You have decompensated cirrhosis, failed prior treatment with a sofosbuvir-based regimen (such as Epclusa [sofosbuvir/velpatasvir]) AND Harvoni will be used with ribavirin
7. You have received a liver transplant, have decompensated cirrhosis, AND Harvoni will be used with ribavirin

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

LEFAMULIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LEFAMULIN ACETATE	XENLETA		46826	GPI-14 (16240040100320)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of community-acquired bacterial pneumonia (CABP) (ICD-10 J15.9) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's CABP infection is caused by any of the following susceptible microorganisms: *Streptococcus pneumoniae, Staphylococcus aureus* (methicillin-susceptible isolates), *Haemophilus influenzae, Legionella pneumophila, Mycoplasma pneumoniae,* or *Chlamydophila pneumoniae*

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the request for continuation of care from an inpatient setting?

   If yes, **approve the 600mg tablet for 1 month by GPID or GPI-14 with a quantity limit of #10 per 5 days for 1 fill.**

   If no, continue to #3.

3. Is therapy prescribed by or in consultation with an Infectious Disease (ID) specialist?

   If yes, **approve the 600mg tablet for 1 month by GPID or GPI-14 with a quantity limit of #10 per 5 days for 1 fill.**

   If no, continue to #4.

4. Has an antimicrobial susceptibility test been performed that meets **ALL** of the following criteria?
   - The results from the infection site culture indicate pathogenic organism(s) with resistance to at least TWO standard of care agents for CABP (e.g., azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone, linezolid)
   - The results from the infection site culture indicate pathogenic organism(s) with susceptibility to Xenleta

   If yes, **approve the 600mg tablet for 1 month by GPID or GPI-14 with a quantity limit of #10 per 5 days for 1 fill.**

   If no, continue to #5.

LEFAMULIN

GUIDELINES FOR USE (CONTINUED)

5. Does the patient meet **ALL** of the following criteria?
   - Antimicrobial susceptibility results are unavailable
   - The patient had a trial of or contraindication to at least TWO standard of care agents for CABP (e.g., azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone, linezolid)

   If yes, **approve the 600mg tablet for 1 month by GPID or GPI-14 with a quantity limit of #10 per 5 days for 1 fill.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LEFAMULIN (Xenleta)** requires the following rule(s) be met for approval:
   A. You have community-acquired bacterial pneumonia (CABP: a type of lung infection)
   B. You are 18 years of age or older
   C. Your infection is caused by any of the following susceptible microorganisms (bacteria that the medication can work on): *Streptococcus pneumoniae, Staphylococcus aureus* (methicillin-susceptible isolates), *Haemophilus influenzae, Legionella pneumophila, Mycoplasma pneumoniae,* or *Chlamydophila pneumoniae*
   D. You meet ONE of the following:
      1. Your request is for continuation of care from an inpatient setting (a healthcare facility where medical treatment is given overnight or longer)
      2. Therapy is prescribed by or in consultation with an Infectious Disease (ID) specialist (a doctor who specializes in the treatment of infections)
      3. Your antimicrobial susceptibility test (lab test that shows what medications work on which bacteria) shows ALL of the following:
         a. The bacteria at the infection site culture is resistant (medication will not work on that bacteria) to at least TWO standard of care medications for community-acquired bacterial pneumonia (CABP: a type of lung infection) (such as azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone, linezolid)
         b. Xenleta will work against the bacteria
      4. If an antimicrobial susceptibility test (lab test that shows what medications work on which bacteria) is not available, approval requires you have tried or have a contraindication to (harmful for you to use) at least TWO standard of care medications for community- acquired bacterial pneumonia (CABP: a type of lung infection) (such as azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone, linezolid)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LENALIDOMIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LENALIDOMIDE	REVLIMID, LENALIDOMIDE	33412		GPI-10 (9939405000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of multiple myeloma (MM) (ICD-10 Group C90.0) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, continue to #4.

2. Will the requested medication be used as induction or consolidation treatment for multiple myeloma (MM)?

   If yes, **approve for 12 months by HICL or GPI-10 for #21 every 28 days.**
   If no, continue to #3.

3. Will the requested medication be used as maintenance treatment for multiple myeloma (MM)?

   If yes, **approve for 12 months by HICL or GPI-10 for #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient have a diagnosis of anemia due to a myelodysplastic syndrome (MDS) (ICD-10 Group D46) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's myelodysplastic syndrome (MDS) is associated with a deletion 5q abnormality

   If yes, **approve for 12 months by HICL or GPI-10 for #1 per day.**
   If no, continue to #5.

5. Does the patient have a diagnosis of mantle cell lymphoma (MCL) (ICD-10 Group C83.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has relapsed or progressed after two prior therapies, one of which included Velcade (bortezomib)

   If yes, **approve for 12 months by HICL or GPI-10 for #21 per 28 days.**
   If no, continue to #6.

GUIDELINES FOR USE (CONTINUED)

6. Does the patient have a diagnosis of follicular lymphoma (FL) (ICD-10 Group C82) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #7.
   If no, continue to #9.

7. Is the patient's cancer relapsed or refractory and the patient meets **ONE** of the following criteria?
   - The requested medication will be used in combination with Monjuvi (tafasitamab-cxix) and rituximab
   - The requested medication will be used in combination with Epkinly (epcoritamab-bysp) and rituximab

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #8.

8. Has the patient been previously treated **AND** the requested medication will be used in combination with a rituximab product?

   If yes, **approve for 12 months by HICL or GPI-10 for #21 per 28 days for 12 fills.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

9. Does the patient have a diagnosis of marginal zone lymphoma (MZL) (ICD-10 Group C83.0) and meet **ALL** the following criteria?
   - The patient is 18 years of age or older
   - The patient has previously been treated for marginal zone lymphoma (MZL)
   - The requested medication will be used in combination with a rituximab product

   If yes, **approve for 12 months by HICL or GPI-10 for #21 per 28 days for 12 fills.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

LENALIDOMIDE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LENALIDOMIDE (Revlimid)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Multiple myeloma (MM: a type of blood cancer)
   2. Anemia (a type of blood condition) due to a myelodysplastic syndrome (MDS: a type of blood cancer)
   3. Mantle cell lymphoma (MCL: a type of blood cell)
   4. Follicular lymphoma (FL: a type of blood cancer)
   5. Marginal zone lymphoma (MZL: a type of blood cancer)

B. If you have multiple myeloma, approval also requires:
   1. You are 18 years of age or older
   2. The requested medication will be used as induction, consolidation, or maintenance treatment for multiple myeloma

C. If you have anemia due to a myelodysplastic syndrome, approval also requires:
   1. You are 18 years of age or older
   2. Your myelodysplastic syndrome is associated with a deletion 5q abnormality (a type of gene mutation)

D. If you have mantle cell lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You have relapsed or progressed (disease has returned or worsened) after two prior therapies, one of which included Velcade (bortezomib)

E. If you have follicular lymphoma, approval also requires:
   1. You are 18 years of age or older
   2. You meet ONE of the following:
      a. You have relapsed or refractory follicular lymphoma and meet ONE of the following:
         i. The requested medication will be used in combination with Monjuvi (tafasitamab-cxix) and rituximab
         ii. The requested medication will be used in combination with Epkinly (epcoritamab-bysp) and rituximab
      b. You have been previously treated for follicular lymphoma AND the requested medication will be used in combination with a rituximab product (a type of cancer medication)

(Denial text continued on next page)

GUIDELINES FOR USE

1. Does the patient have a diagnosis of differentiated thyroid cancer (DTC) (ICD-10 C73) and meet **ALL** of the following criteria? (**NOTE**: Differentiated thyroid cancer (DTC) can be classified as papillary (PTC), follicular (FTC), or Hurthle cell)
   - The thyroid cancer is locally recurrent or metastatic
   - The thyroid cancer is progressive
   - The thyroid cancer is refractory to radioactive iodine therapy

   If yes, **approve for 12 months by GPID or GPI-14 based on the following daily dose requirements:**
   - **10 mg daily dose: #1 per day.**
   - **14 mg daily dose: #2 per day.**
   - **20 mg daily dose: #2 per day.**
   - **24 mg daily dose: #3 per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #3.
   If no, continue to #5.

3. Will Lenvima be used in combination with pembrolizumab (Keytruda)?

   If yes, **approve for 12 months by GPID or GPI-14 based on the following daily dose requirements:**
   - **8 mg daily dose: #2 per day.**
   - **10 mg daily dose: #1 per day.**
   - **14 mg daily dose: #2 per day.**
   - **20 mg daily dose: #2 per day.**

   If no, continue to #4.

GUIDELINES FOR USE (CONTINUED)

4. Will Lenvima be used in combination with everolimus (Afinitor) **AND** the patient meets the following criterion?
   - The patient has tried one anti-angiogenic therapy (e.g., Sutent [sunitinib], Votrient [pazopanib], Inlyta [axitinib], Nexavar [sorafenib])

   If yes, **approve for 12 months by GPID or GPI-14 based on the following daily dose requirements:**
   - **8 mg daily dose: #2 per day.**
   - **10 mg daily dose: #1 per day.**
   - **14 mg daily dose: #2 per day.**
   - **18 mg daily dose: #3 per day.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Does the patient have a diagnosis of hepatocellular carcinoma (HCC) (ICD-10 C22.0) **AND** meet the following criterion?
   - The patient's cancer is unresectable

   If yes, **approve for 12 months by GPID or GPI-14 based on the following daily dose requirements:**
   - **4 mg every other day: #1 per 2 days.**
   - **4 mg daily dose: #1 per day.**
   - **8 mg daily dose: #2 per day.**
   - **12 mg daily dose: #3 per day.**

   If no, continue to #6.

LENVATINIB

GUIDELINES FOR USE (CONTINUED)

6. Does the patient have a diagnosis of advanced endometrial carcinoma (EC) (ICD-10 C54.1) and meet **ALL** of the following criteria?
   - Lenvima will be used in combination with pembrolizumab (Keytruda)
   - The patient's cancer is mismatch repair proficient (pMMR) OR is not microsatellite instability-high (MSI-H), as determined by an FDA-approved test
   - The patient has experienced disease progression following prior systemic therapy
   - The patient is not a candidate for curative surgery or radiation

   If yes, **approve for 12 months by GPID or GPI-14 based on the following daily dose requirements:**
   - **8 mg daily dose: #2 per day.**
   - **10 mg daily dose: #1 per day.**
   - **14 mg daily dose: #2 per day.**
   - **20 mg daily dose: #2 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LENVATINIB (Lenvima)** requires the following rule(s) be met for approval:

   A. You have **ONE** of the following:
      1. Differentiated thyroid cancer (DTC: a type of thyroid cancer)
      2. Advanced renal cell carcinoma (RCC: a type of kidney cancer)
      3. Hepatocellular carcinoma (HCC: a type of liver cancer)
      4. Advanced endometrial carcinoma (EC: a type of uterus cancer)

   B. If you have differentiated thyroid cancer, approval also requires:
      1. Your thyroid cancer is locally recurrent (re-appears in the same spot) or metastatic (has spread to other parts of the body)
      2. Your thyroid cancer is progressive (getting worse)
      3. Your thyroid cancer is refractory (has not responded) to radioactive iodine therapy

   (Denial text continued on next page)

LENVATINIB

GUIDELINES FOR USE (CONTINUED)

C. If you have advanced renal cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Lenvima will be used in combination with pembrolizumab (Keytruda)
   b. Lenvima will be used in combination with everolimus (Afinitor) AND you have tried one anti-angiogenic therapy (treatment that stop tumors from growing their own blood vessels, such as Sutent [sunitinib], Votrient [pazopanib], Inlyta [axitinib], Nexavar [sorafenib])

D. If you have hepatocellular carcinoma, approval also requires:
1. Your cancer is unresectable (cannot be removed by surgery)

E. If you have advanced endometrial carcinoma, approval also requires:
1. Lenvima will be used in combination with pembrolizumab (Keytruda)
2. Your cancer is mismatch repair proficient (pMMR: your tumor has normal expression of types of protein) OR is not microsatellite instability-high (MSI-H: a type of mutation), as determined by a Food and Drug Administration (FDA)-approved test
3. You have experienced disease progression (worsening) following prior systemic therapy (treatment that targets the entire body)
4. You are not a candidate for curative (to cure) surgery or radiation

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE
For further information, please refer to the Prescribing Information and/or Drug Monograph for Lenvima.

LETERMOVIR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LETERMOVIR	PREVYMIS	44622		GPI-10 (1220004500)	

GUIDELINES FOR USE

1. Is the request for prophylaxis of cytomegalovirus (CMV) infection and disease in an allogeneic hematopoietic stem cell transplant (HSCT) recipient and the patient meets **ALL** of the following criteria?
   - The patient is 6 months of age or older
   - Therapy is prescribed by or in consultation with a transplant specialist or infectious disease specialist
   - The patient is a CMV-seropositive recipient [R+] of an allogeneic HSCT
   - The patient will start or started Prevymis between Day 0 and Day 28 post-transplant (before or after engraftment)

   If yes, continue to #2.
   If no, continue to #4.

2. Will the patient receive Prevymis beyond 100 days post-transplant?

   If yes, continue to #3.

   If no, **approve for 100 days by GPID or GPI-14 for all strengths as follows:**
   - **240mg tablet: #1 per day.**
   - **480mg tablet: #1 per day.**
   - **240mg/12mL vial: #12mL per day.**
   - **480mg/24mL vial: #24mL per day.**
   - **20mg pellet: #4 per day.**
   - **120mg pellet: #4 per day.**

LETERMOVIR

GUIDELINES FOR USE (CONTINUED)

3. Is the patient at risk for late CMV infection and disease, **AND** will not receive Prevymis beyond 200 days post-transplant?

   If yes, **approve for 200 days by GPID or GPI-14 for all strengths as follows:**
   - **240mg tablet: #1 per day.**
   - **480mg tablet: #1 per day.**
   - **240mg/12mL vial: #12mL per day.**
   - **480mg/24mL vial: #24mL per day.**
   - **20mg pellet: #4 per day.**
   - **120mg pellet: #4 per day.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Is the request for prophylaxis of cytomegalovirus (CMV) disease in a kidney transplant recipient and the patient meets **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a transplant specialist or infectious disease specialist
   - The patient is a kidney transplant recipient at high risk (i.e., donor is CMV seropositive, recipient is CMV seronegative [D+/R-])
   - The patient will start or started Prevymis between Day 0 and Day 7 post-transplant
   - The patient will not receive Prevymis beyond 200 days post-transplant

   If yes, **approve for 200 days by GPID or GPI-14 for all strengths as follows:**
   - **240mg tablet: #1 per day.**
   - **480mg tablet: #1 per day.**
   - **240mg/12mL vial: #12mL per day.**
   - **480mg/24mL vial: #24mL per day.**
   - **120mg pellet: #4 per day.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

LETERMOVIR

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LETERMOVIR (Prevymis)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Prophylaxis (prevention) of cytomegalovirus (CMV: a type of virus) infection and disease in an allogeneic hematopoietic stem cell transplant (HSCT: cells transplanted from a matching donor) recipient
   2. Prophylaxis of cytomegalovirus (CMV) disease in a kidney transplant recipient

B. If the request is for prophylaxis of cytomegalovirus infection and disease in an allogeneic hematopoietic stem cell transplant recipient, approval also requires:
   1. You are 6 months of age or older
   2. Therapy is prescribed by or in consultation with a transplant specialist or infectious disease specialist (a doctor who specializes in the treatment of infections)
   3. You are a CMV-seropositive recipient [R+] of an allogeneic HSCT
   4. You will start or have started Prevymis between Day 0 and Day 28 post (after)-transplant (before or after engraftment [a type of transplant])
   5. You meet ONE of the following:
      a. You are NOT at risk for late CMV infection and disease, AND you will not receive Prevymis beyond 100 days post (after)-transplant
      b. You are at risk for late CMV infection and disease, AND you will not receive Prevymis beyond 200 days post (after)-transplant

C. If the request is for prophylaxis of cytomegalovirus disease in a kidney transplant recipient, approval also requires:
   1. You are 12 years of age or older
   2. Therapy is prescribed by or in consultation with a transplant specialist or infectious disease specialist (a doctor who specializes in the treatment of infections)
   3. You are a kidney transplant recipient at high risk (donor is CMV seropositive, recipient is CMV seronegative [D+/R-])
   4. You will start or have started Prevymis between Day 0 and Day 7 post (after)-transplant
   5. You will not receive Prevymis beyond 200 days post (after)-transplant

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

LEUPROLIDE DEPOT (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LEUPROLIDE ACETATE	LEUPROLIDE DEPOT, LUTRATE DEPOT		84594	GPI-14 (21405010152230)	

GUIDELINES FOR USE

1. Is the requested medication being used for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by GPID or GPI-14 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, continue to #2.

2. Does the patient have a diagnosis of advanced prostate cancer?

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #1 vial per 12 weeks.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LEUPROLIDE DEPOT** requires the following rule(s) be met for approval:
   A. The request is for ONE of the following:
      1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
      2. Advanced prostate cancer (prostate cancer that has spread to nearby tissue or organs)
   B. If you have gender dysphoria, approval also requires:
      1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

LEUPROLIDE ACETATE	LEUPROLIDE ACETATE		84597	GPI-14 (21405010106407)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, continue to #2.

2. Does the patient have a diagnosis of advanced prostate cancer (ICD-10 C61)?

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #2 kits per 28 days.**
   If no, continue to #3.

3. Is the request for a female patient who has a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a pediatric endocrinologist
   - The patient has elevated levels of follicle-stimulating hormone (FSH) (level >4.0 mIU/mL) and luteinizing hormone (LH) (level > 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 8 years of age at the onset of CPP
   - The patient has been evaluated for pubertal staging using the Tanner scale for breast development (stage 2 or above) AND pubic hair growth (stage 2 or above)

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, continue to #4.

LEUPROLIDE

INITIAL CRITERIA (CONTINUED)

4. Is the request for a male patient who has a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a pediatric endocrinologist
   - The patient has elevated levels of follicle-stimulating hormone (FSH) (level >5.0 mIU/mL) and luteinizing hormone (LH) (level > 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 9 years of age at the onset of CPP
   - The patient has been evaluated for pubertal staging using the Tanner scale for genital development (stage 2 or above) AND pubic hair growth (stage 2 or above)

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LEUPROLIDE** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
      2. Advanced prostate cancer (prostate cancer that has spread to nearby tissue or organs)
      3. Central precocious puberty (CPP: early sexual development in girls and boys)

   B. If you have gender dysphoria, approval also requires:
      1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

   C. If you are female and have central precocious puberty, approval also requires:
      1. You are 2 years of age or older
      2. Therapy is prescribed by or in consultation with a pediatric endocrinologist (a type of hormone doctor)
      3. You have high levels of follicle-stimulating hormone (FSH) (level greater than 4.0 mIU/mL) and luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
      4. You are/were younger than 8 years of age when your condition started
      5. You have been evaluated for pubertal staging using the Tanner scale (scale of physical measurements of development based on external sex characteristics) for breast development (stage 2 or above) AND pubic hair growth (stage 2 or above)

   (Initial denial text continued on next page)

LEUPROLIDE

RENEWAL CRITERIA

NOTE: For the diagnosis of advanced prostate cancer, please refer to the Initial Criteria section.

1. Is the requested medication being used for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, continue to #2.

2. Does the patient have a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meet **ALL** of the following criteria?
   - The Tanner scale staging at initial diagnosis of CPP has stabilized or regressed during three separate medical visits in the previous year
   - The patient has NOT reached the actual age which corresponds to their current pubertal age

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LEUPROLIDE** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
      2. Central precocious puberty (CPP: early sexual development in girls and boys)

   B. If you have gender dysphoria, renewal also requires:
      1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

   C. If you have central precocious puberty, renewal also requires:
      1. Your Tanner scale staging (scale of physical measurements of development based on external sex characteristics) at initial diagnosis of CPP has stabilized or regressed (lowered) during three separate medical visits in the previous year
      2. You have NOT reached the actual age which corresponds to your current pubertal age

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

LEUPROLIDE-FENSOLVI (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LEUPROLIDE ACETATE	FENSOLVI	21102		GPI-10 (3008005025)	BRAND = FENSOLVI

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, continue to #2.

2. Is the request for a female patient who has a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a pediatric endocrinologist
   - The patient has elevated levels of follicle-stimulating hormone (FSH) (level >4.0 mIU/mL) and luteinizing hormone (LH) (level > 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 8 years of age at the onset of CPP
   - The patient has been evaluated for pubertal staging using the Tanner scale for breast development (stage 2 or above) AND pubic hair growth (stage 2 or above)

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #1 per 6 months.**
   If no, continue to #3.

3. Is the request for a male patient who has a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a pediatric endocrinologist
   - The patient has elevated levels of follicle-stimulating hormone (FSH) (level >5.0 mIU/mL) and luteinizing hormone (LH) (level > 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 9 years of age at the onset of CPP
   - The patient has been evaluated for pubertal staging using the Tanner scale for genital development (stage 2 or above) AND pubic hair growth (stage 2 or above)

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #1 per 6 months.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LEUPROLIDE-FENSOLVI (NSA)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LEUPROLIDE-FENSOLVI** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
   2. Central precocious puberty (CPP: early sexual development in girls and boys)

B. If you have gender dysphoria, approval also requires:
   1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

C. If you are female and have central precocious puberty, approval also requires:
   1. You are 2 years of age or older
   2. Therapy is prescribed by or in consultation with a pediatric endocrinologist (a type of hormone doctor)
   3. You have high levels of follicle-stimulating hormone (FSH) (level greater than 4.0 mIU/mL) and luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   4. You are/were younger than 8 years of age when your condition started
   5. You have been evaluated for pubertal staging using the Tanner scale (scale of physical measurements of development based on external sex characteristics) for breast development (stage 2 or above) AND pubic hair growth (stage 2 or above)

D. If you are male and have central precocious puberty, approval also requires:
   1. You are 2 years of age or older
   2. Therapy is prescribed by or in consultation with a pediatric endocrinologist (a type of hormone doctor)
   3. You have high levels of follicle-stimulating hormone (FSH) (level greater than 5.0 mIU/mL) and luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
   4. You are/were younger than 9 years of age when your condition started
   5. You have been evaluated for pubertal staging using the Tanner scale (scale of physical measurements of development based on external sex characteristics) for genital development (stage 2 or above) AND pubic hair growth (stage 2 or above)

LEUPROLIDE-FENSOLVI (NSA)

RENEWAL CRITERIA

1. Is the requested medication being used for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, continue to #2.

2. Does the patient have a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meet **ALL** of the following criteria?
   - The Tanner scale staging at initial diagnosis of CPP has stabilized or regressed during three separate medical visits in the previous year
   - The patient has NOT reached the actual age which corresponds to their current pubertal age

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #1 per 6 months.** If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LEUPROLIDE-FENSOLVI** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
      2. Central precocious puberty (CPP: early sexual development in girls and boys)

   B. If you have gender dysphoria, renewal also requires:
      1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

   C. If you have central precocious puberty, renewal also requires:
      1. Your Tanner scale staging (scale of physical measurements of development based on external sex characteristics) at initial diagnosis of CPP has stabilized or regressed (lowered) during three separate medical visits in the previous year
      2. You have NOT reached the actual age which corresponds to your current pubertal age

LEUPROLIDE-LUPRON DEPOT (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LEUPROLIDE ACETATE	LUPRON DEPOT	21102		GPI-10 (2140501010, 2140501015, 2140501020, 2140501025)	BRAND = LUPRON DEPOT

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, continue to #2.

2. Does the patient have a diagnosis of advanced prostate cancer?

   If yes, **approve for 12 months for all strengths as follows:**
   - **Approve by GPID or GPI-14:**
     - **7.5mg: #1 per 4 weeks.**
     - **22.5mg: #1 per 12 weeks.**
     - **30mg: #1 per 16 weeks.**
   - **Approve by NDC or GPI-14:**
     - **45mg: #1 per 24 weeks.**

   If no, continue to #3.

LEUPROLIDE-LUPRON DEPOT (NSA)

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of moderate to severe pain from endometriosis and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an obstetrician/gynecologist
   - The patient had a trial of or contraindication to a nonsteroidal anti-inflammatory drug (NSAID) AND a progestin-containing contraceptive preparation (e.g., combination hormonal contraceptive preparation, progestin-only contraceptive preparation)
   - Lupron Depot will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa, Myfembree, Zoladex)
   - The patient has NOT received more than 12 months of treatment with Lupron Depot per lifetime

   If yes, **approve for 6 months for all strengths as follows:**
   - **3.75mg: Approve by GPID or GPI-14 with a quantity limit of #1 per month.**
   - **11.25mg: Approve by NDC with a quantity limit of #1 per 3 months.**

   If no, continue to #4.

4. Does the patient have a diagnosis of uterine leiomyomata (fibroids) and meet **ALL** of the following criteria?
   - Lupron Depot will be used concomitantly with iron therapy for the preoperative hematologic improvement of anemia caused by fibroids
   - Therapy is prescribed by or in consultation with an obstetrician or gynecologist (OB/GYN)
   - Lupron Depot will NOT be used concurrently with another GnRH-modulating agent (e.g., Oriahnn [elagolix/estradiol/norethindrone], Myfembree [relugolix/estradiol/norethindrone])

   If yes, **approve for 3 months for all strengths as follows:**
   - **3.75mg: Approve by GPID or GPI-14 with a quantity limit of #1 per month.**
   - **11.25mg: Approve by NDC for one fill of #1.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LEUPROLIDE-LUPRON DEPOT (NSA)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LEUPROLIDE-LUPRON DEPOT** requires the following rule(s) be met for approval:

A. You have ONE of the following diagnoses:
   1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
   2. Advanced prostate cancer (prostate cancer that has spread to nearby tissue or organs)
   3. Moderate to severe pain from endometriosis (condition affecting the uterus)
   4. Uterine leiomyomata (fibroids: noncancerous growths in the uterus)

B. If you have gender dysphoria, approval also requires:
   1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

C. If you have moderate to severe pain from endometriosis, approval also requires:
   1. Therapy is prescribed by or in consultation with an obstetrician/gynecologist (a type of women's health doctor)
   2. You had a trial of or contraindication (harmful for) to a nonsteroidal anti-inflammatory drug (NSAID) AND a progestin-containing contraceptive preparation (such as combination hormonal contraceptive preparation, progestin-only contraceptive preparation)
   3. Lupron Depot will NOT be used at the same time with another gonadotropin-releasing hormone (GnRH)-modulating agent (such as Orilissa, Myfembree, Zoladex)
   4. You have NOT received more than 12 months of treatment with Lupron Depot per lifetime

D. If you have uterine leiomyomata (fibroids), approval also requires:
   1. Lupron Depot will be used with iron therapy for the preoperative (before surgery) hematologic (blood) improvement of anemia (a type of blood condition) caused by fibroids
   2. Therapy is prescribed by or in consultation with an obstetrician or gynecologist (OB/GYN: a type of women's health doctor)
   3. You will NOT use Lupron Depot concurrently (at the same time) with another gonadotropin-releasing hormone (GnRH)-modulating medication (such as Oriahnn [elagolix/estradiol/norethindrone], Myfembree [relugolix/estradiol/norethindrone])

LEUPROLIDE-LUPRON DEPOT (NSA)

RENEWAL CRITERIA

NOTE: For the diagnoses of advanced prostate cancer or uterine leiomyomata (fibroids), please refer to the Initial Criteria section.

1. Is the requested medication being used for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC Note: Please override the quantity limit coded on the formulary by selecting the "QL Only" override).**

   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe pain from endometriosis and meet **ALL** of the following criteria?
   - The patient has improvement of pain related to endometriosis while on therapy
   - The patient is receiving concomitant add-back therapy (i.e., combination estrogen-progestin or progestin-only contraceptive preparation)
   - Lupron Depot will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa, Myfembree, Zoladex)
   - The patient has NOT received more than 12 months of treatment with Lupron Depot per lifetime

   If yes, **approve for 6 months for all strengths as follows:**
   - **3.75 mg: Approve by GPID or GPI-14 with a quantity limit of #1 per month.**
   - **11.25 mg: Approve by NDC with a quantity limit of #1 per 3 months.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

LEUPROLIDE-LUPRON DEPOT (NSA)

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LEUPROLIDE-LUPRON DEPOT** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
   2. Moderate to severe pain from endometriosis (condition affecting the uterus)

B. If you have gender dysphoria, renewal also requires:
   1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

C. If you have moderate to severe pain from endometriosis, renewal also requires:
   1. You experienced improvement of pain related to endometriosis while on therapy
   2. You are receiving add-back therapy (combination estrogen-progestin or progestin-only contraceptive preparation) at the same time
   3. Lupron Depot will NOT be used at the same time with another gonadotropin-releasing hormone (GnRH)-modulating agent (such as Orilissa, Myfembree, Zoladex)
   4. You have NOT received a total of 12 months of treatment with Lupron Depot per lifetime

LEUPROLIDE-NORETHINDRONE (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LEUPROLIDE/ NORETHINDRONE ACET	LUPANETA PACK	39945		GPI-10 (3008990250)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for gender dysphoria?

   If yes, **approve for 12 months by HICL or GPI-10 and override quantity limits.**
   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe pain from endometriosis and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an obstetrician/gynecologist
   - The diagnosis is confirmed via surgical or direct visualization (e.g., pelvic ultrasound) OR histopathological confirmation (e.g., laparoscopy or laparotomy) in the last 10 years
   - The patient had a trial of or contraindication to a nonsteroidal anti-inflammatory drug (NSAID) AND a progestin-containing contraceptive preparation (e.g., combination hormonal contraceptive preparation, progestin-only contraceptive preparation)
   - Lupaneta will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa, Myfembree, Zoladex)
   - The patient has NOT received more than 12 months of treatment with Lupaneta per lifetime

   If yes, **approve for 6 months by GPID or GPI-14 for the requested strength with the following quantity limits:**
   - **3.75 mg-5 mg: #1 per month.**
   - **11.25 mg-5 mg: #1 per 3 months.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LEUPROLIDE- NORETHINDRONE (NSA)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LEUPROLIDE- NORETHINDRONE (Lupaneta)** requires the following rule(s) be met for approval:

A. You have ONE of the following diagnoses:
   1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
   2. Moderate to severe pain from endometriosis (condition affecting the uterus)

B. If you have moderate to severe pain from endometriosis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an obstetrician/gynecologist (a type of women's health doctor)
   3. Your diagnosis is confirmed by surgical or direct visualization (such as pelvic ultrasound [type of imaging]) or histopathological (tissue) confirmation (such as laparoscopy [type of surgery] or laparotomy [type of surgery]) in the last 10 years
   4. You had a trial of or contraindication (harmful for) to a nonsteroidal anti-inflammatory drug (NSAID: such as ibuprofen, meloxicam, naproxen) AND a progestin-containing contraceptive preparation (such as combination hormonal contraceptive preparation, progestin-only contraceptive preparation)
   5. Lupaneta will NOT be used at the same time with another gonadotropin-releasing hormone (GnRH)-modulating agent (such as Orilissa, Myfembree, Zoladex)
   6. You have NOT received more than 12 months of treatment with Lupaneta per lifetime

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LEUPROLIDE- NORETHINDRONE (NSA)

GUIDELINES FOR USE (CONTINUED)

RENEWAL CRITERIA

NOTE: For gender dysphoria, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe pain from endometriosis and meet **ALL** of the following criteria?
   - The patient has improvement of pain related to endometriosis while on therapy
   - The patient is receiving concomitant add-back therapy (i.e., combination estrogen-progestin or progestin-only contraceptive preparation)
   - The patient has NOT received more than 12 months of treatment with Zoladex per lifetime
   - Lupaneta will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa, Myfembree, Zoladex)

   If yes, **approve for 6 months by GPID or GPI-14 for the requested strength with the following quantity limits:**
   - **3.75 mg-5 mg: #1 per month.**
   - **11.25 mg-5 mg: #1 per 3 months.**

   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LEUPROLIDE- NORETHINDRONE (Lupaneta)** requires the following rule(s) be met for renewal:
   A. You have moderate to severe pain from endometriosis (condition affecting the uterus)
   B. You experienced improvement of pain related to endometriosis while on therapy
   C. You are receiving add-back therapy (combination estrogen-progestin or progestin-only contraceptive preparation) at the same time
   D. You have NOT received a total of 12 months of treatment with Lupaneta per lifetime
   E. Lupaneta will NOT be used at the same time with another gonadotropin-releasing hormone (GnRH)-modulating agent (such as Orilissa, Myfembree, Zoladex)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LEVODOPA

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LEVODOPA	INBRIJA	01897		GPI-10 (7320004000)	ROUTE = INHALATION

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Parkinson's disease and meet **ALL** of the following criteria?
   - Inbrija is being used for intermittent treatment of OFF episodes associated with Parkinson's disease
   - The patient is currently being treated with carbidopa/levodopa
   - Therapy is prescribed by or given in consultation with a neurologist
   - The patient is **NOT** currently taking more than 1600mg of levodopa per day
   - The physician has optimized drug therapy as evidenced by **BOTH** of the following:
     - Change in levodopa/carbidopa dosing strategy or formulation
     - Trial of or contraindication to at least **TWO** Parkinson's disease agents from **TWO** different classes of the following: dopamine agonist (e.g., ropinirole, pramipexole, rotigotine), monoamine oxidase-inhibitors (MAO-I) (e.g., selegiline, rasagiline), catechol-o-methyl transferase (COMT) inhibitors (e.g., entacapone, tolcapone), adenosine receptor antagonist A2A (e.g., istradefylline)

   If yes, **approve for 6 months by GPID or GPI-14 with a quantity limit of #10 capsules per day.**
   APPROVAL TEXT: Renewal requires that the patient has experienced improvement with motor fluctuations during OFF episodes with the use of Inbrija (e.g., improvement in speech, facial expression, tremor at rest, action or postural tremor of hands, rigidity, finger taps, hand movements, rapid alternating movements of hands, posture, leg agility, arising from chair)

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LEVODOPA INHALATION (Inbrija)** requires the following rule(s) be met for approval:
   A. You have Parkinson's disease (a nerve system disorder that affects movement)
   B. Inbrija is being used for intermittent treatment of OFF episodes (times when you have symptoms return due to medication wearing off) associated with Parkinson's disease
   C. You are currently being treated with carbidopa/levodopa
   D. The requested medication is prescribed by or given in consultation with a neurologist (nerve doctor)
   (Initial denial text continued on next page)

   - The patient has a contraindication to or is unable to swallow generic levothyroxine tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #2mL per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LEVOTHYROXINE-TIROSINT-SOL** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Congenital (present from birth) or acquired hypothyroidism (low thyroid function)
      2. Thyrotropin (a type of thyroid hormone)-dependent well-differentiated thyroid cancer

   B. If you have congenital or acquired hypothyroidism, approval also requires:
      1. You have a contraindication to (harmful for you to use) or are unable to swallow generic levothyroxine tablets

   C. If you have thyrotropin-dependent well-differentiated thyroid cancer, approval also requires:
      1. Tirosint-Sol will be used as an adjunct (add-on) to surgery and radioiodine therapy (a type of radiation therapy)
      2. You have a contraindication to (harmful for you to use) or are unable to swallow generic levothyroxine tablets

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

L-GLUTAMINE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
GLUTAMINE (L-GLUTAMINE)	ENDARI, GLUTAMINE (L-GLUTAMINE)		13365	GPI-10 (8280102000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of sickle cell disease (SCD) (ICD-10 Group D57) and meet **ALL** of the following criteria?
- Therapy is prescribed by or in consultation with a hematologist
- The patient had a trial of or contraindication to the clinical standard of care agent: hydroxyurea

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient between 5 to 17 years of age?

If yes, **approve for 12 months by GPID or GPI-10 with a quantity limit of #6 packets per day.**

If no, continue to #3.

3. Is the patient 18 years of age or older and meets **ONE** of the following criteria?
- The patient had at least 2 sickle cell crises in the past year (a sickle cell crises is defined as a visit to an emergency room/medical facility for sickle cell disease-related pain which was treated with a parenterally administered narcotic or parenterally administered ketorolac, the occurrence of chest syndrome, priapism, or splenic sequestration)
- The patient is having sickle-cell associated symptoms (e.g., pain or anemia) which are interfering with activities of daily living
- The patient has a history of or has recurrent acute chest syndrome (ACS)

If yes, **approve for 12 months by GPID or GPI-10 with a quantity limit of #6 packets per day.**

If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

L-GLUTAMINE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **L-GLUTAMINE (Endari)** requires the following rule(s) be met for approval:

A. You have sickle cell disease (a type of blood disorder)
B. You are 5 years of age or older
C. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
D. The patient have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: hydroxyurea
E. If you are 18 years of age or older, approval also requires ONE of the following:
   1. You had at least 2 sickle cell crises in the past year (a sickle cell crisis is defined as a visit to an emergency room/medical facility for sickle cell disease-related pain which was treated with a parenterally administered [injected into the vein] narcotic [a class of medications used to treat pain] or parenterally administered ketorolac, the occurrence of chest syndrome, priapism [prolonged erection of penis], or splenic sequestration [sickle-shaped blood cells trapped in spleen])
   2. You are having sickle-cell associated symptoms (such as pain or anemia [a type of blood condition]) which are interfering with activities of daily living
   3. You have a history of or have recurrent acute chest syndrome (ACS: chest pain, cough, fever, low oxygen level)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

L-GLUTAMINE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of sickle cell disease (ICD-10 Group D57) **AND** meet the following criterion?
   - The patient has maintained or experienced a reduction in acute complications of sickle cell disease (SCD) (e.g., number of sickle cell crises, hospitalizations, acute chest syndrome [ACS])

   If yes, **approve for lifetime by GPID or GPI-10 with a quantity limit of #6 packets per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **L-GLUTAMINE (Endari)** requires the following rule(s) be met for renewal:
   A. You have sickle cell disease (a type of blood disorder)
   B. You have maintained or experienced a reduction in acute (short-term) complications of sickle cell disease (such as the number of sickle cell crises, hospitalizations, acute chest syndrome [ACS: chest pain, cough, fever, low oxygen level])

RATIONALE

LIFILEUCEL (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LIFILEUCEL	AMTAGVI	49406		GPI-10 (2165104700)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable or metastatic melanoma and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received previous treatment with a PD-1 blocking antibody (e.g., Opdivo [nivolumab], Keytruda [pembrolizumab])
   - The patient has not received a previous dose of Amtagvi per lifetime

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient have a BRAF V600 mutation positive melanoma?

   If yes, continue to #3.
   If no, **approve for 12 months by HICL or GPI-10 for #1 fill per lifetime.**

3. Has the patient received previous treatment with a BRAF inhibitor (e.g., Tafinlar [dabrafenib], Zelboraf [vemurafenib], Braftovi [encorafenib])?

   If yes, **approve for 12 months by HICL or GPI-10 for #1 fill per lifetime.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LIFILEUCEL (Amtagvi)** requires the following rule(s) be met for approval:
   A. You have unresectable or metastatic melanoma (a type of skin cancer that cannot be completely removed by surgery or has spread to other parts of the body)
   B. You are 18 years of age or older
   C. You had previous treatment with a PD-1 blocking antibody (such as Opdivo [nivolumab], Keytruda [pembrolizumab])
   D. You have not had a previous dose of Amtagvi in your lifetime
   E. If you have a BRAF V600 mutation positive melanoma, approval also requires you had previous treatment with a BRAF inhibitor (such as Tafinlar [dabrafenib], Zelboraf [vemurafenib], Braftovi [encorafenib])

LIRAGLUTIDE - SAXENDA

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LIRAGLUTIDE	SAXENDA, LIRAGLUTIDE		37637	GPI-10 (6125205000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Are weight loss products (anti-obesity medications) a covered benefit?

   If yes, continue to #2.
   If no, guideline does not apply.

2. Is the request for weight loss OR weight management (ICD-10 Group E66) and the patient meets **ALL** of the following criteria?
   - There is physician attestation of active enrollment in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program
   - Saxenda will NOT be used concurrently with another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release])

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the patient 18 years of age or older and meets **ONE** of the following criteria prior to initiating weight loss therapy?
   - The patient has a body mass index (BMI) of at least 30 kg/m(2)
   - The patient is Asian and has a BMI of at least 27.5 kg/m(2)
   - The patient has a BMI of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non-alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)
   - The patient is Asian, has a BMI of at least 25 kg/m(2), AND has at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non- alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)

   If yes, **approve for 29 weeks by GPID or GPI-10.**
   If no, continue to #4.

LIRAGLUTIDE - SAXENDA

INITIAL CRITERIA (CONTINUED)

4. Is the patient 12 to 17 years of age and meets **ALL** of the following criteria?
   - The patient's body weight is greater than 60 kg (132 lbs)
   - The patient's initial body mass index (BMI) corresponds to 30 kg/m(2) or greater to that for adults (see table below)

BMI Cut-offs for Obesity in Patients 12 to 17 years that corresponds to 30 kg/m^2 in Adults

Age	Body Mass Index	
	Males	Females
12	26.02	26.67
12.5	26.43	27.24
13	26.84	27.76
13.5	27.25	28.20
14	27.63	28.57
14.5	27.98	28.87
15	28.30	29.11
15.5	28.60	29.29
16	28.88	29.43
16.5	29.14	29.56
17	29.41	29.69
17.5	29.70	29.84

If yes, **approve for 29 weeks by GPID or GPI-10.**
If no, do not approve.

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LIRAGLUTIDE - SAXENDA** requires the following rule(s) be met for approval:

A. The request is for weight loss or weight management
B. You are 12 years of age or older
C. You are actively enrolled in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program
D. You will NOT use Saxenda concurrently (at the same time) with another GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release])

LIRAGLUTIDE - SAXENDA

INITIAL CRITERIA (CONTINUED)

E. If you are 18 years of age or older, approval also requires ONE of the following before starting weight loss therapy:

1. You have a body mass index (BMI: a tool for evaluating body fat) of at least 30 kg/m(2)
2. You are Asian and have a body mass index (BMI: a tool for evaluating body fat) of at least 27.5 kg/m(2)
3. You have a body mass index (BMI: a tool for evaluating body fat) of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], dyslipidemia [abnormal levels of fat], cardiovascular disease [condition of the heart or blood vessels], coronary artery disease [CAD: a type of heart condition], sleep apnea [a type of sleep condition with difficulty breathing], osteoarthritis [a type of joint condition] of the knee[s], polycystic ovarian syndrome [a hormonal disorder], non-alcoholic steatohepatitis/non- alcoholic fatty liver disease [a type of liver disease], asthma [a type of lung condition], and chronic obstructive pulmonary disease [COPD: a type of lung condition])
4. You are Asian, have a body mass index (BMI: a tool for evaluating body fat) of at least 25 kg/m(2), AND have at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], dyslipidemia [abnormal levels of fat], cardiovascular disease [condition of the heart or blood vessels], coronary artery disease [CAD: a type of heart condition], sleep apnea [a type of sleep condition with difficulty breathing], osteoarthritis [a type of joint condition] of the knee[s], polycystic ovarian syndrome [a hormonal disorder], non-alcoholic steatohepatitis/non-alcoholic fatty liver disease [a type of liver disease], asthma [a type of lung condition], and chronic obstructive pulmonary disease [COPD: a type of lung condition])

F. If you are 12 to 17 years of age, approval also requires:

1. You have a body weight greater than 60 kilograms (132 pounds)
2. You have an initial body mass index (BMI: a tool for evaluating body fat) corresponding to 30 kg/m(2) for adults

LIRAGLUTIDE - SAXENDA

RENEWAL CRITERIA

1. Is the request for weight loss OR weight management (ICD-10 Group E66) **AND** the patient meets the following criterion?
   - Saxenda will NOT be used concurrently with another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient 12 to 17 years of age **AND** meets the following criterion?
   - The patient has achieved or maintained at least a 1% weight loss of baseline BMI after at least 12 weeks of treatment on the maximally tolerated dose

   If yes, **approve for 12 months by GPID or GPI-10.**
   If no, continue to #3.

3. Is the patient 18 years of age or older and meets **ONE** of the following criteria prior to initiating weight loss therapy?
   - The patient has a body mass index (BMI) of at least 30 kg/m(2)
   - The patient is Asian and has a BMI of at least 27.5 kg/m(2)
   - The patient has a BMI of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non-alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)
   - The patient is Asian, has a BMI of at least 25 kg/m(2), AND has at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non- alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

4. Has the patient achieved or maintained at least a 5% weight loss of baseline body weight after 16 weeks of treatment?

   If yes, **approve for 12 months by GPID or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

LIRAGLUTIDE - SAXENDA

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LIRAGLUTIDE - SAXENDA** requires the following rule(s) be met for renewal:

A. The request is for weight loss or weight management
B. You are 12 years of age or older
C. You will NOT use Saxenda concurrently (at the same time) with another GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release])
D. If you are 12 to 17 years of age, approval also requires:
    1. You have achieved or maintained at least a 1% weight loss of baseline body mass index (BMI: a tool for evaluating body fat) after at least 12 weeks of treatment on your maximally tolerated dose
E. If you are 18 years of age or older, approval also requires:
    1. You meet ONE of the following before starting weight loss therapy:
        a. You have a body mass index (BMI: a tool for evaluating body fat) of at least 30 kg/m(2)
        b. You are Asian and have a body mass index (BMI: a tool for evaluating body fat) of at least 27.5 kg/m(2)
        c. You have a body mass index (BMI: a tool for evaluating body fat) of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], dyslipidemia [abnormal levels of fat], cardiovascular disease [condition of the heart or blood vessels], coronary artery disease [CAD: a type of heart condition], sleep apnea [a type of sleep condition with difficulty breathing], osteoarthritis [a type of joint condition] of the knee[s], polycystic ovarian syndrome [a hormonal disorder], non-alcoholic steatohepatitis/non-alcoholic fatty liver disease [a type of liver disease], asthma [a type of lung condition], and chronic obstructive pulmonary disease [COPD: a type of lung condition])
        d. You are Asian, have a body mass index (BMI: a tool for evaluating body fat) of at least 25 kg/m(2), AND have at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], dyslipidemia [abnormal levels of fat], cardiovascular disease [condition of the heart or blood vessels], coronary artery disease [CAD: a type of heart condition], sleep apnea [a type of sleep condition with difficulty breathing], osteoarthritis [a type of joint condition] of the knee[s], polycystic ovarian syndrome [a hormonal disorder], non-alcoholic steatohepatitis/non-alcoholic fatty liver disease [a type of liver disease], asthma [a type of lung condition], and chronic obstructive pulmonary disease [COPD: a type of lung condition])
    2. You have achieved or maintained at least a 5% weight loss of baseline body weight after 16 weeks of treatment

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #40mL per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of heart failure (ICD-10 Group I50) and meet **ALL** of the following criteria?
   - Qbrelis will be used as adjunct therapy
   - The patient has a contraindication to or is unable to swallow lisinopril tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #40mL per day.**
   If no, continue to #3.

3. Does the patient have a diagnosis of acute myocardial infarction (ICD-10 Group I21) **AND** meet the following criterion?
   - The patient has a contraindication to or is unable to swallow lisinopril tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #40mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

LISINOPRIL

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LISINOPRIL (Qbrelis)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Hypertension (high blood pressure)
   2. Heart failure (a type of heart condition)
   3. Acute myocardial infarction (heart attack)

B. If you have hypertension, approval also requires:
   1. You have a contraindication to (harmful for you to use) or are unable to swallow lisinopril tablets

C. If you have heart failure, approval also requires:
   1. Qbrelis will be used as adjunct (add-on) therapy
   2. You have a contraindication to (harmful for you to use) or are unable to swallow lisinopril tablets

D. If you have acute myocardial infarction, approval also requires:
   1. You have a contraindication to (harmful for you to use) or are unable to swallow lisinopril tablets

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Qbrelis.

LIXISENATIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LIXISENATIDE	ADLYXIN	40782		GPI-10 (2717005600)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of type 2 diabetes (ICD-10 Groups E08, E09, E11, E13) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist, cardiologist, nephrologist, family practice, internal medicine, or another healthcare provider who is specialized in diabetic management
   - The patient had a trial of metformin (IR/ER), a sulfonylurea (e.g., glipizide, glimepiride), pioglitazone, or a preferred combination product containing any of the above agents (e.g., glipizide-metformin, pioglitazone-metformin)
   - The patient had a trial of a preferred GLP-1 agonist (e.g., Byetta [exenatide], Bydureon [exenatide microspheres], Victoza [liraglutide])
   - Adlyxin will NOT be used concurrently with a DPP-4 inhibitor (e.g., Januvia [sitagliptin], Nesina [alogliptin], Onglyza [saxagliptin])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #6mL per 28 days.** If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LIXISENATIDE (Adlyxin)** requires the following rule(s) be met for approval:
   A. You have type 2 diabetes (a disorder with high blood sugar)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), cardiologist (a type of heart doctor), nephrologist (a type of kidney doctor), family practice, internal medicine, or another healthcare provider who specializes in diabetic management
   D. You have tried metformin (immediate-release/extended-release), a sulfonylurea (such as glipizide, glimepiride), pioglitazone, or a preferred combination product containing any of the above medications (such as glipizide-metformin, pioglitazone-metformin)
   E. You have tried a preferred GLP-1 agonist (such as Byetta [exenatide], Bydureon [exenatide microspheres], Victoza [liraglutide])

GUIDELINES FOR USE

1. Is the requested medication being used to mitigate opioid withdrawal symptoms to facilitate abrupt opioid discontinuation (ICD-10 Group F11) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is in a setting with close monitoring of treatment with Lucemyra (lofexidine) and has a treatment duration that does NOT exceed 18 days
   - Lucemyra will be administered as part of an opioid discontinuation plan that includes other withdrawal symptom management medications (e.g., stool softeners, sleep aids) and the implementation of psychosocial support to help prevent relapse

   If yes, **approve for 1 fill by HICL or GPI-10 with a quantity limit of #264 per 18 days.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline name **LOFEXIDINE (Lucemyra)** requires the following rule(s) be met for approval:
   A. Lucemyra will be used to reduce opioid withdrawal symptoms to help abrupt opioid discontinuation
   B. You are 18 years of age or older
   C. You are in a setting with close monitoring of Lucemyra (lofexidine) treatment and will be treated with Lucemyra (lofexidine) for a maximum of 18 days
   D. Lucemyra will be used as part of an opioid discontinuation plan that includes other withdrawal symptom management medications (such as stool softeners, sleep aids) and psychosocial support is in place to help prevent relapse

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LOMITAPIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LOMITAPIDE MESYLATE	JUXTAPID	39883		GPI-10 (3948005020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of homozygous familial hypercholesterolemia (HoFH) (ICD-10 E78.01) and meet **ONE** of the following criteria?
   - The patient has a Simon Broome diagnostic criteria (definite)
   - The patient has a Dutch Lipid Network criteria with a score of at least 8
   - The patient has a clinical diagnosis based on a history of an untreated LDL-cholesterol level greater than 500 mg/dL and either xanthoma before 10 years of age or evidence of heterozygous familial hypercholesterolemia (HeFH) in both parents

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a cardiologist, endocrinologist, or lipidologist
   - The patient has an LDL-cholesterol level of at least 70 mg/dL while on maximally tolerated drug treatment
   - The patient had a trial of or contraindication to the clinical standard of care agent: Zetia (ezetimibe)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient is currently taking a high-intensity statin (atorvastatin 40-80 mg daily, rosuvastatin 20-40 mg daily)
   - Given that the patient cannot tolerate a high-intensity statin (atorvastatin 40-80 mg daily, rosuvastatin 20-40 mg daily), the patient is currently taking a maximally tolerated dose of any statin

   If yes, continue to #4.
   If no, continue to #5.

LOMITAPIDE

INITIAL CRITERIA (CONTINUED)

4. Will the patient continue statin treatment as described above in combination with Juxtapid?

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Does the patient meet **ONE** of the following criteria?
   - The patient has an absolute contraindication to statin therapy (e.g., active decompensated liver disease, nursing female, pregnancy or plans to become pregnant, hypersensitivity reaction)
   - The patient has complete statin intolerance (defined by severe and intolerable adverse effects) (e.g., creatine kinase elevation at least 10 times the upper limit of normal, liver function test elevation at least 3 times the upper limit of normal, rhabdomyolysis, severe muscle weakness leading to temporary disability, fall, or inability to use a major muscle group) that have occurred with trials of at least TWO separate statins AND have improved with the discontinuation of each statin

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

6. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to the preferred agent: Repatha (evolocumab)
   - The patient lacks functioning LDL receptors

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **2mg: #1 per day.**
   - **5mg: #1 per day.**
   - **10mg: #1 per day.**
   - **20mg: #2 per day.**
   - **30mg: #2 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LOMITAPIDE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LOMITAPIDE (Juxtapid)** requires the following rule(s) be met for approval:

A. You have homozygous familial hypercholesterolemia (HoFH: type of inherited high cholesterol)
B. Your diagnosis is determined by meeting ONE of the following:
    1. You have Simon Broome diagnostic criteria (definite) (a tool for diagnosing homozygous familial hypercholesterolemia)
    2. You have a Dutch Lipid Network (a tool for diagnosing homozygous familial hypercholesterolemia) criteria with a score of at least 8
    3. You have a clinical diagnosis based on a history of an untreated low density lipoprotein - cholesterol (LDL-C: bad cholesterol) level greater than 500 mg/dL AND you have either xanthoma (a type of skin condition) before 10 years of age or there is evidence of heterozygous familial hypercholesterolemia (HeFH: type of inherited high cholesterol) in both parents
C. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor), endocrinologist (a type of hormone doctor), or lipidologist (a type of cholesterol doctor)
D. You have a low density lipoprotein cholesterol (LDL-C: bad cholesterol) level of at least 70 mg/dL while on maximally tolerated statin (medication used for cholesterol) treatment
E. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: Zetia (ezetimibe)
F. You meet ONE of the following:
    1. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Repatha (evolocumab)
    2. You do NOT have functional LDL (low-density lipoprotein) receptors
G. If you are statin tolerant, approval also requires:
    1. You meet ONE of the following:
        a. You are currently taking a high-intensity statin (atorvastatin 40-80 mg daily, rosuvastatin 20-40 mg daily)
        b. You did not tolerate a high-intensity statin (atorvastatin 40-80 mg daily, rosuvastatin 20-40 mg daily), but you are currently taking a maximally tolerated dose of any statin
    2. You will continue statin (medication used for cholesterol) treatment in combination with Juxtapid

(Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

LOMITAPIDE

INITIAL CRITERIA (CONTINUED)

H. If you are statin intolerant, approval also requires ONE of the following:

1. You have an absolute contraindication to (harmful for you to use) statin therapy (medication used for cholesterol) (such as active decompensated liver disease [symptoms related to liver damage], nursing [breastfeeding] female, pregnancy or plans to become pregnant, hypersensitivity [allergic] reaction)
2. You have complete statin (medication used for cholesterol) intolerance (defined by severe and intolerable adverse effects) that have occurred with trials of at least TWO separate statins, AND the adverse effects have improved when you stopped each statin. Some adverse effects include: creatine kinase (type of protein) elevation at least 10 times the upper limit of normal, liver function test elevation at least 3 times the upper limit of normal, rhabdomyolysis (severe muscle break down), severe muscle weakness leading to temporary disability, fall, or inability to use a major muscle group

LOMITAPIDE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of homozygous familial hypercholesterolemia (HoFH) (ICD-10 E78.01) **AND** meet the following criterion?
   - The patient's low-density lipoprotein-cholesterol (LDL-C) level has decreased while on Juxtapid

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has continued concurrent therapy with a maximally tolerated dose of ANY statin
   - The patient has an absolute contraindication to statin therapy
   - The patient has complete statin intolerance

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **2mg: #1 per day.**
   - **5mg: #1 per day.**
   - **10mg: #1 per day.**
   - **20mg: #2 per day.**
   - **30mg: #2 per day.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LOMITAPIDE (Juxtapid)** requires the following rule(s) be met for renewal:
   A. You have homozygous familial hypercholesterolemia (HoFH: type of inherited high cholesterol)
   B. Your low-density lipoprotein-cholesterol (LDL-C: bad cholesterol) level has decreased while on Juxtapid
   C. You meet ONE of the following:
      1. You have continued to take a maximally tolerated dose of ANY statin (medication used for cholesterol) along with Juxtapid
      2. You have an absolute contraindication to (harmful for you to use) statin (medication used for cholesterol) therapy
      3. You have complete statin (medication used for cholesterol) intolerance (severe and intolerable adverse effects)

LOMUSTINE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LOMUSTINE	GLEOSTINE, LOMUSTINE	03900		GPI-10 (2110202000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of Hodgkin's lymphoma (ICD-10 Group C81)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of primary and metastatic brain tumors (ICD-10 Group C71) and meet **ALL** of the following criteria?
   - The patient has previously received appropriate surgical and/or radiotherapeutic procedures
   - The requested medication will be used as a part of the PCV (procarbazine, lomustine, and vincristine) regimen

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LOMUSTINE (Gleostine)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Hodgkin's lymphoma (a type of blood cancer)
      2. Primary and metastatic brain tumors (cancer that has spread to other parts of the body)

   B. If you have primary and metastatic brain tumors, approval also requires:
      1. You have previously received appropriate surgical and/or radiotherapeutic procedures
      2. The requested medication will be used as a part of the PCV (procarbazine, lomustine, and vincristine) regimen

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LONAFARNIB	ZOKINVY	46991		GPI-10 (9946304500)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of Hutchinson-Gilford Progeria Syndrome (HGPS) (ICD-10 E34.8) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has a body surface area (BSA) of at least 0.39m(2)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of processing-deficient Progeroid Laminopathies and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient has a body surface area (BSA) of at least 0.39m(2)
   - The patient has a heterozygous LMNA mutation with progerin-like protein accumulation OR homozygous or compound heterozygous ZMPSTE24 mutations

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LONAFARNIB (Zokinvy)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Hutchinson-Gilford Progeria Syndrome (HGPS: a rare genetic disorder)
      2. Processing-deficient Progeroid Laminopathies (a rare genetic disorder)

   B. If you have Hutchinson-Gilford Progeria Syndrome, approval also requires:
      1. You are 1 year of age or older
      2. You have a body surface area (BSA) of at least 0.39 meters squared

   C. If you have processing-deficient Progeroid Laminopathies, approval also requires:
      1. You are 1 year of age or older
      2. You have a body surface area (BSA) of at least 0.39 meters squared
      3. You have a heterozygous LMNA mutation (abnormal change in a type of gene) with progerin-like protein accumulation, OR you have homozygous or compound heterozygous ZMPSTE24 mutations (abnormal changes in a type of gene)

   (Denial text continued on next page)

PRIOR AUTHORIZATION GUIDELINES

LONAPEGSOMATROPIN-TCGD

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LONAPEGSOMATROPIN-TCGD	SKYTROFA	47565		GPI-10 (3010000380)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes
   - Idiopathic short stature (ISS) (ICD-10 R62.52)

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.
   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 1 to 17 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand)
   - Skytrofa will NOT be used concurrently with Increlex (mecasermin)

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - The patient's height is at least 2 standard deviations (SD) below the mean height for children of the same age and gender
   - The patient has a height velocity that is less than the 25th percentile for age
   - The patient has a low peak growth hormone (less than 10 ng/mL) on TWO growth hormone stimulation tests, OR has an insulin-like growth factor 1 (IGF-1) that is at least 2 SD below the mean for the same age and gender

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **3mg, 3.6mg, 4.3mg, 5.2mg, 6.3mg, 13.3mg: #4 per 28 days.**
   - **7.6mg, 9.1mg, 11mg: #8 per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LONAPEGSOMATROPIN-TCGD

INITIAL CRITERIA (CONTINUED)

4. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 Group E34.3, E23.0), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - Skytrofa will NOT be used concurrently with Increlex (mecasermin)

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Is the patient's GHD caused by a congenital, genetic, or organic disease (e.g., craniopharyngioma [tumor], pituitary hypoplasia, ectopic posterior pituitary, previous cranial irradiation)?

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per 28 days.**
   If no, continue to #6.

6. Is the patient's GHD confirmed by **ONE** of the following growth hormone stimulation tests?
   - Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
   - Glucagon-stimulation test (peak response of 3 ng/mL or less AND the patient's BMI is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND the patient's BMI is greater than 30 kg/m2)
   - Macimorelin test (peak growth hormone of 2.8 ng/mL or less)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

LONAPEGSOMATROPIN-TCGD

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LONAPEGSOMATROPIN-TCGD (Skytrofa)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
   2. You are an adult patient with growth hormone deficiency (GHD: a type of hormone disorder with low growth hormone)

B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, approval also requires:
   1. You are 1 to 17 years of age
   2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   3. Your epiphyses (end part of long bone) are NOT closed, as confirmed by a radiograph (type of imaging test) of the wrist and hand
   4. You will NOT use Skytrofa concurrently (at the same time) with Increlex (mecasermin)
   5. You meet ONE of the following:
      a. Your height is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) height for children of the same age and gender
      b. Your height velocity is less than the 25th percentile for your age
      c. You have a low peak growth hormone level (less than 10 ng/mL) on TWO growth hormone stimulation tests, OR an insulin-like growth factor 1 (IGF-1) level that is at least 2 standard deviations (SD: a measure of variation from the average) below the mean (average) for your age and gender

(Initial denial text continued on next page)

LONAPEGSOMATROPIN-TCGD

INITIAL CRITERIA (CONTINUED)

C. If you are an adult patient with growth hormone deficiency, approval also requires:
1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
3. You meet ONE of the following:
   a. Your diagnosis is caused by a congenital (at birth), genetic, or organic disease (such as craniopharyngioma [tumor], pituitary hypoplasia [a type of brain condition], ectopic posterior pituitary [a type of brain condition], previous cranial irradiation [radiation to the brain])
   b. Your diagnosis is confirmed by ONE of the following growth hormone stimulation tests (tests that measure the body's ability to produce growth hormone):
      i. Insulin tolerance test (peak growth hormone of 5 ng/mL or less)
      ii. Glucagon-stimulation test (peak response of 3 ng/mL or less AND your body mass index [BMI: a tool for evaluating body fat] is less than 25 kg/m2; OR peak response of 3 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a high pre-test probability; OR peak response of 1 ng/mL or less AND your BMI is between 25 and 30 kg/m2 with a low test probability; OR peak response of 1 ng/mL or less AND your BMI is greater than 30 kg/m2)
      iii. Macimorelin test (peak growth hormone of 2.8 ng/mL or less)
4. You will NOT use Skytrofa concurrently (at the same time) with Increlex (mecasermin)

D. Request for Skytrofa will NOT be approved for athletic enhancement (to perform better in sports), anti-aging purposes, or idiopathic short stature (ISS: a type of growth condition)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LONAPEGSOMATROPIN-TCGD

RENEWAL CRITERIA

1. Is the requested medication being used for **ANY** of the following?
   - Athletic enhancement
   - Anti-aging purposes
   - Idiopathic short stature (ISS) (ICD-10 R62.52)

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.
   If no, continue to #2.

2. Is the request for a pediatric patient with a diagnosis of growth failure due to inadequate secretion of endogenous growth hormone (GH) (ICD-10 Group E34.3), and does the patient meet **ALL** of the following criteria?
   - The patient is 1 to 17 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's epiphyses are NOT closed (as confirmed by radiograph of the wrist and hand), OR the patient has not completed prepubertal growth
   - Skytrofa will NOT be used concurrently with Increlex (mecasermin)

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - The patient has an annual growth velocity of at least 2 cm compared with what was observed from the previous year
   - The patient is near the terminal phase of puberty and has an annual growth velocity of at least 1 cm compared with what was observed from the previous year

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **3mg, 3.6mg, 4.3mg, 5.2mg, 6.3mg, 13.3mg: #4 per 28 days.**
   - **7.6mg, 9.1mg, 11mg: #8 per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

LONAPEGSOMATROPIN-TCGD

RENEWAL CRITERIA (CONTINUED)

4. Is the request for an adult patient with a diagnosis of growth hormone deficiency (GHD) (ICD-10 Group E34.3, E23.0), and does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has achieved or maintained a response to therapy as evidenced by clinical treatment goals (e.g., improved body composition, lipid panel, bone health)
   - Skytrofa will NOT be used concurrently with Increlex (mecasermin)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per 28 days.** If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LONAPEGSOMATROPIN-TCGD (Skytrofa)** requires the following rule(s) be met for renewal:

   A. You meet ONE of the following:
      1. You are a pediatric patient with growth failure due to inadequate secretion (release) of endogenous (produced inside the body) growth hormone (GH)
      2. You are an adult patient with growth hormone deficiency (GHD: a type of hormone disorder with low growth hormone)

   B. If you are a pediatric patient with growth failure due to inadequate secretion of endogenous growth hormone, renewal also requires:
      1. You are 1 to 17 years of age
      2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
      3. Your epiphyses (end part of long bone) are NOT closed, as confirmed by a radiograph (type of imaging test) of the wrist and hand, OR you have not completed prepubertal growth
      4. You will NOT use Skytrofa concurrently (at the same time) with Increlex (mecasermin)
      5. You meet ONE of the following:
         a. Your annual growth velocity (rate of growth) is at least 2 cm compared with what was observed from the previous year
         b. Your annual growth velocity (rate of growth) is at least 1 cm compared with what was observed from the previous year if you are close to the terminal (final) phase of puberty

LORLATINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LORLATINIB	LORBRENA	45448		GPI-10 (2153055600)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumors are anaplastic lymphoma kinase (ALK)-positive, as detected by an FDA-approved test
   - The patient had a trial of or contraindication to ONE of the following first-line preferred agents: Alecensa (alectinib), Alunbrig (brigatinib)

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **25mg: #3 per day.**
   - **100mg: #1 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LORLATINIB (Lorbrena)** requires the following rule(s) be met for approval:
   A. You have metastatic non-small cell lung cancer (NSCLC: type of lung cancer that has spread to other parts of the body)
   B. You are 18 years of age or older
   C. Your tumors are anaplastic lymphoma kinase (ALK: a type of enzyme)-positive, as detected by a Food and Drug Administration (FDA)-approved test
   D. You have tried or have a contraindication to (harmful for you to use) ONE of the following first-line preferred medications: Alecensa (alectinib), Alunbrig (brigatinib)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LOSARTAN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LOSARTAN POTASSIUM	ARBLI	09829		GPI-10 (3615004020)	BRAND = ARBLI

GUIDELINES FOR USE

1. Does the patient have a diagnosis of hypertension (ICD-10 I10) **AND** meet the following criterion?
   - The patient has a contraindication to or is unable to swallow losartan tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #10mL per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of hypertension (ICD-10 I10) with left ventricular hypertrophy (ICD-10 I51.7) **AND** meet the following criterion?
   - The patient has a contraindication to or is unable to swallow losartan tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #10mL per day.**
   If no, continue to #3.

3. Does the patient have a diagnosis of type 2 diabetes with diabetic nephropathy (ICD-10 E11.21) and meet **ALL** of the following criteria?
   - The patient has a history of hypertension
   - The patient has an elevated serum creatinine level and proteinuria (urinary albumin to creatinine ratio of at least 300mg/g)
   - The patient has a contraindication to or is unable to swallow losartan tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #10mL per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

LOSARTAN

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LOSARTAN (Arbli)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Hypertension (high blood pressure)
   2. Hypertension with left ventricular hypertrophy (a type of heart condition)
   3. Type 2 diabetes (a disorder with high blood sugar) with diabetic nephropathy (a type of kidney disease caused by high blood sugar)

B. If you have hypertension, approval also requires:
   1. You have a contraindication to (harmful for you to use) or are unable to swallow losartan tablets

C. If you have hypertension with left ventricular hypertrophy, approval also requires:
   1. You have a contraindication to (harmful for you to use) or are unable to swallow losartan tablets

D. If you have type 2 diabetes with diabetic nephropathy, approval also requires:
   1. You have a history of hypertension (high blood pressure)
   2. You have an elevated serum creatinine (a type of lab test to measure kidney function) level and proteinuria (a condition with high levels of protein in the urine) (urinary albumin to creatinine ratio of at least 300mg/g)
   3. You have a contraindication to (harmful for you to use) or are unable to swallow losartan tablets

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LU-177 VIPIVOTIDE TETRAXETAN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LU-177 VIPIVOTIDE TETRAXETAN	PLUVICTO	47914		GPI-10 (2160004580)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic castration-resistant prostate cancer (mCRPC) (ICD-10 Z19.2 and C61) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is prostate-specific membrane antigen (PSMA)-positive
   - The patient has been treated with androgen receptor pathway inhibitor (ARPI) therapy (e.g., enzalutamide, abiraterone)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - It is appropriate to delay taxane-based chemotherapy (e.g., docetaxel, cabazitaxel)
   - The patient has received prior taxane-based chemotherapy (e.g., docetaxel, cabazitaxel)

   If yes, **approve for 12 months by HICL or GPI-10 for 6 fills.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LU-177 VIPIVOTIDE TETRAXETAN (Pluvicto)** requires the following rule(s) be met for approval:
   A. You have metastatic castration-resistant prostate cancer (mCRPC: a type of prostate cancer that has spread to other parts of the body and no longer responds to testosterone lowering treatment)
   B. You are 18 years of age or older
   C. Your cancer is prostate-specific membrane antigen (PSMA)-positive (a type of test)
   D. You have been treated with androgen receptor pathway inhibitor (ARPI) therapy (such as enzalutamide, abiraterone)
   E. You meet ONE of the following:
      1. It is appropriate to delay taxane-based chemotherapy (medications used to treat cancer such as docetaxel, cabazitaxel)
      2. You have received prior taxane-based chemotherapy

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LUMACAFTOR-IVACAFTOR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LUMACAFTOR/IVACAFTOR	ORKAMBI	42235		GPI-10 (4530990230)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or cystic fibrosis expert
   - Orkambi will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
   - The patient is homozygous for the F508del mutation in the CFTR gene

   If yes, **approve for 6 months by GPID or GPI-14 for all of the following:**
   - **75-94mg granule packets: #2 per day.**
   - **100-125mg granule packets: #2 per day.**
   - **150-188mg granule packets: #2 per day.**
   - **100-125mg tablets: #4 per day.**
   - **200-125mg tablets: #4 per day.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LUMACAFTOR-IVACAFTOR (Orkambi)** requires the following rule(s) be met for approval:
   A. You have cystic fibrosis (CF: a type of lung disorder)
   B. You are 1 year of age or older
   C. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or cystic fibrosis expert
   D. You will NOT use Orkambi concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)
   E. You are homozygous (have two copies of the same gene) for the F508del mutation (abnormal change) in the CFTR gene

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

LUMACAFTOR-IVACAFTOR

RENEWAL CRITERIA

1. Does the patient have a diagnosis of cystic fibrosis (CF) (ICD-10 Group E84) and meet **ALL** of the following criteria?
   - The patient has experienced an improvement in clinical status
   - Orkambi will NOT be used concurrently with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (e.g., medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)

   If yes, **approve for lifetime by GPID or GPI-14 for all of the following:**
   - **75-94mg granule packets: #2 per day.**
   - **100-125mg granule packets: #2 per day.**
   - **150-188mg granule packets: #2 per day.**
   - **100-125mg tablets: #4 per day.**
   - **200-125mg tablets: #4 per day.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LUMACAFTOR-IVACAFTOR (Orkambi)** requires the following rule(s) be met for renewal:
   A. You have cystic fibrosis (CF: a type of lung disorder)
   B. You have experienced an improvement in your clinical status
   C. You will NOT use Orkambi concurrently (at the same time) with another cystic fibrosis transmembrane conductance regulator (CFTR) modulator (such as medications containing vanzacaftor, deutivacaftor, ivacaftor, lumacaftor, tezacaftor, or elexacaftor)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Orkambi.

LURBINECTEDIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LURBINECTEDIN	ZEPZELCA	46626		GPI-10 (2110002400)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of small cell lung cancer (SCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient have extensive-stage small cell lung cancer (ES-SCLC) and meet **ALL** of the following criteria?
   - Zepzelca will be used in combination with Tecentriq (atezolizumab) or Tecentriq Hybreza (atezolizumab and hyaluronidase-tqjs)
   - The patient's disease has not progressed after first-line induction therapy with Tecentriq (atezolizumab) or Tecentriq Hybreza (atezolizumab and hyaluronidase-tqjs), carboplatin, and etoposide

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Is the patient's cancer metastatic **AND** the patient meets the following criterion?
   - The patient had disease progression on or after platinum-based chemotherapy (e.g. carboplatin, cisplatin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

LURBINECTEDIN

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **LURBINECTEDIN (Zepzelca)** requires the following rule(s) be met for approval:

A. You have small cell lung cancer (SCLC: a type of lung cancer)
B. You are 18 years of age or older
C. You meet ONE of the following:
   1. You have extensive-stage small cell lung cancer (ES-SCLC: a type of lung cancer); Zepzelca will be used in combination with Tecentriq (atezolizumab) or Tecentriq Hybreza (atezolizumab and hyaluronidase-tqjs); AND your disease has not progressed (worsened) after first-line induction therapy (start of treatment) with Tecentriq (atezolizumab) or Tecentriq Hybreza (atezolizumab and hyaluronidase-tqjs), carboplatin, and etoposide
   2. Your cancer is metastatic (has spread to other parts of the body); AND you had disease progression (worsening) on or after platinum-based chemotherapy (a type of cancer treatment such as carboplatin or cisplatin)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

PRIOR AUTHORIZATION GUIDELINES

LUSPATERCEPT-AAMT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LUSPATERCEPT-AAMT	REBLOZYL	46196		GPI-10 (8240054010)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of beta thalassemia (ICD-10 D56.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient requires regular red blood cell (RBC) transfusions
   - Reblozyl will be used for the treatment of anemia

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of very low- to intermediate-risk myelodysplastic syndrome (MDS) (ICD-10 Group D46) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is erythropoiesis stimulating agent (ESA)-naïve (has not previously used an ESA such as Epogen [epoetin alfa])
   - Reblozyl will be used for the treatment of anemia

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have **ONE** of the following diagnoses?
   - Very low- to intermediate-risk myelodysplastic syndrome with ring sideroblasts (MDS-RS) (ICD-10 D46.B, D46.1)
   - Myelodysplastic/myeloproliferative neoplasm with ring sideroblasts and thrombocytosis (MDS/MPN-RS-T) (ICD-10 D46.B and D46.1 and D47.1 and Group D75.83)

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is failing an erythropoiesis stimulating agent (ESA) (e.g., Epogen [epoetin alfa]) AND requires at least 2 red blood cell (RBC) units over 8 weeks
   - Reblozyl will be used for the treatment of anemia

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

LUSPATERCEPT-AAMT

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

Our guideline named **LUSPATERCEPT-AAMT (Reblozyl)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Beta thalassemia (a type of blood condition)
   2. Very low- to intermediate-risk myelodysplastic syndrome (MDS: a type of blood cancer)
   3. Very low- to intermediate-risk myelodysplastic syndrome with ring sideroblasts (MDS-RS: a type of blood cancer)
   4. Myelodysplastic/myeloproliferative neoplasm with ring sideroblasts and thrombocytosis (MDS/MPN-RS-T: a type of blood cancer)

B. If you have beta thalassemia, approval also requires:
   1. You are 18 years of age or older
   2. You require regular red blood cell (RBC) transfusions (adding blood to your body)
   3. Reblozyl will be used for the treatment of anemia (a type of blood condition)

C. If you have very low- to intermediate-risk myelodysplastic syndrome, approval also requires:
   1. You are 18 years of age or older
   2. You are erythropoiesis stimulating agent (ESA)-naïve (you have not previously used a type of medication that increases the production of red blood cells such as Epogen [epoetin alfa])
   3. Reblozyl will be used for the treatment of anemia (a type of blood condition)

D. If you have very low- to intermediate-risk myelodysplastic syndrome with ring sideroblasts OR with myelodysplastic/myeloproliferative neoplasm with ring sideroblasts and thrombocytosis, approval also requires:
   1. You are 18 years of age or older
   2. You are failing an erythropoiesis stimulating agent (ESA: a type of medication that increases the production of red blood cells, such as Epogen [epoetin alfa])
   3. You require at least 2 red blood cell (RBC) units over 8 weeks
   4. Reblozyl will be used for the treatment of anemia (a type of blood condition)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Reblozyl.

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
LUSUTROMBOPAG	MULPLETA	45127		GPI-10 (8240504500)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of thrombocytopenia (ICD-10 D69.6) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has chronic liver disease
   - The patient is scheduled to undergo a procedure 8 to 14 days after starting Mulpleta (lusutrombopag) therapy
   - Therapy is prescribed by or in consultation with a hematologist, gastroenterologist, hepatologist, immunologist, endocrinologist, or surgeon
   - The patient has a platelet count of less than 50x10^9 cells/L measured within the last 30 days
   - Mulpleta will NOT be used concurrently with other thrombopoietin receptor agonists [TPO-RAs] (e.g., Doptelet [avatrombopag], Nplate [romiplostim], Promacta [eltrombopag])

   If yes, **approve for 1 fill by HICL or GPI-10 with a quantity limit of #7 tablets.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **LUSUTROMBOPAG (Mulpleta)** requires the following rule(s) be met for approval:
   A. You have thrombocytopenia (a type of blood disorder)
   B. You are 18 years of age or older
   C. You have chronic (long-term) liver disease
   D. You are scheduled to undergo a procedure 8 to 14 days after starting Mulpleta (lusutrombopag) therapy
   E. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor), gastroenterologist (a type of doctor who treats digestive conditions), hepatologist (a type of liver doctor), immunologist (a type of immune system doctor), endocrinologist (a type of hormone doctor), or surgeon
   F. You have a platelet count of less than 50x10^9 cells/L measured within the last 30 days
   G. You will NOT use Mulpleta concurrently (at the same time) with other thrombopoietin receptor agonists [TPO-RAs] (such as Doptelet [avatrombopag], Nplate [romiplostim], Promacta [eltrombopag])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MARALIXIBAT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MARALIXIBAT CHLORIDE	LIVMARLI	47604		GPI-10 (5235005010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cholestatic pruritus (ICD-10 L29.81)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's cholestatic pruritus associated with Alagille syndrome (ALGS) (ICD-10 Q44.71) and the patient meets **ALL** of the following criteria?
   - The patient is 3 months of age or older
   - Therapy is prescribed by or in consultation with a hepatologist, gastroenterologist, or physician who specializes in ALGS cholestasis
   - Livmarli will NOT be used concurrently with another IBAT inhibitor (e.g., Bylvay [odevixibat])

   If yes, **approve all strengths and formulations for 6 months by GPID or GPI-14 as follows:**
   - **9.5mg/mL oral solution: #3mL per day.**
   - **10mg, 15mg, 20mg, 30mg tablet: #1 per day.**

   If no, continue to #3.

3. Is the patient's cholestatic pruritus associated with progressive familial intrahepatic cholestasis (PFIC) and the patient meets **ALL** of the following criteria?
   - The patient is 12 months of age or older
   - Therapy is prescribed by or in consultation with a hepatologist, gastroenterologist, or physician who specializes in PFIC cholestasis
   - Livmarli will NOT be used concurrently with another IBAT inhibitor (e.g., Bylvay [odevixibat])

   If yes, **approve all strengths and formulations for 6 months by GPID or GPI-14 as follows:**
   - **19mg/mL oral solution: #2mL per day.**
   - **10mg, 15mg, 20mg tablet: #2 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

CONTINUED ON NEXT PAGE

Copyright © 2025 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MARALIXIBAT (Livmarli)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Cholestatic pruritus (itching caused by liver disease) associated with Alagille syndrome (ALGS: a type of genetic disorder)
   2. Cholestatic pruritus (itching caused by liver disease) associated with progressive familial intrahepatic cholestasis (PFIC: a type of genetic disorder)

B. If you have cholestatic pruritus associated with Alagille syndrome, approval also requires:
   1. You are 3 months of age or older
   2. Therapy is prescribed by or in consultation with a hepatologist (a type of liver doctor), gastroenterologist (a doctor who treats digestive conditions), or physician (doctor) who specializes in ALGS cholestasis
   3. You will NOT use Livmarli concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Bylvay [odevixibat])

C. If you have cholestatic pruritus associated with progressive familial intrahepatic cholestasis, approval also requires:
   1. You are 12 months of age or older
   2. Therapy is prescribed by or in consultation with a hepatologist (a type of liver doctor), gastroenterologist (a doctor who treats digestive conditions), or physician (doctor) who specializes in PFIC cholestasis
   3. You will NOT use Livmarli concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Bylvay [odevixibat])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MARALIXIBAT

RENEWAL CRITERIA

1. Does the patient have a diagnosis of cholestatic pruritus (ICD-10 L29.81)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient's cholestatic pruritus associated with Alagille syndrome (ALGS) (ICD-10 Q44.71) and the patient meets **ALL** of the following criteria?
   - The patient has shown a clinical response to therapy, defined as improvement in pruritus symptoms AND a reduction of serum bile acid from baseline
   - Livmarli will NOT be used concurrently with another IBAT inhibitor (e.g., Bylvay [odevixibat])

   If yes, **approve the requested formulation for 12 months by GPID or GPI-14 as follows:**
   - **9.5mg/mL oral solution: #3mL per day.**
   - **10mg, 15mg, 20mg, 30mg tablet: Approve all strengths with a quantity limit of #1 per day.**

   If no, continue to #3.

3. Is the patient's cholestatic pruritus associated with progressive familial intrahepatic cholestasis (PFIC) and the patient meets **ALL** of the following criteria?
   - The patient has shown a clinical response to therapy, defined as improvement in pruritus symptoms AND a reduction of serum bile acid from baseline
   - The patient does NOT have PFIC type 2 with specific ABCB11 variants that would result in nonfunctional, or the complete absence of, bile salt export pump (BSEP) protein
   - Livmarli will NOT be used concurrently with another IBAT inhibitor (e.g., Bylvay [odevixibat])

   If yes, **approve the requested formulation for 12 months by GPID or GPI-14 as follows:**
   - **19mg/mL oral solution: #2mL per day.**
   - **10mg, 15mg, 20mg tablet: Approve all strengths with a quantity limit of #2 per day.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MARALIXIBAT (Livmarli)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Cholestatic pruritus (itching caused by liver disease) associated with Alagille syndrome (ALGS: a type of genetic disorder)
   2. Cholestatic pruritus (itching caused by liver disease) associated with progressive familial intrahepatic cholestasis (PFIC: a type of genetic disorder)

B. If you have cholestatic pruritus associated with Alagille syndrome, renewal also requires:
   1. You have shown a clinical response to therapy, defined as improvement in pruritus (itching) symptoms AND a reduction of serum bile acid (a type of blood test) from baseline (before starting Livmarli)
   2. You will NOT use Livmarli concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Bylvay [odevixibat])

C. If you have cholestatic pruritus associated with progressive familial intrahepatic cholestasis, renewal also requires:
   1. You have shown a clinical response to therapy, defined as improvement in pruritus (itching) symptoms AND a reduction of serum bile acid (a type of blood test) from baseline (before starting Livmarli)
   2. You do NOT have PFIC type 2 with specific ABCB11 variants (a type of abnormal gene) that would result in nonfunctional (does not work), or the complete absence of, bile salt export pump (BSEP: a type of protein)
   3. You will NOT use Livmarli concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Bylvay [odevixibat])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

MARGETUXIMAB-CMKB (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MARGETUXIMAB-CMKB	MARGENZA	47037		GPI-10 (2117003420)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic HER2-positive breast cancer and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Margenza will be used in combination with chemotherapy (e.g., Xeloda, Halaven, gemcitabine, Navelbine)
   - The patient has received two or more prior anti-HER2 regimens (e.g., Herceptin, Perjeta), at least one of which was for metastatic disease

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 fill per 21 days.** If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MARGETUXIMAB-CMKB (Margenza)** requires the following rule(s) be met for approval:
   A. You have metastatic (cancer has spread to other parts of the body) HER2 (human epidermal growth factor receptor 2: type of protein found in breast cancer)-positive breast cancer
   B. You are 18 years of age or older
   C. Margenza will be used in combination with chemotherapy (such as Xeloda, Halaven, gemcitabine, Navelbine)
   D. You have received two or more prior anti-HER2 regimens (such as Herceptin, Perjeta), at least one of which was for metastatic disease

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MARIBAVIR

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MARIBAVIR	LIVTENCITY	47687		GPI-10 (1220005000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of a post-transplant cytomegalovirus (CMV) infection (ICD-10 Group B25) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The infection is refractory to prior therapy with ganciclovir, valganciclovir, cidofovir or foscarnet
   - Therapy is prescribed by or in consultation with a transplant specialist or infectious disease specialist

   If yes, **approve for 8 weeks by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MARIBAVIR (Livtencity)** requires the following rule(s) be met for approval:
   A. You have a post-transplant cytomegalovirus (CMV) infection (a type of viral infection)
   B. You are 12 years of age or older
   C. Your infection is refractory (has not responded) to prior therapy with ganciclovir, valganciclovir, cidofovir or foscarnet
   D. Therapy is prescribed by or in consultation with a transplant specialist or infectious disease specialist (a doctor who specializes in the treatment of infections)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MARSTACIMAB-HNCQ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MARSTACIMAB-HNCQ	HYMPAVZI	49937		GPI-10 (8510505020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hemophilia A (congenital factor VIII deficiency) (ICD-10 Z14.0) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - Hympavzi will be used for routine prophylaxis to prevent or reduce the frequency of bleeding episodes
   - Hympavzi will NOT be used concurrently with another non-factor prophylaxis therapy (e.g., Hemlibra [emicizumab-kxwh])

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **150mg/mL: #8mL per 28 days.**
   - **75mg/0.5 mL: #2.5mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of hemophilia B (congenital factor IX deficiency) (ICD-10 D67) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - Hympavzi will be used for routine prophylaxis to prevent or reduce the frequency of bleeding episodes
   - Hympavzi will NOT be used concurrently with another non-factor prophylaxis therapy (e.g., Hemlibra [emicizumab-kxwh])

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **150mg/mL: #8mL per 28 days.**
   - **75mg/0.5mL: #2.5mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

MARSTACIMAB-HNCQ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hemophilia A (congenital factor VIII deficiency) (ICD-10 Z14.0) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline
   - Hympavzi will NOT be used concurrently with another non-factor prophylaxis therapy (e.g., Hemlibra [emicizumab-kxwh])

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **150mg/mL: #8mL per 28 days.**
   - **75mg/0.5 mL: #2.5mL per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of hemophilia B (congenital factor IX deficiency) (ICD-10 D67) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline
   - Hympavzi will NOT be used concurrently with another non-factor prophylaxis therapy (e.g., Hemlibra [emicizumab-kxwh])

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following:**
   - **150mg/mL: #8mL per 28 days.**
   - **75mg/0.5 mL: #2.5mL per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MARSTACIMAB-HNCQ (Hympavzi)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Hemophilia A (congenital factor VIII deficiency: a type of bleeding disorder)
      2. Hemophilia B (congenital factor IX deficiency: a type of bleeding disorder)

   B. If you have hemophilia A (congenital factor VIII deficiency), renewal also requires:
      1. You have shown a clinical benefit compared to baseline (before starting Hympavzi)
      2. You will NOT use Hympavzi concurrently (at the same time) with another non-factor prophylaxis therapy (such as Hemlibra [emicizumab-kxwh])

   C. If you have hemophilia B (congenital factor IX deficiency), renewal also requires:
      1. You have shown a clinical benefit compared to baseline (before starting Hympavzi)
      2. You will NOT use Hympavzi concurrently (at the same time) with another non-factor prophylaxis therapy (such as Hemlibra [emicizumab-kxwh])

MAVACAMTEN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MAVACAMTEN	CAMZYOS	47972		GPI-10 (4019005000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of symptomatic obstructive hypertrophic cardiomyopathy (HCM) (ICD-10 I42.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a cardiologist
   - The patient has New York Heart Association (NYHA) functional class II or III
   - The patient has a peak left ventricular outflow tract (LVOT) gradient of at least 50 mmHg at rest or with provocation
   - Camzyos will NOT be used concurrently with another myosin inhibitor (e.g., Myqorzo [aficamten]) for the treatment of hypertrophic cardiomyopathy
   - The patient had a trial of or contraindication to ONE of the following clinical standard of care agents: a beta-blocker (e.g., metoprolol, carvedilol), a non-dihydropyridine calcium channel blocker (e.g., verapamil, diltiazem)

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

MAVACAMTEN

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MAVACAMTEN (Camzyos)** requires the following rule(s) be met for approval:

A. You have symptomatic obstructive hypertrophic cardiomyopathy (HCM: a type of heart condition)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor)
D. You have New York Heart Association (NYHA) functional class II or III (a way to classify the severity of symptoms)
E. You have a peak left ventricular outflow tract (LVOT) gradient (evaluates the severity of disease) of at least 50 mmHg at rest or with provocation (a type of technique to evaluate how the heart performs under stress)
F. You will NOT use Camzyos concurrently (at the same time) with another myosin inhibitor (such as Myqorzo [aficamten]) for the treatment of hypertrophic cardiomyopathy (a type of heart condition)
G. You have tried or have a contraindication to (harmful for you to use) ONE of the following clinical standard of care medications: a beta-blocker (such as metoprolol, carvedilol), a non-dihydropyridine calcium channel blocker (such as verapamil, diltiazem)

MEBENDAZOLE	EMVERM		43181	GPI-14 (15000010000505)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of *Enterobius vermicularis* (pinworm) infection (ICD-10 B80) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient had a trial of or contraindication to pyrantel pamoate (OTC)

   If yes, **approve for 1 month by GPID or GPI-14 with a quantity limit of #2**.
   If no, continue to #2.

2. Does the patient have a diagnosis of *Trichuris trichiura* (whipworm) (ICD-10 B79) or *Ascaris lumbricoides* (roundworm) (ICD-10 Group B77) infection and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient had a trial of or contraindication to albendazole (Albenza)

   If yes, **approve for 1 month by GPID or GPI-14 with a quantity limit of #6**.
   If no, continue to #3.

3. Does the patient have a diagnosis of *Ancylostoma duodenale* (hookworm) (ICD-10 B76.0) or *Necator americanus* (hookworm) (ICD-10 B76.1) infection and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient had a trial of or contraindication to albendazole (Albenza) or pyrantel pamoate (OTC)

   If yes, **approve for 1 month by GPID or GPI-14 with a quantity limit of #6.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

MEBENDAZOLE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MEBENDAZOLE (Emverm)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. *Enterobius vermicularis* (pinworm) infection
   2. *Trichuris trichiura* (whipworm) infection
   3. *Ascaris lumbricoides* (roundworm) infection
   4. *Ancylostoma duodenale* (hookworm) infection
   5. *Necator americanus* (hookworm) infection

B. If you have *Enterobius vermicularis* (pinworm) infection, approval also requires:
   1. You are 2 years of age or older
   2. You have tried or have a contraindication to (harmful for you to use) over-the-counter (OTC) pyrantel pamoate

C. If you have Trichuris trichiura (whipworm) or Ascaris lumbricoides (roundworm) infection, approval also requires:
   1. You are 2 years of age or older
   2. You have tried or have a contraindication to (harmful for you to use) albendazole (Albenza)

D. If you have Ancylostoma duodenale (hookworm) or Necator americanus (hookworm) infection, approval also requires:
   1. You are 2 years of age or older
   2. You have tried or have a contraindication to (harmful for you to use) albendazole (Albenza) OR over-the-counter (OTC) pyrantel pamoate

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Emverm.

MECAMYLAMINE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MECAMYLAMINE HCL	VECAMYL		1471	GPI-10 (3660002010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderately severe to severe essential (primary) hypertension (ICD-10 I10) or uncomplicated malignant hypertension (ICD-10 I10) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a cardiologist, nephrologist, or endocrinologist
   - The patient's blood pressure is NOT controlled on at least three anti-hypertensive agents from different pharmacologic classes (e.g., an angiotensin receptor blocker [e.g., valsartan], a calcium channel blocker [e.g., amlodipine], a diuretic [e.g., hydrochlorothiazide]) at a maximally tolerated dose for at least 4 weeks
   - The patient does NOT have resistant hypertension due to white coat effect, medical inertia, poor therapeutic adherence, or secondary causes of hypertension (except sleep apnea)
   - Vecamyl will be used concurrently with at least three other anti-hypertensive agents (e.g., valsartan, amlodipine, hydrochlorothiazide) at maximally tolerated doses
   - The patient had a trial of or contraindication to BOTH clinical standard of care agents: a potent diuretic (clorthalidone or indapamide) AND a mineralocorticoid receptor antagonist (spironolactone or eplerenone)

     If yes, **approve for 2 months by GPID or GPI-10.**
     If no, do not approve.
     DENIAL TEXT: See the denial text at the end of the guideline.

MECAMYLAMINE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MECAMYLAMINE (Vecamyl)** requires the following rule(s) be met for approval:

A. You have moderately severe to severe essential (primary) hypertension (high blood pressure) or uncomplicated malignant hypertension (severe high blood pressure)
B. Therapy is prescribed by or in consultation with a cardiologist (a type of heart doctor), nephrologist (a type of kidney doctor), or endocrinologist (a type of hormone doctor)
C. Your blood pressure is NOT controlled on at least three anti-hypertensive medications (medications used to treat high blood pressure) with different mechanisms of action (such as an angiotensin receptor blocker [such as valsartan], a calcium channel blocker [such as amlodipine], a diuretic [such as hydrochlorothiazide]) at a maximally tolerated dose for at least 4 weeks
D. You do NOT have resistant hypertension (a type of high blood pressure) due to white coat effect (a condition where blood pressure is higher in a medical setting), medical inertia (when healthcare providers do not make changes to treatment even if the medical condition is poorly controlled), poor therapeutic adherence (not keeping up with therapy), or secondary causes of hypertension (high blood pressure that is caused by another medical condition) (except sleep apnea [a type of sleep condition with difficulty breathing])
E. You will use Vecamyl concurrently (at the same time) with at least three other anti-hypertensive medications (medications used to treat high blood pressure such as valsartan, amlodipine, hydrochlorothiazide) at maximally tolerated doses
F. You have tried or have a contraindication to (harmful for you to use) BOTH clinical standard of care medications: a potent diuretic (chlorthalidone or indapamide) AND a mineralocorticoid receptor antagonist (spironolactone or eplerenone)

MECAMYLAMINE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderately severe to severe essential (primary) hypertension (ICD-10 I10) or uncomplicated malignant hypertension (ICD-10 I10) and meet **ALL** of the following criteria?
   - The patient continues to benefit from Vecamyl
   - Vecamyl will be used concurrently with at least three other anti-hypertensive agents (e.g., valsartan, amlodipine, hydrochlorothiazide) at maximally tolerated doses

   If yes, **approve for 12 months by GPID or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MECAMYLAMINE (Vecamyl)** requires the following rule(s) be met for renewal:
   A. You have moderately severe to severe essential (primary) hypertension (high blood pressure) or uncomplicated malignant hypertension (severe high blood pressure)
   B. You continue to benefit from Vecamyl
   C. You will use Vecamyl concurrently (at the same time) with at least three other anti-hypertensive medications (medications used to treat high blood pressure such as valsartan, amlodipine, hydrochlorothiazide) at maximally tolerated doses

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Vecamyl.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

MECASERMIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MECASERMIN	INCRELEX	33207		GPI-10 (3016004500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have **ONE** of the following diagnoses?
   - Severe primary IGF-1 deficiency (ICD-10 E34.321)
   - Growth hormone (GH) gene deletion (not growth hormone-deficient short stature) **AND** have neutralizing antibodies to GH

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ALL** of the following criteria?
   - The patient is 2 years to less than 18 years of age
   - Therapy is prescribed by or in consultation with an endocrinologist or a nephrologist
   - The patient has a height standard deviation score of less than or equal to -3.0
   - The patient has a basal IGF-1 standard deviation score of less than or equal to -3.0
   - The patient has normal or elevated growth hormone (GH) (serum growth hormone level of at least 10ngm/mL to at least 2 stimuli [insulin, levodopa, arginine, clonidine, or glucagon])
   - The patient's epiphyses (bone growth plates) are open (as confirmed by radiograph of the wrist and hand)
   - Increlex will NOT be used concurrently with another growth hormone medication (somatropin [Genotropin, Humatrope, Norditropin, Nutropin AQ, Omnitrope, Saizen, Serostim, Zomacton], Ngenla [somatrogon-ghla], Sogroya [somapacitan-beco], Skytrofa [lonapegsomatropin-tcgd])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline**.**

MECASERMIN

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MECASERMIN (Increlex)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Severe primary insulin-like growth factor 1 deficiency (IGF-1: hormone levels that promote normal bone and tissue growth and development are extremely low or undetectable in the blood)
   2. Growth hormone gene deletion (not growth hormone-deficient short stature) with neutralizing antibodies to growth hormone

B. You are 2 years to less than 18 years of age

C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor) or nephrologist (a type of kidney doctor)

D. You have a height standard deviation score of less than or equal to -3.0

E. You have a basal IGF-1 (insulin-like growth factor 1) standard deviation score of less than or equal to -3.0

F. You have normal or elevated growth hormone (serum growth hormone level of at least 10ngm/mL to at least 2 stimuli [insulin, levodopa, arginine, clonidine or glucagon])

G. Your bone growth plates (epiphyses) are open (as confirmed by radiograph [a type of imaging] of the wrist and hand)

H. You will NOT use Increlex concurrently (at the same time) with another growth hormone medication (somatropin [Genotropin, Humatrope, Norditropin, Nutropin AQ, Omnitrope, Saizen, Serostim, Zomacton], Ngenla [somatrogon-ghla], Sogroya [somapacitan-beco], Skytrofa [lonapegsomatropin-tcgd])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MECASERMIN

RENEWAL CRITERIA

1. Will Increlex be used concurrently with another growth hormone medication (somatropin [Genotropin, Humatrope, Norditropin, Nutropin AQ, Omnitrope, Saizen, Serostim, Zomacton], Ngenla [somatrogon-ghla], Sogroya [somapacitan-beco], Skytrofa [lonapegsomatropin-tcgd])?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has an annual growth velocity of at least 2 cm compared with what was observed from the previous year
   - The patient is near the terminal phase of puberty and has an annual growth velocity of at least 1 cm compared with what was observed from the previous year

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MECASERMIN (Increlex)** requires the following rule(s) be met for renewal:
   A. You will NOT use Increlex concurrently (at the same time) with another growth hormone medication (somatropin [Genotropin, Humatrope, Norditropin, Nutropin AQ, Omnitrope, Saizen, Serostim, Zomacton], Ngenla [somatrogon-ghla], Sogroya [somapacitan-beco], Skytrofa [lonapegsomatropin-tcgd])
   B. You meet ONE of the following:
      1. Your annual growth velocity is at least 2 cm compared with what was observed from the previous year
      2. Your annual growth velocity is at least 1 cm compared with what was observed from the previous year if you are near the terminal (end) phase of puberty

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MEPOLIZUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MEPOLIZUMAB	NUCALA	42775		GPI-10 (4460405500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in pulmonary or allergy medicine
   - The patient has a blood eosinophil level of at least 150 cells/mcL within the past 12 months
   - Nucala will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline, or an oral corticosteroid [e.g., prednisone])
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced at least ONE asthma exacerbation requiring systemic corticosteroid burst lasting at least 3 days within the past 12 months
   - The patient has experienced at least ONE serious asthma exacerbation requiring hospitalization or an emergency room visit within the past 12 months

   If yes, **approve all formulations of the requested strength for 4 months by GPID or GPI-14 as follows:**
   - **100mg: #1 per 28 days.**
   - **40mg/0.4mL: #0.4mL per 28 days.**

   If no, continue to #3.

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

MEPOLIZUMAB

INITIAL CRITERIA (CONTINUED)

3. Does the patient have poor symptom control despite current therapy as evidenced by at least **THREE** of the following within the past 4 weeks?
   - Daytime asthma symptoms more than twice per week
   - Any night waking due to asthma
   - Use of a short-acting inhaled beta2-agonist (SABA) reliever (e.g., albuterol) for symptoms more than twice per week
   - Any activity limitation due to asthma

   If yes, **approve all formulations of the requested strength for 4 months by GPID or GPI-14 as follows:**
   - **100mg: #1 per 28 days.**
   - **40mg/0.4mL: #0.4mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an otolaryngologist, allergist, or immunologist
   - There is evidence of nasal polyps by direct examination, endoscopy, or sinus CT scan
   - The patient has inadequately controlled disease
   - The patient had a 56-day trial of ONE clinical standard of care agent: an intranasal corticosteroid (e.g., mometasone nasal spray)
   - Nucala will be used as add-on maintenance treatment
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve all formulations of the 100mg strength for 6 months by GPID or GPI-14 with a quantity limit of #1 per 28 days.**

   If no, continue to #5.

CONTINUED ON NEXT PAGE

MEPOLIZUMAB

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of eosinophilic granulomatosis with polyangiitis (EGPA) (ICD-10 M30.1), also known as Churg-Strauss syndrome, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Fasenra [benralizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of EGPA

   If yes, **approve all formulations of the 100mg strength for 12 months by GPID or GPI-14 with a quantity limit of #3 per 28 days.**

   If no, continue to #6.

6. Does the patient have a diagnosis of hypereosinophilic syndrome (HES) (ICD-10 Group D72.11) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient has had HES for at least 6 months without an identifiable non-hematologic secondary cause
   - Therapy is prescribed by or in consultation with an allergist, immunologist, hematologist, or pulmonologist
   - The patient has a blood eosinophil count of at least 1000 cell/mcL at initiation of therapy
   - The patient has a negative FIP1L1-PDGFRA test
   - The patient has been stable on HES therapy (corticosteroid [e.g., prednisone]) for at least 4 weeks
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Fasenra [benralizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HES

   If yes, **approve all formulations of the 100mg strength for 8 months by GPID or GPI-14 with a quantity limit of #3 per 28 days.**

   If no, continue to #7.

CONTINUED ON NEXT PAGE

MEPOLIZUMAB

INITIAL CRITERIA (CONTINUED)

7. Does the patient have a diagnosis of chronic obstructive pulmonary disease (COPD) (ICD-10 Group J44 except for ICD-10 J44.0 and J44.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has an eosinophilic phenotype of COPD
   - Therapy is prescribed by or in consultation with a pulmonologist
   - The patient has an elevated blood eosinophil count of at least 150 cell/mcL at screening (within the past 3 months) OR at least 300 cells/mcL in the previous 12 months
   - Nucala will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (e.g., Trelegy Ellipta, Breztri Aerosphere)
   - Nucala will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype COPD

   If yes, **approve all formulations of the 100mg strength for 4 months by GPID or GPI-14 with a quantity limit of #1 per 28 days.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MEPOLIZUMAB (Nucala)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Severe asthma with an eosinophilic phenotype (a type of lung condition with inflammation)
      2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus passages with small growths in the nose)
      3. Eosinophilic granulomatosis with polyangiitis (EGPA), also known as Churg-Strauss syndrome (a type of immune system disorder with inflammation of blood vessels)
      4. Hypereosinophilic syndrome (HES: a type of blood disorder)
      5. Chronic obstructive pulmonary disease (COPD: a type of long-term lung condition)

   (Initial denial text continued on next page)

MEPOLIZUMAB

INITIAL CRITERIA (CONTINUED)

B. If you have severe asthma with an eosinophilic phenotype, approval also requires:

1. You are 6 years of age or older
2. Therapy is prescribed by or in consultation with a physician specializing in pulmonary (relating to lungs/breathing) or allergy medicine
3. You have a blood eosinophil level (a type of lab test) of at least 150 cells/mcL within the past 12 months
4. Nucala will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis), such as a long-acting inhaled beta2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), theophylline, or an oral corticosteroid (such as prednisone)
5. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma (a type of lung condition with inflammation)
6. You meet ONE of the following:
   a. You have experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
   b. You have experienced at least ONE serious asthma exacerbation requiring a hospitalization or an emergency room visit within the past 12 months
   c. You have poor symptom control despite current therapy as shown by at least THREE of the following within the past 4 weeks:
      i. Daytime asthma symptoms more than twice per week
      ii. Any night waking due to asthma
      iii. Use of a short-acting inhaled beta2-agonist reliever (such as albuterol) for symptoms more than twice per week
      iv. Any activity limitation due to asthma

(Initial denial text continued on next page)

MEPOLIZUMAB

INITIAL CRITERIA (CONTINUED)

C. If you have chronic rhinosinusitis with nasal polyps, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an otolaryngologist (ear, nose, and throat doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
3. There is evidence of nasal polyps (non-cancerous growths) by direct examination, endoscopy (using a small camera), or sinus computed tomography (CT) scan (a type of imaging test)
4. You have inadequately controlled disease
5. You had a 56-day trial of ONE clinical standard of care medication: an intranasal corticosteroid (such as mometasone nasal spray)
6. Nucala will be used as add-on maintenance treatment (taken on a regular basis)
7. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps (inflammation of nasal and sinus passages with small growths in the nose)

D. If you have eosinophilic granulomatosis with polyangiitis, approval also requires:

1. You are 18 years of age or older
2. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Fasenra [benralizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic granulomatosis with polyangiitis (a type of immune system disorder with inflammation of blood vessels)

(Initial denial text continued on next page)

MEPOLIZUMAB

INITIAL CRITERIA (CONTINUED)

E. If you have hypereosinophilic syndrome, approval also requires:
1. You are 12 years of age or older
2. You have had hypereosinophilic syndrome (HES: a type of blood disorder) for at least 6 months without an identifiable non-hematologic (not present in the blood) secondary cause (HES is not caused by another condition)
3. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), immunologist (a type of immune system doctor), hematologist (a type of blood doctor), or pulmonologist (lung/breathing doctor)
4. You have a blood eosinophil count (a type of lab test) of at least 1000 cells/mcL at the start of therapy
5. You have a negative FIP1L1-PDFRA test (a type of lab test that detects a type of gene mutation)
6. You have been stable on hypereosinophilic syndrome (HES: a type of blood disorder) therapy (corticosteroid [such as prednisone]) for at least 4 weeks
7. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Fasenra [benralizumab]) or targeted small molecules (such as JAK inhibitor, PDE-4 inhibitor) for the treatment of hypereosinophilic syndrome (a type of blood disorder)

F. If you have chronic obstructive pulmonary disease, approval also requires:
1. You are 18 years of age or older
2. You have an eosinophilic phenotype of chronic obstructive pulmonary disease (COPD: a type of inflammatory long-term lung condition)
3. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor)
4. You have an elevated blood eosinophil count (a type of lab test) of at least 150 cell/mcL at screening (within the past 3 months) OR at least 300 cells/mcL in the previous 12 months
5. Nucala will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (such as Trelegy Ellipta, Breztri Aerosphere)
6. You will NOT use Nucala concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype chronic obstructive pulmonary disease (a type of long-term lung condition)

MEPOLIZUMAB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of severe asthma with an eosinophilic phenotype (ICD-10 J82.83) and meet **ALL** of the following criteria?
   - The patient will continue to use an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline, or an oral corticosteroid [e.g., prednisone])
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma

   If yes, continue to #2.
   If no, continue to #3.

2. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Increase in percent predicted FEV1 from pretreatment baseline
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)

   If yes, **approve all formulations of the requested strength for 12 months by GPID or GPI-14 as follows:**
   - **100mg: #1 per 28 days.**
   - **40mg/0.4mL: #0.4mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

MEPOLIZUMAB

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline (e.g., improvements in nasal congestion, sense of smell, size of polyps)
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of CRSwNP

   If yes, **approve all formulations of the 100mg strength for 12 months by GPID or GPI-14 with a quantity limit of #1 per 28 days.**

   If no, continue to #4.

4. Does the patient have a diagnosis of eosinophilic granulomatosis with polyangiitis (EGPA) (ICD-10 M30.1), also known as Churg-Strauss syndrome, and meet **ALL** of the following criteria?
   - The patient has shown a reduction in EGPA symptoms compared to baseline OR has been able to reduce/eliminate corticosteroid use
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Fasenra [benralizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of EGPA

   If yes, **approve all formulations of the 100mg strength for 12 months by GPID or GPI-14 with a quantity limit of #3 per 28 days.**

   If no, continue to #5.

5. Does the patient have a diagnosis of chronic obstructive pulmonary disease (COPD) (ICD-10 Group J44 except for ICD-10 J44.0 and J44.81) and meet **ALL** of the following criteria?
   - The patient has an eosinophilic phenotype of COPD
   - Nucala will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (e.g., Trelegy Ellipta, Breztri Aerosphere)
   - Nucala will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor [e.g., Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype COPD

   If yes, continue to #6.
   If no, continue to #7.

MEPOLIZUMAB

RENEWAL CRITERIA (CONTINUED)

6. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - The patient has a reduction in COPD exacerbations from baseline
   - The patient has a reduction in severity or frequency of COPD-related symptoms (e.g., wheezing, shortness of breath, coughing, sputum production)
   - The patient has an increase in FEV1 of at least 5% from pretreatment baseline

   If yes, **approve all formulations of the 100mg strength for 12 months by GPID or GPI-14 with a quantity limit of #1 per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

7. Does the patient have a diagnosis of hypereosinophilic syndrome (HES) (ICD-10 Group D72.11) and meet **ALL** of the following criteria?
   - The patient has a reduction in frequency/severity of HES flares
   - The patient has improved symptoms or reduced oral steroid (e.g., prednisone) requirements
   - Nucala will NOT be used concurrently with another systemic biologic (e.g., Fasenra [benralizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of HES

   If yes, **approve all formulations of the 100mg strength for 12 months by GPID or GPI-14 with a quantity limit of #3 per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MEPOLIZUMAB (Nucala)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Severe asthma with an eosinophilic phenotype (a type of lung condition with inflammation)
      2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus passages with small growths in the nose)
      3. Eosinophilic granulomatosis with polyangiitis (EGPA), also known as Churg-Strauss syndrome (a type of immune system disorder with inflammation of blood vessels)
      4. Chronic obstructive pulmonary disease (COPD: a type of long-term lung condition)
      5. Hypereosinophilic syndrome (HES: a type of blood disorder)

MEPOLIZUMAB

RENEWAL CRITERIA (CONTINUED)

B. If you have severe asthma with an eosinophilic phenotype, renewal also requires:
1. You will continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis), such as a long-acting inhaled beta2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), theophylline, or an oral corticosteroid (such as prednisone)
2. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic phenotype asthma (a type of lung condition with inflammation)
3. You have shown a clinical response as evidenced by ONE of the following:
   a. You have experienced a decrease in asthma exacerbations (worsening of symptoms) from baseline (before starting Nucala)
   b. You have decreased your use of rescue medications (such as albuterol)
   c. You have an increase in the percent predicted FEV1 (a type of lung test) from pre-treatment baseline (before starting Nucala)
   d. You have a decrease in the severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)

C. If you have chronic rhinosinusitis with nasal polyps, renewal also requires:
1. You have shown a clinical benefit compared to baseline (before starting Nucala) (such as improvements in nasal congestion, sense of smell, size of polyps)
2. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps (inflammation of nasal and sinus passages with small growths in the nose)

D. If you have eosinophilic granulomatosis with polyangiitis, renewal also requires:
1. You have shown a reduction in eosinophilic granulomatosis with polyangiitis (EGPA) symptoms compared to baseline (before starting Nucala), OR you have been able to decrease or eliminate (stop) corticosteroid use
2. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Fasenra [benralizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of eosinophilic granulomatosis with polyangiitis (a type of immune system disorder with inflammation of blood vessels)

(Renewal denial text continued on next page)

MEPOLIZUMAB

RENEWAL CRITERIA (CONTINUED)

E. If you have chronic obstructive pulmonary disease, renewal also requires:
1. You have an eosinophilic phenotype of chronic obstructive pulmonary disease (COPD: a type of inflammatory long-term lung condition)
2. Nucala will be used in combination with a long-acting muscarinic antagonist (LAMA)/long-acting beta-2-agonist (LABA)/inhaled corticosteroid (ICS) (such as Trelegy Ellipta, Breztri Aerosphere)
3. You will NOT use Nucala concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor [such as Daliresp (roflumilast)]) for the treatment of eosinophilic phenotype chronic obstructive pulmonary disease (a type of long-term lung condition)
4. You have shown a clinical response as evidenced by ONE of the following:
   a. You have a reduction (decrease) in COPD exacerbations (worsening of symptoms) from baseline (before starting Nucala)
   b. You have a reduction in severity or frequency of COPD-related symptoms (such as wheezing, shortness of breath, coughing, sputum [mucus] production)
   c. You have had an increase in FEV1 (a type of lung test) by at least 5% from pretreatment baseline

F. If you have hypereosinophilic syndrome, renewal also requires:
1. You have a reduction in frequency/severity of hypereosinophilic syndrome (HES: a type of blood disorder) flares
2. You have improved symptoms or reduced oral steroid (such as prednisone) requirements
3. You will NOT use Nucala concurrently (at the same time) with another systemic biologic (such as Fasenra [benralizumab]) or targeted small molecules (such as JAK inhibitor, PDE-4 inhibitor) for the treatment of hypereosinophilic syndrome (a type of blood disorder)

METHOTREXATE - JYLAMVO

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
METHOTREXATE	JYLAMVO	03906		GPI-10 (2130005000)	BRAND = JYLAMVO

GUIDELINES FOR USE

1. Does the patient have a diagnosis of acute lymphoblastic leukemia (ALL) (ICD-10 Group C91.0) and meet **ALL** of the following criteria?
   - Jylamvo will be used as part of a combination chemotherapy maintenance regimen
   - The patient has a contraindication to or is unable to swallow generic methotrexate tablets

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, continue to #2.

2. Does the patient have a diagnosis of mycosis fungoides (cutaneous T-cell lymphoma) (ICD-10 Group C84.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a contraindication to or is unable to swallow generic methotrexate tablets

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, continue to #3.

3. Does the patient have a diagnosis of relapsed or refractory non-Hodgkin lymphoma (ICD-10 Group C85) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Jylamvo will be used as part of a metronomic combination chemotherapy regimen
   - The patient has a contraindication to or is unable to swallow generic methotrexate tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #20mL per 28 days.**
   If no, continue to #4.

4. Does the patient have a diagnosis of rheumatoid arthritis (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a contraindication to or is unable to swallow generic methotrexate tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #40mL per 28 days.**
   If no, continue to #5.

GUIDELINES FOR USE (CONTINUED)

5. Does the patient have a diagnosis of polyarticular juvenile idiopathic arthritis (pJIA) (ICD-10 Group M08) **AND** meet the following criterion?
   - The patient has a contraindication to or is unable to swallow generic methotrexate tablets

   If yes, **approve for 12 months by GPID or GPI-14.**
   If no, continue to #6.

6. Does the patient have a diagnosis of severe psoriasis (ICD-10 L40.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a contraindication to or is unable to swallow generic methotrexate tablets

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #60mL per 28 days.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **METHOTREXATE - JYLAMVO** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Acute lymphoblastic leukemia (ALL: a type of blood cancer)
      2. Mycosis fungoides (cutaneous T-cell lymphoma) (a type of blood cancer affecting the skin)
      3. Relapsed or refractory non-Hodgkin lymphoma (a type of blood cancer that has returned or did not respond to treatment)
      4. Rheumatoid arthritis (a type of joint condition)
      5. Polyarticular juvenile idiopathic arthritis (pJIA: a type of joint condition)
      6. Severe psoriasis (a type of skin condition)

   B. If you have acute lymphoblastic leukemia, approval also requires:
      1. Jylamvo will be used as part of a combination chemotherapy maintenance regimen (a type of therapy to treat cancer)
      2. You have a contraindication to (harmful for you to use) or are unable to swallow generic methotrexate tablets

   C. If you have mycosis fungoides (cutaneous T-cell lymphoma), approval also requires:
      1. You are 18 years of age or older
      2. You have a contraindication to (harmful for you to use) or are unable to swallow generic methotrexate tablets

METHOTREXATE - JYLAMVO

GUIDELINES FOR USE (CONTINUED)

D. If you have relapsed or refractory non-Hodgkin lymphoma, approval also requires:
1. You are 18 years of age or older
2. Jylamvo will be used as part of a metronomic combination chemotherapy regimen (a type of therapy to treat cancer where lower doses are given over a long period to reduce side effects)
3. You have a contraindication to (harmful for you to use) or are unable to swallow generic methotrexate tablets

E. If you have rheumatoid arthritis, approval also requires:
1. You are 18 years of age or older
2. You have a contraindication to (harmful for you to use) or are unable to swallow generic methotrexate tablets

F. If you have polyarticular juvenile idiopathic arthritis, approval also requires:
1. You have a contraindication to (harmful for you to use) or are unable to swallow generic methotrexate tablets

G. If you have severe psoriasis, approval also requires:
1. You are 18 years of age or older
2. You have a contraindication to (harmful for you to use) or are unable to swallow generic methotrexate tablets

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

METHOXY PEG-EPOETIN BETA

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
METHOXY PEG-EPOETIN BETA	MIRCERA	35005		GPI-10 (8240104010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of anemia associated with chronic kidney disease (CKD) (ICD-10 D63.1) **AND** meet the following criterion?
   - Mircera will NOT be used concurrently with another erythropoiesis-stimulating agent (ESA) (e.g., Retacrit [epoetin alfa-epbx], Aranesp [darbepoetin alfa], Epogen [epoetin alfa], Procrit [epoetin alfa]) OR hypoxia-inducible factor prolyl hydroxylase inhibitor (HIF-PHI) (e.g., Jesduvroq [daprodustat], Vafseo [vadadustat])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient 18 years of age or older and meets **ALL** of the following criteria?
   - The patient had a trial of the preferred agent: Retacrit (epoetin alfa-epbx)
   - The patient's hemoglobin level is less than 10g/dL

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.6mL per 28 days.**

   If no, continue to #3.

3. Is the patient between 3 months and 17 years of age **AND** meets the following criterion?
   - The patient is converting from another erythropoiesis-stimulating agent (ESA) (e.g., Epogen [epoetin alfa], Aranesp [darbepoetin alfa]) after the hemoglobin level has been stabilized with that ESA

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.6mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

METHOXY PEG-EPOETIN BETA

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **METHOXY PEG-EPOETIN BETA (Mircera)** requires the following rule(s) be met for approval:

A. You have anemia (a type of blood condition) associated with chronic (long-term) kidney disease (CKD)
B. You are 3 months of age or older
C. You will NOT use Micera concurrently (at the same time) with another erythropoiesis-stimulating agent (ESA) (such as Retacrit [epoetin alfa-epbx], Aranesp [darbepoetin alfa], Epogen [epoetin alfa], Procrit [epoetin alfa]) OR hypoxia-inducible factor prolyl hydroxylase inhibitor (HIF-PHI) (such as Jesduvroq [daprodustat], Vafseo [vadadustat])
D. If you are 18 years of age or older, approval also requires:
    1. You have tried the preferred medication: Retacrit (epoetin alfa-epbx)
    2. Your hemoglobin level (type of blood test) is less than 10g/dL
E. If you are between 3 months and 17 years of age, approval also requires:
    1. You are changing from another erythropoiesis-stimulating agent (ESA, such as Epogen [epoetin alfa], Aranesp [darbepoetin alfa]) after your hemoglobin level (type of blood test) has been stabilized with that ESA

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

METHOXY PEG-EPOETIN BETA

RENEWAL CRITERIA

1. Does the patient have a diagnosis of anemia associated with chronic kidney disease (CKD) (ICD-10 D63.1) **AND** meet the following criterion?
   - Mircera will NOT be used concurrently with another erythropoiesis-stimulating agent (ESA) (e.g., Retacrit [epoetin alfa-epbx], Aranesp [darbepoetin alfa], Epogen [epoetin alfa], Procrit [epoetin alfa]) OR hypoxia-inducible factor prolyl hydroxylase inhibitor (HIF-PHI) (e.g., Jesduvroq [daprodustat], Vafseo [vadadustat])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient 18 years of age or older and meets **ONE** of the following criteria?
   - The patient's hemoglobin level is less than 10g/dL if not on dialysis
   - The patient's hemoglobin level is less than 11g/dL if on dialysis
   - The patient's hemoglobin level has reached 10g/dL (if not on dialysis) and the dose is being or has been reduced/interrupted to decrease the need for blood transfusions
   - The patient's hemoglobin level has reached 11g/dL (if on dialysis) and the dose is being or has been reduced/interrupted to decrease the need for blood transfusions

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.6mL per 28 days.**

   If no, continue to #3.

3. Is the patient between 3 months and 17 years of age and meets **ONE** of the following criteria?
   - The patient's hemoglobin level is less than 12g/dL
   - The patient's hemoglobin level has reached 12g/dL and the dose is being or has been reduced/interrupted to decrease the need for blood transfusions

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.6mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

METHOXY PEG-EPOETIN BETA

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **METHOXY PEG-EPOETIN BETA (Mircera)** requires the following rule(s) be met for renewal:

A. You have anemia (a type of blood condition) associated with chronic (long-term) kidney disease (CKD)
B. You are 3 months of age or older
C. You will NOT use Micera concurrently (at the same time) with another erythropoiesis-stimulating agent (ESA) (such as Retacrit [epoetin alfa-epbx], Aranesp [darbepoetin alfa], Epogen [epoetin alfa], Procrit [epoetin alfa]) OR hypoxia-inducible factor prolyl hydroxylase inhibitor (HIF-PHI) (such as Jesduvroq [daprodustat], Vafseo [vadadustat])
D. If you are 18 years of age or older, renewal also requires ONE of the following:
    1. Your hemoglobin level (type of blood test) is less than 10g/dL if you are not on dialysis (process of removing excess water, toxins from the blood)
    2. Your hemoglobin level (type of blood test) is less than 11g/dL if you are on dialysis (process of removing excess water, toxins from the blood)
    3. Your hemoglobin level (type of blood test) has reached 10g/dL (if you are not on dialysis [process of removing excess water, toxins from the blood]) and your dose is being or has been reduced or interrupted to decrease the need for blood transfusions (adding blood to your body)
    4. Your hemoglobin level (type of blood test) has reached 11g/dL (if you are on dialysis [process of removing excess water, toxins from the blood]) and your dose is being or has been reduced or interrupted to decrease the need for blood transfusions (adding blood to your body)
E. If you are between 3 months and 17 years of age, renewal also requires ONE of the following:
    1. Your hemoglobin level (type of blood test) is less than 12g/dL
    2. Your hemoglobin level (type of blood test) has reached 12g/dL and your dose is being or has been reduced or interrupted to decrease the need for blood transfusions (adding blood to your body)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

METHYLNALTREXONE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
METHYLNALTREXONE BROMIDE	RELISTOR	35611		GPI-10 (5258005010)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of opioid-induced constipation (OIC) (ICD-10 K59.03) with chronic non-cancer pain (ICD-10 G89.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has chronic non-cancer pain, including chronic pain related to prior cancer or its treatment
   - The patient does NOT require frequent opioid dosage escalation
   - The patient has been taking opioids for at least four weeks
   - The patient had a trial of or contraindication to the preferred agents: Symproic (naldemedine) and Movantik (naloxegol)

   If yes, **approve all formulations of the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **12 mg: #0.6 mL per day.**
   - **150 mg: #3 per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of opioid-induced constipation (OIC) (ICD-10 K59.03) with advanced illness or pain caused by active cancer (ICD-10 G89.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The request is for Relistor injection
   - The patient requires opioid dosage escalation for palliative care

   If yes, **approve all strengths and formulations for 6 months by GPID or GPI-14 with the following quantity limits:**
   - **12 mg: #0.6 mL per day.**
   - **8 mg: #0.4 mL per day.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

METHYLNALTREXONE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **METHYLNALTREXONE (Relistor)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Opioid-induced constipation (a type of bowel disorder caused by drugs used to treat pain) with chronic (long-term) non-cancer pain
   2. Opioid-induced constipation with advanced illness or pain caused by active cancer

B. If you have opioid-induced constipation with chronic non-cancer pain, approval also requires:
   1. You are 18 years of age or older
   2. You have chronic non-cancer pain, including chronic pain related to prior cancer or its treatment
   3. You do NOT require frequent opioid dosage escalation (increase)
   4. You have been taking opioids for at least four weeks
   5. You have tried or have a contraindication to (harmful for you to use) the preferred medications: Symproic (naldemedine) AND Movantik (naloxegol)

C. If you have opioid-induced constipation with advanced illness or pain caused by active cancer, approval also requires:
   1. You are 18 years of age or older
   2. Your request is for Relistor injection
   3. You require opioid dosage escalation (increase) for palliative care (treatment for comfort from symptoms)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

METHYLTESTOSTERONE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
METHYLTESTOSTERONE	TESTRED, ANDROID, METHITEST, METHYLTESTOS-TERONE		10380 10411	GPI-10 (2310002000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1)?

   If yes, continue to #2.
   If no, continue to #6.

2. Does the patient meet **ONE** of the following criteria confirming low testosterone levels?
   - The patient has at least TWO total serum testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
   - The patient has a free serum testosterone level of less than 5 ng/dL (0.17 nmol/L)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the patient 40 years of age or older?

   If yes, continue to #4.
   If no, continue to #5.

4. Has the patient's prostate specific antigen (PSA) been evaluated within the past 12 months and the patient meets **ONE** of the following criteria?
   - The PSA level is less than or equal to 4 ng/mL
   - The PSA level is greater than 4 ng/mL and the provider attests that the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

METHYLTESTOSTERONE

INITIAL CRITERIA (CONTINUED)

5. Has the patient had a trial of or contraindication to **TWO** preferred agents: intramuscular testosterone cypionate and intramuscular testosterone enanthate?

   If yes, **approve the requested agent for 12 months by GPID or GPI-14 with a quantity limit of #5 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

6. Is the request for a male patient with a diagnosis of delayed puberty (ICD-10 E30.0), not secondary to a pathological disorder, who meets the following criterion?
   - The patient had a trial of or contraindication to intramuscular testosterone enanthate

   If yes, **approve the requested agent for 6 months by GPID or GPI-14 with a quantity limit of #5 per day.**

   If no, continue to #7.

7. Is the request for a female patient with a diagnosis of metastatic breast cancer (ICD-10 Group C50) who meets the following criterion?
   - The patient had a trial of or contraindication to intramuscular testosterone enanthate

   If yes, continue to #8.
   If no, continue to #9.

8. Does the patient meet **ONE** of the following criteria?
   - The patient is postmenopausal
   - The patient is premenopausal who benefited from an oophorectomy AND is considered to have a hormone-responsive tumor

   If yes, **approve the requested agent for 12 months by GPID or GPI-14 with a quantity limit of #20 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

METHYLTESTOSTERONE

INITIAL CRITERIA (CONTINUED)

9. Is the requested agent for gender dysphoria (ICD-10 Group F64) as supported by the compendia (e.g., DrugDex strength of recommendation Class I, IIa, or IIb)?

   If yes, **approve the requested agent for 12 months by GPID or GPI-14 (PAC Note: Please override the quantity limit coded on the formulary).**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **METHYLTESTOSTERONE (Testred, Android, Methitest)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Primary or secondary male hypogonadism (hypotestosteronism or low testosterone)
      2. Delayed puberty not due to a pathological disorder (not due to a disease) in a male
      3. Metastatic breast cancer (cancer that has spread to other parts of the body) in a female
      4. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)

   B. If you are a male with primary or secondary hypogonadism, approval also requires:
      1. You meet ONE of the following showing you have low testosterone levels:
         a. You have at least TWO total serum (blood) testosterone levels of less than 300 ng/dL (10.4 nmol/L) taken on separate occasions
         b. You have a free serum testosterone level of less than 5 ng/dL (0.17 nmol/L)
      2. You have tried or have a contraindication to (harmful for you to use) TWO preferred medications: intramuscular [injected into the muscle] testosterone cypionate, intramuscular testosterone enanthate
      3. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated within the past 12 months and you meet ONE of the following:
         a. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is less than or equal to 4 ng/mL
         b. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is greater than 4 ng/mL and the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

   (Initial denial text continues on next page)

METHYLTESTOSTERONE

INITIAL CRITERIA (CONTINUED)

C. If you are a male with delayed puberty not secondary to a pathological disorder, approval also requires:
1. You have tried or have a contraindication to (harmful for you to use) intramuscular (injected into the muscle) testosterone enanthate

D. If you are a female with metastatic breast cancer, approval also requires:
1. You have tried or have a contraindication to (harmful for you to use) intramuscular (injected into the muscle) testosterone enanthate
2. You meet ONE of the following:
   a. You are postmenopausal (after menopause)
   b. You are premenopausal (before menopause), you have benefited from an oophorectomy (surgical removal of the ovaries), and your tumor is hormone-responsive

E. If you have gender dysphoria, approval also requires:
1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for the treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

METHYLTESTOSTERONE

RENEWAL CRITERIA

1. Is the request for a male patient with a diagnosis of primary or secondary hypogonadism (hypotestosteronism or low testosterone) (ICD-10 E29.1) who meets **ALL** of the following criteria?
   - The patient has improved symptoms compared to baseline and tolerance to treatment
   - The patient has yearly lab tests, AND both testosterone and hematocrit levels are NOT above the normal range

   If yes, continue to #2.
   If no, continue to #4.

2. Is the patient 40 years of age or older?

   If yes, continue to #3.
   If no, **approve the requested agent for 12 months by GPID or GPI-14 with a quantity limit of #5 per day.**

3. Has the patient's prostate specific antigen (PSA) been evaluated within the past 12 months and the patient meets **ONE** of the following criteria?
   - The PSA level is less than or equal to 4 ng/mL
   - The PSA level is greater than 4 ng/mL and the provider attests that the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

   If yes, **approve the requested agent for 12 months by GPID or GPI-14 with a quantity limit of #5 per day.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

4. Is the request for a male patient with a diagnosis of delayed puberty (ICD-10 E30.0), not secondary to a pathological disorder, who meets the following criterion?
   - The patient has not received more than two 6-month courses of testosterone replacement therapy

   If yes, **approve the requested agent for 6 months by GPID or GPI-14 with a quantity limit of #5 per day.**

   If no, continue to #5.

METHYLTESTOSTERONE

RENEWAL CRITERIA (CONTINUED)

B. If you are a male with primary or secondary hypogonadism, renewal also requires:
1. You have shown improvement in your symptoms compared to baseline (before treatment) and tolerance to treatment
2. You have yearly lab tests, and your testosterone and hematocrit levels (types of blood tests) are not above the normal range
3. If you are 40 years of age or older, your prostate specific antigen (PSA: lab result that may indicate prostate cancer) has been evaluated within the past 12 months and you meet ONE of the following:
   a. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is less than or equal to 4 ng/mL
   b. The prostate specific antigen (PSA: lab result that may indicate prostate cancer) level is greater than 4 ng/mL and the benefits of ongoing testosterone replacement therapy outweigh the risks associated with the elevated PSA

C. If you are a male with delayed puberty not secondary to a pathological disorder, renewal also requires:
1. You have NOT received more than two 6-month courses of testosterone replacement therapy

D. If you are a female with metastatic breast cancer, renewal also requires ONE of the following:
1. You are postmenopausal (after menopause)
2. You are premenopausal (before menopause), you have benefited from an oophorectomy (surgical removal of the ovaries), and your tumor is hormone-responsive

E. If you have gender dysphoria, renewal also requires:
1. Only medications supported by the compendia (accepted medical references such as DrugDex strength of recommendation Class I, IIa, or IIb) for the treatment of gender dysphoria (your gender identity conflicts with your sex assigned at birth) may be approved

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

METOPROLOL

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
METOPROLOL TARTRATE	LOPRESSOR		56737	GPI-14 (33200030102020)	

GUIDELINES FOR USE

1. Does the patient have a contraindication to or is unable to swallow metoprolol tartrate tablets?

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of #45mL per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **METOPROLOL (Lopressor)** requires the following rule(s) be met for approval:
   A. You have a contraindication to (harmful for you to use) or are unable to swallow metoprolol tartrate tablets

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Lopressor.

PRIOR AUTHORIZATION GUIDELINES

METRELEPTIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
METRELEPTIN	MYALEPT	41078		GPI-10 (3090605000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of congenital or acquired generalized lipodystrophy (ICD-10 E88.1) and meet **ALL** of the following criteria?
   - Myalept will be used as an adjunct to diet as replacement therapy to treat the complications of leptin deficiency
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient has diabetes mellitus, insulin resistance, OR a fasting hypertriglyceridemia of greater than 200mg/dL

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **METRELEPTIN (Myalept)** requires the following rule(s) be met for approval:
   A. You have congenital or acquired generalized lipodystrophy (abnormal distribution of fat in the body)
   B. Myalept will be used as an adjunct (add-on) to diet as replacement therapy to treat the complications of leptin deficiency (low level of a type of hormone)
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   D. You have diabetes mellitus (a disorder with high blood sugar), insulin resistance (a condition where cells in the body do not respond to a type of hormone), OR a fasting hypertriglyceridemia (high levels of fat in the blood) of greater than 200mg/dL

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

METRELEPTIN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of congenital or acquired generalized lipodystrophy (ICD-10 E88.1) **AND** meet the following criterion?
   - The patient has shown clinical benefit with the use of Myalept (e.g., reduction in glucose levels, reduction of insulin resistance, or reduction of triglycerides)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **METRELEPTIN (Myalept)** requires the following rule(s) be met for renewal:
   A. You have congenital or acquired generalized lipodystrophy (abnormal distribution of fat in the body)
   B. You have shown clinical benefit (improvement) with the use of Myalept (such as a reduction in glucose levels [lower level of blood sugar], reduction of insulin resistance [cells in the body are more responsive to a type of hormone], or reduction of triglycerides [lower level of fat in the blood])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Myalept.

METRONIDAZOLE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
METRONIDAZOLE	LIKMEZ	04157		GPI-10 (1600003500)	BRAND = LIKMEZ

GUIDELINES FOR USE

1. Is the request for the treatment of trichomoniasis (ICD-10 Group A59) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a contraindication to or is unable to swallow metronidazole tablets

   If yes, **approve for 30 days by GPID or GPI-14 with a quantity limit of #400mL per 10 days for 1 fill.**

   If no, continue to #2.

2. Is the request for the treatment of acute intestinal amebiasis (amoebic dysentery) (ICD-10 A06.0) or amebic liver abscess (ICD-10 A06.4), **AND** the patient meets the following criterion?
   - The patient has a contraindication to or is unable to swallow metronidazole tablets

   If yes, **approve for 30 days by GPID or GPI-14 with a quantity limit of #400mL per 10 days for 1 fill.**

   If no, continue to #3.

3. Is the request for the treatment of serious infections caused by susceptible anaerobic bacteria (e.g., *Bacteroides* species, *Clostridium* species, *Peptococcus* species) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a contraindication to or is unable to swallow metronidazole tablets

   If yes, **approve for 30 days by GPID or GPI-14 with a quantity limit of #400mL per 10 days for 1 fill.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

METRONIDAZOLE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **METRONIDAZOLE (Likmez)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Trichomoniasis (a type of infection caused by a parasite)
   2. Acute intestinal amebiasis (amoebic dysentery: a type of infection of the intestines) OR amebic liver abscess (a collection of pus in the liver caused by a parasite)
   3. Serious infections caused by susceptible anaerobic bacteria, such as *Bacteroides* species, *Clostridium* species, *Peptococcus* species (infections caused by types of bacteria that can be treated with metronidazole)

B. You have a contraindication to (harmful for you to use) or are unable to swallow metronidazole tablets

C. For the treatment of trichomoniasis or serious infections caused by susceptible anaerobic bacteria, approval also requires:
   1. You are 18 years of age or older

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Likmez.

METYROSINE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
METYROSINE	DEMSER, METYROSINE	00138		GPI-10 (3630002500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of pheochromocytoma (ICD-10 Groups D35.0, C74.1) and the requested medication will be used for **ONE** of the following?
   - Preoperative preparation for surgery
   - Management of malignant pheochromocytoma when surgery is contraindicated
   - Chronic treatment of patients with malignant pheochromocytoma

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ALL** of the following?
   - The patient has a non-metastatic pheochromocytoma
   - Therapy is prescribed by or in consultation with an endocrinologist, an endocrine surgeon, or a hematologist-oncologist

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the patient awaiting surgery?

   If yes, continue to #4.
   If no, **approve for 12 months by HICL or GPI-10 with a quantity limit of #16 per day.**

4. Will the requested medication be used in combination with an alpha-adrenergic receptor blocker (e.g., doxazosin, terazosin, prazosin, phenoxybenzamine)?

   If yes, **approve for 30 days by HICL or GPI-10 with a quantity limit of #224 per 14 days for one fill.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

METYROSINE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **METYROSINE (Demser)** requires the following rule(s) be met for approval:

A. You have pheochromocytoma (a type of rare tumor)
B. You will be using the requested medication for ONE of the following:
   1. Preoperative preparation for surgery
   2. Management of malignant (cancerous) pheochromocytoma when surgery is contraindicated (harmful for you to have)
   3. Chronic (long term) treatment of malignant pheochromocytoma
C. You have a non-metastatic pheochromocytoma (tumor has not spread to other parts of the body)
D. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), an endocrine surgeon (surgeon specializing in removal of glands such as adrenal glands), or a hematologist-oncologist (a type of cancer doctor)
E. If you are awaiting surgery, approval also requires:
   1. The requested medication will be in combination with an alpha-adrenergic receptor blocker (such as doxazosin, terazosin, prazosin, phenoxybenzamine)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MIDOSTAURIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MIDOSTAURIN	RYDAPT	44227		GPI-10 (2153303000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of acute myeloid leukemia (AML) (ICD-10 Group C92.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is newly diagnosed (e.g., starting or previously started Rydapt treatment at the time of diagnosis)
   - The patient's cancer is FLT3 mutation-positive as detected by an FDA-approved test
   - Rydapt will be used in combination with standard cytarabine and daunorubicin induction and cytarabine consolidation chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #56 per 28 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of aggressive systemic mastocytosis (ASM) (ICD-10 C96.21), systemic mastocytosis with an associated hematological neoplasm (SM-AHN) (ICD-10 D47.02), or mast cell leukemia (MCL) (ICD-10 Group C94.3) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #224 per 28 days.**
   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MIDOSTAURIN (Rydapt)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Acute myeloid leukemia (AML: a type of blood and bone marrow cancer)
      2. Aggressive systemic mastocytosis (ASM: a type of blood disorder)
      3. Systemic mastocytosis with an associated hematological neoplasm (SM-AHN: a type of blood cancer)
      4. Mast cell leukemia (MCL: a type of blood cancer)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MIFEPRISTONE	KORLYM, MIFEPRISTONE		31485	GPI-10 (2730405000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of endogenous Cushing's syndrome (CS) (ICD-10 Group E24 except ICD-10 E24.2 and E24.4) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's hypercortisolism is NOT a result of chronic glucocorticoids (e.g., prednisone)
   - The patient also has a diagnosis of type 2 diabetes mellitus (ICD-10 Groups E08, E09, E11, E13) OR glucose intolerance
   - The patient has failed surgical treatment for Cushing's syndrome OR is not a candidate for surgery
   - The patient had a trial of or contraindication to the clinical standard of care agent: ketoconazole
   - The requested medication will NOT be used concurrently with other agents to lower cortisol (e.g., Recorlev [levoketoconazole], Isturisa [osilodrostat]) for the treatment of Cushing’s disease/syndrome

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Has the diagnosis of endogenous Cushing’s syndrome been confirmed by **ONE** of the following tests?
   - 24-hour urine free cortisol (at least 2 tests to confirm)
   - Overnight 1mg dexamethasone test
   - Late-night salivary cortisol (at least 2 tests to confirm)

   If yes, **approve for 12 months by GPID or GPI-10 with a quantity limit of #4 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

MIFEPRISTONE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MIFEPRISTONE (Korlym)** requires the following rule(s) be met for approval:

A. You have endogenous Cushing's syndrome (CS: a type of hormone disorder)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
D. Your hypercortisolism (high levels of cortisol) is NOT due to chronic glucocorticoids (long-term use of a class of medications that consists of steroids, such as prednisone)
E. You also have type 2 diabetes mellitus (a disorder with high blood sugar) OR glucose intolerance (a condition that results in high blood sugar)
F. You have failed surgical treatment (surgery did not work) for Cushing's syndrome (a type of hormone disorder) OR you are NOT a candidate for surgery
G. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: ketoconazole
H. You will NOT use the requested medication concurrently (at the same time) with other medications to lower cortisol (such as Recorlev [levoketoconazole], Isturisa [osilodrostat]) for the treatment of Cushing’s disease/syndrome (a type of hormone disorder)
I. Your diagnosis is confirmed by ONE of the following:
    1. A 24-hour urine free cortisol (a type of test that measures the amount of cortisol in the urine) (at least 2 tests to confirm)
    2. An overnight 1mg dexamethasone test (a type of diagnostic test)
    3. A late-night salivary cortisol (a type of test that measures the amount of cortisol in the saliva at night) (at least 2 tests to confirm)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MIFEPRISTONE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of endogenous Cushing's syndrome (CS) (ICD-10 Group E24 except ICD-10 E24.2 and E24.4) and meet **ALL** of the following criteria?
   - The patient continues to have improvement of glucose tolerance or stable glucose tolerance (e.g., reduced A1C, improved fasting glucose)
   - The patient continues to have tolerability to Korlym (mifepristone)
   - The patient continues to NOT be a candidate for surgical treatment for Cushing's syndrome OR has failed surgery
   - The requested medication will NOT be used concurrently with other agents to lower cortisol (e.g., Recorlev [levoketoconazole], Isturisa [osilodrostat]) for the treatment of Cushing's disease/syndrome

   If yes, **approve for 12 months by GPID or GPI-10 with a quantity limit of #4 per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MIFEPRISTONE (Korlym)** requires the following rule(s) be met for renewal:
   A. You have endogenous Cushing's syndrome (CS: a type of hormone disorder)
   B. You continue to have improvement of glucose tolerance or stable glucose tolerance (such as reduced hemoglobin A1C level [a type of lab test], improved fasting glucose)
   C. You continue to tolerate Korlym (mifepristone)
   D. You are NOT a candidate for surgery OR you have failed surgery (surgery did not work) for Cushing's syndrome (a type of hormone disorder)
   E. You will NOT use the requested medication concurrently (at the same time) with other medications to lower cortisol (such as Recorlev [levoketoconazole], Isturisa [osilodrostat]) for the treatment of Cushing's disease/syndrome (a type of hormone disorder)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MIGALASTAT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MIGALASTAT HCL	GALAFOLD	44433		GPI-10 (3090365010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Fabry disease (ICD-10 E75.21) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a nephrologist, cardiologist, or specialist physician in genetics or inherited metabolic disorders
   - The patient has an amenable galactosidase alpha (GLA) gene variant based on in vitro assay data as interpreted by a clinical genetics professional as pathogenic or likely pathogenic (i.e., patient does NOT have a benign amenable GLA variant)
   - Galafold will NOT be used concurrently with another Fabry disease therapy (e.g., Fabrazyme [agalsidase beta], Elfabrio [pegunigalsidase alfa-iwxj])
   - The patient is symptomatic OR has evidence of injury from GL-3 to the kidney, heart, or central nervous system recognized by laboratory, histological, or imaging findings (e.g., decreased GFR for age, persistent albuminuria, cerebral white matter lesions on brain MRI, cardiac fibrosis on contrast cardiac MRI)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the request for a female **AND** the patient meets the following criterion?
   - The patient has a galactosidase alpha (GLA) gene mutation via genetic testing

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #14 per 28 days.**
   If no, continue to #3.

3. Is the request for a male and the patient meets **ONE** of the following criteria?
   - The patient has an alpha galactosidase A (a-Gal-A) deficiency as indicated by an enzyme assay
   - The patient has a galactosidase alpha (GLA) gene mutation via genetic testing

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #14 per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

MIGALASTAT

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MIGALASTAT (Galafold)** requires the following rule(s) be met for approval:

A. You have Fabry disease (a rare genetic disease)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor), cardiologist (a type of heart doctor), or a doctor specializing in genetics or inherited metabolic disorders
D. You have an amenable (responsive) galactosidase alpha (GLA) gene variant (abnormal change in a type of gene) based on in vitro assay data (data collected from lab test tubes or cultures) that is interpreted by a clinical genetics professional as the cause of disease (pathogenic or likely pathogenic)
E. You will NOT use Galafold concurrently (at the same time) with another Fabry disease medication (such as Fabrazyme [agalsidase beta], Elfabrio [pegunigalsidase alfa-iwxj])
F. You are symptomatic OR have evidence of injury from GL-3 (globotriaosylceramide: a type of fat) to the kidney, heart, or central nervous system recognized by laboratory, histological (viewed by microscope), or imaging findings. Evidence of injury may include decreased GFR (glomerular filtration rate: a tool for evaluating kidney function) for age, persistent albuminuria (protein in urine), cerebral white matter lesions on brain MRI (magnetic resonance imaging: type of imaging lab), cardiac fibrosis (abnormal thickening of heart valves) on contrast cardiac MRI
G. If you are a female, approval also requires:
    1. You have a galactosidase alpha (GLA) gene mutation (abnormal change in a type of gene) as shown by genetic testing
H. If you are a male, approval also requires ONE of the following:
    1. You do NOT have enough alpha galactosidase A (a-Gal-A: a type of protein) as indicated by an enzyme assay (a type of lab test)
    2. You have a galactosidase alpha (GLA) gene mutation (abnormal change in a type of gene) as shown by genetic testing

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MIGALASTAT

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Fabry disease (ICD-10 E75.21) **AND** meet the following criterion?
   - Galafold will NOT be used concurrently with another Fabry disease therapy (e.g., Fabrazyme [agalsidase beta], Elfabrio [pegunigalsidase alfa-iwxj])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient demonstrated improvement, maintenance, or stabilization in ONE of the following while on therapy?
   - Symptoms (e.g., pain, hypohidrosis/anhidrosis, exercise intolerance, GI symptoms, angiokeratomas, abnormal cornea, tinnitus/hearing loss)
   - Imaging (e.g., brain/cardiac MRI, DEXA, renal ultrasound)
   - Laboratory or histological testing (e.g., GL-3 in plasma/urine, renal biopsy)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #14 per 28 days.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MIGALASTAT (Galafold)** requires the following rule(s) be met for renewal:
   A. You have Fabry disease (a rare genetic disease)
   B. You will NOT use Galafold concurrently (at the same time) with another Fabry disease medication (such as Fabrazyme [agalsidase beta], Elfabrio [pegunigalsidase alfa-iwxj])
   C. You have demonstrated improvement, maintenance, or stabilization in ONE of the following while on therapy:
      1. Symptoms (such as pain, hypohidrosis [less sweating]/anhidrosis [no sweating], exercise intolerance, gastrointestinal [GI] symptoms, angiokeratomas [dark red-blue raised spots on the skin], abnormal cornea [a part of the eye], tinnitus [ringing in the ears]/hearing loss)
      2. Imaging (such as brain/cardiac MRI [magnetic resonance imaging: type of imaging lab], DEXA [a type of bone scan], renal [kidney] ultrasound)
      3. Laboratory or histological (viewed by microscope) testing (such as GL-3 [globotriaosylceramide: a type of fat] in plasma/urine, renal biopsy [removal of cells or tissue from the body for examination])

   (Renewal denial text continued on next page)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MIGLUSTAT	ZAVESCA, YARGESA, MIGLUSTAT		19453	GPI-10 (8270007000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of mild to moderate type 1 Gaucher disease (ICD-10 E75.22) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The requested medication will be used as monotherapy
   - Enzyme replacement therapy is not a therapeutic option for this patient (e.g., due to allergy, hypersensitivity, poor venous access)

   If yes, **approve for 12 months by GPID or GPI-10 with a quantity limit of #90 per 30 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of Niemann-Pick disease type C (NPC) (ICD-10 E75.242) **AND** meet the following criterion?
   - The requested medication will be used in combination with Miplyffa (arimoclomol)

   If yes, **approve for 12 months by GPID or GPI-10.**
   If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MIGLUSTAT-ZAVESCA (Yargesa)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Mild to moderate type 1 Gaucher disease (a type of genetic condition)
   2. Niemann-Pick disease type C (NPC: a type of genetic condition)

B. If you have mild to moderate type 1 Gaucher disease, approval also requires:
   1. You are 18 years of age or older
   2. The requested medication will be used as monotherapy (one drug treatment)
   3. Enzyme replacement therapy (a type of treatment) is not a therapeutic option for you (due to reasons such as allergy, hypersensitivity [allergic reaction], poor access to veins)

C. If you have Niemann-Pick disease type C, approval also requires:
   1. The requested medication will be used in combination with Miplyffa (arimoclomol)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MILTEFOSINE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MILTEFOSINE	IMPAVIDO	16200		GPI-10 (1600003600)	

GUIDELINES FOR USE

1. Does the patient have **ONE** of the following diagnoses?
   - Visceral leishmaniasis (ICD-10 B55.0) caused by *Leishmania donovani*
   - Cutaneous leishmaniasis (ICD-10 B55.1) caused by *Leishmania braziliensis, Leishmania guyanensis*, or *Leishmania panamensis*
   - Mucosal leishmaniasis (ICD-10 B55.2) caused by *Leishmania braziliensis*

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Has the Leishmaniasis species been identified by **ONE** of the following CDC recommended tests?
   - Stained slides (using tissue from biopsy specimens, impression smears, or dermal scrapings)
   - Culture medium
   - Polymerase chain reaction (PCR)
   - Serologic testing (e.g., rK39 Rapid Test)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #84 per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

MILTEFOSINE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline for **MILTEFOSINE (Impavido)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Visceral leishmaniasis caused by *Leishmania donovani* (a type of parasitic disease that affects the organs)
   2. Cutaneous leishmaniasis caused by *Leishmania braziliensis, Leishmania guyanensis, or Leishmania panamensis* (a type of parasitic disease that affects the skin)
   3. Mucosal leishmaniasis caused by *Leishmania braziliensis* (a type of parasitic disease that affects the inside of the mouth, throat, and nose)

B. The *Leishmaniasis* species have been identified by ONE of the following CDC (Center for Disease Control and Prevention) recommended tests:
   1. Stained slides (using tissue from biopsy specimens [removal of tissue from the body for examination], impression smears [removal of cells from the body for examination] or dermal scrapings [removal of cells from the body for examination])
   2. Culture medium (a type of lab test)
   3. Polymerase chain reaction (PCR: a type of lab test)
   4. Serologic testing (a type of blood test, such as rK39 Rapid Test)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MINOCYCLINE MICROSPHERES

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MINOCYCLINE HCL MICROSPHERES	ARESTIN	25203		GPI-10 (8845205010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: SEE RENEWAL CRITERIA BELOW)

1. Is this medication excluded from coverage?

   If yes, guideline does not apply.
   If no, continue to #2.

2. Does the patient have a confirmed diagnosis of periodontitis (ICD-10 Groups K05.2, K05.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an oral health care professional
   - The patient does NOT have a history of minocycline or tetracycline sensitivity or allergy
   - The patient does NOT have a history of candidiasis or active oral candidiasis
   - Arestin will be administered by an oral health care professional
   - Arestin will be used as an adjunct to scaling and root planing procedures OR used as part of a periodontal maintenance program which includes good oral hygiene and scaling and root planing
   - Arestin will NOT be used for an acutely abscessed periodontal pocket
   - Arestin will NOT be used in an immunocompromised individual, such as those immunocompromised by any of the following conditions: uncontrolled diabetes mellitus, chemotherapy, radiation therapy, HIV infection
   - Arestin will NOT be used in the regeneration of alveolar bone, either in preparation for or in conjunction with the placement of endosseous (dental) implants or in the treatment of failing implants

   If yes, **approve for 3 months by HICL or GPI-10 for the quantity requested up to a maximum of 48 unit-dose cartridges.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

MINOCYCLINE MICROSPHERES

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MINOCYCLINE MICROSPHERES (Arestin)** requires the following rule(s) be met for approval:

A. You have a confirmed diagnosis of periodontitis (inflammation and infection of the gums)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with an oral health care professional
D. You do NOT have a history of minocycline or tetracycline sensitivity or allergy
E. You do NOT have a history of candidiasis (a type of fungal infection) or active oral candidiasis
F. Arestin will be administered by an oral health care professional
G. Arestin will be used as an adjunct (add-on therapy) to scaling and root planing procedures OR used as part of a periodontal maintenance program which includes good oral hygiene and scaling and root planing
H. Arestin will NOT be used for an acutely abscessed periodontal pocket (infection with pus-filled pocket)
I. Arestin will NOT be used in an immunocompromised individual (your immune system is weakened), such as those immunocompromised by any of the following conditions:
    1. Uncontrolled diabetes mellitus (a disorder with high blood sugar)
    2. Chemotherapy (a type of drug used to treat cancer)
    3. Radiation therapy
    4. HIV (human immunodeficiency virus) infection
J. Arestin will NOT be used in the regeneration (reconstruction) of alveolar bone (part of the bone that has tooth sockets), either in preparation for or in conjunction (together) with the placement of endosseous (dental) implants or in the treatment of failing implants

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MIRIKIZUMAB-MRKZ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MIRIKIZUMAB-MRKZ	OMVOH	49282		GPI-10 (5250405040)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Omvoh will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for a total of 6 months. Please enter two authorizations as follows:**
   - **FIRST APPROVAL: Approve the 300mg/15mL vial for 3 months by GPID or GPI-14 with a quantity limit of #15mL per 28 days.**
   - **SECOND APPROVAL: Approve for 3 months by HICL or GPI-10 with a quantity limit of #2mL per 28 days. (Please enter a start date of 3 DAYS BEFORE the END date of the first approval).**

   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Omvoh will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for a total of 6 months. Please enter two authorizations as follows:**
   - **FIRST APPROVAL: Approve the 300mg/15mL vial for 3 months by GPID or GPI-14 with a quantity limit of #45mL per 28 days.**
   - **SECOND APPROVAL: Approve for 3 months by HICL or GPI-10 with a quantity limit of #3mL per 28 days. (Please enter a start date of 3 DAYS BEFORE the END date of the first approval).**

   If no, do not approve.

MIRIKIZUMAB-MRKZ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MIRIKIZUMAB-MRKZ (Omvoh)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
   2. Moderate to severe Crohn's disease (CD: a type of bowel disorder)

B. If you have moderate to severe ulcerative colitis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
   3. You will NOT use Omvoh concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

C. If you have moderate to severe Crohn's disease, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
   3. You will NOT use Omvoh concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MIRIKIZUMAB-MRKZ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) **AND** meet the following criterion?
   - Omvoh will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2mL per 28 days.** If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) **AND** meet the following criterion?
   - Omvoh will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #3mL per 28 days.** If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MIRIKIZUMAB-MRKZ (Omvoh)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)
      2. Moderate to severe Crohn's disease (CD: a type of bowel disorder)

   B. If you have moderate to severe ulcerative colitis, renewal also requires:
      1. You will NOT use Omvoh concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis

   C. If you have moderate to severe Crohn's disease, renewal also requires:
      1. You will NOT use Omvoh concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

MIRVETUXIMAB SORAVTANSINE-GYNX (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MIRVETUXIMAB SORAVTANSINE-GYNX	ELAHERE	48453		GPI-10 (2135503020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of platinum-resistant epithelial ovarian, fallopian tube, or primary peritoneal cancer and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumor is folate receptor-alpha (FRa) positive as determined by an FDA-approved test
   - The patient has received one to three prior systemic treatment regimen(s) (e.g., bevacizumab, Lynparza)
   - The patient will complete an ophthalmic exam, including visual acuity and slit lamp exam, prior to the initiation of Elahere and at the recommended scheduled intervals

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MIRVETUXIMAB SORAVTANSINE-GYNX (Elahere)** requires the following rule(s) be met for approval:
   A. You have platinum-resistant epithelial ovarian, fallopian tube, or primary peritoneal cancer (types of reproductive system cancers that do not respond to a type of cancer treatment)
   B. You are 18 years of age or older
   C. Your tumor is folate receptor-alpha (FRa: a type of protein) positive as determined by a Food and Drug Administration (FDA)-approved test
   D. You have received one to three prior systemic treatment regimen(s) (such as bevacizumab, Lynparza)
   E. You will complete an ophthalmic (eye) exam, including visual acuity (sharpness of vision) and slit lamp exam (a type of eye exam), before starting Elahere and at the recommended scheduled times

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MOMETASONE SINUS IMPLANT (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MOMETASONE FUROATE	SINUVA		44214	GPI-14 (42200045102350)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have non-self-administered (NSA) drug benefit coverage?

   If yes, continue to #2.
   If no, guideline does not apply.

2. Has the patient previously had 4 implants (2 per nostril) per lifetime?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.
   If no, continue to #3.

3. Does the patient have a diagnosis of nasal polyps and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or given in consultation with an otolaryngologist
   - The patient previously had ethmoid sinus surgery
   - The patient is a candidate for repeat ethmoid sinus surgery due to refractory moderate to severe symptoms of nasal obstruction, nasal congestion or nasal polyps in both ethmoid sinuses
   - The patient had a previous 90-day trial of **ONE** intranasal corticosteroid (e.g., fluticasone, beclomethasone, flunisolide, ciclesonide, mometasone)

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of 2 implants (1 per nostril).**
   APPROVAL TEXT: Renewal requires the patient has nasal polyps and has NOT had 4 implants (2 per nostril) per lifetime. In addition, the patient has ethmoid sinus polyps grade ≥ 1 on any side and does not have extensive ethmoid sinus polyp grade (grade 4 on at least one side) or extensive adhesions/synechiae (grade 3 or 4).

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

MOMETASONE SINUS IMPLANT (NSA)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **MOMETASONE IMPLANT (Sinuva)** requires the following rule(s) be met for approval:

A. You have nasal polyps (small growths inside the nose)
B. You are 18 years of age or older
C. Therapy is prescribed by or given in consultation with an otolaryngologist (ear, nose and throat doctor)
D. You previously had ethmoid sinus surgery (process to remove blockage in your sinuses)
E. You are a candidate for repeat ethmoid sinus surgery due to refractory moderate to severe symptoms (symptoms return and do not respond to surgery) of nasal obstruction, nasal congestion or nasal polyps in both ethmoid sinuses
F. You previously had a 90-day trial of ONE intranasal corticosteroid (such as fluticasone, beclomethasone, flunisolide, ciclesonide, mometasone)
G. You have not received 4 implants (2 per nostril) in your lifetime

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RENEWAL CRITERIA

1. Has the patient previously had 4 implants (2 per nostril) per lifetime?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.
   If no, continue to #2.

2. Does the patient have a diagnosis of nasal polyps and meet **ALL** of the following criteria?
   - The patient has ethmoid sinus polyps grade ≥ 1 on any side
   - The patient does **NOT** have extensive ethmoid sinus polyp grade (grade 4 on at least one side) or extensive adhesions/synechiae (grade 3 or 4)

   If yes, **approve for 12 months by GPID or GPI-14 with a quantity limit of 2 implants (1 per nostril). (Note: maximum #4 implants [2 per nostril] allowed per lifetime.)**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MONOMETHYL FUMARATE (Bafiertam)** requires the following rule(s) be met for approval:
   A. You have a relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), or active secondary progressive disease (advanced disease)
   B. You are 18 years of age or older
   C. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications: Zeposia (ozanimod), fingolimod (Gilenya), dimethyl fumarate (Tecfidera), Vumerity (diroximel fumarate), Mayzent (siponimod)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Bafiertam.

MOSUNETUZUMAB-AXGB (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
MOSUNETUZUMAB-AXGB	LUNSUMIO	48556		GPI-10 (2135205010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of relapsed or refractory follicular lymphoma and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has tried two or more lines of systemic therapy

   If yes, **enter TWO approvals by HICL or GPI-10 for a total of 6 months as follows:**
   - **FIRST APPROVAL: Approve for 6 weeks for up to 4 fills with a quantity limit of #60 mL per fill.**
   - **SECOND APPROVAL: Approve for 18 weeks for 6 fills with a quantity limit of #30 mL per fill.**

   If no, do not approve.
   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MOSUNETUZUMAB-AXGB (Lunsumio)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory follicular lymphoma (a type of blood cancer that has returned or did not respond to treatment)
   B. You are 18 years of age or older
   C. You have tried two or more lines of systemic therapy (treatment that targets the entire body)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

MOSUNETUZUMAB-AXGB (NSA)

GUIDELINES FOR USE (CONTINUED)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of relapsed or refractory follicular lymphoma and meet **ALL** of the following criteria?
   - The patient has achieved a partial response to treatment
   - The patient has not previously received more than 17 cycles of treatment

   If yes, **approve for 7 months by HICL OR GPI-10 with a quantity limit of #30 mL per 21 days.**
   If no, do not approve.
   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **MOSUNETUZUMAB-AXGB (Lunsumio)** requires the following rule(s) be met for renewal:
   A. You have relapsed or refractory follicular lymphoma (a type of blood cancer that has returned or does not respond to treatment)
   B. You have achieved a partial response to treatment
   C. You have not previously received more than 17 cycles of treatment

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NAFARELIN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NAFARELIN ACETATE	SYNAREL	21103		GPI-10 (3008005510)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the requested medication being used for gender dysphoria (ICD-10 Group F64)?

   If yes, **approve for 12 months by HICL or GPI-10 (PAC NOTE: Please override the quantity limits coded on the formulary by selecting the "QL Only" override).**
   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe pain associated with endometriosis (ICD-10 Group N80 and R52) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an obstetrician/gynecologist
   - The patient had a trial of or contraindication to the clinical standard of care agents: a nonsteroidal anti-inflammatory drug (NSAID) AND a progestin-containing contraceptive preparation (e.g., combination hormonal contraceptive preparation, progestin-only contraceptive preparation)
   - Synarel will NOT be used concurrently with another GnRH-modulating agent (e.g., Orilissa [elagolix], Myfembree [relugolix-estradiol-norethindrone acetate], Lupron Depot [leuprolide])
   - The patient has NOT received more than 6 months of treatment with Synarel per lifetime

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #96mL per 6 months.**
   If no, continue to #3.

3. Is the request for a female patient who has a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a pediatric endocrinologist
   - The patient has elevated levels of follicle-stimulating hormone (FSH) (level >4.0 mIU/mL) and luteinizing hormone (LH) (level > 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 8 years of age at the onset of CPP
   - The patient has been evaluated for pubertal staging using the Tanner scale for breast development (stage 2 or above) AND pubic hair growth (stage 2 or above)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #32mL per month.**
   If no, continue to #4.

NAFARELIN

INITIAL CRITERIA (CONTINUED)

4. Is the request for a male patient who has a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meets **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - Therapy is prescribed by or in consultation with a pediatric endocrinologist
   - The patient has elevated levels of follicle-stimulating hormone (FSH) (level >5.0 mIU/mL) and luteinizing hormone (LH) (level > 0.2 to 0.3 mIU/mL) at diagnosis
   - The patient is younger than 9 years of age at the onset of CPP
   - The patient has been evaluated for pubertal staging using the Tanner scale for genital development (stage 2 or above) AND pubic hair growth (stage 2 or above)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #32mL per month.** If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NAFARELIN (Synarel)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Gender dysphoria (your gender identity conflicts with your sex assigned at birth)
      2. Moderate to severe pain from endometriosis (condition affecting the uterus)
      3. Central precocious puberty (CPP: early sexual development in girls and boys)

   B. If you have moderate to severe pain from endometriosis, approval also requires:
      1. You are 18 years of age or older
      2. Therapy is prescribed by or in consultation with an obstetrician/gynecologist (a type of women's health doctor)
      3. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medications: a nonsteroidal anti-inflammatory drug (NSAID) AND a progestin- containing contraceptive preparation (such as combination hormonal contraceptive preparation, progestin-only contraceptive preparation)
      4. You are NOT using Synarel concurrently (at the same time) with another gonadotropin-releasing hormone (GnRH)-modulating agent (such as Orilissa [elagolix], Myfembree [relugolix-estradiol-norethindrone acetate], Lupron Depot [leuprolide])
      5. You have NOT received more than 6 months of treatment with Synarel per lifetime

NAFARELIN

INITIAL CRITERIA (CONTINUED)

C. If you are female and have central precocious puberty, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a pediatric endocrinologist (a type of hormone doctor)
3. You have high levels of follicle-stimulating hormone (FSH) (level greater than 4.0 mIU/mL) and luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
4. You are/were younger than 8 years of age when your condition started
5. You have been evaluated for pubertal staging using the Tanner scale (scale of physical measurements of development based on external sex characteristics) for breast development (stage 2 or above) AND pubic hair growth (stage 2 or above)

D. If you are male and have central precocious puberty, approval also requires:
1. You are 2 years of age or older
2. Therapy is prescribed by or in consultation with a pediatric endocrinologist (a type of hormone doctor)
3. You have high levels of follicle-stimulating hormone (FSH) (level greater than 5.0 mIU/mL) and luteinizing hormone (LH) (level greater than 0.2 to 0.3 mIU/mL) at diagnosis
4. You are/were younger than 9 years of age when your condition started
5. You have been evaluated for pubertal staging using the Tanner scale (scale of physical measurements of development based on external sex characteristics) for genital development (stage 2 or above) AND pubic hair growth (stage 2 or above)

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

NAFARELIN

RENEWAL CRITERIA

NOTE: For the diagnoses of gender dysphoria or pain from endometriosis, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of central precocious puberty (CPP) (ICD-10 E30.1) and meet **ALL** of the following criteria?
   - The Tanner scale staging at initial diagnosis of CPP has stabilized or regressed during three separate medical visits in the previous year
   - The patient has NOT reached the actual age which corresponds to their current pubertal age

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #32mL per month.** If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NAFARELIN (Synarel)** requires the following rule(s) be met for renewal:
   A. You have central precocious puberty (CPP: early sexual development in girls and boys)
   B. Your Tanner scale staging (scale of physical measurements of development based on external sex characteristics) at initial diagnosis of CPP has stabilized or regressed (lowered) during three separate medical visits in the previous year
   C. You have NOT reached the actual age which corresponds to your current pubertal age

NALTREXONE HCL/ BUPROPION HCL	CONTRAVE	41389		GPI-10 (6125990250)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Are weight loss products (anti-obesity medications) a covered benefit?

   If yes, continue to #2.
   If no, guideline does not apply.

2. Is the request for weight loss OR weight management (ICD-10 Group E66) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - There is physician attestation of active enrollment in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria prior to initiating weight loss therapy?
   - The patient has a body mass index (BMI) of at least 30 kg/m(2)
   - The patient is Asian and has a BMI of at least 27.5 kg/m(2)
   - The patient has a BMI of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, hyperlipidemia)
   - The patient is Asian, has a BMI of at least 25 kg/m(2), AND has at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, hyperlipidemia)

   If yes, **approve for a total of 4 months by entering TWO approvals by HICL or GPI-10 as follows:**
   - **FIRST APPROVAL: #78 for 30 days.**
   - **SECOND APPROVAL: #4 per day for 3 months (please enter a start date of 3 days BEFORE the end of the first approval).**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Tysabri will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance programs do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #15mL per 28 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Tysabri will be used as monotherapy
   - Tysabri will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of a relapsing form of MS
   - The patient had a trial of or contraindication to the preferred agent: Kesimpta (ofatumumab)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

NATALIZUMAB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NATALIZUMAB (Tysabri)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   2. A relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), or active secondary progressive disease (advanced disease)

B. If you have moderate to severe Crohn's disease, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
   3. You will NOT use Tysabri concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
   4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      b. Skyrizi (risankizumab-rzaa)
      c. Tremfya (guselkumab)
      d. Omvoh (mirikizumab-mrkz)
      e. Adalimumab-ryvk/adalimumab-aaty
      f. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

C. If you have a relapsing form of multiple sclerosis, approval also requires:
   1. You are 18 years of age or older
   2. Tysabri will be used as monotherapy (one drug treatment)
   3. You will NOT use Tysabri concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of a relapsing form of multiple sclerosis (a type of nerve disorder)
   4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Kesimpta (ofatumumab)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

NATALIZUMAB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - Tysabri will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance programs do not qualify]

   If yes, continue to #2.
   If no, continue to #4.

2. Has the patient received at least 12 months of Tysabri therapy **AND** meets the following criterion?
   - The patient has NOT received more than 3 months of corticosteroids within the past 12 months for control of Crohn's disease while on Tysabri

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 28 days.**
   If no, continue to #3.

3. Has the patient received only 6 months of Tysabri therapy **AND** meets the following criterion?
   - The patient is NOT currently on corticosteroids (the patient has tapered off corticosteroids during the first 6 months of Tysabri therapy)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

NATALIZUMAB

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, **AND** meet the following criterion?
   - Tysabri will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of a relapsing form of MS

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 28 days.** If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NATALIZUMAB (Tysabri)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      2. A relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), or active secondary progressive disease (advanced disease)

   B. If you have moderate to severe Crohn's disease, renewal also requires:
      1. You will NOT use Tysabri concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
      2. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
         b. Skyrizi (risankizumab-rzaa)
         c. Tremfya (guselkumab)
         d. Omvoh (mirikizumab-mrkz)
         e. Adalimumab-ryvk/adalimumab-aaty
         f. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

   (Renewal denial text continued on next page)

NATALIZUMAB

RENEWAL CRITERIA (CONTINUED)

3. If you have received at least 12 months of Tysabri therapy, renewal also requires:
   a. You have NOT received more than 3 months of corticosteroids within the past 12 months to control your Crohn's disease while on Tysabri
4. If you have only received 6 months of Tysabri therapy, renewal also requires:
   a. You are NOT currently on corticosteroid therapy (you have slowly lowered the dose and stopped taking corticosteroids during the first 6 months of Tysabri therapy)

C. If you have a relapsing form of multiple sclerosis, renewal also requires:

1. You will NOT use Tysabri concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of a relapsing form of multiple sclerosis (a type of nerve disorder)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Tyruko will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance programs do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #15mL per 28 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Tyruko will be used as monotherapy
   - Tyruko will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of a relapsing form of MS
   - The patient had a trial of or contraindication to the preferred agent: Kesimpta (ofatumumab)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 28 days.**
   If no, do not approve.

NATALIZUMAB-SZTN

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NATALIZUMAB-SZTN (Tyruko)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
   2. A relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), or active secondary progressive disease (advanced disease)

B. If you have moderate to severe Crohn's disease, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
   3. You will NOT use Tyruko concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
   4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
      a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
      b. Skyrizi (risankizumab-rzaa)
      c. Tremfya (guselkumab)
      d. Omvoh (mirikizumab-mrkz
      e. Adalimumab-ryvk/adalimumab-aaty
      f. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

C. If you have a relapsing form of multiple sclerosis, approval also requires:
   1. You are 18 years of age or older
   2. Tyruko will be used as monotherapy (one drug treatment)
   3. You will NOT use Tyruko concurrently (at the same time) with another systemic biologic or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of a relapsing form of multiple sclerosis (a type of nerve disorder)
   4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Kesimpta (ofatumumab)

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

NATALIZUMAB-SZTN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate to severe Crohn's disease (CD) (ICD-10 Group K50) and meet **ALL** of the following criteria?
   - Tyruko will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of CD
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance programs do not qualify]

   If yes, continue to #2.
   If no, continue to #4.

2. Has the patient received at least 12 months of Tyruko therapy **AND** meets the following criterion?
   - The patient has NOT received more than 3 months of corticosteroids within the past 12 months for control of Crohn's disease while on Tyruko

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 28 days.**
   If no, continue to #3.

3. Has the patient received only 6 months of Tyruko therapy **AND** meets the following criterion?
   - The patient is NOT currently on corticosteroids (the patient has tapered off corticosteroids during the first 6 months of Tyruko therapy)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

NATALIZUMAB-SZTN

RENEWAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, **AND** meet the following criterion?
   - Tyruko will NOT be used concurrently with another systemic biologic or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of a relapsing form of MS

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 28 days.** If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NATALIZUMAB-SZTN (Tyruko)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Moderate to severe Crohn's disease (CD: a type of bowel disorder)
      2. A relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), or active secondary progressive disease (advanced disease)

   B. If you have moderate to severe Crohn's disease, renewal also requires:
      1. You will NOT use Tyruko concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of Crohn's disease (a type of bowel disorder)
      2. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
         a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
         b. Skyrizi (risankizumab-rzaa)
         c. Tremfya (guselkumab)
         d. Omvoh (mirikizumab-mrkz)
         e. Adalimumab-ryvk/adalimumab-aaty
         f. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

   (Renewal denial text continued on next page)

NAVEPEGRITIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NAVEPEGRITIDE	YUVIWEL	51182		GPI-10 (3095005500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of achondroplasia (ICD-10 Q77.4) and meet **ALL** of the following criteria?
   - The patient has open epiphyses
   - Therapy is prescribed by or in consultation with an endocrinologist, orthopedist, or medical geneticist
   - Yuviwel will NOT be used concurrently with another C-type natriuretic peptide (CNP) (e.g., Voxzogo [vosoritide]) for the treatment of achondroplasia

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NAVEPEGRITIDE (Yuviwel)** requires the following rule(s) be met for approval:
   A. You have achondroplasia (a type of bone condition)
   B. You have open epiphyses (the end part of a long bone)
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), orthopedist (a type of doctor who specializes in bones, joints, muscles, ligaments, tendons and nerves), or medical geneticist (doctor who treats gene disorders)
   D. You will NOT use Yuviwel concurrently (at the same time) with another C-type natriuretic peptide (CNP) (such as Voxzogo [vosoritide]) for the treatment of achondroplasia (a type of bone condition)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NAVEPEGRITIDE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of achondroplasia (ICD-10 Q77.4) and meet **ALL** of the following criteria?
   - The patient has experienced an improvement in annual growth velocity since baseline
   - The patient's epiphyses remain open
   - Yuviwel will NOT be used concurrently with another C-type natriuretic peptide (CNP) (e.g., Voxzogo [vosoritide]) for the treatment of achondroplasia

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NAVEPEGRITIDE (Yuviwel)** requires the following rule(s) be met for renewal:
   A. You have achondroplasia (a type of bone condition)
   B. You have experienced an improvement in annual growth velocity (rate of growth) since baseline (before treatment with Yuviwel)
   C. Your epiphyses (the end part of a long bone) remain open
   D. You will NOT use Yuviwel concurrently (at the same time) with another C-type natriuretic peptide (CNP) (such as Voxzogo [vosoritide]) for the treatment of achondroplasia (a type of bone condition)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Yuviwel.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

NAXITAMAB-GQGK

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NAXITAMAB-GQGK	DANYELZA	47001		GPI-10 (2135605030)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of relapsed or refractory high-risk neuroblastoma in the bone or bone marrow and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - Danyelza will be used in combination with a granulocyte-macrophage colony-stimulating factor (GM-CSF)
   - The patient has demonstrated a partial response, minor response, or stable disease to prior therapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NAXITAMAB-GQGK (Danyelza)** requires the following rule(s) be met for approval:
   A. You have relapsed or refractory high-risk neuroblastoma in the bone or bone marrow (a type of cancer that has returned or no longer responds to treatment)
   B. You are 1 year of age or older
   C. Danyelza will be used in combination with a granulocyte-macrophage colony-stimulating factor (GM-CSF) (a type of medication used to make more white blood cells)
   D. You have shown a partial response (the cancer partly responded to treatment, but still did not go away), minor response, or stable disease to prior therapy

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Danyelza.

NEDOSIRAN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NEDOSIRAN SODIUM	RIVFLOZA	49234		GPI-10 (5662605060)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of primary hyperoxaluria type 1 (PH1) (ICD-10 E72.53) and meet **ALL** of the following criteria?
   - The patient is 2 years of age or older
   - The patient has relatively preserved kidney function (e.g., eGFR is at least 30mL/min/1.73m[2])

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **80mg/0.5mL: #1mL per 30 days.**
   - **128mg/0.8mL: #0.8mL per 30 days.**
   - **160mg/mL: #1mL per 30 days.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NEDOSIRAN (Rivfloza)** requires the following rule(s) be met for approval:
   A. You have primary hyperoxaluria type 1 (PH1: a type of rare genetic disorder)
   B. You are 2 years of age or older
   C. You have relatively preserved kidney function (such as an estimated glomerular filtration rate [eGFR: a tool for evaluating kidney function] is at least 30mL/min/1.73m[2])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

NEMOLIZUMAB-ILTO

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NEMOLIZUMAB-ILTO	NEMLUVIO	49814		GPI-10 (9079355510)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of prurigo nodularis (PN) (ICD-10 L28.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a dermatologist, immunologist, or allergist
   - The patient has the presence of multiple pruriginous lesions (localized or general)
   - The patient had a trial of or contraindication to ONE of the following clinical standard of care agents: topical capsaicin, topical ketamine/amitriptyline/lidocaine, gabapentinoids (e.g., gabapentin, pregabalin), antidepressants (SNRI, SSRI, TCA), k-/mu-opioid receptor antagonists (e.g., naltrexone, butorphanol), thalidomide, topical corticosteroids, topical calcineurin inhibitors, topical calcipotriol, intralesional corticosteroids, phototherapy, methotrexate, cyclosporine, azathioprine
   - Nemluvio will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PN

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2 per 28 days.**
   If no, continue to #2.

NEMOLIZUMAB-ILTO

INITIAL CRITERIA (CONTINUED)

2. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Nemluvio will be used in combination with a topical corticosteroid (e.g., triamcinolone, clobetasol) and/or calcineurin inhibitor (e.g., tacrolimus, pimecrolimus)
   - Therapy is prescribed by or in consultation with a dermatologist, allergist, or immunologist
   - The patient's disease is not adequately controlled with clinical standard of care topical prescription therapies (e.g., topical corticosteroids [e.g., hydrocortisone, clobetasol propionate, halobetasol propionate], topical PDE-4 inhibitors [e.g., Eucrisa (crisaborole), Adquey (difamilast), Zoryve (roflumilast)], topical AhR agonist [e.g., Vtama (tapinarof)], topical JAK inhibitors [e.g., Opzelura (ruxolitinib)], topical calcineurin inhibitors [e.g., Elidel (pimecrolimus), Protopic (tacrolimus)]), with or without prior phototherapy
   - Nemluvio will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient was previously stable on another biologic (e.g., Dupixent [dupilumab], Adbry [tralokinumab-ldrm]) and is switching to Nemluvio
   - The patient has atopic dermatitis covering at least 10% of body surface area (BSA)
   - The patient has atopic dermatitis affecting the face, head, neck, hands, feet, groin, or intertriginous areas

   If yes, **approve 6 months by HICL or GPI-10 with a quantity limit of #1 per 28 days. (Please enter a one time approval for 1 month with a quantity limit of #2 per 28 days.)**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

NEMOLIZUMAB-ILTO

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: Our guideline named **NEMOLIZUMAB-ILTO (Nemluvio)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Prurigo nodularis (PN: a type of skin condition)
   2. Moderate to severe atopic dermatitis (AD: a type of skin condition)

B. If you have prurigo nodularis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), immunologist (a type of immune system doctor), or allergist (a type of allergy doctor)
   3. You have multiple pruriginous lesions (wounds)
   4. You have tried or have a contraindication to (harmful for you to use) ONE of the following clinical standard of care medications: topical capsaicin, topical ketamine/amitriptyline/lidocaine, gabapentinoids (such as gabapentin, pregabalin), antidepressants (serotonin-norepinephrine reuptake inhibitor [SNRI], selective serotonin reuptake inhibitor [SSRI], tricyclic antidepressant [TCA]), k-/mu-opioid receptor antagonists (such as naltrexone, butorphanol), thalidomide, topical corticosteroids (such as hydrocortisone), topical calcineurin inhibitors (such as Elidel [pimecrolimus]), topical calcipotriol, intralesional corticosteroids, phototherapy (light therapy), methotrexate, cyclosporine, azathioprine
   5. You will NOT use Nemluvio concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of prurigo nodularis (a type of skin condition)

(Initial denial text continued on next page)

NEMOLIZUMAB-ILTO

INITIAL CRITERIA (CONTINUED)

C. If you have moderate to severe atopic dermatitis, approval also requires:

1. You are 12 years of age or older
2. You will use Nemluvio in combination with a topical corticosteroid (such as triamcinolone, clobetasol) and/or calcineurin inhibitor (such as tacrolimus, pimecrolimus)
3. Therapy is prescribed by or in consultation with a dermatologist (a type of skin doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
4. Your disease is not adequately controlled with clinical standard of care topical prescription therapies (such as topical corticosteroids [such as hydrocortisone, clobetasol propionate, halobetasol propionate], topical PDE-4 [phosphodiesterase-4] inhibitors [such as Eucrisa (crisaborole), Adquey (difamilast), Zoryve (roflumilast)], topical aryl hydrocarbon receptor (AhR) agonist [such as Vtama (tapinarof)], topical JAK [Janus kinase] inhibitors [such as Opzelura (ruxolitinib)], topical calcineurin inhibitors [such as Elidel (pimecrolimus), Protopic (tacrolimus)]), with or without prior phototherapy (light therapy)
5. You will NOT use Nemluvio concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis (a type of skin condition)
6. You meet ONE of the following:
   a. You were previously stable on another biologic (such as Dupixent [dupilumab], Adbry [tralokinumab-ldrm]) and are switching to Nemluvio
   b. You have atopic dermatitis (a type of skin condition) covering at least 10% of body surface area (BSA)
   c. You have atopic dermatitis (a type of skin condition) affecting the face, head, neck, hands, feet, groin, or intertriginous areas (areas between skin folds)

NEMOLIZUMAB-ILTO

RENEWAL CRITERIA

1. Does the patient have a diagnosis of prurigo nodularis (PN) (ICD-10 L28.1) and meet **ALL** of the following criteria?
   - The patient has had prurigo nodularis improvement (reduction) of pruritus or pruriginous lesions
   - Nemluvio will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of PN

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per 28 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of moderate to severe atopic dermatitis (AD) (ICD-10 Group L20) and meet **ALL** of the following criteria?
   - The patient has shown improvement while on Nemluvio
   - Nemluvio will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor [e.g., Eucrisa (crisaborole)]) for the treatment of AD

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per 28 days.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: Our guideline named **NEMOLIZUMAB-ILTO (Nemluvio)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Prurigo nodularis (PN: a type of skin condition)
      2. Moderate to severe atopic dermatitis (AD: a type of skin condition)

   B. If you have prurigo nodularis, renewal also requires:
      1. You have had prurigo nodularis improvement or reduction of pruritus (itching) or pruriginous lesions (wounds)
      2. You will NOT use Nemluvio concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of prurigo nodularis (a type of skin condition)

   C. If you have moderate to severe atopic dermatitis, renewal also requires:
      1. You have shown improvement while on Nemluvio
      2. You will NOT use Nemluvio concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor [such as Eucrisa (crisaborole)]) for the treatment of atopic dermatitis (a type of skin condition)

NERANDOMILAST

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NERANDOMILAST	JASCAYD	50937		GPI-10 (4555505000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of idiopathic pulmonary fibrosis (IPF) (ICD-10 J84.112) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a pulmonologist
   - The patient has a usual interstitial pneumonia (UIP) pattern as evidenced by high-resolution computed tomography (HRCT) alone or via a combination of surgical lung biopsy and HRCT
   - The patient does NOT have other known causes of interstitial lung disease (ILD) (e.g., connective tissue disease, drug toxicity, asbestos or beryllium exposure, hypersensitivity pneumonitis, systemic sclerosis, rheumatoid arthritis, radiation, sarcoidosis, bronchiolitis obliterans organizing pneumonia, human immunodeficiency virus [HIV] infection, viral hepatitis, cancer)
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Ofev (nintedanib), pirfenidone (Esbriet)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of progressive pulmonary fibrosis (PPF) (ICD-10 J84.170) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a pulmonologist or rheumatologist
   - The patient has interstitial lung disease with a progressive phenotype (trait) (PF-ILD)
   - The patient's lung function and respiratory symptoms OR chest imaging have worsened/progressed despite treatment with medications used in clinical practice for ILD (not attributable to comorbidities [e.g., infection, heart failure])
   - The patient has at least 10% fibrosis on a chest high resolution computed tomography (HRCT) (e.g., defined as reticular abnormality with traction bronchiectasis with or without honeycombing)
   - The patient had a trial of or contraindication to the preferred agent: Ofev (nintedanib)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

NERANDOMILAST

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NERANDOMILAST (Jascayd)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Idiopathic pulmonary fibrosis (IPF: a type of lung condition)
   2. Progressive pulmonary fibrosis (PPF: a type of lung condition with gradual scarring of the lungs)

B. If you have idiopathic pulmonary fibrosis, approval also requires:
   1. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor)
   2. You have a usual interstitial pneumonia (UIP) pattern (a specific type of lung scarring) as shown by high-resolution computed tomography (HRCT: type of imaging test) alone or by a combination of surgical lung biopsy (removal of cells or tissue from the lung for examination) and HRCT
   3. You do NOT have other known causes of interstitial lung disease (ILD: a type of lung condition) (such as connective tissue disease [a type of autoimmune disorder], drug toxicity, asbestos [a type of mineral that can be toxic] or beryllium [a type of metal that can be toxic] exposure, hypersensitivity pneumonitis [a type of lung condition], systemic sclerosis [a type of autoimmune disorder], rheumatoid arthritis [a type of joint condition], radiation, sarcoidosis [a type of inflammatory disorder], bronchiolitis obliterans organizing pneumonia [a type of lung condition], human immunodeficiency virus infection [HIV: an immune system disease caused by a virus], viral hepatitis [a type of liver inflammation], cancer)
   4. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Ofev (nintedanib), pirfenidone (Esbriet)

(Initial denial text continued on next page)

NERATINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NERATINIB MALEATE	NERLYNX	44421		GPI-10 (2153303510)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of early stage (stage I-III) breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumor is HER2-positive
   - Nerlynx will be used as extended adjuvant therapy following trastuzumab based therapy
   - Nerlynx is being requested within 2 years after completing last trastuzumab dose

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #180 per 30 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of advanced or metastatic breast cancer (ICD-10 C79.81, Group C50) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumor is HER2-positive
   - Nerlynx will be used in combination with capecitabine
   - The patient has received two or more prior anti-HER2 based regimens in the metastatic setting

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #180 per 30 days.**
   If no, do not approve.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient's cancer newly diagnosed (e.g., starting or previously started nilotinib treatment at the time of diagnosis) and the patient meets **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient's cancer is in chronic phase

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day**.
   If no, continue to #3.

3. Has the patient's cancer been previously treated and the patient meets **ALL** of the following criteria?
   - The patient's cancer is in chronic phase or accelerated phase
   - The patient had a mutational analysis prior to initiation AND the requested medication is appropriate per the NCCN guideline table for treatment recommendations based on BCR-ABL1 mutation profile *(Please see header CML-5 of the current NCCN guidelines)*

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

NILOTINIB

GUIDELINES FOR USE (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient is 1 to 17 years of age AND is resistant or intolerant to prior therapy with other tyrosine kinase inhibitors (TKI) [e.g., Gleevec (imatinib), Sprycel (dasatinib), Bosulif (bosutinib)]
   - The patient is 18 years of age or older AND is resistant or intolerant to prior therapy that included imatinib (Gleevec)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NILOTINIB (Tasigna, Danziten)** requires the following rule(s) be met for approval:
   A. You have Philadelphia chromosome-positive chronic myeloid leukemia (Ph+ CML: a type of blood cell cancer)
   B. If your cancer is newly diagnosed (such as you are starting or previously started nilotinib treatment at the time your condition was identified), approval also requires:
      1. You are 1 year of age or older
      2. Your cancer is in chronic phase
   C. If your cancer has been previously treated, approval also requires:
      1. Your cancer is in chronic phase or accelerated phase
      2. You meet ONE of the following:
         a. You are 1 to 17 years of age AND you are resistant (not responding to treatment) or intolerant (side effect) to prior treatment with other tyrosine kinase inhibitors (TKIs, such as Gleevec [imatinib], Sprycel [dasatinib], Bosulif [bosutinib])
         b. You are 18 years of age or older AND you are resistant or intolerant to prior treatment that included Gleevec (imatinib)
      3. You had a mutational analysis (a type of lab test) prior to the start of treatment AND the requested medication is appropriate per the National Comprehensive Cancer Network (NCCN) guideline table for treatment recommendations based on BCR-ABL1 mutation (breakpoint cluster region-Abelson murine leukemia 1: a type of abnormal gene) profile

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

NIMODIPINE SOLUTION

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NIMODIPINE	NYMALIZE, NIMODIPINE		34794 47984 47985 48405	GPI-14 (34000022002050) (34000022002054)	

GUIDELINES FOR USE

1. Does the patient have a history of subarachnoid hemorrhage (SAH) (ICD-10 I60.7) and meet **ALL** of the following criteria?
- The patient is 18 years of age or older
- The patient's SAH is from a ruptured intracranial berry aneurysm within the past 21 days
- The patient has a contraindication to or is unable to swallow generic nimodipine capsules

If yes, **approve the requested strength for 1 fill by GPID or GPI-14 up to a maximum 21-day supply with the following quantity limits:**
- **60mg/20mL: #120mL per day.**
- **30mg/5mL: #60mL per day.**
- **60mg/10mL: #60mL per day.**

If no, do not approve.

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NIMODIPINE SOLUTION (Nymalize)** requires the following rule(s) be met for approval:
A. You have a history of a subarachnoid hemorrhage (SAH: bleeding in the space surrounding your brain)
B. You are 18 years of age or older
C. Your subarachnoid hemorrhage (SAH: bleeding in the space surrounding your brain) is from a ruptured intracranial berry aneurysm (part of blood vessel in your brain has expanded and burst) within the past 21 days
D. You have a contraindication to (harmful for you to use) or are unable to swallow generic nimodipine capsules

RATIONALE

NINTEDANIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NINTEDANIB ESYLATE	OFEV	41489		GPI-10 (4555405020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of idiopathic pulmonary fibrosis (IPF) (ICD-10 J84.112) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a pulmonologist
   - The patient has a usual interstitial pneumonia (UIP) pattern as evidenced by high-resolution computed tomography (HRCT) alone or via a combination of surgical lung biopsy and HRCT
   - The patient does NOT have other known causes of interstitial lung disease (ILD) (e.g., connective tissue disease, drug toxicity, asbestos or beryllium exposure, hypersensitivity pneumonitis, systemic sclerosis, rheumatoid arthritis, radiation, sarcoidosis, bronchiolitis obliterans organizing pneumonia, human immunodeficiency virus [HIV] infection, viral hepatitis, cancer)
   - Ofev will NOT be used concurrently with Esbriet

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, continue to #2.

2. Does the patient have a diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81) and meet **ALL** of the following criteria?
   - The patient has a diagnosis of Systemic Sclerosis (SSc) according to the American College of Rheumatology (ACR) and European League Against Rheumatism (EULAR)
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a pulmonologist or rheumatologist
   - The patient has at least 10% fibrosis on a chest high resolution computed tomography (HRCT)
   - The patient has a baseline forced vital capacity (FVC) of at least 40% of predicted value
   - The patient does NOT have other etiologies of interstitial lung disease (ILD) (e.g., heart failure/fluid overload, drug-induced lung toxicity [cyclophosphamide, methotrexate, ACE-inhibitors], recurrent aspiration [such as from GERD], pulmonary vascular disease, pulmonary edema, pneumonia, chronic pulmonary thromboembolism, alveolar hemorrhage, ILD caused by another rheumatic disease such as mixed connective tissue disease [MCTD])

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, continue to #3.

NINTEDANIB

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of chronic fibrosing interstitial lung disease with a progressive phenotype (PF-ILD) (ICD-10 J84.170) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a pulmonologist or rheumatologist
   - The patient's lung function and respiratory symptoms OR chest imaging have worsened/progressed despite treatment with medications used in clinical practice for ILD (not attributable to comorbidities [e.g., infection, heart failure])
   - The patient has at least 10% fibrosis on a chest high resolution computed tomography (HRCT) (e.g., defined as reticular abnormality with traction bronchiectasis with or without honeycombing)
   - Ofev will NOT be used concurrently with Esbriet

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NINTEDANIB (Ofev)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Idiopathic pulmonary fibrosis (IPF: a type of lung condition)
      2. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: disorder that causes hardening of lung tissue)
      3. Chronic fibrosing interstitial lung disease with a progressive phenotype (PF-ILD: a type of lung condition with scarring of the lungs caused by different underlying diseases/conditions that worsen over time)

   B. If you have idiopathic pulmonary fibrosis, approval also requires:
      1. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor)
      2. You have a usual interstitial pneumonia pattern (UIP: a specific type of lung scarring) as shown by high-resolution computed tomography (HRCT: type of imaging test) alone or by a combination of surgical lung biopsy (removal of cells or tissue from the body for examination) and HRCT
      3. You do NOT have other known causes of interstitial lung disease (ILD: a type of lung condition) (such as connective tissue disease [a type of autoimmune disorder], drug toxicity, asbestos [a type of mineral that can be toxic] or beryllium [a type of metal that can be toxic] exposure, hypersensitivity pneumonitis [type of lung condition], systemic sclerosis [a type of autoimmune disorder], rheumatoid arthritis [a type of joint condition], radiation, sarcoidosis [a type of inflammatory disorder], bronchiolitis obliterans organizing pneumonia [a type of lung condition], human immunodeficiency virus [HIV: an immune system disease caused by a virus] infection, viral hepatitis [a type of liver inflammation], cancer)
      4. You will NOT use Ofev concurrently (at the same time) with Esbriet

   (Initial denial text continued on next page)

CONTINUED ON NEXT PAGE

NINTEDANIB

INITIAL CRITERIA (CONTINUED)

C. If you have systemic sclerosis-associated interstitial lung disease, approval also requires:

1. You have Systemic Sclerosis (SSc) according to the American College of Rheumatology (ACR) and European League Against Rheumatism (EULAR)
2. You are 18 years of age or older
3. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or rheumatologist (a type of immune system doctor)
4. You have at least 10 percent fibrosis (tissue scarring) on a chest high resolution computed tomography (HRCT: type of imaging testing)
5. You have a baseline (before treatment) forced vital capacity (FVC: amount of air that can be forcefully exhaled) of at least 40 percent of predicted value
6. You do NOT have other causes of interstitial lung disease (ILD: a type of lung condition) (such as heart failure/fluid overload, drug-induced lung toxicity [cyclophosphamide, methotrexate, ACE-inhibitors [class of blood pressure medications], recurrent aspiration [inhaling] such as from GERD [acid reflux], pulmonary vascular disease [affecting blood vessels in lungs], pulmonary edema [excess fluid in the lungs], pneumonia [type of lung infection], chronic pulmonary thromboembolism [blood clot in lungs], alveolar hemorrhage [bleeding of a part of the lungs], interstitial lung disease caused by another rheumatic [inflammatory] disease such as mixed connective tissue disease [MCTD])

D. If you have chronic fibrosing interstitial lung disease with a progressive phenotype, approval also requires:

1. Therapy is prescribed by or in consultation with a pulmonologist (lung/breathing doctor) or rheumatologist (a type of immune system doctor)
2. Your lung function and respiratory (breathing) symptoms OR chest imaging have worsened/progressed despite treatment with medications used in clinical practice for interstitial lung disease (not caused by comorbidities [additional health conditions] such as infection, heart failure)
3. You have at least 10 percent fibrosis (tissue scarring) on a chest high resolution computed tomography (HRCT: type of imaging testing) (such as reticular abnormality [a specific pattern on imaging studies] with traction bronchiectasis [a condition where your lungs' airway becomes damaged, widened, and thickened] with or without honeycombing)
4. You will NOT use Ofev concurrently (at the same time) with Esbriet

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NINTEDANIB

RENEWAL CRITERIA

1. Does the patient have **ONE** of the following diagnoses?
   - Idiopathic pulmonary fibrosis (IPF) (ICD-10 J84.112)
   - Chronic fibrosing interstitial lung disease with a progressive phenotype (PF-ILD) (ICD-10 J84.170)

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ALL** of the following criteria?
   - The patient has experienced a clinically meaningful improvement or maintenance in annual rate of decline
   - Ofev will NOT be used concurrently with Esbriet

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Does the patient have a diagnosis of systemic sclerosis-associated interstitial lung disease (SSc-ILD) (ICD-10 M34.81) **AND** meet the following criterion?
   - The patient has experienced a clinically meaningful improvement or maintenance in annual rate of decline

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NINTEDANIB (Ofev)** requires the following rule(s) be met for renewal:
   A. You have ONE of the following:
      1. Idiopathic pulmonary fibrosis (IPF: a type of lung condition)
      2. Systemic sclerosis-associated interstitial lung disease (SSc-ILD: disorder that causes hardening of lung tissue)
      3. Chronic fibrosing interstitial lung disease with a progressive phenotype (PF-ILD: a type of lung condition with scarring of the lungs caused by different underlying diseases/conditions that worsen over time)

   (Renewal denial text continued on next page)

NINTEDANIB

RENEWAL CRITERIA (CONTINUED)

B. If you have idiopathic pulmonary fibrosis or chronic fibrosing interstitial lung disease with a progressive phenotype, renewal also requires:
1. You have experienced a clinically meaningful improvement or maintenance in annual rate of decline
2. You will NOT use Ofev concurrently (at the same time) with Esbriet

C. If you have systemic sclerosis-associated interstitial lung disease, renewal also requires:
1. You have experienced a clinically meaningful improvement or maintenance in annual rate of decline

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

NIPOCALIMAB-AAHU

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NIPOCALIMAB-AAHU	IMAAVY	50526		GPI-10 (9939825501)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient's diagnosis is confirmed by a positive serologic test for anti-acetylcholine receptor antibody (AChR-Ab+) OR anti-muscle-specific tyrosine kinase antibody (MuSK-Ab+)
   - The patient is Myasthenia Gravis Foundation of America class II, III, or IV
   - The patient had a trial of or contraindication to the clinical standard of care agent: ONE corticosteroid (e.g., prednisone)
   - Imaavy will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]), complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (e.g., Uplizna [inebilizumab-cdon]) for the treatment of gMG

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to the clinical standard of care agents: TWO non-steroidal immunosuppressive therapies (e.g., azathioprine, cyclophosphamide, methotrexate)
   - The patient had a trial of or contraindication to the clinical standard of care agent: ONE non-steroidal immunosuppressive therapy if on chronic plasmapheresis or plasma exchange

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient is 12 to 17 years of age
   - The patient is 18 years of age or older AND had a trial of or contraindication to ONE of the following preferred agents: Rystiggo (rozanolixizumab-noli), Vyvgart (efgartigimod alfa- fcab)/Vyvgart Hytrulo (efgartigimod-hyaluronidase-qvfc)

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

NIPOCALIMAB-AAHU

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of warm autoimmune hemolytic anemia (wAIHA) (ICD-10 D59.11) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient is currently being treated with or has previously been treated with corticosteroids (e.g., prednisone)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NIPOCALIMAB-AAHU (Imaavy)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
      2. Warm autoimmune hemolytic anemia (wAIHA: a rare blood disorder)

   B. If you have generalized myasthenia gravis, approval also requires:
      1. You are 12 years of age or older
      2. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
      3. Your diagnosis is confirmed by a positive serologic test (a type of blood test) for anti-acetylcholine receptor antibody (AChR-Ab+: an indicator of myasthenia gravis) OR anti-muscle-specific tyrosine kinase antibody (MuSK-Ab+: an indicator of myasthenia gravis)
      4. You have Myasthenia Gravis Foundation of America class II, III, or IV (types of severity of disease)
      5. You have tried or have a contraindication to (harmful for you to use) the clinical standard of care medication: ONE corticosteroid (such as prednisone)
      6. You will NOT use Imaavy concurrently (at the same time) with another neonatal Fc receptor blocker (such as Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]), complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (such as Uplizna [inebilizumab-cdon]) for the treatment of generalized myasthenia gravis

   (Initial denial text continued on the next page)

NIPOCALIMAB-AAHU

RENEWAL CRITERIA

NOTE: For the diagnosis of warm autoimmune hemolytic anemia (wAIHA), please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of generalized myasthenia gravis (gMG) (ICD-10 Group G70.0) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline according to validated gMG instruments (e.g., Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   - Imaavy will NOT be used concurrently with another neonatal Fc receptor blocker (e.g., Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]), complement inhibitor (e.g., Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (e.g., Uplizna [inebilizumab-cdon]) for the treatment of gMG

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NIPOCALIMAB-AAHU (Imaavy)** requires the following rule(s) be met for renewal:
   A. You have generalized myasthenia gravis (gMG: a chronic autoimmune disorder)
   B. You have shown a clinical benefit compared to baseline according to validated gMG instruments (such as Myasthenia Gravis Activities of Daily Living tool, Quantitative Myasthenia Gravis tool)
   C. You will NOT use Imaavy concurrently (at the same time) with another neonatal Fc receptor blocker (such as Vyvgart [efgartigimod alfa-fcab], Rystiggo [rozanolixizumab-noli]), complement inhibitor (such as Soliris [eculizumab], Zilbrysq [zilucoplan]), or CD-19 antibody (such as Uplizna [inebilizumab-cdon]) for the treatment of generalized myasthenia gravis

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

NIRAPARIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NIRAPARIB TOSYLATE	ZEJULA	44177		GPI-10 (2153555020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of epithelial ovarian, fallopian tube, or primary peritoneal cancer (ICD-10 Groups C56, C57.0, C48, C79.6) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the cancer advanced and does the patient meet **ALL** of the following criteria?
   - The patient is in complete or partial response to first-line platinum-based chemotherapy (e.g., cisplatin, carboplatin)
   - The patient's cancer is associated with homologous recombination deficiency (HRD)-positive status as defined by either a deleterious or suspected deleterious BRCA mutation, and/or genomic instability

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #3.

3. Is the cancer recurrent and does the patient meet **ALL** of the following criteria?
   - The patient's cancer has a deleterious or suspected deleterious germline BRCA-mutation (gBRCAmut), based on an FDA-approved companion diagnostic for Zejula
   - The patient has completed at least TWO lines of platinum-based chemotherapy (e.g., cisplatin, carboplatin)
   - The patient is in complete or partial response to platinum-based chemotherapy (e.g., cisplatin, carboplatin)
   - Zejula will be started no later than 8 weeks after the patient's most recent platinum-containing regimen

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

NIRAPARIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NIRAPARIB (Zejula)** requires the following rule(s) be met for approval:

A. You have advanced (has spread to other parts of the body) or recurrent (has returned) epithelial ovarian, fallopian tube, or primary peritoneal cancer (types of reproductive system or abdomen cancers)

B. If you have advanced epithelial ovarian, fallopian tube, or primary peritoneal cancer, approval also requires:

1. You are 18 years of age or older
2. You are in complete or partial response (cancer is not detectable or has partly responded to treatment but still did not go away) to first-line platinum-based chemotherapy (such as cisplatin, carboplatin)
3. Your cancer is associated with homologous recombination deficiency (HRD: a type of gene mutation)-positive status as defined by either a deleterious or suspected deleterious BRCA mutation (a type of gene mutation), and/or genomic instability (high rate of gene mutation)

C. If you have recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer, approval also requires:

1. You are 18 years of age or older
2. Your cancer has a deleterious or suspected deleterious germline BRCA-mutation (gBRCAmut: a type of gene mutation [abnormal change]) based on a Food and Drug Administration (FDA)-approved companion diagnostic for Zejula
3. You have completed at least TWO lines of platinum-based chemotherapy (such as cisplatin, carboplatin)
4. You are in complete or partial response (cancer is not detectable or has partly responded to treatment but still did not go away) to platinum-based chemotherapy (such as cisplatin, carboplatin)
5. Zejula will be started no later than 8 weeks after your most recent platinum-containing regimen (such as cisplatin, carboplatin)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Zejula.

PRIOR AUTHORIZATION GUIDELINES

NIRAPARIB-ABIRATERONE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NIRAPARIB-ABIRATERONE	AKEEGA	49143		GPI-10 (2140990212)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic castration-resistant prostate cancer (mCRPC) (ICD-10 Z19.2, C61) and meet **ALL** of the following criteria?
   - The patient's cancer has a deleterious or suspected deleterious BRCA mutation (BRCAm) based on an FDA-approved test for Akeega
   - Akeega will be used in combination with an oral corticosteroid (e.g., prednisone, prednisolone, methylprednisolone)

   If yes, continue to #3.
   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic castration-sensitive prostate cancer (mCSPC) (ICD-10 Z19.1, C61) and meet **ALL** of the following criteria?
   - The patient's cancer has a deleterious or suspected deleterious BRCA2 mutation (BRCA2m) based on an FDA-approved test for Akeega
   - Akeega will be used in combination with an oral corticosteroid (e.g., prednisone, prednisolone, methylprednisolone)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - The patient had a bilateral orchiectomy
   - The patient has a castrate level of testosterone (i.e., less than 50 ng/dL)
   - Akeega will be used concurrently with a gonadotropin-releasing hormone (GnRH) analog (e.g., Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

NIRAPARIB-ABIRATERONE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NIRAPARIB-ABIRATERONE (Akeega)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Metastatic castration-resistant prostate cancer (mCRPC: prostate cancer that has spread to other parts of the body and no longer responds to testosterone lowering treatment)
   2. Metastatic castration-sensitive prostate cancer (mCSPC: prostate cancer that has spread to other parts of the body and responds to hormone therapy)

B. If you have metastatic castration-resistant prostate cancer, approval also requires:
   1. Your cancer has a deleterious (harmful) or suspected deleterious BRCA mutation (BRCAm: abnormal change in gene) based on a Food and Drug Administration (FDA)-approved test for Akeega
   2. Akeega will be used in combination with an oral corticosteroid (such as prednisone, prednisolone, methylprednisolone)
   3. You meet ONE of the following:
      a. You had a bilateral orchiectomy (both testicles have been surgically removed)
      b. You have a castrate level of testosterone (your blood testosterone levels are less than 50 ng/dL)
      c. Akeega will be used together with a gonadotropin-releasing hormone (GnRH) analog (such as Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

C. If you have metastatic castration-sensitive prostate cancer, approval also requires:
   1. Your cancer has a deleterious (harmful) or suspected deleterious BRCA2 mutation (BRCA2m: abnormal change in gene) based on a Food and Drug Administration (FDA)- approved test for Akeega
   2. Akeega will be used in combination with an oral corticosteroid (such as prednisone, prednisolone, methylprednisolone)
   3. You meet ONE of the following:
      a. You had a bilateral orchiectomy (both testicles have been surgically removed)
      b. You have a castrate level of testosterone (your blood testosterone levels are less than 50 ng/dL)
      c. Akeega will be used together with a gonadotropin-releasing hormone (GnRH) analog (such as Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NIROGACESTAT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NIROGACESTAT HYDROBROMIDE	OGSIVEO	49323		GPI-10 (2153235020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of progressing desmoid tumors (ICD-10 Group D48.11) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient requires systemic treatment

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **50mg: #6 per day.**
   - **100mg: #2 per day.**
   - **150mg: #2 per day.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NIROGACESTAT (Ogsiveo)** requires the following rule(s) be met for approval:
   A. You have progressing desmoid tumors (noncancerous growths in the connective tissue)
   B. You are 18 years of age or older
   C. You require systemic treatment (treatment that targets the entire body)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Ogsiveo.

PRIOR AUTHORIZATION GUIDELINES

NIRSEVIMAB-ALIP (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NIRSEVIMAB-ALIP	BEYFORTUS	49077		GPI-10 (1950205205)	

GUIDELINES FOR USE

1. Is the request for the prevention of respiratory syncytial virus (RSV) lower respiratory tract disease and the patient meets **ONE** of the following criteria?
   - The patient is less than 12 months of age (neonate or infant) and born during or entering their first RSV season
   - The patient is 12 to 24 months of age and remains vulnerable to severe RSV disease

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has not completed a course of Synagis (palivizumab) and will not receive further doses of Synagis within the same RSV season
   - The patient has not received a dose of Synagis in the past 30 days, and will not receive further doses of Synagis within the same RSV season

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Has the patient received 2 doses of Beyfortus in their lifetime?

   If yes, continue to #4.
   If no, continue to #7.

4. Has the patient undergone or will undergo cardiac surgery with cardiopulmonary bypass?

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Is the patient requesting a zero-dollar cost share exception (i.e., the plan follows Affordable Care Act [ACA] recommendations and is linked to MedImpact's Essential Health Benefit Tables)?

   If yes, continue to #6.
   If no, **approve for 6 months by HICL or GPI-10 for 1 fill.**

NIRSEVIMAB-ALIP (NSA)

GUIDELINES FOR USE (CONTINUED)

6. Is the patient 19 months of age or younger?

   If yes, **approve for 6 months by GPID or GPI-14 at zero copay for a total of 1 fill for the requested strength as follows:**
   - **50mg/0.5mL: #0.5 mL.**
   - **100mg/1mL: #2 mL.**

   If no, **approve for 6 months by HICL or GPI-10 for 1 fill.**

7. Is the patient requesting a zero-dollar cost share exception (i.e., the plan follows Affordable Care Act [ACA] recommendations and is linked to MedImpact's Essential Health Benefit Tables)?

   If yes, continue to #9.
   If no, continue to #8.

8. Has the patient undergone or will undergo cardiac surgery with cardiopulmonary bypass?

   If yes, **approve for 6 months by HICL or GPI-10 for 2 fills.**
   If no, **approve for 6 months by HICL or GPI-10 for 1 fill.**

9. Is the patient 19 months of age or younger?

   If yes, **approve for 6 months by GPID or GPI-14 at zero copay for a total of 1 fill for the requested strength as follows:**
   - **50mg/0.5mL: #0.5 mL.**
   - **100mg/1mL: #2 mL.**

   If no, continue to #10.

10. Has the patient undergone or will undergo cardiac surgery with cardiopulmonary bypass?

    If yes, **approve for 6 months by HICL or GPI-10 for 2 fills.**
    If no, **approve for 6 months by HICL or GPI-10 for 1 fill.**

NIRSEVIMAB-ALIP (NSA)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NIRSEVIMAB-ALIP (Beyfortus)** requires the following rule(s) be met for approval:

A. Beyfortus will be used for the prevention of respiratory syncytial virus (RSV: a type of lung and respiratory tract infection)
B. You meet ONE of the following:
   1. You are less than 12 months of age (neonate or infant), and you were born during or are entering your first RSV season (period of increased rate of infection)
   2. You are 12 to 24 months of age and are vulnerable to (at risk of) severe RSV disease
C. You have NOT completed a course of Synagis (palivizumab) within this RSV season or you have not received a dose of Synagis in the past 30 days, AND you will not receive further doses of Synagis within this RSV season
D. You have not received more than 2 doses of Beyfortus in your lifetime, unless you have undergone or will undergo a cardiac surgery with cardiopulmonary bypass (a type of heart and lung surgery)
E. Requests for zero dollar cost share also requires that you are 19 months of age or younger

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Beyfortus.

NITISINONE	ORFADIN, NITYR, NITISINONE	23253		GPI-10 (3090404500)	BRAND ≠ HARLIKU

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary tyrosinemia type 1 (HT-1) (ICD-10 E70.21) and meet **ALL** of the following criteria?
   - The patient has elevated urinary or plasma succinylacetone (SA) levels OR a mutation in the fumarylacetoacetate hydrolase (FAH) gene
   - Therapy is prescribed by or in consultation with a prescriber specializing in inherited metabolic diseases
   - The patient has been counseled on maintaining dietary restriction of tyrosine and phenylalanine

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the request for generic nitisinone capsules?

   If yes, **approve all strengths of generic nitisinone capsules for 6 months by GPID-G or GPI-14-G.**

   If no, continue to #3.

3. Is the request for Nityr tablets **AND** the patient meets the following criterion?
   - The patient had a trial of or contraindication to generic nitisinone capsules

   If yes, **approve for 6 months by NDC for all strengths or by GPI-10.**
   If no, continue to #4.

4. Is the request for brand Orfadin capsules or Orfadin oral suspension, **AND** the patient meets the following criterion?
   - The patient had a trial of or contraindication to generic nitisinone capsules

   If yes, **approve the requested formulation for 6 months by GPID for all strengths or by GPI-10.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

NITISINONE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NITISINONE (Orfadin, Nityr)** requires the following rule(s) be met for approval:

A. You have hereditary tyrosinemia type 1 (HT-1: a type of genetic disorder)
B. You have elevated urinary or plasma succinylacetone levels (a chemical that is present in hereditary tyrosinemia) OR a mutation (abnormal change) in the fumarylacetoacetate hydrolase gene
C. Therapy is prescribed by or in consultation with a prescriber specializing in inherited metabolic diseases
D. You have been counseled on maintaining dietary restriction of tyrosine and phenylalanine
E. If you are requesting Nityr tablets; brand Orfadin capsules; or Orfadin oral suspension, approval also requires:
    1. You have tried or have a contraindication to (harmful for you to use) generic nitisinone capsules

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NITISINONE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary tyrosinemia type 1 (HT-1) (ICD-10 E70.21) **AND** meet the following criterion?
- The patients urinary or plasma succinylacetone (SA) levels have decreased from baseline while on treatment with nitisinone.

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the renewal request for generic nitisinone capsules?

If yes, **approve all strengths of generic nitisinone capsules for 12 months by GPID-G or GPI-14-G.**

If no, continue to #3.

3. Is the renewal request for Nityr tablets?

If yes, **approve for 12 months by NDC for all strengths or by GPI-10.**
If no, continue to #4.

4. Is the renewal request for brand Orfadin capsules or Orfadin oral suspension?

If yes, **approve the requested formulation for 12 months by GPID for all strengths or by GPI-10.**

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NITISINONE (Orfadin, Nityr)** requires the following rule(s) be met for renewal:
A. You have hereditary tyrosinemia type 1 (HT-1: a type of genetic disorder)
B. Your urinary or plasma succinylacetone levels (a chemical that is present in hereditary tyrosinemia) have decreased from baseline while on treatment with nitisinone

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NIVOLUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NIVOLUMAB	OPDIVO	41654		GPI-10 (2135794100)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Opdivo will be used as a single agent OR in combination with Yervoy (ipilimumab)
   - Opdivo will NOT be used concurrently with targeted therapy (i.e., BRAF inhibitors [Braftovi (encorafenib), Tafinlar (dabrafenib)], MEK inhibitors [Mekinist (trametinib)], and NTRK inhibitors [Vitrakvi (larotrectinib), Rozlytrek (entrectinib)])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of stage IIB, IIC, III, or IV melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient has undergone complete resection
   - Opdivo will be used as an adjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of resectable (node positive or tumor is 4 cm or greater) non- small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #4.
   If no, continue to #6.

4. Will Opdivo be used in combination with platinum-doublet chemotherapy (e.g., carboplatin/paclitaxel, cisplatin/pemetrexed, cisplatin/gemcitabine) as neoadjuvant treatment only?

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

NIVOLUMAB

GUIDELINES FOR USE (CONTINUED)

5. Does the patient meet **ALL** of the following criteria?
   - The patient's cancer has no known epidermal growth factor receptor (EGFR) mutations or anaplastic lymphoma kinase (ALK) rearrangements
   - Opdivo will be used in combination with platinum-doublet chemotherapy (e.g., carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment, OR as a single agent as adjuvant treatment after surgery and prior use with platinum-doublet chemotherapy as neoadjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #7.
   If no, continue to #10.

7. Does the patient's tumors express PD-L1 (at least 1 percent), as determined by an FDA-approved test, and meet **ALL** of the following criteria?
   - The tumor does NOT have EGFR or ALK genomic tumor aberrations
   - Opdivo will be used in combination with Yervoy (ipilimumab)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #8.

8. Will Opdivo be used in combination with Yervoy (ipilimumab) and 2 cycles of platinum-doublet chemotherapy (e.g., carboplatin/pemetrexed, cisplatin/pemetrexed, carboplatin/paclitaxel) **AND** the patient meets the following criterion?
   - The tumor does NOT have EGFR or ALK genomic tumor aberrations

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #9.

GUIDELINES FOR USE (CONTINUED)

9. Has the patient's disease progressed while on or after platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin) and the patient meets **ONE** of the following criteria?
   - The tumor does NOT have EGFR or ALK genomic tumor aberrations
   - The tumor has an ALK mutation, and the patient had disease progression following an FDA- approved ALK-directed therapy (e.g., Xalkori [crizotinib], Zykadia [ceritinib])
   - The tumor has an EGFR mutation, and the patient had disease progression following an FDA- approved EGFR-directed therapy (e.g., Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

10. Does the patient have a diagnosis of recurrent non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The tumor does NOT have EGFR or ALK genomic tumor aberrations
    - Opdivo will be used in combination with Yervoy (ipilimumab) AND 2 cycles of platinum-doublet chemotherapy (e.g., carboplatin/pemetrexed, cisplatin/pemetrexed, carboplatin/paclitaxel)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #11.

11. Does the patient have a diagnosis of unresectable malignant pleural mesothelioma (ICD-10 C45.0) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo will be used in combination with Yervoy (ipilimumab)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #12.

12. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #13.
    If no, continue to #14.

NIVOLUMAB

GUIDELINES FOR USE (CONTINUED)

13. Does the patient meet **ONE** of the following criteria?
    - The patient has intermediate or poor risk disease AND Opdivo will used in combination with Yervoy (ipilimumab)
    - Opdivo will be used in combination with Cabometyx (cabozantinib)
    - The patient has received prior anti-angiogenic therapy (e.g., Sutent [sunitinib], Votrient [pazopanib], Cabometyx [cabozantinib])

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

14. Does the patient have a diagnosis of classical Hodgkin lymphoma (cHL) (ICD-10 Group C81)?

    If yes, continue to #15.
    If no, continue to #19.

15. Has the patient's disease been previously treated?

    If yes, continue to #16.
    If no, continue to #18.

16. Has the patient's disease relapsed or progressed after **ONE** of the following?
    - Autologous hematopoietic stem cell transplantation (HSCT) and Adcetris (brentuximab vedotin)
    - 3 or more lines of systemic therapy that includes autologous HSCT

    If yes, continue to #17.
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

17. Is the patient 18 years of age or older?

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

GUIDELINES FOR USE (CONTINUED)

18. Is the patient's disease Stage III or IV and the patient meets **ALL** of the following criteria?
    - The patient is 12 years of age or older
    - Opdivo will be used in combination with doxorubicin, vinblastine, and dacarbazine (AVD)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

19. Does the patient have a diagnosis of recurrent or metastatic squamous cell carcinoma of the head and neck (SCCHN) (ICD-10 Groups C44.42, C76.0, C00, C06, C09, C10, C32) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has disease progression while on or after treatment with a platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #20.

20. Does the patient have a diagnosis of urothelial carcinoma (UC) (ICD-10 Groups C65, C66, C67, C68) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo will be used as an adjuvant treatment
    - The patient is at high risk of recurrence after undergoing radical resection of UC

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #21.

21. Does the patient have a diagnosis of unresectable or metastatic urothelial carcinoma (UC) (ICD-10 Groups C65, C66, C67, C68) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo will be used in combination with cisplatin and gemcitabine

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #22.

22. Does the patient have a diagnosis of locally advanced or metastatic urothelial carcinoma (UC) (ICD-10 Groups C65, C66, C67, C68) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #23.
    If no, continue to #24.

NIVOLUMAB

GUIDELINES FOR USE (CONTINUED)

23. Does the patient meet **ONE** of the following criteria?
    - The patient has disease progression during or following platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient has disease progression within 12 months of neoadjuvant or adjuvant treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

24. Does the patient have a diagnosis of colorectal cancer (CRC) (ICD-10 C19) and meet **ALL** of the following criteria?
    - The patient is 12 years of age or older
    - The patient's cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR)

    If yes, continue to #25.
    If no, continue to #27.

25. Is the patient's cancer unresectable **AND** the patient meets the following criterion?
    - Opdivo will be used in combination with Yervoy (ipilimumab)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #26.

26. Is the patient's cancer metastatic and the patient meets **ONE** of the following criteria?
    - Opdivo will be used in combination with Yervoy (ipilimumab)
    - Opdivo will be used as a single agent, AND the patient has disease progression following treatment with a fluoropyrimidine, oxaliplatin, and irinotecan

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

27. Does the patient have a diagnosis of unresectable or metastatic hepatocellular carcinoma (HCC) (ICD-10 C22.0) and meet **ONE** of the following criteria?
    - Opdivo will be used in combination with Yervoy (ipilimumab) as first-line treatment
    - Opdivo will be used in combination with Yervoy (ipilimumab), AND the patient has been previously treated with Nexavar (sorafenib)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #28.

CONTINUED ON NEXT PAGE

GUIDELINES FOR USE (CONTINUED)

28. Does the patient have a diagnosis of completely resected esophageal or gastroesophageal junction cancer (ICD-10 C16.0; Group C15) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo will be used as an adjuvant treatment
    - The patient has a residual pathologic disease and has received neoadjuvant chemoradiotherapy (CRT)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #29.

29. Does the patient have a diagnosis of unresectable advanced, recurrent or metastatic esophageal squamous cell carcinoma (ESCC) (ICD-10 Group C15) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has received prior fluoropyrimidine- and platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #30.

30. Does the patient have a diagnosis of unresectable advanced or metastatic esophageal squamous cell carcinoma (ESCC) (ICD-10 Group C15) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #31.
    If no, continue to #32.

31. Does the patient meet **ONE** of the following criteria?
    - Opdivo will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - Opdivo will be used in combination with Yervoy (ipilimumab)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

GUIDELINES FOR USE (CONTINUED)

32. Does the patient have a diagnosis of advanced or metastatic gastric cancer, gastroesophageal junction cancer, or esophageal adenocarcinoma (ICD-10 Groups C15, C16) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **NIVOLUMAB (Opdivo)** requires the following rule(s) be met for approval:
    A. You have ONE of the following:
        1. Unresectable or metastatic melanoma (type of skin cancer that cannot be removed by surgery or has spread to other parts of the body)
        2. Stage IIB, IIC, III, or IV melanoma (a type of skin cancer)
        3. Resectable (node positive or tumor is 4 cm or greater) non-small cell lung cancer (NSCLC) (a type of lung cancer that can be removed by surgery)
        4. Metastatic non-small cell lung cancer (NSCLC) (a type of lung cancer that has spread to other parts of the body)
        5. Recurrent non-small cell lung cancer (NSCLC) (a type of lung cancer that has returned)
        6. Unresectable malignant pleural mesothelioma (a tumor of the tissue lining the lungs and chest wall that cannot be removed by surgery)
        7. Advanced renal cell carcinoma (RCC: type of kidney cancer)
        8. Classical Hodgkin lymphoma (cHL: a type of blood cancer)
        9. Recurrent or metastatic squamous cell carcinoma of the head and neck (SCCHN: type of head/neck cancer that has returned or spread to other parts of the body)
        10. Urothelial carcinoma (UC: urinary system cancer)
        11. Unresectable or metastatic urothelial carcinoma (urinary system cancer that cannot be removed by surgery or has spread to other parts of the body)
        12. Locally advanced or metastatic urothelial carcinoma (urinary system cancer that has spread to nearby tissue or lymph nodes or that has spread to other parts of the body)
        13. Colorectal cancer (a type of digestive cancer)
        14. Unresectable or metastatic hepatocellular carcinoma (HCC: a type of liver cancer that cannot be removed by surgery or has spread to other parts of the body)

    (Denial text continued on next page)

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

GUIDELINES FOR USE (CONTINUED)

15. Completely resected esophageal or gastroesophageal junction cancer (types of digestive system cancer that has been removed by surgery)
16. Unresectable advanced, recurrent or metastatic esophageal squamous cell carcinoma (ESCC: type of digestive system cancer that cannot be removed by surgery, and has returned or has spread to other parts of the body)
17. Unresectable advanced or metastatic esophageal squamous cell carcinoma (ESCC: type of digestive system cancer that cannot be removed by surgery and has spread to other parts of the body)
18. Advanced or metastatic gastric cancer, gastroesophageal junction cancer, or esophageal adenocarcinoma (types of digestive system cancer that has spread to other parts of the body)

B. If you have unresectable or metastatic melanoma, approval also requires:
1. You are 12 years of age or older
2. Opdivo will be used alone OR in combination with Yervoy (ipilimumab)
3. Opdivo will NOT be used concurrently (at the same time) with a targeted therapy (BRAF inhibitors [such as Braftovi (encorafenib), Tafinlar (dabrafenib)], MEK inhibitors [such as Mekinist (trametinib)], and NTRK inhibitors [such as Vitrakvi (larotrectinib), Rozlytrek (entrectinib)])

C. If you have stage IIB, IIC, III, or IV melanoma, approval also requires:
1. You are 12 years of age or older
2. You have undergone complete resection (completely removed by surgery)
3. Opdivo will be used as an adjuvant (add-on) treatment

D. If you have resectable (node positive or tumor is 4 cm or greater) non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Opdivo will be used in combination with platinum-doublet chemotherapy (a type of cancer treatment, such as carboplatin/paclitaxel, cisplatin/pemetrexed, cisplatin/gemcitabine) as neoadjuvant treatment (given before main treatment) only
   b. Your cancer has NO known epidermal growth factor receptor (EGFR: a type of protein) mutations (abnormal change in a type of gene) or anaplastic lymphoma kinase (ALK: a type of enzyme) rearrangements (type of gene mutation); AND Opdivo will be used in combination with platinum-doublet chemotherapy (such as carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment (given before main treatment), OR as a single medication as adjuvant (add-on) treatment after surgery and prior use with platinum-doublet chemotherapy as neoadjuvant treatment

(Denial text continued on next page)

GUIDELINES FOR USE (CONTINUED)

E. If you have metastatic non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your tumors have programmed death-ligand 1 (PD-L1: a type of protein [of at least 1 percent]) as determined by a Food and Drug Administration (FDA)-approved test; your tumor does NOT have epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of enzyme) genomic tumor aberrations (types of abnormal gene); AND Opdivo will be used in combination with Yervoy (ipilimumab)
   b. Your tumor does NOT have epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of enzyme) genomic tumor aberrations (types of abnormal gene) AND Opdivo will be used in combination with Yervoy (ipilimumab) and 2 cycles of platinum-doublet chemotherapy (a type of cancer treatment, such as carboplatin/pemetrexed, cisplatin/pemetrexed, carboplatin/paclitaxel)
   c. Your disease has worsened while on or after platinum-based chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin), and you meet ONE of the following:
      i. Your tumor does NOT have epidermal growth factor receptor (EGFR: type of protein) or anaplastic lymphoma kinase (ALK: type of enzyme) genomic tumor aberrations (types of abnormal gene)
      ii. Your tumor has an ALK mutation, and your disease has worsened after treatment with an FDA-approved ALK-directed therapy (such as Xalkori [crizotinib], Zykadia [ceritinib])
      iii. Your tumor has an EGFR mutation, and your disease has worsened after treatment with an FDA-approved EGFR-directed therapy (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

F. If you have recurrent non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your tumor does NOT have epidermal growth factor receptor (EGFR: a type of protein) or anaplastic lymphoma kinase (ALK: a type of enzyme) genomic tumor aberrations (types of abnormal gene)
3. Opdivo will be used in combination with Yervoy (ipilimumab) AND 2 cycles of platinum-doublet chemotherapy (a type of cancer treatment, such as carboplatin/pemetrexed, cisplatin/pemetrexed, carboplatin/paclitaxel)

G. If you have unresectable malignant pleural mesothelioma, approval also requires:
1. You are 18 years of age or older
2. Opdivo will be used in combination with Yervoy (ipilimumab)

(Denial text continued on next page)

NIVOLUMAB

GUIDELINES FOR USE (CONTINUED)

H. If you have advanced renal cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You have intermediate or poor risk disease AND Opdivo will used in combination with Yervoy (ipilimumab)
   b. Opdivo will be used in combination with Cabometyx (cabozantinib)
   c. You have received prior anti-angiogenic therapy (medication that stop tumors from growing their own blood vessels such as Sutent [sunitinib], Votrient [pazopanib], Cabometyx [cabozantinib])

I. If you have classical Hodgkin lymphoma, approval also requires ONE of the following:
1. If your disease has been previously treated, you meet ALL of the following:
   a. You are 18 years of age or older
   b. Your disease has relapsed (returned) or worsened after receiving ONE of the following:
      i. Autologous hematopoietic stem cell transplantation (HSCT: a type of procedure to replace damaged bone marrow with your own healthy blood-forming cells) and Adcetris (brentuximab vedotin)
      ii. Three or more lines of systemic therapy (treatment that targets the entire body) that includes autologous hematopoietic stem cell transplantation (HSCT: a type of procedure to replace damaged bone marrow with your own healthy blood-forming cells)
2. If your disease has NOT been previously treated, you meet ALL of the following:
   a. You are 12 years of age or older
   b. Your disease is Stage III or IV
   c. Opdivo will be used in combination with doxorubicin, vinblastine, and dacarbazine (AVD)

J. If you have recurrent or metastatic squamous cell carcinoma of the head and neck, approval also requires:
1. You are 18 years of age or older
2. Your disease has worsened on or after treatment with a platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)

K. If you have urothelial carcinoma, approval also requires:
1. You are 18 years of age or older
2. Opdivo will be used as an adjuvant (add-on) treatment
3. You are at high risk of recurrence (disease returning) after undergoing radical resection (tumor removal) of urothelial carcinoma

L. If you have unresectable or metastatic urothelial carcinoma, approval also requires:
1. You are 18 years of age or older
2. You will be using Opdivo in combination with cisplatin and gemcitabine

(Denial text continued on next page)

NIVOLUMAB

GUIDELINES FOR USE (CONTINUED)

M. If you have locally advanced or metastatic urothelial carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your disease has worsened during or after platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)
   b. Your disease has worsened within 12 months of neoadjuvant (given before main treatment) or adjuvant (add-on) treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)

N. If you have colorectal cancer, approval also requires:
1. You are 12 years of age or older
2. Your cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities)
3. You meet ONE of the following:
   a. Your cancer is unresectable (cannot be removed by surgery); AND Opdivo will be used in combination with Yervoy (ipilimumab)
   b. Your cancer is metastatic (has spread to other parts of the body), and you meet ONE of the following:
      i. Opdivo will be used in combination with Yervoy (ipilimumab)
      ii. Opdivo will be used as a single medication; AND your disease has worsened after treatment with a fluoropyrimidine, oxaliplatin, and irinotecan

O. If you have unresectable or metastatic hepatocellular carcinoma, approval also requires ONE of the following:
1. You will be using Opdivo in combination with Yervoy (ipilimumab) as first-line treatment
2. You will be using Opdivo in combination with Yervoy (ipilimumab), AND you have been previously treated with Nexavar (sorafenib)

P. If you have completely resected esophageal or gastroesophageal junction cancer, approval also requires:
1. You are 18 years of age or older
2. Opdivo will be used as an adjuvant (add-on) treatment
3. You have a residual pathologic disease (disease is still present) and have received neoadjuvant chemoradiotherapy (CRT) (a type of cancer treatment given before surgery)

Q. If you have unresectable advanced, recurrent, or metastatic esophageal squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You have previously received treatment with fluoropyrimidine- and platinum-based chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)

(Denial text continued on next page)

NIVOLUMAB

GUIDELINES FOR USE (CONTINUED)

R. If you have unresectable advanced or metastatic esophageal squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You will be using Opdivo in combination with fluoropyrimidine- and platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)
   b. You will be using Opdivo in combination with Yervoy (ipilimumab)

S. If you have advanced or metastatic gastric cancer, gastroesophageal junction cancer, or esophageal adenocarcinoma, approval also requires:
1. You are 18 years of age or older
2. You will be using Opdivo in combination with fluoropyrimidine and platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)

PRIOR AUTHORIZATION GUIDELINES

NIVOLUMAB-HYALURONIDASE-NVHY

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NIVOLUMAB-HYALURONIDASE-NVHY	OPDIVO QVANTIG	50124		GPI-10 (2199000250)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has intermediate or poor risk disease, and Opdivo Qvantig will be used following treatment with intravenous Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy
   - Opdivo Qvantig will be used in combination with Cabometyx (cabozantinib)
   - The patient has received prior anti-angiogenic therapy (e.g., Sutent [sunitinib], Votrient [pazopanib])

   If yes, **approve the 600mg strength for 12 months by GPID or GPI-14 with a quantity limit of #10mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient have a diagnosis of melanoma (ICD-10 Group C43) **AND** meet the following criterion?
   - The patient is 12 years of age or older

   If yes, continue to #4.
   If no, continue to #6.

4. Is the patient's cancer unresectable or metastatic?

   If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **300mg-5,000units/2.5mL: #5mL per 28 days.**
   - **600mg-10,000units/5mL: #10mL per 28 days.**

   If no, continue to #5.

GUIDELINES FOR USE (CONTINUED)

5. Is the patient's cancer stage IIB, IIC, III, or IV and the patient meets **ALL** of the following criteria?
   - The patient has undergone complete resection
   - Opdivo Qvantig will be used as an adjuvant treatment

   If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **300mg-5,000units/2.5mL: #5mL per 28 days.**
   - **600mg-10,000units/5mL: #10mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Does the patient have a diagnosis of non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer is resectable (node positive or tumor is at least 4cm)

   If yes, continue to #7.
   If no, continue to #11.

7. Will Opdivo Qvantig be used in combination with platinum-doublet chemotherapy (e.g., carboplatin/paclitaxel, cisplatin/pemetrexed, cisplatin/gemcitabine) as neoadjuvant treatment?

   If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **300mg-5,000units/2.5mL: #2.5mL per 21 days.**
   - **600mg-10,000units/5mL: #10mL per 21 days.**

   If no, continue to #8.

8. Does the patient's cancer have no known epidermal growth factor receptor (EGFR) mutations or anaplastic lymphoma kinase (ALK) rearrangements?

   If yes, continue to #9.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

GUIDELINES FOR USE (CONTINUED)

9. Will Opdivo Qvantig be used in combination with platinum-doublet chemotherapy (e.g., carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment?

   If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **300mg-5,000units/2.5mL: #2.5mL per 21 days.**
   - **600mg-10,000units/5mL: #10mL per 21 days.**

   If no, continue to #10.

10. Will Opdivo Qvantig be used as monotherapy as adjuvant treatment **AND** the patient meets the following criterion?
    - The patient had surgical resection and prior use with platinum-doublet chemotherapy (e.g., carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment

    If yes, **approve the 600mg strength for 12 months by GPID or GPI-14 with a quantity limit of #10mL per 28 days.**

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

11. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has disease progression while on or after platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, continue to #12.
    If no, continue to #13.

GUIDELINES FOR USE (CONTINUED)

12. Does the patient meet **ONE** of the following criteria?
    - The tumor does NOT have EGFR or ALK genomic aberrations
    - The tumor has an EGFR mutation, and the patient had disease progression following an FDA- approved EGFR-directed therapy (e.g., Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])
    - The tumor has an ALK mutation, and the patient had disease progression following an FDA- approved ALK-directed therapy (e.g., Xalkori [crizotinib], Zykadia [ceritinib])

    If yes, **approve the 600mg strength for 12 months by GPID or GPI-14 with a quantity limit of #10mL per 28 days.**

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

13. Does the patient have a diagnosis of recurrent or metastatic squamous cell carcinoma of the head and neck (SCCHN) (ICD-10 Groups C44.42, C76.0, C00, C06, C09, C10, C32) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has disease progression while on or after treatment with a platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve the 600mg strength for 12 months by GPID or GPI-14 with a quantity limit of #10mL per 28 days.**

    If no, continue to #14.

14. Does the patient have a diagnosis of urothelial carcinoma (UC) (ICD-10 Groups C65, C66, C67, C68) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #15.
    If no, continue to #18.

15. Is the patient at high risk of recurrence after undergoing radical resection of urothelial carcinoma **AND** meets the following criterion?
    - Opdivo Qvantig will be used as an adjuvant treatment

    If yes, **approve the 600mg strength for 12 months by GPID or GPI-14 with a quantity limit of #10mL per 28 days.**

    If no, continue to #16.

CONTINUED ON NEXT PAGE

GUIDELINES FOR USE (CONTINUED)

16. Is the patient's cancer unresectable or metastatic **AND** the patient meets the following criterion?
    - Opdivo Qvantig will be used in combination with cisplatin and gemcitabine

    If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
    - **300mg-5,000units/2.5mL: #2.5mL per 21 days.**
    - **600mg-10,000units/5mL: #10mL per 21 days.**

    If no, continue to #17.

17. Is the patient's cancer locally advanced or metastatic and the patient meets **ONE** of the following criteria?
    - The patient has disease progression during or following platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient has disease progression within 12 months of neoadjuvant or adjuvant treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve the 600mg strength for 12 months by GPID or GPI-14 with a quantity limit of #10mL per 28 days.**

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

18. Does the patient have a diagnosis of colorectal cancer (CRC) (ICD-10 C19) and meet **ALL** of the following criteria?
    - The patient is 12 years of age or older
    - The patient's cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR)

    If yes, continue to #19.
    If no, continue to #21.

GUIDELINES FOR USE (CONTINUED)

19. Is the patient's cancer metastatic and the patient meets **ONE** of the following criteria?
    - Opdivo Qvantig will be used following treatment with intravenous Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy
    - The patient has disease progression following treatment with a fluoropyrimidine (e.g., fluorouracil, capecitabine), oxaliplatin, and irinotecan

    If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
    - **300mg-5,000units/2.5mL: #5mL per 28 days.**
    - **600mg-10,000units/5mL: #10mL per 28 days.**

    If no, continue to #20.

20. Is the patient's cancer unresectable **AND** the patient meets the following criterion?
    - Opdivo Qvantig will be used following treatment with intravenous Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy

    If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
    - **300mg-5,000units/2.5mL: #5mL per 28 days.**
    - **600mg-10,000units/5mL: #10mL per 28 days.**

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

21. Does the patient have a diagnosis of unresectable or metastatic hepatocellular carcinoma (HCC) (ICD-10 C22.0) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo Qvantig will be used following treatment with intravenous Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy

    If yes, **approve the 600mg strength for 12 months by GPID or GPI-14 with a quantity limit of #10mL per 28 days.**

    If no, continue to #22.

GUIDELINES FOR USE (CONTINUED)

22. Does the patient have a diagnosis of esophageal or gastroesophageal junction cancer (ICD-10 C16.0; Group C15) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has undergone complete resection
    - Opdivo Qvantig will be used as an adjuvant treatment
    - The patient has a residual pathologic disease
    - The patient has received neoadjuvant chemoradiotherapy (CRT)

    If yes, **approve the 600mg strength for 12 months by GPID or GPI-14 with a quantity limit of #10mL per 28 days.**

    If no, continue to #23.

23. Does the patient have a diagnosis of esophageal squamous cell carcinoma (ESCC) (ICD-10 Group C15) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #24.
    If no, continue to #26.

24. Is the patient's cancer unresectable advanced or metastatic and the patient meets **ALL** of the following criteria?
    - Opdivo Qvantig will be used in combination with fluoropyrimidine- (e.g., fluorouracil, capecitabine) and platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient's tumors express PD-L1 (at least 1%)

    If yes, **approve the 600mg strength for 12 months by GPID or GPI-14 with a quantity limit of #10mL per 28 days.**

    If no, continue to #25.

25. Is the patient's cancer unresectable advanced, recurrent or metastatic **AND** the patient meets the following criterion?
    - The patient has received prior fluoropyrimidine- (e.g., fluorouracil, capecitabine) and platinum-based chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve the 600mg strength for 12 months by GPID or GPI-14 with a quantity limit of #10mL per 28 days.**

    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

GUIDELINES FOR USE (CONTINUED)

26. Does the patient have a diagnosis of advanced or metastatic gastric cancer, gastroesophageal junction cancer, or esophageal adenocarcinoma (ICD-10 Groups C15, C16) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Opdivo Qvantig will be used in combination with fluoropyrimidine- (e.g., fluorouracil, capecitabine) and platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient's tumors express PD-L1 (at least 1%)

    If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
    - **300mg-5,000units/2.5mL: #2.5mL per 21 days.**
    - **600mg-10,000units/5mL: #10mL per 21 days.**

    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **NIVOLUMAB-HYALURONIDASE-NVHY (Opdivo Qvantig)** requires the following rule(s) be met for approval:

    A. You have ONE of the following:
        1. Advanced renal cell carcinoma (RCC) (a type of kidney cancer)
        2. Melanoma (a type of skin cancer)
        3. Non-small cell lung cancer (NSCLC) (a type of lung cancer)
        4. Metastatic non-small cell lung cancer (NSCLC) (a type of lung cancer that has spread to other parts of the body)
        5. Recurrent or metastatic squamous cell carcinoma of the head and neck (SCCHN) (a type of head/neck cancer that has returned or has spread to other parts of the body)
        6. Urothelial carcinoma (UC: urinary system cancer)
        7. Colorectal cancer (CRC) (a type of digestive cancer)
        8. Unresectable or metastatic hepatocellular carcinoma (HCC: a type of liver cancer that cannot be completely removed with surgery or has spread to other parts of the body)
        9. Esophageal or gastroesophageal junction cancer (types of digestive system cancer)
        10. Esophageal squamous cell carcinoma (ESCC) (a type of digestive system cancer)
        11. Advanced or metastatic gastric cancer, gastroesophageal junction cancer, or esophageal adenocarcinoma (types of digestive system cancer that has spread to other parts of the body)

    (Denial text continued on the next page)

GUIDELINES FOR USE (CONTINUED)

B. If you have advanced renal cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You have intermediate or poor risk disease, and Opdivo Qvantig will be used following treatment with intravenous (injection into the vein) Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy
   b. Opdivo Qvantig will be used in combination with Cabometyx (cabozantinib)
   c. You have received prior anti-angiogenic therapy (a type of medication that stops tumors from growing new blood vessels, such as Sutent [sunitinib], Votrient [pazopanib])

C. If you have melanoma, approval also requires:
1. You are 12 years of age or older
2. You meet ONE of the following:
   a. Your cancer is unresectable (cannot be removed by surgery) or metastatic (has spread to other parts of the body)
   b. Your cancer is stage IIB, IIC, III, or IV; you have undergone complete resection (removal by surgery); and Opdivo Qvantig will be used as an adjuvant (add-on) treatment

D. If you have non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your cancer is resectable (node positive or tumor is at least 4 cm) (can be removed by surgery)
3. You meet ONE of the following:
   a. Opdivo Qvantig will be used in combination with platinum-doublet chemotherapy (a type of cancer treatment, such as carboplatin/paclitaxel, cisplatin/pemetrexed, cisplatin/gemcitabine) as neoadjuvant treatment (given before main treatment)
   b. Your cancer has no known epidermal growth factor receptor (EGFR: a type of protein) mutations (abnormal change in a type of gene) or anaplastic lymphoma kinase (ALK: a type of enzyme) rearrangements (type of gene mutation), and you meet ONE of the following:
      i. Opdivo Qvantig will be used in combination with platinum-doublet chemotherapy (such as carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment (given before main treatment)
      ii. Opdivo Qvantig will be used alone as adjuvant (add-on) treatment after surgical resection (removal by surgery) and prior use with platinum-doublet chemotherapy (such as carboplatin/paclitaxel, cisplatin/pemetrexed, carboplatin/pemetrexed, cisplatin/docetaxel) as neoadjuvant treatment (given before main treatment)

(Denial text continued on the next page)

GUIDELINES FOR USE (CONTINUED)

E. If you have metastatic non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your disease has worsened while on or after platinum-based chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin), and you meet ONE of the following:
   a. Your tumor does NOT have epidermal growth factor receptor (EGFR: type of protein) or anaplastic lymphoma kinase (ALK: type of enzyme) genomic aberrations (types of abnormal gene)
   b. Your tumor has an epidermal growth factor receptor (EGFR: type of protein) mutation (abnormal change in a type of gene), and your disease has worsened after treatment with a Food and Drug Administration (FDA)-approved EGFR-directed therapy (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])
   c. Your tumor has an anaplastic lymphoma kinase (ALK: type of enzyme) mutation (abnormal change in a type of gene), and your disease has worsened after treatment with a Food and Drug Administration (FDA)-approved ALK-directed therapy (such as Xalkori [crizotinib], Zykadia [ceritinib])

F. If you have recurrent or metastatic squamous cell carcinoma of the head and neck, approval also requires:
1. You are 18 years of age or older
2. Your disease has worsened while on or after treatment with a platinum-based chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)

G. If you have urothelial carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You are at high risk of recurrence (disease returning) after undergoing radical resection (tumor removal) of urothelial carcinoma (UC: urinary system cancer), and Opdivo Qvantig will be used as an adjuvant (add-on) treatment
   b. Your cancer is unresectable (cannot be removed by surgery) or metastatic (has spread to other parts of the body), and Opdivo Qvantig will be used in combination with cisplatin and gemcitabine
   c. Your cancer is locally advanced (has spread to nearby tissue or lymph nodes) or metastatic (has spread to other parts of the body), and you meet ONE of the following:
      i. Your disease has worsened during or following platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)
      ii. Your disease has worsened within 12 months of neoadjuvant (given before main treatment) or adjuvant (add-on) treatment with platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)

(Denial text continued on the next page)

GUIDELINES FOR USE (CONTINUED)

H. If you have colorectal cancer, approval also requires:
1. You are 12 years of age or older
2. Your cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities)
3. You meet ONE of the following:
   a. You have metastatic cancer (cancer that has spread to other parts of the body) and meet ONE of the following:
      i. Opdivo Qvantig will be used following treatment with intravenous (injection into the vein) Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy
      ii. Your disease has worsened after treatment with a fluoropyrimidine (a type of cancer treatment, such as fluorouracil, capecitabine), oxaliplatin, and irinotecan
   b. You have unresectable cancer (cancer that cannot be removed by surgery) and Opdivo Qvantig will be used following treatment with intravenous (injection into the vein) Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy

I. If you have unresectable or metastatic hepatocellular carcinoma, approval also requires:
1. You are 18 years of age or older
2. Opdivo Qvantig will be used following treatment with intravenous (injection into the vein) Opdivo (nivolumab) and Yervoy (ipilimumab) combination therapy

J. If you have esophageal or gastroesophageal junction cancer, approval also requires:
1. You are 18 years of age or older
2. You have undergone complete resection (removal by surgery)
3. Opdivo Qvantig will be used as an adjuvant (add-on) treatment
4. You have a residual pathologic disease (disease is still present)
5. You have received neoadjuvant chemoradiotherapy (CRT) (a type of cancer treatment given before surgery)

K. If you have esophageal squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your cancer is unresectable (cannot be removed by surgery) advanced or metastatic (has spread to other parts of the body); Opdivo Qvantig will be used in combination with fluoropyrimidine- (a type of cancer treatment, such as fluorouracil, capecitabine) and platinum-containing chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin); AND your tumor expresses programmed death-ligand 1
   (PD-L1: type of protein) (at least 1%)
   b. Your cancer is unresectable (cannot be removed by surgery) advanced, recurrent (has returned) or metastatic (has spread to other parts of the body), AND you have previously received treatment with fluoropyrimidine- (a type of cancer treatment, such as fluorouracil, capecitabine) and platinum-based chemotherapy (a type of cancer treatment, such as cisplatin, carboplatin, oxaliplatin)

(Denial text continued on the next page)

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

NUSINERSEN (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
NUSINERSEN SODIUM/PF	SPINRAZA	44016		GPI-10 (7470005000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of spinal muscular atrophy (SMA) (ICD-10 G12.9) and meet **ALL** of the following criteria?
- The patient's diagnosis of spinal muscular atrophy (SMA) is confirmed by gene mutation analysis indicating mutations or deletions of both alleles of the survival motor neuron 1 (SMN1) gene (e.g., homozygous deletions of SMN1, homozygous mutations of SMN1, compound heterozygous mutations in SMN1 [i.e., deletion of SMN1 on one allele and point mutation of SMN1 on the other allele])
- Therapy is prescribed by or in consultation with a neuromuscular specialist or spinal muscular atrophy (SMA) specialist at a SMA Specialty Center

If yes, continue to #2.
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient pre-symptomatic **AND** meets the following criterion?
- The patient has up to (i.e., no more than) three copies of the survival motor neuron 2 (SMN2) gene based on newborn screening

If yes, **please enter TWO approvals for a total of 6 months by HICL or GPI-10 as follows:**
- **FIRST APPROVAL: approve for 1 month for 3 fills with a quantity limit of #5mL per fill.**
- **SECOND APPROVAL: approve for 5 months for 2 fills with a quantity limit of #5mL per fill (Please enter a start date of 2 weeks AFTER the end date of the first approval).**

If no, continue to #3.

NUSINERSEN (NSA)

INITIAL CRITERIA (CONTINUED)

3. Is the patient symptomatic and meets **ALL** of the following criteria?
   - The onset of spinal muscular atrophy (SMA) symptoms occurred before 20 years of age
   - The patient has had a baseline motor function assessment by a neuromuscular specialist or SMA specialist
   - If the patient has received prior gene therapy, they had a less than expected clinical benefit with gene therapy

   If yes, **please enter TWO approvals for a total of 6 months by HICL or GPI-10 as follows:**
   - **FIRST APPROVAL: approve for 1 month for 3 fills with a quantity limit of #5mL per fill.**
   - **SECOND APPROVAL: approve for 5 months for 2 fills with a quantity limit of #5mL per fill (Please enter a start date of 2 weeks AFTER the end date of the first approval).**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **NUSINERSEN (Spinraza)** requires the following rule(s) be met for approval:

   A. You have spinal muscular atrophy (SMA: a type of nerve and muscle movement disorder)
   B. Your diagnosis of spinal muscular atrophy (SMA) is confirmed by a gene mutation analysis indicating mutations (abnormal changes) or deletions of both alleles of the survival motor neuron 1 (SMN1: type of protein in spinal cord) gene (such as homozygous deletions of SMN1, homozygous mutations of SMN1, compound heterozygous mutations in SMN1 [deletion of SMN1 on one allele and point mutation of SMN1 on the other allele])
   C. Therapy is prescribed by or in consultation with a neuromuscular (nerve and muscle) specialist or spinal muscular atrophy (SMA) specialist at a SMA Specialty Center
   D. If you are pre-symptomatic (symptoms have not yet appeared), approval also requires:
      1. You have up to (no more than) three copies of the survival motor neuron 2 (SMN2: type of protein in spinal cord) gene based on screening that was done when you were a newborn

NUSINERSEN (NSA)

INITIAL CRITERIA (CONTINUED)

E. If you are symptomatic (symptoms have appeared), approval also requires:

1. The onset of spinal muscular atrophy (SMA) symptoms occurred before 20 years of age
2. You had a baseline motor function assessment by a neuromuscular (nerve and muscle) specialist or SMA specialist
3. If you previously had gene therapy, you experienced a less than expected clinical benefit with gene therapy

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

NUSINERSEN (NSA)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of spinal muscular atrophy (SMA) (ICD-10 G12.9) and meet **ONE** of the following criteria?

- The patient has improved, maintained, or demonstrated a less than expected decline in motor function assessments compared to baseline (e.g., HINE, HFMSE, CHOP-INTEND)
- The patient has improved, maintained, or demonstrated a less than expected decline in other muscle function (e.g., pulmonary)

If yes, **approve for 12 months by HICL or GPI-10 for 3 fills with a quantity limit of #5mL per fill.**

If no, do not approve.

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **NUSINERSEN (Spinraza)** requires the following rule(s) be met for renewal:

A. You have spinal muscular atrophy (SMA: a type of nerve and muscle movement disorder)
B. You meet ONE of the following:
    1. You have improved, maintained, or demonstrated a less than expected decline in motor function assessments compared to baseline. Some types of motor assessment tests include Hammersmith Infant Neurological Examination (HINE), Hammersmith Functional Motor Scale - Expanded (HFMSE), and Children's Hospital of Philadelphia Infant Test of Neuromuscular Disorders (CHOP-INTEND)
    2. You have improved, maintained, or demonstrated a less than expected decline in other muscle function (such as pulmonary [lung/breathing] function)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OBETICHOLIC ACID

Generic	Brand	HICL	GCN	MEDISPAN	Exception/Other
OBETICHOLIC ACID	OCALIVA	43438		GPI-10 (5275006000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of primary biliary cholangitis (PBC) (ICD-10 K74.3) as confirmed by at least **TWO** of the following criteria?
   - The patient has an elevated alkaline phosphatase (ALP) level
   - The patient has the presence of antimitochondrial antibodies (AMA) OR other PBC-specific autoantibodies, including sp100 or gp210 if AMA is negative
   - The patient has histologic evidence (obtained by liver biopsy) of non-suppurative destructive cholangitis and destruction of interlobular bile ducts

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient does not have cirrhosis OR has compensated cirrhosis with no evidence of portal hypertension
   - Therapy is prescribed by or in consultation with a gastroenterologist or hepatologist
   - The patient does NOT have complete biliary obstruction
   - Ocaliva will NOT be used concurrently with any other second-line PBC treatment (i.e., Iqirvo [elafibranor], Livdelzi [seladelpar])

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient meet **ONE** of the following criteria?
   - Ocaliva will be used as monotherapy in a patient who is unable to tolerate ursodiol (ursodeoxycholic acid)
   - Ocaliva will be used in combination with ursodiol (ursodeoxycholic acid) in a patient who had an inadequate response to at least 1 year of treatment with ursodiol (ursodeoxycholic acid) monotherapy

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

OBETICHOLIC ACID

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OBETICHOLIC ACID (Ocaliva)** requires the following rule(s) be met for approval:

A. You have primary biliary cholangitis (PBC: a type of immune system disorder that destroys the bile duct), as confirmed by TWO of the following:
   1. You have an elevated (high) alkaline phosphatase (ALP) level (a type of lab test)
   2. You have the presence of antimitochondrial antibodies (AMA: indicator of the body attacking its own cells) or other PBC-specific autoantibodies (indicator of the body attacking its own cells), including sp100 or gp210 if AMA is negative
   3. You have histologic evidence (lab data obtained by liver biopsy [removal of cells or tissue from the liver for examination]) of non-suppurative destructive cholangitis and destruction of interlobular bile ducts (symptoms of liver disease)
B. You are 18 years of age or older
C. You do not have cirrhosis (liver damage and scarring) OR you have compensated cirrhosis (a condition where there is liver damage and scarring without any major symptoms) with no evidence of portal hypertension (high blood pressure in the major vein that leads to the liver)
D. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions) or hepatologist (a type of liver doctor)
E. You do NOT have complete biliary obstruction (blockage of bile ducts)
F. You will NOT use Ocaliva concurrently (at the same time) with any other second-line therapy for PBC (Iqirvo [elafibranor], Livdelzi [seladelpar])
G. You meet ONE of the following:
   1. Ocaliva will be used as monotherapy (one drug treatment) if you are unable to tolerate ursodiol (ursodeoxycholic acid)
   2. Ocaliva will be used in combination (together) with ursodiol (ursodeoxycholic acid) if you had an inadequate (poor) response to at least 1 year of treatment with ursodiol (ursodeoxycholic acid) monotherapy (one drug treatment)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OBETICHOLIC ACID

RENEWAL CRITERIA

1. Does the patient have a diagnosis of primary biliary cholangitis (PBC) (ICD-10 K74.3) and meet **ALL** of the following criteria?
   - The patient has an alkaline phosphatase (ALP) level that is less than 1.67-times the upper limit of normal AND which has decreased by at least 15 percent from baseline while on treatment with Ocaliva
   - The patient has NOT developed complete biliary obstruction
   - Ocaliva will NOT be used concurrently with any other second-line PBC treatment (i.e., Iqirvo [elafibranor], Livdelzi [seladelpar])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OBINUTUZUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OBINUTUZUMAB	GAZYVA	40703		GPI-10 (2135184300)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL) (ICD-10 Group C91.1) and meet **ALL** of the following criteria?
   - The patient has not received previous treatment for CLL
   - Gazyva will be used in combination with Leukeran (chlorambucil)

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of follicular lymphoma (FL) (ICD-10 Group C82)?

   If yes, continue to #3.
   If no, continue to #10.

3. Has the patient relapsed after, or is refractory to, a regimen containing rituximab?

   If yes, continue to #4.
   If no, continue to #6.

4. Will Gazyva be used in combination with bendamustine for the initial six cycles?

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #5.

5. Will Gazyva be used as monotherapy following initial combination therapy with bendamustine?

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Is the patient's cancer stage II bulky, III or IV and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has NOT received previous treatment for stage II bulky, III or IV follicular lymphoma

   If yes, continue to #7.
   If no, continue to #9.

OBINUTUZUMAB

GUIDELINES FOR USE (CONTINUED)

7. Will Gazyva be used in combination with chemotherapy (e.g., bendamustine; CHOP [cyclophosphamide, daunorubicin, vincristine, prednisone or prednisolone]; CVP [cyclophosphamide, vincristine, prednisone or prednisolone]) for the initial six or eight cycles?

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #8.

8. Will Gazyva be used as monotherapy following initial combination therapy with chemotherapy?

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

9. Is the patient's cancer relapsed or refractory **AND** Gazyva will be used in combination with Brukinsa (zanubrutinib)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

10. Will Gazyva be used as a pretreatment prior to initiating Columvi (glofitamab-gxbm)?

    If yes, **approve for 1 month by HICL or GPI-10 for 1 fill.**
    If no, continue to #11.

11. Does the patient have a diagnosis of lupus nephritis (LN) (ICD-10 M32.14) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient is receiving standard therapy (e.g., mycophenolate mofetil and corticosteroids)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

OBINUTUZUMAB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OBINUTUZUMAB (Gazyva)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Chronic lymphocytic leukemia (CLL: a type of blood and bone marrow cancer)
   2. Follicular lymphoma (FL: a type of cancer with abnormal immune cells)
   3. Use as a pretreatment prior to initiating Columvi (glofitamab-gxbm)
   4. Lupus nephritis (a type of immune condition that affects the kidneys)

B. If you have chronic lymphocytic leukemia, approval also requires:
   1. You have NOT received previous treatment for chronic lymphocytic leukemia
   2. Gazyva will be used in combination with Leukeran (chlorambucil)

C. If you have follicular lymphoma, approval also requires ONE of the following:
   1. You have relapsed after or are refractory to (disease has returned or is resistant to) a regimen containing rituximab; AND Gazyva will be used in combination with bendamustine for the initial six cycles OR as monotherapy (the only drug used in treatment) thereafter
   2. Your cancer is stage II bulky, III, or IV; you are 18 years of age or older; you have NOT received previous treatment for stage II bulky, III or IV follicular lymphoma; AND Gazyva will be used in combination with chemotherapy (such as bendamustine; CHOP [cyclophosphamide, daunorubicin, vincristine, prednisone or prednisolone]; CVP [cyclophosphamide, vincristine, prednisone or prednisolone]) for the initial six or eight cycles, or as monotherapy (the only drug used in treatment) thereafter
   3. You have relapsed or refractory follicular lymphoma (disease has returned or is resistant to treatment); AND Gazyva will be used in combination with Brukinsa (zanubrutinib)

D. If you have lupus nephritis, approval also requires:
   1. You are 18 years of age or older
   2. You are receiving standard therapy (such as mycophenolate mofetil and corticosteroids)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of primary progressive multiple sclerosis (PPMS) (ICD-10 G35) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10 for all of the following:**
   - **Ocrevus: #20mL per 6 months.**
   - **Ocrevus Zunovo: #23mL per 6 months.**

   If no, continue to #2.

2. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to the preferred agent: Kesimpta (ofatumumab)

   If yes, **approve for 12 months by HICL or GPI-10 for all of the following:**
   - **Ocrevus: #20mL per 6 months.**
   - **Ocrevus Zunovo: #23mL per 6 months.**

   If no, continue to #3.

3. Does the patient have a diagnosis of relapsing-remitting multiple sclerosis (MS) (ICD-10 G35.A) **AND** meet the following criterion?
   - The request is for Ocrevus (ocrelizumab)

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OCRELIZUMAB AND OCRELIZUMAB-HYALURONIDASE-OCSQ

GUIDELINES FOR USE (CONTINUED)

4. Does the patient meet **ONE** of the following?
   - The patient is 10 to 17 years of age
   - The patient is 18 years of age or older AND had a trial of or contraindication to the preferred agent: Kesimpta (ofatumumab)

   If yes, **approve Ocrevus for 12 months by HICL or GPI-10 with a quantity limit of #20mL per 6 months.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OCRELIZUMAB AND OCRELIZUMAB-HYALURONIDASE-OCSQ (Ocrevus, Ocrevus Zunovo)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Primary progressive multiple sclerosis (PPMS: a type of nerve disorder)
      2. A relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), or active secondary progressive disease (advanced disease)
      3. Relapsing-remitting multiple sclerosis (MS) (a type of nerve disorder that returns and goes away)

   B. If you have primary progressive multiple sclerosis, approval also requires:
      1. You are 18 years of age or older

   C. If you have a relapsing form of multiple sclerosis, approval also requires:
      1. You are 18 years of age or older
      2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Kesimpta (ofatumumab)

   D. If you have relapsing-remitting multiple sclerosis, approval also requires:
      1. The request is for Ocrevus (ocrelizumab)
      2. You meet ONE of the following:
         a. You are 10 to 17 years of age
         b. You are 18 years of age or older AND have tried or have a contraindication to (harmful for you to use) the preferred medication: Kesimpta (ofatumumab)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of acromegaly (ICD-10 E22.0) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient had an inadequate response to surgery or radiotherapy, OR surgery or radiotherapy is not an option for this patient
   - The patient's serum insulin-like growth factor 1 (IGF-1) level (adjusted for the patient's age) is elevated or unequivocal with inadequate suppression of growth hormone after a glucose load
   - The patient had a prior response to and tolerated subcutaneous octreotide injection for at least 2 weeks

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **10mg: #1 per 28 days.**
   - **20mg: #2 per 28 days.**
   - **30mg: #1 per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of severe diarrhea and flushing episodes (ICD-10 R19.7, R23.2) associated with metastatic carcinoid tumors (ICD-10 Groups C7B.0, C7A.0, D3A.0) **AND** meet the following criterion?
   - The patient had a prior response to and tolerated subcutaneous octreotide injection for at least 2 weeks

   If yes, **approve for 2 months by HICL or GPI-12 with a quantity limit of #1 per 28 days.**
   If no, continue to #3.

OCTREOTIDE - IM

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of profuse watery diarrhea associated with vasoactive intestinal peptide (VIP)-secreting tumors (VIPoma) (ICD-10 C25.4) **AND** meet the following criterion?
   - The patient had a prior response to and tolerated subcutaneous octreotide injection for at least 2 weeks

   If yes, **approve for 2 months by HICL or GPI-12 with a quantity limit of #1 per 28 days.** If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OCTREOTIDE - IM (Sandostatin LAR Depot)** requires the following rule(s) be met for approval:

   A. You have ONE of the following:
      1. Acromegaly (a type of hormone disorder)
      2. Severe diarrhea and flushing episodes associated with metastatic carcinoid tumors (a type of slow growing cancer that has spread to other parts of the body)
      3. Profuse watery diarrhea associated with vasoactive intestinal peptide (VIP)-secreting tumors (a type of tumor that starts from hormone producing cells)

   B. If you have acromegaly, approval also requires:
      1. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
      2. You had an inadequate response (did not work) to surgery or radiotherapy (a type of cancer treatment), OR surgery or radiotherapy is not an option for you
      3. Your serum insulin-like growth factor 1 (IGF-1: a type of hormone) level (adjusted for your age) is elevated (higher than normal) or unequivocal with inadequate suppression (reduction) of growth hormone after a glucose load (a type of test used to diagnose acromegaly [a type of hormone disorder])
      4. You had a prior response to and tolerated subcutaneous octreotide injection for at least 2 weeks

   C. If you have severe diarrhea and flushing episodes associated with metastatic carcinoid tumors, approval also requires:
      1. You had a prior response to and tolerated subcutaneous octreotide injection for at least 2 weeks

   D. If you have profuse watery diarrhea associated with vasoactive intestinal peptide (VIP)-secreting tumors, approval also requires:
      1. You had a prior response to and tolerated subcutaneous octreotide injection for at least 2 weeks

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OCTREOTIDE - IM

RENEWAL CRITERIA

1. Does the patient have a diagnosis of acromegaly (ICD-10 E22.0) and meet **ALL** of the following criteria?
   - The patient has had a reduction, normalization, or maintenance of IGF-1 levels based on age and gender
   - The patient has shown improvement or has sustained remission of clinical symptoms of acromegaly

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **10mg: #1 per 28 days.**
   - **20mg: #2 per 28 days.**
   - **30mg: #1 per 28 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of severe diarrhea and flushing episodes (ICD-10 R19.7, R23.2) associated with metastatic carcinoid tumors (ICD-10 Groups C7B.0, C7A.0, D3A.0) **AND** meet the following criterion?
   - The patient has shown improvement or has sustained remission of clinical symptoms

   If yes, **approve for 12 months by HICL or GPI-12 with a quantity limit of #1 per 28 days.**
   If no, continue to #3.

3. Does the patient have a diagnosis of profuse watery diarrhea associated with vasoactive intestinal peptide (VIP)-secreting tumors (VIPoma) (ICD-10 C25.4) **AND** meet the following criterion?
   - The patient has shown improvement or has sustained remission of clinical symptoms

   If yes, **approve for 12 months by HICL or GPI-12 with a quantity limit of #1 per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

OCTREOTIDE - IM

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OCTREOTIDE - IM (Sandostatin LAR Depot)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Acromegaly (a type of hormone disorder)
   2. Severe diarrhea and flushing episodes associated with metastatic carcinoid tumors (a type of slow growing cancer that has spread to other parts of the body)
   3. Profuse watery diarrhea associated with vasoactive intestinal peptide (VIP)-secreting tumors (a type of tumor that starts from hormone producing cells)

B. If you have acromegaly, renewal also requires:
   1. You have had a reduction, normalization, or maintenance of insulin-like growth factor 1 (IGF-1: a type of hormone) levels based on your age and gender
   2. You have shown improvement or have sustained remission (reduction or disappearance) of clinical symptoms of acromegaly (a type of hormone disorder)

C. If you have severe diarrhea and flushing episodes associated with metastatic carcinoid tumors, renewal also requires:
   1. You have shown improvement or have sustained remission (reduction or disappearance) of clinical symptoms

D. If you have profuse watery diarrhea associated with vasoactive intestinal peptide (VIP)-secreting tumors, renewal also requires:
   1. You have shown improvement or have sustained remission (reduction or disappearance) of clinical symptoms

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OCTREOTIDE - SQ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OCTREOTIDE ACETATE	BYNFEZIA		47454	GPI-14 (3017007010D220)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of acromegaly (ICD-10 E22.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's serum insulin-like growth factor 1 (IGF-1) level (adjusted for the patient's age) is elevated or unequivocal with inadequate suppression of growth hormone after a glucose load
   - The patient had a trial of or contraindication to the preferred agent: a generic octreotide (e.g., octreotide acetate)
   - The patient had an inadequate response to or cannot be treated with surgical resection, pituitary irradiation, and bromocriptine mesylate at maximally tolerated doses

   If yes, **approve for 6 months by GPID or GPI-14 with a quantity limit of #16.8mL per 28 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of severe diarrhea and flushing episodes (ICD-10 R19.7, R23.2) associated with metastatic carcinoid tumors (ICD-10 Groups C7B.0, C7A.0, D3A.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to the preferred agent: a generic octreotide (e.g., octreotide acetate)

   If yes, **approve for 6 months by GPID or GPI-14 with a quantity limit of #16.8mL per 28 days.**
   If no, continue to #3.

3. Does the patient have a diagnosis of profuse watery diarrhea associated with vasoactive intestinal peptide (VIP)-secreting tumors (VIPomas) (ICD-10 C25.4) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to the preferred agent: a generic octreotide (e.g., octreotide acetate)

   If yes, **approve for 6 months by GPID or GPI-14 with a quantity limit of #16.8mL per 28 days.**
   If no, do not approve.

OCTREOTIDE - SQ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OCTREOTIDE - SQ (Bynfezia)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Acromegaly (a type of hormone disorder)
   2. Severe diarrhea and flushing episodes associated with metastatic carcinoid tumors (a type of slow growing cancer that has spread to different parts of the body)
   3. Profuse watery diarrhea associated with vasoactive intestinal peptide (VIP)-secreting tumors (VIPomas: a type of cancer that starts from hormone producing cells)

B. If you have acromegaly, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   3. Your serum insulin-like growth factor 1 (IGF-1: a type of hormone) level (adjusted for your age) is elevated (higher than normal) or unequivocal with inadequate suppression (reduction) of growth hormone after a glucose load (a type of test used to diagnose acromegaly [a type of hormone disorder])
   4. You have tried or have a contraindication to (harmful for you to use) the preferred medication: a generic octreotide (such as octreotide acetate)
   5. You had an inadequate response (did not work) to or cannot be treated with surgical resection (removal by surgery), pituitary irradiation (radiation therapy directed at the pituitary), and bromocriptine mesylate at maximally tolerated doses

C. If you have severe diarrhea and flushing episodes associated with metastatic carcinoid tumors, approval also requires:
   1. You are 18 years of age or older
   2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: a generic octreotide (such as octreotide acetate)

D. If you have profuse watery diarrhea associated with vasoactive intestinal peptide (VIP)-secreting tumors (VIPomas), approval also requires:
   1. You are 18 years of age or older
   2. You have tried or have a contraindication to (harmful for you to use) the preferred medication: a generic octreotide (such as octreotide acetate)

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of cholestatic pruritus (ICD-10 L29.81)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient's pruritus associated with progressive familial intrahepatic cholestasis (PFIC) and the patient meets **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a hepatologist, gastroenterologist, or physician who specializes in PFIC cholestasis
   - Bylvay will NOT be used concurrently with another IBAT inhibitor (e.g., Livmarli [maralixibat])

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - The patient is 3 months to 11 months of age
   - The patient is 12 months of age or older AND had a trial of or contraindication to the preferred agent: Livmarli (maralixibat)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **200mcg pellets: #30 per day.**
   - **400mcg capsule: #15 per day.**
   - **600mcg pellets: #10 per day.**
   - **1200mcg capsule: #5 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ODEVIXIBAT

INITIAL CRITERIA (CONTINUED)

4. Is the patient's pruritus associated with Alagille syndrome (ALGS) (ICD-10 Q44.71) and the patient meets **ALL** of the following criteria?
   - The patient is 12 months of age or older
   - Therapy is prescribed by or in consultation with a hepatologist, gastroenterologist, or physician who specializes in ALGS cholestasis
   - Bylvay will NOT be used concurrently with another IBAT inhibitor (e.g., Livmarli [maralixibat])
   - The patient had a trial of or contraindication to the preferred agent: Livmarli (maralixibat)

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **200mcg pellets: #36 per day.**
   - **400mcg capsule: #18 per day.**
   - **600mcg pellets: #12 per day.**
   - **1200mcg capsule: #6 per day.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ODEVIXIBAT (Bylvay)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Cholestatic pruritus (itching caused by liver disease) associated with progressive familial intrahepatic cholestasis (PFIC: a type of genetic disorder)
      2. Cholestatic pruritus (itching caused by liver disease) associated with Alagille syndrome (ALGS: a type of genetic disorder)

   B. If you have cholestatic pruritus associated with progressive familial intrahepatic cholestasis, approval also requires:
      1. Therapy is prescribed by or in consultation with a hepatologist (a type of liver doctor), gastroenterologist (a doctor who treats digestive conditions), or physician (doctor) who specializes in PFIC cholestasis
      2. You will NOT use Bylvay concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Livmarli [maralixibat])
      3. You meet ONE of the following:
         a. You are 3 months to 11 months of age
         b. You are 12 months of age or older AND have tried or have a contraindication to (harmful for you to use) the preferred medication: Livmarli (maralixibat)

   (Initial denial text continued on the next page)

ODEVIXIBAT

RENEWAL CRITERIA

1. Does the patient have a diagnosis of cholestatic pruritus (ICD-10 L29.81)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient's pruritus associated with progressive familial intrahepatic cholestasis (PFIC) and the patient meets **ALL** of the following criteria?
   - The patient has shown a clinical response to therapy, defined as improvement in pruritus symptoms AND a reduction of serum bile acid from baseline
   - The patient does NOT have PFIC type 2 with specific ABCB11 variants that would result in nonfunctional, or the complete absence of, bile salt export pump (BSEP) protein
   - Bylvay will NOT be used concurrently with another IBAT inhibitor (e.g., Livmarli [maralixibat])

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **200mcg pellets: #30 per day.**
   - **400mcg capsule: #15 per day.**
   - **600mcg pellets: #10 per day.**
   - **1200mcg capsule: #5 per day.**

   If no, continue to #3.

3. Is the patient's pruritus associated with Alagille syndrome (ALGS) (ICD-10 Q44.71) and the patient meets **ALL** of the following criteria?
   - The patient has shown a clinical response to therapy, defined as improvement in pruritus symptoms AND a reduction of serum bile acid from baseline
   - Bylvay will NOT be used concurrently with another IBAT inhibitor (e.g., Livmarli [maralixibat])

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **200mcg pellets: #36 per day.**
   - **400mcg capsule: #18 per day.**
   - **600mcg pellets: #12 per day.**
   - **1200mcg capsule: #6 per day.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

ODEVIXIBAT

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **ODEVIXIBAT (Bylvay)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Cholestatic pruritus (itching caused by liver disease) associated with progressive familial intrahepatic cholestasis (PFIC: a type of genetic disorder)
   2. Cholestatic pruritus (itching caused by liver disease) associated with Alagille syndrome (ALGS: a type of genetic disorder)

B. If you have cholestatic pruritus associated with progressive familial intrahepatic cholestasis, renewal also requires:
   1. You have shown a clinical response to therapy, defined as improvement in pruritus (itching) symptoms AND a reduction of serum bile acid (a type of blood test) from baseline (before starting Bylvay)
   2. You do NOT have PFIC type 2 with specific ABCB11 variants (a type of abnormal gene) that would result in nonfunctional (does not work), or the complete absence of, bile salt export pump (BSEP: a type of protein)
   3. You will NOT use Bylvay concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Livmarli [maralixibat])

C. If you have cholestatic pruritus associated with Alagille syndrome, renewal also requires:
   1. You have shown a clinical response to therapy, defined as improvement in pruritus (itching) symptoms AND a reduction of serum bile acid (a type of blood test) from baseline (before starting Bylvay)
   2. You will NOT use Bylvay concurrently (at the same time) with another ileal bile acid transporter (IBAT) inhibitor (such as Livmarli [maralixibat])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Bylvay.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OFATUMUMAB (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OFATUMUMAB	ARZERRA		27827	GPI-10 (2135184500)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of chronic lymphocytic leukemia (CLL)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient previously untreated for chronic lymphocytic leukemia (CLL) and meets **ALL** of the following criteria?
   - Fludara (fludarabine)-based therapy is considered inappropriate in this patient
   - The requested medication will be used in combination with chlorambucil

   If yes, **approve as follows by GPID or GPI-14 and enter two prior authorizations:**
   - **FIRST APPROVAL:**
     - **Approve one fill of Arzerra 100mg/5mL with a quantity limit of #3 vials**
   - **SECOND APPROVAL (Please enter a start date of 1 WEEK AFTER the start date of the initial PA):**
     - **Approve 12 months of Arzerra 100mg/5mL with a quantity limit of #10 vials per 28 days (total fill count of 12) OR**
     - **Approve 12 months of Arzerra 1,000mg/50mL with a quantity limit of #1 vial per 28 days (total fill count of 12)**

   If no, continue to #3.

OFATUMUMAB (NSA)

GUIDELINES FOR USE (CONTINUED)

3. Is the request for the treatment of **relapsed** chronic lymphocytic leukemia (CLL) **AND** does the patient meet the following criterion?
   - The requested medication will be used in combination with Fludara (fludarabine) and cyclophosphamide

   If yes, **approve as follows by GPID or GPI-14 and enter two prior authorizations:**
   - **FIRST APPROVAL:**
     - **Approve one fill of Arzerra 100mg/5mL with a quantity limit of #3 vials**
   - **SECOND APPROVAL (Please enter a start date of 1 WEEK AFTER the start date of the initial PA):**
     - **Approve 6 months of Arzerra 100mg/5mL with a quantity limit of #10 vials per 28 days (total fill count of 6) OR**
     - **Approve 6 months of Arzerra 1,000mg/50mL with a quantity limit of #1 vial per 28 days (total fill count of 6)**

   If no, continue to #4.

4. Is the request for extended treatment of chronic lymphocytic leukemia (CLL) and does the patient meet **ALL** of the following criteria?
   - The patient is in complete or partial response
   - The patient has received at least two lines of therapy for recurrent or progressive chronic lymphocytic leukemia (CLL)

   If yes, **approve as follows by GPID or GPI-14 and enter three prior authorizations:**
   - **FIRST APPROVAL:**
     - **Approve one fill of Arzerra 100mg/5mL with a quantity limit of #3 vials**
   - **SECOND APPROVAL (Please enter a start date of 1 WEEK AFTER the start date of the initial PA):**
     - **Approve one fill of Arzerra 100mg/5mL with a quantity limit of #10 vials OR**
     - **Approve one fill of Arzerra 1,000mg/50mL with a quantity limit of #1 vial**
   - **THIRD APPROVAL (Please enter a start date of 7 WEEKS AFTER the start date of the second approval):**
     - **Approve 24 months of Arzerra 100mg/5mL with a quantity limit of #10 vials per 8 weeks (total fill count of 13) OR**
     - **Approve 24 months of Arzerra 1,000mg/50mL with a quantity limit of #1 vial per 8 weeks (total fill count of 13)**

   If no, continue to #5.

OFATUMUMAB (NSA)

GUIDELINES FOR USE (CONTINUED)

5. Is the request for the treatment of refractory chronic lymphocytic leukemia (CLL) **AND** does the patient meet the following criterion?
   - The patient is refractory to Fludara (fludarabine) and Campath (alemtuzumab)

   If yes, **approve as follows by GPID or GPI-14 and enter three prior authorizations:**
   - **FIRST APPROVAL:**
     - **Approve one fill of Arzerra 100mg/5mL with a quantity limit of #3 vials**
   - **SECOND APPROVAL (Please enter a start date of 1 WEEK AFTER the start date of the initial PA):**
     - **Approve 7 weeks of Arzerra 100mg/5mL with a quantity limit of #20 vials per 7 days (total fill count of 7) OR**
     - **Approve 7 weeks of Arzerra 1,000mg/50mL with a quantity limit of #2 vials per 7 days**
   - **THIRD APPROVAL (Please enter a start date of 4 WEEKS AFTER the end date of the second approval):**
     - **Approve 16 weeks of Arzerra 100mg/5mL with a quantity limit of #20 vials per 28 days (total fill count of 4) OR**
     - **Approve 16 weeks of Arzerra 1,000mg/50mL with a quantity limit of #2 vials per 28 days (total fill count of 4)**

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OFATUMUMAB (Arzerra)** requires the following rule(s) be met for approval:
   A. You have chronic lymphocytic leukemia (CLL: type of blood and bone marrow cancer)
   B. If you have previously untreated chronic lymphocytic leukemia, approval also requires:
      1. You have not received previous treatment for chronic lymphocytic leukemia
      2. Fludara (fludarabine)-based therapy is considered inappropriate for you
      3. The requested medication will be used in combination with chlorambucil
   C. If you have relapsed chronic lymphocytic leukemia (type of blood and bone marrow cancer that has returned), approval also requires:
      1. The requested medication will be used in combination with Fludara (fludarabine) and cyclophosphamide
   (Denial text continued on next page)

PRIOR AUTHORIZATION GUIDELINES

OLAPARIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OLAPARIB	LYNPARZA	41642		GPI-10 (2153556000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of advanced epithelial ovarian, fallopian tube or primary peritoneal cancer (ICD-10 Groups C56, C57.0, C48, C79.6), and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is in complete or partial response to first-line platinum-based chemotherapy (e.g., paclitaxel, docetaxel, cisplatin, carboplatin)
   - The patient's diagnosis is confirmed by an FDA-approved companion diagnostic for Lynparza

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient meet **ONE** of the following criteria?
   - The patient's cancer has a deleterious or suspected deleterious germline or somatic BRCA mutation
   - The patient's cancer is associated with a homologous recombination deficiency (HRD)-positive status as defined by either a deleterious or suspected deleterious BRCA mutation, and/or genomic instability, AND Lynparza will be used in combination with bevacizumab

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient have a diagnosis of recurrent epithelial ovarian, fallopian tube or primary peritoneal cancer (ICD-10 Groups C56, C57.0, C48, C79.6), and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has a deleterious or suspected deleterious germline or somatic BRCA mutation, as confirmed by an FDA-approved companion diagnostic for Lynparza
   - The patient is in complete or partial response to platinum-based chemotherapy (e.g., paclitaxel, docetaxel, cisplatin, carboplatin)
   - Lynparza will be used as monotherapy

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, continue to #4.

OLAPARIB

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have a diagnosis of high risk early breast cancer (ICD-10 Group C50) and meet **ALL** of the following criteria?
   - Lynparza will be used as adjuvant treatment
   - The patient's cancer is HER2-negative
   - The patient's cancer has a deleterious or suspected deleterious germline BRCA mutation (gBRCAm) as confirmed by an FDA-approved companion diagnostic for Lynparza
   - The patient has been treated with neoadjuvant or adjuvant chemotherapy (e.g., doxorubicin, paclitaxel)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, continue to #5.

5. Does the patient have a diagnosis of metastatic breast cancer (ICD-10 C79.81; Group C50) and meet **ALL** of the following criteria?
   - The patient's cancer is HER2-negative
   - The patient's cancer has a deleterious or suspected deleterious germline BRCA mutation (gBRCAm) as confirmed by an FDA-approved companion diagnostic for Lynparza
   - The patient has been treated with chemotherapy (e.g., doxorubicin, docetaxel) in the neoadjuvant, adjuvant, or metastatic setting

   If yes, continue to #6.
   If no, continue to #7.

6. Does the patient meet **ONE** of the following criteria?
   - The patient does not have hormone receptor (HR)-positive breast cancer
   - The patient has a hormone receptor (HR)-positive breast cancer and has been treated with prior endocrine therapy or is considered inappropriate for endocrine therapy (e.g., tamoxifen, Arimidex [anastrozole])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OLAPARIB

GUIDELINES FOR USE (CONTINUED)

7. Does the patient have a diagnosis of metastatic pancreatic adenocarcinoma (ICD-10 Group C25) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's cancer has a deleterious or suspected deleterious germline BRCA mutation (gBRCAm) as confirmed by an FDA-approved companion diagnostic for Lynparza
   - The patient's disease has not progressed on at least 16 weeks of a first-line platinum-based chemotherapy regimen (e.g., paclitaxel, docetaxel, cisplatin, carboplatin)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, continue to #8.

8. Does the patient have a diagnosis of metastatic castration-resistant prostate cancer (mCRPC) (ICD-10 Z19.2, C61) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #9.
   If no, continue to #12.

9. Does the patient meet **BOTH** of the following criteria?
   - The patient's cancer has a deleterious or suspected deleterious germline or somatic homologous recombination repair (HRR) gene mutation as confirmed by an FDA-approved companion diagnostic for Lynparza
   - The patient's disease has progressed following prior treatment with enzalutamide (Xtandi) or abiraterone (Yonsa, Zytiga)

   If yes, continue to #11.
   If no, continue to #10.

10. Does the patient meet **BOTH** of the following criteria?
    - Lynparza will be used in combination with abiraterone (Yonsa, Zytiga) AND prednisone or prednisolone
    - The patient's cancer has a deleterious or suspected deleterious BRCA mutation (BRCAm) as confirmed by an FDA-approved companion diagnostic for Lynparza

    If yes, continue to #11.
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

OLAPARIB

GUIDELINES FOR USE (CONTINUED)

11. Does the patient meet **ONE** of the following criteria?
    - The patient had a bilateral orchiectomy
    - The patient has a castrate testosterone level (i.e., less than 50 ng/dL)
    - Lynparza will be used concurrently with a gonadotropin-releasing hormone (GnRH) analog (e.g., Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

    If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

12. Is the request for a currently approved US Food and Drug Administration (FDA) indication as listed in the recent manufacturer prescribing information document? (see FDA website for approved drugs indications: https://www.accessdata.fda.gov/scripts/cder/daf/index.cfm)

    If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
    If no, do not approve.

    DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **OLAPARIB (Lynparza)** requires the following rule(s) be met for approval:
    A. You have ONE of the following:
        1. Advanced or recurrent (returning) epithelial ovarian cancer, fallopian tube cancer, or primary peritoneal cancer (types of reproductive system cancers)
        2. High risk early breast cancer
        3. Metastatic breast cancer (breast cancer that has spread to other parts of the body)
        4. Metastatic pancreatic adenocarcinoma (a type of pancreas cancer that has spread to other parts of the body)
        5. Metastatic castration-resistant prostate cancer (mCRPC: prostate cancer that has spread to other parts of the body and does not respond to hormone therapy)
        6. A currently approved US Food and Drug Administration (FDA) indication as listed in the recent manufacturer prescribing information document

    (Denial text continued on next page)

OLAPARIB

GUIDELINES FOR USE (CONTINUED)

B. If you have advanced epithelial ovarian, fallopian tube, or primary peritoneal cancer, approval also requires:
1. You are 18 years of age or older
2. You are in complete or partial response to first-line platinum-based chemotherapy (such as paclitaxel, docetaxel, cisplatin, carboplatin)
3. Your diagnosis is confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
4. You meet ONE of the following:
   a. Your cancer has a deleterious or suspected deleterious germline or somatic BRCA mutation (a type of gene mutation)
   b. Your cancer is associated with a homologous recombination deficiency (HRD: type of gene mutation)-positive status as defined by either a deleterious or suspected deleterious BRCA mutation (type of gene mutation), and/or genomic instability (high rate of gene mutation), AND Lynparza will be used in combination with bevacizumab

C. If you have recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer, approval also requires:
1. You are 18 years of age or older
2. Your cancer has a deleterious or suspected deleterious germline or somatic BRCA mutation (a type of gene mutation), as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
3. You are in complete or partial response to platinum-based chemotherapy (such as paclitaxel, docetaxel, cisplatin, carboplatin)
4. Lynparza will be used as monotherapy (used alone)

D. If you have high risk early breast cancer, approval also requires:
1. Lynparza will be used as adjuvant (add-on) treatment
2. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-negative
3. Your cancer has a deleterious or suspected deleterious germline BRCA mutation (gBRCAm: a type of gene mutation) as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
4. You have been treated with neoadjuvant or adjuvant chemotherapy (cancer treatment given before the main treatment or as add-on therapy such as doxorubicin, paclitaxel)

(Denial text continued on next page)

CONTINUED ON NEXT PAGE

OLAPARIB

GUIDELINES FOR USE (CONTINUED)

E. If you have metastatic breast cancer, approval also requires:
1. Your cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-negative
2. Your cancer has a deleterious or suspected deleterious germline BRCA mutation (gBRCAm: a type of gene mutation) as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
3. You have been treated with chemotherapy (such as doxorubicin, docetaxel) in the neoadjuvant (given before the main treatment), adjuvant (add-on to main treatment), or metastatic setting (to treat disease that has spread to other parts of the body)
4. You meet ONE of the following:
   a. You do not have hormone receptor (HR)-positive breast cancer
   b. You have hormone receptor (HR)-positive breast cancer and have been treated with prior endocrine (hormone) therapy (such as tamoxifen, Arimidex [anastrozole]), or endocrine therapy is considered inappropriate for you

F. If you have metastatic pancreatic adenocarcinoma, approval also requires:
1. You are 18 years of age or older
2. Your cancer has a deleterious or suspected deleterious germline BRCA mutation (gBRCAm: a type of gene mutation) as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
3. Your disease has not progressed on at least 16 weeks of a first-line platinum-based chemotherapy regimen (such as paclitaxel, docetaxel, cisplatin, carboplatin)

G. If you have metastatic castration-resistant prostate cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your cancer has worsened following prior treatment with enzalutamide (Xtandi) or abiraterone (Yonsa or Zytiga) AND has a deleterious or suspected deleterious germline or somatic homologous recombination repair (HRR) gene mutation (type of mutation), as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
   b. Lynparza will be used in combination with abiraterone (Yonsa or Zytiga) and with prednisone or prednisolone AND your cancer has a deleterious or suspected deleterious BRCA mutation (BRCAm: a type of gene mutation) as confirmed by a Food and Drug Administration (FDA)-approved companion diagnostic for Lynparza
3. You meet ONE of the following:
   a. You had a bilateral orchiectomy (both testicles have been surgically removed)
   b. You have a castrate level of testosterone (blood testosterone levels are less than 50 ng/dL)
   c. Lynparza will be used concurrently (at the same time) with a gonadotropin-releasing hormone (GnRH) analog (such as Lupron Depot [leuprolide], Zoladex [goserelin], Firmagon [degarelix])

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OLEZARSEN

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OLEZARSEN SODIUM	TRYNGOLZA	50111		GPI-10 (3090626530)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of familial chylomicronemia syndrome (FCS) (ICD-10 E78.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Tryngolza will be used as an adjunct therapy to diet
   - Tryngolza will NOT be used concurrently with another agent (e.g., Redemplo [plozasiran]) for the treatment of FCS

   If yes, continue to #2.
   If no, continue to #3.

2. Has the patient's FCS diagnosis been confirmed with **ONE** of the following criteria?
   - Genetic testing
   - History of fasting triglycerides of at least 1000 mg/dL on repeated testing (for at least 3 prior occasions) AND a history of recurrent acute pancreatitis that is not caused by alcohol or cholelithiasis, a history of hospitalization for severe abdominal pain without other explainable cause, or a family history of hypertriglyceridemia-induced pancreatitis

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.8mL per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Does the patient have a diagnosis of severe hypertriglyceridemia and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient is adhering to or has previously tried guideline-recommended lifestyle interventions for triglyceride reduction, including dietary modifications and physical activity when clinically appropriate and feasible
   - The patient has a baseline fasting triglyceride level of at least 500 mg/dL
   - The patient had a trial of or contraindication to TWO clinical standard of care triglyceride lowering therapies (e.g., Vascepa [icosapent ethyl], Lovaza [omega-3 acid ethyl esters], Lopid [gemfibrozil], fenofibrate, statin [e.g., atorvastatin, simvastatin, rosuvastatin])

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #0.8mL per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

OLEZARSEN

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT:

Our guideline named **OLEZARSEN (Tryngolza)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Familial chylomicronemia syndrome (FCS: a type of rare genetic condition)
   2. Severe hypertriglyceridemia (high levels of fat in the blood)

B. If you have familial chylomicronemia syndrome, approval also requires:
   1. You are 18 years of age or older
   2. You will use Tryngolza as an adjunct (add-on) therapy to diet
   3. You will NOT use Tryngolza concurrently (at the same time) with another medication (such as Redemplo [plozasiran]) for the treatment of familial chylomicronemia syndrome (FCS: a type of rare genetic condition)
   4. Your familial chylomicronemia syndrome (FCS: a type of rare genetic condition) has been confirmed with ONE of the following:
      a. Genetic testing (a type of lab test)
      b. History of fasting triglycerides (a type of fat) of at least 1000 mg/dL on repeated testing (for at least 3 prior occasions) AND a history of recurrent acute pancreatitis (short-term inflammation of the pancreas) that is not caused by alcohol or cholelithiasis (hard, pebble-like stones that form inside gallbladder), a history of hospitalization for severe abdominal pain without other explainable cause, or a family history of hypertriglyceridemia-induced pancreatitis (high levels of fat in the blood due to pancreas inflammation)

C. If you have severe hypertriglyceridemia, approval also requires:
   1. You are 18 years of age or older
   2. You are adhering to (keeping up with) or have previously tried guideline-recommended lifestyle interventions for triglyceride (a type of fat) reduction (decrease), including dietary modifications (changes) and physical activity when clinically appropriate and feasible (doable)
   3. You have a baseline (before treatment) fasting triglyceride (a type of lab test) level of at least 500 mg/dL
   4. You have tried or have a contraindication to (harmful for you to use) TWO clinical standard of care triglyceride (a type of fat) lowering therapies (such as Vascepa [icosapent ethyl], Lovaza [omega-3 acid ethyl esters], Lopid [gemfibrozil], fenofibrate, statin [such as atorvastatin, simvastatin, rosuvastatin])

OLEZARSEN

RENEWAL CRITERIA

1. Does the patient have a diagnosis of familial chylomicronemia syndrome (FCS) (ICD-10 E78.3) and meet **ALL** of the following criteria?
   - The patient has experienced a clinical benefit as demonstrated by a reduction in triglyceride levels
   - Tryngolza will NOT be used concurrently with another agent (e.g., Redemplo [plozasiran]) for the treatment of FCS

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.8mL per 28 days.** If no, continue to #2.

2. Does the patient have a diagnosis of severe hypertriglyceridemia **AND** meet the following criterion?
   - The patient has experienced a clinical benefit as demonstrated by a reduction in triglyceride levels or acute pancreatitis events

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #0.8mL per 28 days.** If no, do not approve.

   RENEWAL DENIAL TEXT:

   Our guideline named **OLEZARSEN (Tryngolza)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. You have familial chylomicronemia syndrome (FCS: a type of rare genetic condition)
      2. Severe hypertriglyceridemia (high levels of fat in the blood)

   B. If you have familial chylomicronemia syndrome, renewal also requires:
      1. You have experienced a clinical benefit as shown by a reduction (decrease) in triglyceride (a type of fat) levels
      2. You will NOT use Tryngolza concurrently (at the same time) with another medication (such as Redemplo [plozasiran]) for the treatment of familial chylomicronemia syndrome (FCS: a type of rare genetic condition)

   C. If you have severe hypertriglyceridemia, renewal also requires:
      1. You have experienced a clinical benefit as shown by a reduction (decrease) in triglyceride (a type of fat) levels or acute pancreatitis (short-term inflammation of the pancreas) events

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OLIPUDASE ALFA-RPCP (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OLIPUDASE ALFA-RPCP	XENPOZYME	48267		GPI-10 (3090156030)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of acid sphingomyelinase deficiency (ASMD) and meet **ALL** of the following criteria?
   - The patient has non-central nervous system manifestations of ASMD
   - The patient has baseline alanine aminotransferase (ALT) and aspartate aminotransferase (AST) levels within 1 month of Xenpozyme initiation date

   If yes, **approve for lifetime by HICL or GPI-10 for 2 fills per 28 days.**
   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OLIPUDASE ALFA-RPCP (Xenpozyme)** requires the following rule(s) be met for approval:
   A. You have acid sphingomyelinase deficiency (ASMD: a type of rare genetic disorder that affects the body's ability to break down fat)
   B. You have non-central nervous system manifestations (affected organs are not in the brain or spinal cord) of ASMD
   C. You have baseline alanine aminotransferase (ALT: a type of liver enzyme test) and aspartate aminotransferase (AST: a type of liver enzyme test) levels within 1 month of Xenpozyme start date

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OMADACYCLINE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OMADACYCLINE TOSYLATE	NUZYRA		45478	GPI-14 (04200050200320)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of community-acquired bacterial pneumonia (CABP) (ICD-10 J15.9) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's CABP infection is caused by any of the following susceptible microorganisms: *Streptococcus pneumoniae, Staphylococcus aureus* (methicillin-susceptible isolates), *Haemophilus influenzae, Haemophilus parainfluenzae, Klebsiella pneumoniae, Legionella pneumophila, Mycoplasma pneumoniae,* or *Chlamydophila pneumoniae*

   If yes, continue to #2.
   If no, continue to #6.

2. Is the request for continuation of care from an inpatient setting?

   If yes, **approve the 150 mg tablet for 1 month by GPID or GPI-14 with a quantity limit of #30 per 14 days for 1 fill.**

   If no, continue to #3.

3. Is therapy prescribed by or in consultation with an infectious disease (ID) specialist?

   If yes, **approve the 150 mg tablet for 1 month by GPID or GPI-14 with a quantity limit of #30 per 14 days for 1 fill.**

   If no, continue to #4.

4. Has an antimicrobial susceptibility test been performed that meets **ALL** of the following criteria?
   - The results from the infection site culture indicate pathogenic organism(s) with resistance to at least TWO standard of care agents for CABP (e.g., azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone)
   - The results from the infection site culture indicate pathogenic organism(s) with susceptibility to Nuzyra

   If yes, **approve the 150 mg tablet for 1 month by GPID or GPI-14 with a quantity limit of #30 per 14 days for 1 fill.**

   If no, continue to #5.

OMADACYCLINE

GUIDELINES FOR USE (CONTINUED)

5. Does the patient meet **ALL** of the following criteria?
   - Antimicrobial susceptibility results are unavailable
   - The patient had a trial of or contraindication to at least TWO standard of care agents for CABP (e.g., azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone)

   If yes, **approve the 150 mg tablet for 1 month by GPID or GPI-14 with a quantity limit of #30 per 14 days for 1 fill.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Does the patient have a diagnosis of an acute bacterial skin or skin structure infection (ABSSSI) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's ABSSSI infection is caused by any of the following susceptible microorganisms: *Staphylococcus aureus* (methicillin-susceptible and -resistant isolates), *Staphylococcus lugdunensis, Streptococcus pyogenes, Streptococcus anginosus grp.* (includes *S. anginosus, S. intermedius,* and *S. constellatus), Enterococcus faecalis, Enterobacter cloacae,* or *Klebsiella pneumoniae*

   If yes, continue to #7.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

7. Is therapy prescribed by or in consultation with an infectious disease (ID) specialist?

   If yes, **approve the 150 mg tablet for 1 month by GPID or GPI-14 with a quantity limit of #30 per 14 days for 1 fill.**

   If no, continue to #8.

OMADACYCLINE

GUIDELINES FOR USE (CONTINUED)

8. Has an antimicrobial susceptibility test been performed that meets **ALL** of the following criteria?
   - The results from the infection site culture indicate pathogenic organism(s) with resistance to at least TWO standard of care agents for ABSSSI (e.g., linezolid, clindamycin, doxycycline, sulfamethoxazole/trimethoprim, vancomycin, amoxicillin, nafcillin, ceftriaxone, cephalexin, cefazolin)
   - The results from the infection site culture indicate pathogenic organism(s) with susceptibility to Nuzyra

   If yes, **approve the 150 mg tablet for 1 month by GPID or GPI-14 with a quantity limit of #30 per 14 days for 1 fill.**

   If no, continue to #9.

9. Does the patient meet **ALL** of the following criteria?
   - Antimicrobial susceptibility results are unavailable
   - The patient had a trial of or contraindication to at least TWO standard of care agents for ABSSSI (e.g., linezolid, clindamycin, doxycycline, sulfamethoxazole/trimethoprim, vancomycin, amoxicillin, nafcillin, ceftriaxone, cephalexin, cefazolin)

   If yes, **approve the 150 mg tablet for 1 month by GPID or GPI-14 with a quantity limit of #30 per 14 days for 1 fill.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OMADACYCLINE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OMADACYCLINE (Nuzyra)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Community-acquired bacterial pneumonia (CABP: a type of lung infection)
2. Acute bacterial skin or skin structure infection (ABSSSI: a type of skin condition)

B. If you have community-acquired bacterial pneumonia, approval also requires:

1. You are 18 years of age or older
2. Your infection is caused by any of the following susceptible microorganisms (bacteria that the medication can work on): *Streptococcus pneumoniae, Staphylococcus aureus* (methicillin-susceptible isolates), *Haemophilus influenzae, Haemophilus parainfluenzae, Klebsiella pneumoniae, Legionella pneumophila, Mycoplasma pneumoniae,* or *Chlamydophila pneumoniae*
3. You meet ONE of the following:
   a. Your request is for continuation of care from an inpatient setting (a healthcare facility where medical treatment is given overnight or longer)
   b. Therapy is prescribed by or in consultation with an infectious disease (ID) specialist (a doctor who specializes in the treatment of infections)
   c. Your antimicrobial susceptibility test (lab test that shows what medications work on which bacteria) shows ALL of the following:
      i. The bacteria at the infection site culture is resistant (medication will not work on that bacteria) to at least TWO standard of care medications for community-acquired bacterial pneumonia (CABP: a type of lung infection) (such as azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone)
      ii. Nuzyra will work against the bacteria
   d. If an antimicrobial susceptibility test (lab test that shows what medications work on which bacteria) is not available, approval requires you have tried or have a contraindication to (harmful for you to use) at least TWO standard of care medications for community-acquired bacterial pneumonia (CABP: a type of lung infection) (such as azithromycin, doxycycline, levofloxacin, moxifloxacin, amoxicillin, ceftriaxone)

(Denial text continued on next page)

OMADACYCLINE

GUIDELINES FOR USE (CONTINUED)

C. If you have an acute bacterial skin or skin structure infection (ABSSSI), approval also requires:

1. You are 18 years of age or older
2. Your infection is caused by any of the following microorganisms (bacteria that the medication can work on): *Staphylococcus aureus* (methicillin-susceptible and -resistant isolates), *Staphylococcus lugdunensis, Streptococcus pyogenes, Streptococcus anginosus grp. (*includes *S. anginosus, S. intermedius,* and *S. constellatus), Enterococcus faecalis, Enterobacter cloacae,* or *Klebsiella pneumoniae*
3. You meet ONE of the following:
   a. Therapy is prescribed by or in consultation with an infectious disease (ID) specialist (a doctor who specializes in the treatment of infections)
   b. Your antimicrobial susceptibility test (lab test that shows what medications work on which bacteria) shows ALL of the following:
      i. The bacteria at the infection site culture is resistant (medication will not work on that bacteria) to at least TWO standard of care medications for acute bacterial skin or skin structure infection (such as linezolid, clindamycin, doxycycline, sulfamethoxazole/trimethoprim, vancomycin, amoxicillin, nafcillin, ceftriaxone, cephalexin, cefazolin)
      ii. Nuzyra will work against the bacteria
   c. If an antimicrobial susceptibility test (lab test that shows what medications work on which bacteria) is not available, approval requires you have tried or have a contraindication to (harmful for you to use) at least TWO standard of care medications for acute bacterial skin or skin structure infection (such as linezolid, clindamycin, doxycycline, sulfamethoxazole/trimethoprim, vancomycin, amoxicillin, nafcillin, ceftriaxone, cephalexin, cefazolin)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OMALIZUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OMALIZUMAB	XOLAIR	25399		GPI-10 (4460306000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate persistent asthma (ICD-10 Group J45.4) to severe persistent asthma (ICD-10 Group J45.5) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in pulmonary or allergy medicine
   - The patient has a positive skin prick or blood test (e.g., ELISA, FEIA) to a perennial aeroallergen
   - The patient has a baseline IgE serum level of at least 30 IU/mL
   - Xolair will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline, or an oral corticosteroid [e.g., prednisone])
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Tezspire [tezepelumab-ekko]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of asthma

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced at least ONE asthma exacerbation requiring systemic corticosteroid burst lasting at least 3 days within the past 12 months
   - The patient has experienced at least ONE serious asthma exacerbation requiring hospitalization or an emergency room visit within the past 12 months

   If yes, **approve all formulations of the requested strength for 4 months by GPID or GPI-14 as follows:**
   - **150mg: #6 per 28 days.**
   - **75mg/0.5mL: #5mL per 28 days.**
   - **150mg/mL: #4mL per 28 days.**
   - **300mg/2mL: #4mL per 28 days.**

   If no, continue to #3.

CONTINUED ON NEXT PAGE

OMALIZUMAB

INITIAL CRITERIA (CONTINUED)

3. Does the patient have poor symptom control despite current therapy as evidenced by at least **THREE** of the following within the past 4 weeks?
   - Daytime asthma symptoms more than twice per week
   - Any night waking due to asthma
   - Use of a short-acting inhaled beta2-agonist (SABA) reliever (e.g., albuterol) for symptoms more than twice per week
   - Any activity limitation due to asthma

   If yes, **approve all formulations of the requested strength for 4 months by GPID or GPI-14 as follows:**
   - **150mg: #6 per 28 days.**
   - **75mg/0.5mL: #5mL per 28 days.**
   - **150mg/mL: #4mL per 28 days.**
   - **300mg/2mL: #4mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an otolaryngologist, allergist, or immunologist
   - There is evidence of nasal polyps by direct examination, endoscopy, or sinus CT scan
   - The patient has inadequately controlled disease
   - The patient had a 56-day trial of ONE clinical standard of care agent: an intranasal corticosteroid (e.g., mometasone nasal spray)
   - Xolair will be used as add-on maintenance treatment
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #8 per 28 days.**
   If no, continue to #5.

CONTINUED ON NEXT PAGE

OMALIZUMAB

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of an IgE-mediated food allergy (ICD-10 Group Z91.01) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient will continue to avoid food allergens while on Xolair
   - The patient has an IgE serum level of at least 30 IU/mL
   - The patient has an allergen specific IgE serum level of at least 6 kUA/L to at least one food, OR a positive skin prick test to at least one food, OR a positive medically monitored food challenge to at least one food
   - Therapy is prescribed by or in consultation with an allergist or immunologist
   - The patient has an active prescription for epinephrine auto-injector/injection while on Xolair
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Palforzia) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of IgE-mediated food allergy

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #8 per 28 days.**
   If no, continue to #6.

6. Does the patient have a diagnosis of chronic spontaneous urticaria (CSU; also called chronic idiopathic urticaria [CIU]) (ICD-10 L50.1, L50.8, L50.9) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with an allergist, dermatologist, or immunologist
   - The patient still experiences hives or angioedema on most days of the week for at least 6 weeks
   - The patient had a trial of and is maintained on, OR has a contraindication to, the clinical standard of care agent at four times the maximally labeled dose: a second generation H1 antihistamine (Zyrtec [cetirizine] dose of 40mg/day, Xyzal [levocetirizine] dose of 20mg/day, Claritin [loratadine] dose of 40mg/day, Clarinex [desloratadine] dose of 20mg/day, or Allegra [fexofenadine] dose of 720mg/day)
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

   If yes, **approve all formulations of the requested strength for 6 months by GPID or GPI-14 as follows:**
   - **150mg: #2 per 28 days.**
   - **150mg/mL: #2mL per 28 days.**
   - **300mg/2mL: #2mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

OMALIZUMAB

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OMALIZUMAB (Xolair)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe persistent asthma (a type of lung condition)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)
   3. IgE-mediated food allergy (body's reaction to a food allergy)
   4. Chronic spontaneous urticaria (also called chronic idiopathic urticaria) [severe itching with unknown cause]

B. If you have moderate to severe persistent asthma, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a physician specializing in pulmonary (relating to lungs/breathing) medicine or allergy medicine
   3. You have a positive skin prick or blood test, such as ELISA or FEIA (types of blood tests to identify allergies), to a perennial aeroallergen (airborne particles that cause allergies year-round)
   4. You have a baseline IgE (type of antibody that is produced by the immune system if there is an allergy) serum (blood) level of at least 30 IU/mL
   5. Xolair will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long- acting inhaled beta2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), theophylline, or an oral corticosteroid (such as prednisone)
   6. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Tezspire [tezepelumab-ekko]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma

(Initial denial text continued on next page)

OMALIZUMAB

INITIAL CRITERIA (CONTINUED)

7. You meet ONE of the following:
   a. You have experienced at least ONE asthma exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
   b. You have experienced at least ONE serious asthma exacerbation requiring a hospitalization or an emergency room visit within the past 12 months
   c. You have poor symptom control despite current therapy as shown by at least THREE of the following within the past 4 weeks:
      i. Daytime asthma symptoms more than twice per week
      ii. Any night waking due to asthma
      iii. Use of a short-acting inhaled beta2-agonist reliever (such as albuterol) for symptoms more than twice per week
      iv. Any activity limitation due to asthma

C. If you have chronic rhinosinusitis with nasal polyps, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an otolaryngologist (ear, nose, and throat doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
3. There is evidence of nasal polyps (non-cancerous growths) by direct examination, endoscopy (using a small camera), or sinus computed tomography (CT) scan (a type of imaging test)
4. You have inadequately controlled disease
5. You had a 56-day trial of ONE clinical standard of care medication: an intranasal corticosteroid (such as mometasone nasal spray)
6. Xolair will be used as add-on maintenance treatment (taken on a regular basis)
7. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

(Initial denial text continued on next page)

OMALIZUMAB

INITIAL CRITERIA (CONTINUED)

D. If you have an IgE-mediated food allergy, approval also requires:
1. You are 1 year of age or older
2. You will continue to avoid food allergens (not eating or coming into contact with food that causes an allergic reaction) while on Xolair
3. You have an IgE (type of antibody that is produced by the immune system if there is an allergy) serum (blood) level of at least 30 IU/mL
4. You have an allergen specific IgE serum level of at least 6 kUA/L to at least one food, OR a positive skin prick test (a type of allergy test) to at least one food, OR a positive medically monitored food challenge to at least one food
5. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor) or immunologist (a type of immune system doctor)
6. You have an active prescription for epinephrine auto-injector/injection while on Xolair
7. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Palforzia) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of IgE-mediated food allergy

E. If you have chronic spontaneous urticaria (chronic idiopathic urticaria), approval also requires:
1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You still experience hives or angioedema (a type of swelling) on most days of the week for at least 6 weeks
4. You have tried and are maintained on (continue to use on a regular basis), OR you have a contraindication to (harmful for you to use), the clinical standard of care medication at four times the maximally labeled dose: a second generation H1 antihistamine (type of allergy medication) (Zyrtec [cetirizine] dose of 40mg/day, Xyzal [levocetirizine] dose of 20mg/day, Claritin [loratadine] dose of 40mg/day, Clarinex [desloratadine] dose of 20mg/day, or Allegra [fexofenadine] dose of 720mg/day)
5. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OMALIZUMAB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate persistent asthma (ICD-10 Group J45.4) to severe persistent asthma (ICD-10 Group J45.5) and meet **ALL** of the following criteria?
   - The patient will continue to use an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline, or an oral corticosteroid [e.g., prednisone])
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Tezspire [tezepelumab-ekko]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of asthma

   If yes, continue to #2.
   If no, continue to #3.

2. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Increase in percent predicted FEV1 from pretreatment baseline
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)

   If yes, **approve all formulations of the requested strength for 12 months by GPID or GPI-14 as follows:**
   - **150mg: #6 per 28 days.**
   - **75mg/0.5mL: #5mL per 28 days.**
   - **150mg/mL: #4mL per 28 days.**
   - **300mg/2mL: #4mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

OMALIZUMAB

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline (e.g., improvements in nasal congestion, sense of smell, size of polyps)
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #8 per 28 days.**
   If no, continue to #4.

4. Does the patient have a diagnosis of an IgE-mediated food allergy (ICD-10 Group Z91.01) and meet **ALL** of the following criteria?
   - The patient has persistent IgE-mediated food allergy
   - The patient has an active prescription for epinephrine auto-injector/injection while on Xolair
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Palforzia) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of IgE-mediated food allergy

   If yes, **approve for 24 months by HICL or GPI-10 with a quantity limit of #8 per 28 days.**
   If no, continue to #5.

5. Does the patient have a diagnosis of chronic spontaneous urticaria (CSU; also called chronic idiopathic urticaria [CIU]) (ICD-10 L50.1, L50.8, L50.9) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an allergist, dermatologist, or immunologist
   - The patient is maintained on, OR has a contraindication to, a second generation H1 anti-histamine (Zyrtec [cetirizine], Xyzal [levocetirizine], Claritin [loratadine], Clarinex [desloratadine], or Allegra [fexofenadine])
   - Xolair will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

   If yes, **approve all formulations of the requested strength for 12 months by GPID or GPI-14 as follows:**
   - **150mg: #2 per 28 days.**
   - **150mg/mL: #2mL per 28 days.**
   - **300mg/2mL: #2mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

OMALIZUMAB

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OMALIZUMAB (Xolair)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe persistent asthma (a type of lung condition)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)
   3. IgE-mediated food allergy (body's reaction to a food allergy)
   4. Chronic spontaneous urticaria (also called chronic idiopathic urticaria) [severe itching with unknown cause]

B. If you have moderate to severe persistent asthma, renewal also requires:
   1. You will continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), theophylline, or an oral corticosteroid (such as prednisone)
   2. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Tezspire [tezepelumab-ekko]), or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma
   3. You have shown a clinical response as evidenced by ONE of the following:
      a. You have experienced a decrease in asthma exacerbations (worsening of symptoms) from baseline (before starting Xolair)
      b. You have decreased your use of rescue medications (such as albuterol)
      c. You have an increase in percent predicted FEV1 (type of lung test) from pre- treatment baseline (before starting Xolair)
      d. You have a decrease in the severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)

C. If you have chronic rhinosinusitis with nasal polyps, renewal also requires:
   1. You have shown a clinical benefit compared to baseline (before starting Xolair) (such as improvements in nasal congestion, sense of smell, size of polyps)
   2. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps

(Renewal denial text continued on next page)

OMALIZUMAB

RENEWAL CRITERIA (CONTINUED)

D. If you have an IgE-mediated food allergy, renewal also requires:
1. You have persistent IgE-mediated food allergy
2. You have an active prescription for epinephrine auto-injector/injection while on Xolair
3. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Palforzia) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of IgE-mediated food allergy

E. If you have chronic spontaneous urticaria (chronic idiopathic urticaria), renewal also requires:
1. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
2. You are maintained on (continue to use on a regular basis), OR you have a contraindication to (harmful for you to use), a second generation H1 antihistamine (type of allergy medication) (Zyrtec [cetirizine], Xyzal [levocetirizine], Claritin [loratadine], Clarinex [desloratadine], or Allegra [fexofenadine])
3. You will NOT use Xolair concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of moderate persistent asthma (ICD-10 Group J45.4) to severe persistent asthma (ICD-10 Group J45.5) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Therapy is prescribed by or in consultation with a physician specializing in pulmonary or allergy medicine
   - The patient has a positive skin prick or blood test (e.g., ELISA, FEIA) to a perennial aeroallergen
   - The patient has a baseline IgE serum level of at least 30 IU/mL
   - Omlyclo will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline, or an oral corticosteroid [e.g., prednisone])
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Tezspire [tezepelumab-ekko]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of asthma

   If yes, continue to #2.
   If no, continue to #4.

2. Does the patient meet **ONE** of the following criteria?
   - The patient has experienced at least ONE asthma exacerbation requiring systemic corticosteroid (e.g., prednisone) burst lasting at least 3 days within the past 12 months
   - The patient has experienced at least ONE serious asthma exacerbation requiring hospitalization or an emergency room visit within the past 12 months

   If yes, **approve for 4 months by GPID or GPI-14 for all of the following strengths:**
   - **75mg/0.5mL: #5mL per 28 days.**
   - **150mg/mL: #4mL per 28 days.**
   - **300mg/2mL: #4mL per 28 days.**

   If no, continue to #3.

OMALIZUMAB-IGEC

INITIAL CRITERIA (CONTINUED)

3. Does the patient have poor symptom control despite current therapy as evidenced by at least **THREE** of the following within the past 4 weeks?
   - Daytime asthma symptoms more than twice per week
   - Any night waking due to asthma
   - Use of a short-acting inhaled beta2-agonist (SABA) reliever (e.g., albuterol) for symptoms more than twice per week
   - Any activity limitation due to asthma

   If yes, **approve for 4 months by GPID or GPI-14 for all of the following strengths:**
   - **75mg/0.5mL: #5mL per 28 days.**
   - **150mg/mL: #4mL per 28 days.**
   - **300mg/2mL: #4mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an otolaryngologist, allergist, or immunologist
   - There is evidence of nasal polyps by direct examination, endoscopy, or sinus CT scan
   - The patient has inadequately controlled disease
   - The patient had a 56-day trial of ONE clinical standard of care agent: an intranasal corticosteroid (e.g., mometasone nasal spray)
   - Omlyclo will be used as add-on maintenance treatment
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #8mL per 28 days.**
   If no, continue to #5.

CONTINUED ON NEXT PAGE

OMALIZUMAB-IGEC

INITIAL CRITERIA (CONTINUED)

5. Does the patient have a diagnosis of an IgE-mediated food allergy (ICD-10 Group Z91.01) and meet **ALL** of the following criteria?
   - The patient is 1 year of age or older
   - The patient will continue to avoid food allergens while on Omlyclo
   - The patient has an IgE serum level of at least 30 IU/mL
   - The patient has an allergen specific IgE serum level of at least 6 kUA/L to at least one food, OR a positive skin prick test to at least one food, OR a positive medically monitored food challenge to at least one food
   - Therapy is prescribed by or in consultation with an allergist or immunologist
   - The patient has an active prescription for epinephrine auto-injector/injection while on Omlyclo
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Palforzia) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of IgE-mediated food allergy

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #8mL per 28 days.** If no, continue to #6.

6. Does the patient have a diagnosis of chronic spontaneous urticaria (CSU; also called chronic idiopathic urticaria [CIU]) (ICD-10 L50.1, L50.8, L50.9) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with an allergist, dermatologist, or immunologist
   - The patient still experiences hives or angioedema on most days of the week for at least 6 weeks
   - The patient had a trial of and is maintained on, OR has a contraindication to, the clinical standard of care agent at four times the maximally labeled dose: a second generation H1 antihistamine (Zyrtec [cetirizine] dose of 40mg/day, Xyzal [levocetirizine] dose of 20mg/day, Claritin [loratadine] dose of 40mg/day, Clarinex [desloratadine] dose of 20mg/day, or Allegra [fexofenadine] dose of 720mg/day)
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #2mL per 28 days.** If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

OMALIZUMAB-IGEC

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT:

Our guideline named **OMALIZUMAB-IGEC (Omlyclo)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Moderate to severe persistent asthma (a type of lung condition)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)
   3. IgE-mediated food allergy (body's reaction to a food allergy)
   4. Chronic spontaneous urticaria (also called chronic idiopathic urticaria) [severe itching with unknown cause]

B. If you have moderate to severe persistent asthma, approval also requires:
   1. You are 6 years of age or older
   2. Therapy is prescribed by or in consultation with a physician specializing in pulmonary (relating to lungs/breathing) medicine or allergy medicine
   3. You have a positive skin prick or blood test, such as ELISA or FEIA (types of blood tests to identify allergies), to a perennial aeroallergen (airborne particles that cause allergies year-round)
   4. You have a baseline IgE (type of antibody that is produced by the immune system if there is an allergy) serum (blood) level of at least 30 IU/mL
   5. Omlyclo will be used in combination with a medium, high-dose, or maximally tolerated dose of an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), theophylline, or an oral corticosteroid (such as prednisone)
   6. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Tezspire [tezepelumab-ekko]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma (a type of lung condition)

(Initial denial text continued on next page)

OMALIZUMAB-IGEC

INITIAL CRITERIA (CONTINUED)

7. You meet ONE of the following:
   a. You have experienced at least ONE asthma (a type of lung condition) exacerbation (worsening of symptoms) requiring systemic corticosteroid (such as prednisone) burst lasting at least 3 days within the past 12 months
   b. You have experienced at least ONE serious asthma exacerbation requiring a hospitalization or an emergency room visit within the past 12 months
   c. You have poor symptom control despite current therapy as shown by at least THREE of the following within the past 4 weeks:
      i. Daytime asthma symptoms more than twice per week
      ii. Any night waking due to asthma
      iii. Use of a short-acting inhaled beta2-agonist reliever (such as albuterol) for symptoms more than twice per week
      iv. Any activity limitation due to asthma

C. If you have chronic rhinosinusitis with nasal polyps, approval also requires:

1. You are 18 years of age or older
2. Therapy is prescribed by or in consultation with an otolaryngologist (ear, nose, and throat doctor), allergist (a type of allergy doctor), or immunologist (a type of immune system doctor)
3. There is evidence of nasal polyps (non-cancerous growths) by direct examination, endoscopy (using a small camera), or sinus computed tomography (CT) scan (a type of imaging test)
4. You have inadequately controlled disease
5. You had a 56-day trial of ONE clinical standard of care medication: an intranasal corticosteroid (such as mometasone nasal spray)
6. Omlyclo will be used as add-on maintenance treatment (taken on a regular basis)
7. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps (inflammation of nasal and sinus ways with small growths in the nose)

(Initial denial text continued on next page)

OMALIZUMAB-IGEC

INITIAL CRITERIA (CONTINUED)

D. If you have an IgE-mediated food allergy, approval also requires:
1. You are 1 year of age or older
2. You will continue to avoid food allergens (not eating or coming into contact with food that causes an allergic reaction) while on Omlyclo
3. You have an IgE (type of antibody that is produced by the immune system if there is an allergy) serum (blood) level of at least 30 IU/mL
4. You have an allergen specific IgE serum level of at least 6 kUA/L to at least one food, OR a positive skin prick test (a type of allergy test) to at least one food, OR a positive medically monitored food challenge to at least one food
5. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor) or immunologist (a type of immune system doctor)
6. You have an active prescription for epinephrine auto-injector/injection while on Omlyclo
7. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Palforzia) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of IgE-mediated food allergy (body's reaction to a food allergy)

E. If you have chronic spontaneous urticaria (chronic idiopathic urticaria), approval also requires:
1. You are 12 years of age or older
2. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor), dermatologist (a type of skin doctor), or immunologist (a type of immune system doctor)
3. You still experience hives or angioedema (a type of swelling) on most days of the week for at least 6 weeks
4. You have tried and are maintained on (continue to use on a regular basis), OR you have a contraindication to (harmful for you to use), the clinical standard of care medication at four times the maximally labeled dose: a second generation H1 antihistamine (type of allergy medication) (Zyrtec [cetirizine] dose of 40mg/day, Xyzal [levocetirizine] dose of 20mg/day, Claritin [loratadine] dose of 40mg/day, Clarinex [desloratadine] dose of 20mg/day, or Allegra [fexofenadine] dose of 720mg/day)
5. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria) (severe itching with unknown cause)

OMALIZUMAB-IGEC

RENEWAL CRITERIA

1. Does the patient have a diagnosis of moderate persistent asthma (ICD-10 Group J45.4) to severe persistent asthma (ICD-10 Group J45.5) and meet **ALL** of the following criteria?
   - The patient will continue to use an inhaled corticosteroid (ICS) (e.g., beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (e.g., a long-acting inhaled beta2-agonist [e.g., formoterol, salmeterol], a long-acting muscarinic antagonist [e.g., Tudorza (aclidinium), Spiriva (tiotropium), Incruse Ellipta (umeclidinium)], a leukotriene receptor antagonist [e.g., montelukast, zafirlukast], theophylline, or an oral corticosteroid [e.g., prednisone])
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Tezspire [tezepelumab-ekko]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of asthma

   If yes, continue to #2.
   If no, continue to #3.

2. Has the patient shown a clinical response as evidenced by **ONE** of the following criteria?
   - Reduction in asthma exacerbations from baseline
   - Decreased utilization of rescue medications (e.g., albuterol)
   - Increase in percent predicted FEV1 from pretreatment baseline
   - Reduction in severity or frequency of asthma-related symptoms (e.g., wheezing, shortness of breath, coughing)

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following strengths:**
   - **75mg/0.5mL: #5mL per 28 days.**
   - **150mg/mL: #4mL per 28 days.**
   - **300mg/2mL: #4mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

OMALIZUMAB-IGEC

RENEWAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of chronic rhinosinusitis with nasal polyps (CRSwNP) (ICD-10 Groups J32 and J33) and meet **ALL** of the following criteria?
   - The patient has shown a clinical benefit compared to baseline (e.g., improvements in nasal congestion, sense of smell, size of polyps)
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of CRSwNP

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #8mL per 28 days.**
   If no, continue to #4.

4. Does the patient have a diagnosis of an IgE-mediated food allergy (ICD-10 Group Z91.01) and meet **ALL** of the following criteria?
   - The patient has persistent IgE-mediated food allergy
   - The patient has an active prescription for epinephrine auto-injector/injection while on Omlyclo
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Palforzia) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of IgE-mediated food allergy

   If yes, **approve for 24 months by HICL or GPI-10 with a quantity limit of #8mL per 28 days.**
   If no, continue to #5.

5. Does the patient have a diagnosis of chronic spontaneous urticaria (CSU; also called chronic idiopathic urticaria [CIU]) (ICD-10 L50.1, L50.8, L50.9) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an allergist, dermatologist, or immunologist
   - The patient is maintained on, OR has a contraindication to, a second generation H1 anti-histamine (Zyrtec [cetirizine], Xyzal [levocetirizine], Claritin [loratadine], Clarinex [desloratadine], or Allegra [fexofenadine])
   - Omlyclo will NOT be used concurrently with another systemic biologic (e.g., Dupixent [dupilumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of chronic spontaneous urticaria (chronic idiopathic urticaria)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2mL per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

OMALIZUMAB-IGEC

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT:

Our guideline named **OMALIZUMAB-IGEC (Omlyclo)** requires the following rule(s) be met for renewal:

A. You have ONE of the following:
   1. Moderate to severe persistent asthma (a type of lung condition)
   2. Chronic rhinosinusitis with nasal polyps (CRSwNP: inflammation of nasal and sinus ways with small growths in the nose)
   3. IgE-mediated food allergy (body's reaction to a food allergy)
   4. Chronic spontaneous urticaria (also called chronic idiopathic urticaria) [severe itching with unknown cause]

B. If you have moderate to severe persistent asthma, renewal also requires:
   1. You will continue to use an inhaled corticosteroid (such as beclomethasone, mometasone, budesonide) AND at least ONE other maintenance medication (taken on a regular basis) such as a long-acting inhaled beta2-agonist (such as formoterol, salmeterol), a long-acting muscarinic antagonist (such as Tudorza [aclidinium], Spiriva [tiotropium], Incruse Ellipta [umeclidinium]), a leukotriene receptor antagonist (such as montelukast, zafirlukast), theophylline, or an oral corticosteroid (such as prednisone)
   2. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Tezspire [tezepelumab-ekko]), or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of asthma (a type of lung condition)
   3. You have shown a clinical response as evidenced by ONE of the following:
      a. You have experienced a decrease in asthma (a type of lung condition) exacerbations (worsening of symptoms) from baseline (before starting Omlyclo)
      b. You have decreased your use of rescue medications (such as albuterol)
      c. You have an increase in percent predicted FEV1 (type of lung test) from pre- treatment baseline (before starting Omlyclo)
      d. You have a decrease in the severity or frequency of asthma-related symptoms (such as wheezing, shortness of breath, coughing)

C. If you have chronic rhinosinusitis with nasal polyps, renewal also requires:
   1. You have shown a clinical benefit compared to baseline (before starting Omlyclo) (such as improvements in nasal congestion, sense of smell, size of polyps)
   2. You will NOT use Omlyclo concurrently (at the same time) with another systemic biologic (such as Dupixent [dupilumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of chronic rhinosinusitis with nasal polyps (inflammation of nasal and sinus ways with small growths in the nose)

OMAVELOXOLONE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OMAVELOXOLONE	SKYCLARYS	48741		GPI-10 (7413506000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Friedreich's ataxia (ICD-10 G11.11) and meet **ALL** of the following criteria?
   - The patient is 16 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist
   - The patient's diagnosis is confirmed by genetic testing (homozygous for GAA repeat expansion in intron-1 of FXN gene)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #3 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OMAVELOXOLONE (Skyclarys)** requires the following rule(s) be met for approval:
   A. You have Friedreich's ataxia (a type of nervous system and movement disorder)
   B. You are 16 years of age or older
   C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nervous system doctor)
   D. Your diagnosis is confirmed by genetic testing (homozygous for guanine-adenine-adenine [GAA] repeat expansion in intron-1 of frataxin [FXN] gene) (a type of gene mutation)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OMEPRAZOLE-SODIUM BICARBONATE

INITIAL CRITERIA (CONTINUED)

4. Is the request for H. Pylori eradication?

If yes, **approve the requested medication for 1 month by GPID or GPI-14 as follows:**
- **Konvomep 2-84mg/mL: #10mL per day.**
- **Zegerid (omeprazole-sodium bicarbonate) 20-1680mg: #1 per day.**
- **Zegerid (omeprazole-sodium bicarbonate) 40-1680mg: #1 per day.**

If no, **approve the requested medication for 12 months by GPID or GPI-14 as follows:**
- **Konvomep 2-84mg/mL: #10mL per day.**
- **Zegerid (omeprazole-sodium bicarbonate) 20-1680mg: #1 per day.**
- **Zegerid (omeprazole-sodium bicarbonate) 40-1680mg: #1 per day.**

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OMEPRAZOLE-SODIUM BICARBONATE (Konvomep, Zegerid)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. **If you are 1 month to 11 years of age, approval also requires:**
      a. You have tried or have a contraindication to (harmful for you to use) the preferred medication: generic esomeprazole packets
   2. **If you are 12 years of age or older, approval also requires:**
      a. You have a contraindication to (harmful for you to use) OR you are unable to swallow the tablet/capsule formulation of omeprazole, pantoprazole, esomeprazole, or lansoprazole
      b. You have tried or have a contraindication to (harmful for you to use) the preferred medication: generic esomeprazole packets

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

OMEPRAZOLE-SODIUM BICARBONATE

RENEWAL CRITERIA

NOTE: For the diagnosis of H. pylori eradication, please refer to the Initial Criteria section.

1. Does the patient meet **ALL** of the following criteria?
   - The patient has had clinical benefit
   - The patient requires continued therapy of the requested medication

   If yes, **approve the requested medication for 12 months by GPID or GPI-14 as follows:**
   - **Konvomep 2-84mg/mL: #10mL per day.**
   - **Zegerid (omeprazole-sodium bicarbonate) 20-1680mg: #1 per day.**
   - **Zegerid (omeprazole-sodium bicarbonate) 40-1680mg: #1 per day.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OMEPRAZOLE-SODIUM BICARBONATE (Konvomep, Zegerid)** requires the following rule(s) be met for renewal:
   A. You have had clinical benefit (medication worked)
   B. You require continued therapy of the requested medication

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

OMIDUBICEL-ONLV

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OMIDUBICEL-ONLV	OMISIRGE	48861		GPI-10 (2165085010)	

GUIDELINES FOR USE

1. Is the request to reduce the time to neutrophil recovery and the incidence of infection in a patient with a hematologic malignancy and the patient meets **ALL** of the following criteria?
   - The patient will be undergoing umbilical cord blood transplantation following myeloablative conditioning (e.g., chemotherapy, radiation)
   - The patient is 12 years of age or older

   If yes, **approve for 30 days by HICL or GPI-10 for 1 fill.**
   If no, continue to #2.

2. Does the patient have a diagnosis of severe aplastic anemia (SAA) (ICD-10 D61.9) and meet **ALL** of the following criteria?
   - The patient is 6 years of age or older
   - Omisirge will be used following reduced intensity conditioning

   If yes, **approve for 30 days by HICL or GPI-10 for 1 fill.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OMIDUBICEL-ONLV (Omisirge)** requires the following rule(s) be met for approval:

   A. The request is for ONE of the following:
      1. To reduce the time to neutrophil recovery (lab levels normalize) and the rate of infection and you have a hematologic malignancy (cancer that affects the blood, bone marrow, and lymph nodes)
      2. Severe aplastic anemia (SAA: a type of blood disorder)

   B. If the request is to reduce the time to neutrophil recovery and the rate of infection, and you have a hematologic malignancy, approval also requires:
      1. You will be undergoing umbilical cord blood transplantation (type of procedure) following myeloablative conditioning (a type of treatment such as chemotherapy, radiation)
      2. You are 12 years of age or older

   C. If you have severe aplastic anemia, approval also requires:
      1. You are 6 years of age or older
      2. Omisirge will be used after reduced intensity conditioning (a type of treatment to lower the risk of complications)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

ONABOTULINUM TOXIN A

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ONABOTULINUMTOXINA	BOTOX	04867		GPI-10 (7440002005)	BRAND ≠ BOTOX COSMETIC

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for a cosmetic indication (e.g., wrinkles - glabellar lines, lateral canthal lines, forehead lines) (ICD-10 L98.8; Group L81)?

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of chronic migraines (greater than or equal to 15 days per month with headaches lasting 4 hours a day or longer) (ICD-10 Groups G43.7, G43.E) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Botox is prescribed for the prophylaxis of headaches
   - The patient had a trial of TWO of the following prophylactic migraine treatments: valproic acid/divalproex sodium, topiramate, propranolol, timolol, amitriptyline, venlafaxine, atenolol, nadolol, metoprolol

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of overactive bladder (OAB) (ICD-10 N32.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to an anticholinergic medication (e.g., oxybutynin, Ditropan XL, Detrol, Detrol LA, Enablex, Toviaz, VESIcare, Sanctura)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

ONABOTULINUM TOXIN A

INITIAL CRITERIA (CONTINUED)

4. Does the patient have a diagnosis of urinary incontinence (ICD-10 R32) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has detrusor overactivity associated with a neurologic condition (e.g., spinal cord injury [SCI], multiple sclerosis [MS])
   - The patient had a trial of or contraindication to an anticholinergic medication (e.g., oxybutynin, Ditropan XL, Detrol, Detrol LA, Enablex, Toviaz, VESIcare, Sanctura)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

5. Does the patient have a diagnosis of neurogenic detrusor overactivity (NDO) and meet **ALL** of the following criteria?
   - The patient is 5 years of age or older
   - The patient had an inadequate response to or is intolerant of anticholinergic medications (e.g., oxybutynin, Ditropan XL, Detrol, Detrol LA, Enablex, Toviaz, VESIcare, Sanctura)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #6.

6. Does the patient have a diagnosis of spasticity (ICD-10 Group G81.1; G04.1, G11.4, G80.0, G80.1, G80.2) **AND** meet the following criterion?
   - The patient is 2 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #7.

7. Does the patient have a diagnosis of cervical dystonia (spasmodic torticollis or involuntary contracting of the neck muscles) (ICD-10 G24.3) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient had a trial of or contraindication to TWO preferred agents: Dysport (abobotulinumtoxinA), Myobloc (rimabotulinumtoxinB), Xeomin (incobotulinumtoxinA)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #8.

ONABOTULINUM TOXIN A

INITIAL CRITERIA (CONTINUED)

8. Does the patient have a diagnosis of severe axillary hyperhidrosis (excessive underarm sweating) (ICD-10 L74.510) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #9.

9. Does the patient have a diagnosis of blepharospasm (involuntary forcible closure of the eyelid) (ICD-10 G24.5) **AND** meet the following criterion?
   - The patient is 12 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #10.

10. Does the patient have a diagnosis of strabismus (crossed eyes) (ICD-10 H50.9) **AND** meet the following criterion?
    - The patient is 12 years of age or older

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.

    INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **ONABOTULINUM TOXIN A (Botox)** requires the following rule(s) be met for approval:
    A. You have ONE of the following:
       1. Chronic migraine headaches (at least 15 days per month with headaches lasting 4 hours a day or longer)
       2. Overactive bladder (a type of bladder condition)
       3. Urinary incontinence (loss of bladder control)
       4. Neurogenic detrusor overactivity (a type of bladder condition)
       5. Spasticity (stiffness or tightness of your muscles)
       6. Cervical dystonia (a type of muscle condition)
       7. Severe axillary hyperhidrosis (excessive underarm sweating)
       8. Blepharospasm (a type of eye disease)
       9. Strabismus (a type of eye condition)

    (Initial denial text continued on next page)

ONABOTULINUM TOXIN A

INITIAL CRITERIA (CONTINUED)

B. If you have chronic migraine headaches (at least 15 days per month with headaches lasting 4 hours a day or longer), approval also requires:
1. You are 18 years of age or older
2. Botox is prescribed for the prophylaxis (prevention) of headaches
3. You have tried TWO of the following migraine (a type of headache) prevention treatments: valproic acid/divalproex sodium, topiramate, propranolol, timolol, amitriptyline, venlafaxine, atenolol, nadolol, metoprolol

C. If you have overactive bladder, approval also requires:
1. You are 18 years of age or older
2. You have tried or have a contraindication to (harmful for you to use) an anticholinergic medication (such as oxybutynin, Ditropan XL, Detrol, Detrol LA, Enablex, Toviaz, Vesicare, Sanctura)

D. If you have urinary incontinence, approval also requires:
1. You are 18 years of age or older
2. You have detrusor (bladder muscle) overactivity associated with a neurologic (nervous system) condition (such as a spinal cord injury [SCI], multiple sclerosis [MS: a type of nerve disorder])
3. You have tried or have a contraindication to (harmful for you to use) an anticholinergic medication (such as oxybutynin, Ditropan XL, Detrol, Detrol LA, Enablex, Toviaz, Vesicare, Sanctura)

E. If you have neurogenic detrusor overactivity, approval also requires:
1. You are 5 years of age or older
2. You did not have an adequate response (medication did not work) or you are not able to take anticholinergic medications (such as oxybutynin, Ditropan XL, Detrol, Detrol LA, Enablex, Toviaz, VESIcare, Sanctura)

F. If you have spasticity, approval also requires:
1. You are 2 years of age or older

G. If you have cervical dystonia, approval also requires:
1. You are 18 years of age or older
2. You have tried or have a contraindication to (harmful for you to use) TWO preferred medications: Dysport (abobotulinumtoxinA), Myobloc (rimabotulinumtoxinB), Xeomin (incobotulinumtoxinA)

H. If you have severe axillary hyperhidrosis, approval also requires:
1. You are 18 years of age or older

I. If you have blepharospasm, approval also requires:
1. You are 12 years of age or older

J. If you have strabismus, approval also requires:
1. You are 12 years of age or older

ONABOTULINUM TOXIN A

RENEWAL CRITERIA

NOTE: For diagnoses other than migraines, please refer to the Initial Criteria section.

1. Is the request for a cosmetic indication (e.g., wrinkles - glabellar lines, lateral canthal lines, forehead lines) (ICD-10 L98.8; Group L81)?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.
   If no, continue to #2.

2. Does the patient have a diagnosis of chronic migraines (greater than or equal to 15 days per month with headaches lasting 4 hours a day or longer) (ICD-10 Group G43.7 and G43.E)?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Has the patient experienced **ONE** of the following criteria?
   - A reduction in migraine or headache frequency of at least 2 days per month
   - A reduction in migraine severity
   - A reduction in migraine duration

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

ONABOTULINUM TOXIN A

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the text you need to use does not already have definition(s) in it.

Our guideline named **ONABOTULINUM TOXIN A (Botox)** requires the following rule(s) be met for renewal:

A. You have chronic migraine headaches (at least 15 days per month with headaches lasting 4 hours a day or longer)
B. You have experienced ONE of the following:
   1. A reduction in migraine (a type of headache) or headache frequency of at least 2 days per month
   2. A reduction in migraine (a type of headache) severity
   3. A reduction in migraine (a type of headache) duration (length)

NOTE: This medication will not be approved for a cosmetic indication (such as wrinkles - glabellar lines [between the eyebrows], lateral canthal [outer corner of eye] lines, forehead lines).

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

OPIOID CUMULATIVE DOSING OVERRIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/other
N/A	N/A	N/A	N/A	N/A	N/A

GUIDELINES FOR USE

1. Is the request for an opioid product equal to or exceeding the soft-stop threshold or hard-stop threshold as noted in the POS reject messaging?

   NOTE: Claims should stop for DUR_MAX_CUMUL_DOSE 2 edit with Soft_DENY_LIMIT= X or HARD_DENY_LIMIT= X (i.e., Cumulative morphine milligram equivalent of [patient's current MME] = / exceeds threshold of [**soft-stop threshold**-mg MME or **hard-stop threshold**-mg MME]).

   If yes, continue to #2.
   If no, guideline does not apply.

2. Does the patient meet at least **ONE** of the following criteria?
   - The patient is in hospice care
   - The patient is receiving palliative care (ICD-10 Z51.5) or end-of-life care
   - The patient is a resident of a long-term care facility or intermediate care for intellectually disabled
   - The patient has sickle cell disease (ICD-10 Group D57)
   - The patient is being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

   If yes, **approve as follows:**
   - **Approval duration should be for 12 months by HICL or GPI-10.**
   - **NOTE: Please enter a class override to override the MME cumulative dosing for the duration of 12 months.**
   - **If the claim rejects after analyzing, then follow the clinical coverage determination process.**

   If no, continue to #3.

3. Is the prescriber aware of multiple prescribers for opioid prescriptions?

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OPIOID CUMULATIVE DOSING OVERRIDE

GUIDELINES FOR USE (CONTINUED)

4. Have **TWO** of the following criteria been met?
   - The patient's current level of opioid utilization is necessary and required for the level of pain management needed
   - The patient has been evaluated by a pain specialist, and/or the request is based on the recommendation of a pain specialist
   - The patient has a pain contract in place
   - The patient does NOT have a history of substance abuse or addiction
   - The prescriber has committed to monitoring the state's Prescription Monitoring Program to ensure the controlled substance history is consistent with the prescribing record

   If yes, **approve as follows:**
   - **Approval duration should be for 12 months by HICL or GPI-10.**
   - **NOTE: Please enter a class override to override the MME cumulative dosing for the duration of 12 months.**
   - **If the claim rejects after analyzing, then follow the clinical coverage determination process.**

   If no, do not approve.
   OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT:
   While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because of the amount of opiates prescribed and because your opiate amount exceeds or is equal to **[enter soft stop threshold]**-mg morphine milligram equivalent (MME) or **[enter hard stop threshold]**-mg morphine milligram equivalent (MME).
   [Proceed to enter Denial Text below]

OPIOID CUMULATIVE DOSING OVERRIDE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

A claim for a pain medication will be denied when there are two or more providers prescribing opioid medications for a patient who is receiving a high quantity of these agents. Our guideline named **OPIOID CUMULATIVE DOSING OVERRIDE** will allow you to receive a higher quantity of an opioid medication if ONE of the following rules (A or B) is met:

A. You have ONE of the following conditions:
   1. You are receiving palliative care (treatment for comfort from symptoms) or end-of life care
   2. You are enrolled in a hospice (end of life care)
   3. You are a resident of a long-term care facility or intermediate care for intellectually disabled
   4. You have sickle cell disease (a type of blood disorder)
   5. You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

B. Your prescriber is aware that there is more than one provider prescribing opiates for you, AND you meet **TWO** of the following:
   1. Your current level of opioid use is necessary and required for your level of pain management needed
   2. You have been evaluated by a pain specialist, and/or the request is based on the recommendation of a pain specialist
   3. You have a pain contract in place
   4. You do NOT have a history of substance abuse or addiction
   5. Your prescriber has committed to monitoring the state's Prescription Monitoring Program to make sure your controlled substance history is consistent with prescribing record

This safety edit allows for an override for an opioid product equal to or exceeding the **[enter soft stop threshold]**-mg morphine milligram equivalent (MME) or **[enter hard stop threshold]**-mg morphine milligram equivalent (MME). Please consult your physician if you have any questions about this safety edit on prescription opioid medications and the requirements needed for you to obtain an approval for higher quantities of these agents.

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.
(Denial text continued on next page)

OPIOID CUMULATIVE DOSING OVERRIDE

GUIDELINES FOR USE (CONTINUED)

PARTIALLY APPROVED OPIOID TEXT:
Although we have entered a prior authorization for <DRUG+QL/UM (if any)> from <DATE RANGE>, your request has additional restrictions and criteria that you must meet as described above. You will be able to receive your medication once the additional criteria has been met and the restrictions have been removed.

PREVIOUSLY APPROVED OPIOID CLAIMS WITH NO PA, BUT NOW REJECTS DUE TO SAFETY EDIT TEXT: Although you were previously approved for <DRUG> your new request now has additional safety restrictions that you must meet as described above. You will not be able to receive your medication until the newly added restrictions have been removed.

RATIONALE

To ensure appropriate use of opioids and addressing prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens. In addition, align with the opioid restrictions from the CMS 2019 Call Letter.
Prior authorization will be required for opioid prescriptions in excess of hard opioid edit. Soft opioid edit thresholds may be overridden by a dispensing pharmacist or provider/patient may request a coverage determination. This requirement should not apply to patients with, in hospice, those receiving palliative or end of life care, residents of a long-term facility, patients approved by case management or retrospective DUR Programming or patients being treated for cancer-related pain. Cancer-related pain includes those undergoing active cancer treatment, as well as cancer survivors with chronic pain who have completed cancer treatment, are in clinical remission, or are under cancer surveillance only. Following CMS guidance, patients with a diagnosis of sickle cell disease are also exempt from this restriction based on acute attacks and painful complications associated with the disease. Additional payment determination is required for patients identified as hospice. Soft-thresholds may also be overriden by the pharmacy via DUR PPS codes or as part of coverage determination process and by certain PPS codes. Hard-thresholds are overridable as part of the coverage determination process. The cumulative opioid edit minimizes false positives by accounting for known exceptions: 1) patients on hospice, have certain cancer diagnosis 2) overlapping dispensing dates for Rx refills and new Rx orders for continuing fills 3) high-dose opioid usage previously determined to be medically necessary (approved PAs, previous coverage determinations, case management) 4) no consecutive high-MME days' criterion as it would not prevent beneficiaries from reaching high opioid doses.

PRIOR AUTHORIZATION GUIDELINES

OPIOID LONG-ACTING DUPLICATIVE THERAPY

Generic	Brand	HICL	GCN	Medi-Span	Exception/other
N/A	N/A	N/A	N/A	N/A	N/A

GUIDELINES FOR USE

1. Is the claim rejecting with the following error code?
   - **REJ-1045: THERAPEUTIC DUPLICATION DENIAL (DRUG_TD)**
     (The incoming claim for a long-acting (LA) opioid will reject when the patient is concurrently taking a different long-acting opioid [different HICL] from a different prescriber.)

     If yes, continue to #2.
     If no, guideline does not apply.

2. Does the patient meet at least **ONE** of the following criteria?
   - The patient is in hospice care
   - The patient is receiving palliative care (ICD-10 Z51.5) or end-of-life care
   - The patient is a resident of a long-term care facility or intermediate care for intellectually disabled
   - The patient has sickle cell disease (ICD-10 Group D57)
   - The patient is being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

     If yes, **approve for 12 months by HICL or GPI-10 and set DRUG_TD_OVR to 'Y' for Yes.**
     If no, continue to #3.

3. Is the prescriber aware that the patient is concurrently receiving more than one long-acting opioid therapy?

     If yes, **approve for 12 months by HICL or GPI-10 and set DRUG_TD_OVR to 'Y' for Yes.**
     If no, do not approve.
     DENIAL TEXT: See the denial text at the end of the guideline.

OPIOID LONG-ACTING DUPLICATIVE THERAPY

GUIDELINES FOR USE (CONTINUED)

OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT:
While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because of the use of two long-acting opioid drugs together that are from different prescribers. **[Proceed to enter Denial Text below]**

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OPIOID LONG ACTING DUPLICATIVE THERAPY** allows approval of the requested drug taken together with other long-acting opioid drug(s) from different prescribers when ONE of the following conditions are met:

A. You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
B. You are enrolled in a hospice (end of life care)
C. You are a resident of a long-term care facility or intermediate care for intellectually disabled
D. You have sickle cell disease (a type of blood disorder)
E. Your doctor confirms that they are aware that you are concurrently receiving more than one long-acting opioid medication
F. You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Please consult your physician if you have any questions about this prescription medication and the requirements needed for you to obtain an approval for this agent.

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request

PARTIALLY APPROVED OPIOID TEXT:
Although we have entered a prior authorization for <DRUG+QL/UM (if any)> from <DATE RANGE>, your request has additional restrictions and criteria that you must meet as described above. You will be able to receive your medication once the additional criteria has been met and the restrictions have been removed.

PREVIOUSLY APPROVED OPIOID CLAIMS WITH NO PA, BUT NOW REJECTS DUE TO SAFETY EDIT TEXT:
Although you were previously approved for <DRUG> your new request now has additional safety restrictions that you must meet as described above. You will not be able to receive your medication until the newly added restrictions have been removed**.**

OPIOID LONG-ACTING DUPLICATIVE THERAPY

RATIONALE

To ensure appropriate use of opioids and addressing prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens. In addition, align with the opioid restrictions from the CMS 2019 Call Letter:
"…we expect all Part D plan sponsors to implement a soft POS safety edit (which can be overridden by the pharmacist) for duplicative LA opioid therapy beginning in 2019, with or without a multiple prescriber criterion." *CMS 2019 Call Letter, page 252*
Prior authorization will be required for Long Acting (LA) opioid prescriptions when an incoming claim for a long-acting opioid overlaps with another a long acting opioid (different HICL) claim(s) from a different prescriber(s). The edit can be overridden by professional pharmacy professional service (PPS) code at POS or by a PA. This requirement does not apply to patients receiving palliative care or end-of-life care, those enrolled in hospice, patients that are a resident of a long-term care facility or intermediate care for intellectually disabled, or patients being treated for cancer-related pain. Cancer-related pain includes those undergoing active cancer treatment, as well as cancer survivors with chronic pain who have completed cancer treatment, are in clinical remission, or are under cancer surveillance only. Following CMS guidance, patients with a diagnosis of sickle cell disease are also exempt from this restriction based on acute attacks and painful complications associated with the disease. This guideline also allows an override when there is physician attestation that the prescriber is aware that the patient is concurrently receiving long acting duplicative therapy and would like to proceed with treatment for a clinically appropriate indication.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OPIOID NAIVE FILL LIMIT

Generic	Brand	HICL	GCN	Medi-Span	Medi-Span	Exception/Other
N/A	N/A	N/A	N/A	N/A	N/A	N/A

GUIDELINES FOR USE

1. Is the claim rejecting with the following error code?
   REJ-306-1066: THIS CLAIM EXCEEDS LIMIT OF 2 OPIOID FILLS IN 30 DAYS

   [**NOTE**: The incoming opioid analgesic claim will reject if an initially opioid-naive member exceeds two opioid fills regardless of day supply, for the same drug (HICL), within the past 30 days. In addition, the patient is considered opioid-naive if they have no history of an opioid analgesic drug(s) in the past 60 days (not counting same day claims).]

   If yes, continue to #2.
   If no, guideline does not apply.

2. Does the patient meet at least **ONE** of the following criteria?
   - The patient is in hospice care
   - The patient is receiving palliative care (ICD-10 Z51.5) or end-of-life care
   - The patient is a resident of a long-term care facility or intermediate care for intellectually disabled
   - The patient has sickle cell disease (ICD-10 Group D57)
   - The patient is being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

   If yes, **approve for 12 months by HICL or GPI-10 and set FILL_LIMIT_OVR to 'Y' for Yes.**
   If no, continue to #3.

3. Has the prescriber indicated that the additional fill of the requested opioid analgesic medication is intended and clinically appropriate for the patient?

   [NOTE: Refer to the Medical Request Form (MRF) or chart notes if provided (e.g., patient is stable on the requested drug, patient needs to continue use, etc.). The member cannot provide this information.]

   If yes, **approve for 1 month, for one fill count by HICL or GPI-10 and set FILL_LIMIT_OVR to 'Y' for Yes.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OPIOID NAIVE FILL LIMIT

GUIDELINES FOR USE (CONTINUED)

OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT:
[NOTE: Enter proactive PAs for other UM overrides not including the Opioid Naive Fill Limit, if applicable.]

While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because you exceeded the fill limit of the requested opioid analgesic.

[Proceed to enter Denial Text below]

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OPIOID NAIVE FILL LIMIT** allows an approval of the requested drug when it exceeds the fill limit for an initially opioid-naïve patient (those who have not used opioid drugs within the past 60 days) when ONE of the following conditions is met:

A. You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
B. You are enrolled in a hospice (end of life care)
C. You are a resident of a long-term care facility or intermediate care for intellectually disabled
D. You have sickle cell disease (a type of blood disorder)
E. Your doctor confirms that the additional fill of the requested opioid medication is intended and clinically appropriate for you
F. You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Please consult your physician if you have any questions about this prescription pain medication and the requirements needed for you to obtain an approval for this agent.

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OPIOID NAIVE FILL LIMIT

RATIONALE

To ensure appropriate use of opioids and to address prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens.

In addition, the goal is to align with the opioid restrictions from the SUPPORT Act. The SUPPORT Act is an acronym for the Congress HR 6 - *Substance Use-Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act.* The rule identified six requirements that each State and Managed Care Entity must have in place by October 1, 2019. CMS defined the SUPPORT Act requirements as minimum Drug Utilization Review (DUR) standards for MMCPs and they are listed below:

Safety edits, as specified by the states, for subsequent opioid fills and maximum daily morphine milligram equivalent that exceed state-defined limitations

Automated process that monitors when an individual is concurrently prescribed opioids and benzodiazepines or antipsychotics

Monitoring antipsychotic prescribing for children

Process that identifies potential fraud or abuse by enrolled individuals and pharmacies

Report to the Secretary annually on state DUR activities

Have in place managed care contracts that include these provisions

The guideline also allows an override for patients with one of the following conditions:

Receiving palliative care or end-of-life care

Enrolled in hospice

Resident of a long-term care facility or intermediate care for intellectually disabled

Diagnosis of sickle cell disease

Being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

CMS noted that minimum standards may be expanded by the states or CMS in future rule making.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OPIOID SINGLE CLAIM DOSING AT POS (OSCDP)

Generic	Brand	HICL	GCN	Medi-Span	Exception/other
OPIOIDS	OPIOIDS	N/A	N/A	N/A	N/A

GUIDELINES FOR USE

1. Is the request for an opioid product equal to or exceeding the soft-stop threshold hard-stop threshold as noted in the POS reject messaging?

   NOTE: Claims should stop for DUR_MAX_SINGLE_DOSE edit with Soft_DENY_LIMIT = X or HARD_DENY_LIMIT = X (i.e., morphine milligram equivalent of [patient's current MME] = / exceeds threshold of [**soft-stop threshold**-mg MME or **hard-stop threshold**-mg MME]).

   If yes, continue to #2.
   If no, guideline does not apply.

2. Is the request for an opioid product less than or equal to the hard-stop threshold-1 MME?

   If yes, **approve 12 months by HICL or GPI-10 up to hard-stop threshold-1 MME. (NOTE: If the claim rejects after analyzing, follow the clinical prior authorization process).**

   If no, continue to #3.

3. Does the patient meet **ANY** of the following criteria?
   - The patient is receiving palliative care (ICD-10 Z51.5)
   - The patient has sickle cell disease (ICD-10 Group D57)
   - The patient is enrolled in hospice
   - The prescriber is a pain management specialist
   - The patient is being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

   If yes, **approve 12 months by HICL or GPI-10. (NOTE: If the claim rejects after analyzing, follow the clinical prior authorization process).**

   If no, continue to #4.

4. Has the physician provided attestation that the requested high dose is considered medically necessary?

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OPIOID SINGLE CLAIM DOSING AT POS (OSCDP)

GUIDELINES FOR USE (CONTINUED)

5. Is the request for an opioid with an MME equal to or exceeding the hard-stop threshold and the prescriber has not indicated an opioid MME threshold value?

   If yes, **approve for 12 months by HICL or GPI-10 up to 25% greater than the previously approved MME via the patient's claim profile or physician attestation, up to 300 MME. (NOTE: If the claim rejects after analyzing, follow the clinical prior authorization process).**

   If no, continue to #6.

6. Did the physician indicate a maximum opioid threshold for the requested drug that is less than 300 MME?

   If yes, **approve for 12 months by HICL or GPI-10 as requested up to 300 MME. (NOTE: If the claim rejects after analyzing, follow the clinical prior authorization process).**

   If no, continue to #7**.**

7. Is the request for an opioid with an MME equal to or exceeding the maximum threshold (300 MME) for a patient who is currently stable on this MME?

   If yes, **approve for 3 months by HICL or GPI-10. (NOTE: If the claim rejects after analyzing, follow the clinical prior authorization process).**
   APROVAL TEXT: While your prior authorization for (enter requested drug) has been granted, your opiate amount is equal to or exceeds [300 morphine milligram equivalent (MME)] and is considered a high dose of opiate. Please consult with your pain management specialist regarding your treatment options.

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OPIOID SINGLE CLAIM DOSING AT POS** allows for an override of an opioid product equal to or exceeding the soft-stop threshold of **[enter soft stop threshold]**-mg morphine milligram equivalent (MME) at the pharmacy or by a prior authorization. The hard-stop threshold of **[enter hard stop threshold]**-mg morphine milligram equivalent (MME) is not overridable and requires a prior authorization.
   (Denial text continued on next page)

OPIOID SINGLE CLAIM DOSING AT POS (OSCDP)

GUIDELINES FOR USE (CONTINUED)

An override will be provided if ONE (A or B) of the following rule(s) are met:

A. You meet ONE of the following conditions:
   1. You are receiving treatment for palliative care (treatment for comfort from symptoms)
   2. You have sickle cell disease (a type of blood disorder)
   3. You are enrolled in a hospice (end of life care)
   4. Your doctor is a pain management specialist
   5. You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

B. Your physician confirms that the requested high dose is considered medically necessary.
   1. If the requested dose is lower than 300 MME, your prescriber must provide a maximum opioid threshold. If your prescriber does not provide a maximum threshold and the request is for an opioid with an MME equal to or exceeding **[enter hard-stop threshold]**-mg morphine milligram equivalent (MME), the claim will be approved up to 25 percent greater than the previously approved MME.
   2. If the requested dose is equal to or greater than 300 MME, approval will be granted if you are stable on the dose.

Please consult your pain management specialist regarding your treatment options.

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

To align with opioid restrictions required by several states and to prevent overutilization of opioids and increase safety.

This advanced POS intervention blocks an incoming claim when a single claim's Morphine Milligram Equivalent (MME) is equal to or exceeds a specified hard-stop threshold (e.g. over 90 MME). The hard-stop is non-overridable except via prior authorization. The edit allows a soft stop on an incoming claim with an MME equal to or over a lower threshold (e.g. over 50 MME) that can be overridden by Pharmacy Professional Service (PPS) codes at the point-of-sale (POS) or by prior authorization. Overriding the hard threshold for OSCDP will also override the OSCDP soft threshold, but does not affect Opioid Cumulative Dosing Program (OCDP).

OPIOID SINGLE CLAIM DOSING AT POS (OSCDP)

RATIONALE (CONTINUED)

This requirement does not apply to patients with sickle cell disease, patients in palliative care, hospice patients, patients with a prescription from a pain management specialist, or patients being treated for cancer-related pain. Cancer-related pain includes those undergoing active cancer treatment, as well as cancer survivors with chronic pain who have completed cancer treatment, are in clinical remission, or are under cancer surveillance only.

OPIOID-BENZODIAZEPINE CONCURRENT USE

GUIDELINES FOR USE (CONTINUED)

OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT:
While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because of the use of an opioid drug and a benzodiazepine drug together.

[Proceed to enter Denial Text below]

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OPIOID-BENZODIAZEPINE CONCURRENT USE** allows for an approval of use of an opioid with a benzodiazepine together when ONE of the following criteria is met:

A. You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
B. You are enrolled in a hospice (end of life care)
C. You are a resident of (living in) a long-term care facility or intermediate care for intellectually disabled
D. You have sickle cell disease (a type of blood disorder)
E. Your doctor agrees to proceed with the concurrent use (at the same time) of an opioid and a benzodiazepine for a clinically appropriate indication (reason)
F. You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Please consult your physician if you have any questions about this prescription pain medication and the requirements needed for you to obtain an approval for this agent.

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.
(*Denial text continued on next* page)

OPIOID-BENZODIAZEPINE CONCURRENT USE

GUIDELINES FOR USE (CONTINUED)

PARTIALLY APPROVED OPIOID TEXT:
Although we have entered a prior authorization for <DRUG+QL/UM (if any)> from <DATE RANGE>, your request has additional restrictions and criteria that you must meet as described above. You will be able to receive your medication once the additional criteria has been met and the restrictions have been removed.

PREVIOUSLY APPROVED OPIOID CLAIMS WITH NO PA, BUT NOW REJECTS DUE TO SAFETY EDIT TEXT:
Although you were previously approved for <DRUG> your new request now has additional safety restrictions that you must meet as described above. You will not be able to receive your medication until the newly added restrictions have been removed**.**

RATIONALE

To ensure appropriate use of opioids and addressing prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens. In addition, align with the opioid restrictions from the CMS 2019 Call Letter:
"We expect that Part D sponsors implement a concurrent opioid and benzodiazepine soft POS safety edit (which can be overridden by the pharmacist) to prompt additional safety review at the time of dispensing beginning in 2019."*CMS 2019 Call Letter, page 251*
The claim will deny when there is concurrent use of benzodiazepines and opioids with any overlap in day supply. This can be overridden at POS or by a Prior Authorization. If the pharmacy does not submit the specified PPS codes, the claim should reject unless a prior approval is in place.
This guideline allows an approval for patients with one of the following conditions:
Receiving palliative care or end-of-life care
Enrolled in hospice
Resident of a long-term care facility or intermediate care for intellectually disabled
Diagnosis of sickle cell disease
Physician attestation that the prescriber is aware that the patient is concurrently receiving a benzodiazepine with an opioid(s) and would like to proceed with an opioid and benzodiazepine
Being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OPIOID-BUPRENORPHINE CONCURRENT USE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
N/A	N/A	N/A	N/A	N/A	N/A

GUIDELINES FOR USE

1. Is the claim rejecting with **ONE** of the following error codes?
   - **REJ-433-1200 (DUR CONCURRENT USE): CLAIM CONFLICTS IN THERAPY WITH MEMBER HISTORY**
   - **REJ-1064 (DUR_DD_DENY): DRUG-DRUG INTERACTION FOUND**

   If yes, continue to #2.
   If no, guideline does not apply.

2. Does the patient meet at least **ONE** of the following criteria?
   - The patient is in hospice care
   - The patient is receiving palliative care (ICD-10 Z51.5) or end-of-life care
   - The patient is a resident of a long-term care facility or intermediate care for intellectually disabled
   - The patient has sickle cell disease (ICD-10 Group D57)
   - The patient is being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

   If yes, **approve for 12 months by HICL or GPI-10 with ONE of the following overrides:**
   - **For DUR_CONCURRENT_ USE Rejection: Set DUR_CONCURRENT_ OVR to 'OP_BUP'**
   - **For DUR_DD_DENY Rejection: Set OVR_RES to 'Y'**

   If the claim analysis continues to reject, follow the clinical coverage determination process.

   If no, continue to #3.

3. Has the prescriber provided attestation that the patient has discontinued or will be discontinuing opioid dependency treatment with buprenorphine or buprenorphine-containing agents and needs to resume chronic opioid treatment? (**NOTE:** Consultation with an addiction medicine specialist is recommended)

   If yes, **approve for 4 months by HICL or GPI-10 with ONE of the following overrides:**
   - **For DUR_CONCURRENT_ USE Rejection: Set DUR_CONCURRENT_ OVR to 'OP_BUP'**
   - **For DUR_DD_DENY Rejection: Set OVR_RES to 'Y'**

   If the claim analysis continues to reject, follow the clinical coverage determination process.

   If no, continue to #4.

OPIOID-BUPRENORPHINE CONCURRENT USE

GUIDELINES FOR USE

4. Is the prescriber aware that the patient is currently receiving buprenorphine or buprenorphine-containing agents for treatment of opioid dependency and has provided attestation to proceed with opioid treatment for an acute, clinically appropriate indication? (**NOTE:** Consultation with an addiction medicine specialist is recommended)

   If yes, **approve for 30 days by HICL or GPI-10 with ONE of the following overrides:**
   - **For DUR_CONCURRENT_ USE Rejection: Set DUR_CONCURRENT_ OVR to 'OP_BUP'**
   - **For DUR_DD_DENY Rejection: Set OVR_RES to 'Y'**

   If the claim analysis continues to reject, follow the clinical coverage determination process.

   If no, do not approve.
   OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT: While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because of the use of an opioid drug and a buprenorphine-containing drug together.

   [Proceed to enter Denial Text below]

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OPIOID-BUPRENORPHINE CONCURRENT USE** allows approval for use of an opioid with buprenorphine or a buprenorphine-containing agent together when ONE of the following rule(s) is met:
   A. You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
   B. You are enrolled in a hospice (end of life care)
   C. You are a resident of (living in) a long-term care facility or intermediate care for intellectually disabled
   D. You have sickle cell disease (a type of blood disorder)
   E. Your doctor confirms (attests) that you have discontinued or will be discontinuing opioid dependency treatment with buprenorphine or buprenorphine-containing agents and you need to resume chronic opioid treatment. Consultation with an addiction medicine specialist is recommended.
   F. Your doctor is aware that you are currently receiving buprenorphine or a buprenorphine-containing agent for treatment of opioid dependency and has confirmed to proceed with opioid treatment for an acute, clinically appropriate indication. Consultation with an addiction medicine specialist is recommended

OPIOID-BUPRENORPHINE CONCURRENT USE

GUIDELINES FOR USE (CONTINUED)

You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Please consult your physician if you have any questions about this prescription pain medication and the requirements needed for you to obtain an approval for this agent.

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PARTIALLY APPROVED OPIOID TEXT:
Although we have entered a prior authorization for <DRUG+QL/UM (if any)> from <DATE RANGE>, your request has additional restrictions and criteria that you must meet as described above. You will be able to receive your medication once the additional criteria has been met and the restrictions have been removed.

PREVIOUSLY APPROVED OPIOID CLAIMS WITH NO PA, BUT NOW REJECTS DUE TO SAFETY EDIT TEXT:
Although you were previously approved for <DRUG> your new request now has additional safety restrictions that you must meet as described above. You will not be able to receive your medication until the newly added restrictions have been removed.

RATIONALE

To ensure appropriate use of opioids and addressing prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens. In addition, align with the opioid restrictions from CMS guidance. For further information, please refer to the Drug Monograph for Opioid-Buprenorphine Concurrent Use.

Prior authorization will be required for opioid prescriptions when in concurrent use with buprenorphine. This edit will be utilized to stop opioid claims, which overlap with buprenorphine use. The edit will stop the claim for pharmacy submission of PPS codes. If the pharmacy does not submit the specified PPS codes, the claim should reject unless a prior approval is in place.

OPIOID-BUPRENORPHINE CONCURRENT USE

RATIONALE (CONTINUED)

The guideline requires that the prescriber is aware that the patient is currently receiving buprenorphine or buprenorphine-containing agents for treatment of opioid dependency and has provided attestation to proceed with opioid treatment for an acute, clinically appropriate indication, or the prescriber has provided attestation that the patient has discontinued or will be discontinuing opioid dependency treatment with buprenorphine or buprenorphine-containing agents and to proceed with opioid treatment. Consultation with an addiction medicine specialist is recommended.
In addition, the guideline allows an override for patients with one of the following conditions:
Receiving palliative care or end-of-life care
Enrolled in hospice
Resident of a long-term care facility or intermediate care for intellectually disabled
Diagnosis of sickle cell disease
Being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OPIOID-NAIVE CUMULATIVE DOSING (ONCD)

Generic	Brand	HICL	GCN	Medi-Span	Exception/other
N/A	N/A	N/A	N/A	N/A	N/A

GUIDELINES FOR USE

1. Does the patient meet **ALL** of the following criteria?
   - The request is for an opioid product equal to or exceeding the soft-stop threshold or hard-stop threshold as noted in the POS reject messaging?
     NOTE: The following reject code(s) may also be present:
     - For Soft-Stop: **REJ-88-1080**
     - For Hard-Stop: **REJ-88-1081**

     If yes, continue to #2.
     If no, guideline does not apply.

2. Is the patient opioid-naive meaning they have not used an opioid drug(s) in the past 60 days (starting the day prior to the fill date of the incoming claim)?
   [NOTE: Please refer to the claims history in MedAcess, Medication Request Form (MRF) or chart notes (e.g., patient is stable on the requested drug, patient needs to continue use, etc.). The member cannot provide this information.]

   If yes, continue to #3.
   If no, **approve for one (1) month, for one (1) fill count by HICL or GPI-10 and set NAIVE_OP_HARD_LIMIT_OVR to 'Y' for Yes**.

3. Does the patient meet at least **ONE** of the following criteria?
   - The patient is enrolled in hospice
   - The patient is receiving palliative care (ICD-10 Z51.5) or end-of-life care
   - The patient is a resident of a long-term care facility or intermediate care for intellectually disabled
   - The patient has sickle cell disease (ICD-10 Group D57)
   - The patient is being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

   If yes, **approve for 12 months by HICL or GPI-10 and set NAIVE_OP_HARD_LIMIT_OVR to 'Y' for Yes**.

   If no, continue to #4.

OPIOID-NAIVE CUMULATIVE DOSING

GUIDELINES FOR USE (CONTINUED)

4. Have **BOTH** of the following criteria been met?
   - The provider has indicated that the patient's current level of opioid utilization is necessary and required for the level of pain management needed
   - The provider has committed to monitoring the state's Prescription Monitoring Program to ensure controlled substance history is consistent with prescribing record

   If yes, **approve for one (1) month, for one (1) fill count by HICL or GPI-10 and set NAIVE_OP_HARD_LIMIT_OVR to 'Y' for Yes**.

   If no, do not approve.
   OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT:
   [NOTE: Enter proactive PAs for other UM overrides not including Opioid-Naive Cumulative Dosing, if applicable.]

   While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because you are considered opioid naive (those who have not used opioid drugs within the past 60 days) and the opiate amount exceeds or is equal to **[enter soft stop threshold]**-mg morphine milligram equivalent (MME) or **[enter hard stop threshold]**-mg morphine milligram equivalent (MME). **[Proceed to enter Denial Text below]**

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OPIOID-NAIVE CUMULATIVE DOSING** allows approval of a higher quantity of an opioid medication if at least ONE of the following conditions is met:
   - You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
   - You are enrolled in hospice (end of life care)
   - You are a resident of (living in) a long-term care facility or intermediate care for intellectually disabled
   - You have sickle cell disease (a type of blood disorder)
   - You are not opioid naive (you have been consistently using opioid pain medications)
   - You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

   (Denial text continued on next page)

OPIOID-NAIVE CUMULATIVE DOSING

GUIDELINES FOR USE (CONTINUED)

If none of these conditions apply, BOTH of the following criteria must be met:

- The provider has indicated that your current level of opioid utilization (use) is necessary and required for the level of pain management needed
- The provider has committed to monitoring the state's Prescription Monitoring Program to ensure controlled substance history is consistent with prescribing record

Please consult your physician and/or your pharmacist to discuss your options or if you have any questions about this prescription pain medication and the requirements needed for you to obtain an approval for this agent.

RATIONALE

To ensure appropriate use of opioids and address the prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens.
The guideline is based on CDC dosage recommendations stated in the “Initial Opioid Prescribing at High Dosage” measures from the Pharmacy Quality Alliance (PQA) and Managed Medicaid program limits.

This requirement does not apply to patients in palliative care, hospice patients, patients living in a long-term care facility or intermediate care for intellectually disabled, or patients being treated for cancer-related pain. Cancer-related pain includes those undergoing active cancer treatment, as well as cancer survivors with chronic pain who have completed cancer treatment, are in clinical remission, or are under cancer surveillance only. Following CMS guidance, patients with a diagnosis of sickle cell disease are also exempt from this restriction based on acute attacks and painful complications associated with the disease.
In addition, approval is granted if BOTH of the following conditions are met:
The provider has indicated that the patient’s current level of opioid utilization is necessary and required for the level of pain management needed
The provider has committed to monitoring the state’s Prescription Monitoring Program to ensure controlled substance history is consistent with prescribing record

PRIOR AUTHORIZATION GUIDELINES

OPIOID-NAIVE DAY SUPPLY LIMITATION

Generic	Brand	HICL	GCN	Medi-Span	Exception/other
N/A	N/A	N/A	N/A	N/A	N/A

GUIDELINES FOR USE

1. Is the claim rejecting with the following error code?
   - **REJ-1044: INITIAL FILL DAYS SUPPLY EXCEEDS LIMITS (DS-NAIVE)**

   If yes, continue to #2.
   If no, guideline does not apply.

2. Does the patient meet at least **ONE** of the following criteria?
   - The patient is enrolled in hospice
   - The patient is receiving palliative care (ICD-10 Z51.5) or end-of-life care
   - The patient is a resident of a long-term care facility or intermediate care for intellectually disabled
   - The patient has sickle cell disease (ICD-10 Group D57)
   - The patient is being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only
   - The patient is NOT opioid naive
     (**NOTE:** For new patients with no claims history, please refer to the MRF or MedAccess).

   If yes, **approve for one month, for one fill count by HICL or GPI-10 and set DS_NAIVE_OVR to 'Y' for Yes.**

   If no, continue to #3.

3. Has the prescriber provided attestation that the opioid medication with the requested day supply is the intended and medically necessary amount for the beneficiary?

   If yes, **approve for one month, for one fill count by HICL or GPI-10 and set DS_NAIVE_OVR to 'Y' for Yes.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OPIOID-NAIVE DAY SUPPLY LIMITATION

GUIDELINES FOR USE (CONTINUED)

OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT: While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because of the day supply you are requesting for this opioid medication.

[Proceed to enter Denial Text below]

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OPIOID-NAIVE DAY SUPPLY LIMITATION** allows approval of the requested drug for a longer day supply when you meet at least **ONE** of the following conditions:

A. You are enrolled in hospice (end of life care)
B. You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
C. You are a resident of a long-term care facility or intermediate care for intellectually disabled
D. You have sickle cell disease (a type of blood disorder)
E. You are NOT opioid naïve (you have been consistently using opioid pain medications)
F. Your doctor confirms (attests) that the prescribed dose of opioids with the requested day supply is intended and medically necessary
G. You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Please consult your doctor if you have any questions about this prescription pain medication and the requirements needed for you to obtain an approval for this medication.

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

To ensure appropriate use of opioids and addressing prescription opioid overuse from a medication safety perspective while preserving patient access to medically necessary drug regimens.

In addition, align with the opioid restrictions from the CMS 2019 Call Letter:
“Beginning in 2019, we expect all Part D sponsors to implement a hard safety edit to limit initial opioid prescription fills for the treatment of acute pain to no more than a 7 days’ supply…”. *CMS 2019 Call Letter, page 237*

CONTINUE ON NEXT PAGE

OPIOID-NAIVE DAY SUPPLY LIMITATION

RATIONALE (CONTINUED)

Prior authorization will be required for opioid prescriptions with a longer day supply for opioid naive patients. This requirement does not apply to patients receiving palliative care or end-of-life care, those enrolled in hospice, residents of a long-term care facility or intermediate care for intellectually disabled, or patients being treated for cancer-related pain. Cancer-related pain includes those undergoing active cancer treatment, as well as cancer survivors with chronic pain who have completed cancer treatment, are in clinical remission, or are under cancer surveillance only.

In addition, if the patient is determined to NOT be opioid naive during the coverage determination process, they are exempt from this safety edit. This exemption is based on the following guidance: "If during the coverage determination process, it becomes known that the patient is not opioid naive, he or she should be excluded from the opioid naive edit." *CMS Additional Guidance memo from October 23, 2018, page 8.*

Following CMS guidance, patients with a diagnosis of sickle cell disease are also exempt from this restriction based on acute attacks and painful complications associated with the disease. This guideline also allows an override when there is attestation from the prescriber that the prescribed dose of opioids with the requested day supply is intended and medically necessary.

OPIOID-SKELETAL MUSCLE RELAXANT CONCURRENT USE

GUIDELINES FOR USE (CONTINUED)

OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT:
[NOTE: Enter proactive PAs for other UM overrides not including the Opioid-Skeletal Muscle Relaxant Concurrent Use, if applicable.]
While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because of the use of an opioid drug and a skeletal muscle relaxant together.

[Proceed to enter Denial Text below]

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OPIOID-SKELETAL MUSCLE RELAXANT CONCURRENT USE** allows an approval for use of an opioid with a skeletal muscle relaxant medication (type of pain medication) together when one of the following criteria is met:

A. You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
B. You are enrolled in a hospice (end of life care)
C. You are a resident of a long-term care facility or intermediate care for intellectually disabled
D. You have sickle cell disease (a type of blood disorder)
E. Your doctor confirms that the use of an opioid and a skeletal muscle relaxant medication together is intended and clinically appropriate for you
F. You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Please consult your physician if you have any questions about this prescription pain medication and the requirements needed for you to obtain an approval for this agent.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OPIOID-SOMA-BENZODIAZEPINE CONCURRENT USE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
N/A	N/A	N/A	N/A	N/A	N/A

GUIDELINES FOR USE

1. Is the claim rejecting with the following error code?
   - **REJ- 433-1204: SOMA-OPIOID-BENZODIAZEPINE CONFLICT FOUND (H: DUR_CONCURRENT_USE)**

   If yes, continue to #2.
   If no, guideline does not apply.

2. Does the patient meet at least **ONE** of the following criteria?
   - The patient is in hospice care
   - The patient is receiving palliative care (ICD-10 Z51.5) or end-of-life care
   - The patient is a resident of a long-term care facility or intermediate care for intellectually disabled
   - The patient is being treated for cancer-related pain which includes: those undergoing active cancer treatment, cancer survivors with chronic pain who have completed cancer treatment, those in clinical remission, or under cancer surveillance only

   If yes, **approve for 12 months by HICL or GPI-10 and set DUR_CONCURRENT_OVR to 'SOMA_OP_BZD'.**

   If no, continue to #3.

3. Has the prescriber indicated that the concurrent use of an opioid with Soma (carisoprodol) and a benzodiazepine medication is intended and clinically appropriate for the patient?

   [NOTE: Refer to the Medical Request Form (MRF) or chart notes if provided (e.g., patient is stable on the requested drug, patient needs to continue use, etc.). The member cannot provide this information.]

   If yes, **approve for one (1) month by HICL or GPI-10 and set DUR_CONCURRENT_OVR to 'SOMA_OP_BZD'.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OPIOID-SOMA-BENZODIAZEPINE CONCURRENT USE

GUIDELINES FOR USE (CONTINUED)

OPTIONAL OPERATIONAL DENIAL TEXT FOR APPROVAL OF CLINICAL UM, BUT DENIAL OF THE OPIOID SAFETY EDIT:
[NOTE: Enter proactive PAs for other UM overrides not including Opioid-Soma-Benzodiazepine Concurrent Use, if applicable.]
While your request for **[enter approved UM]** for **[enter requested drug]** has been granted, the drug has not been approved because of the use of an opioid with Soma (carisoprodol) and a benzodiazepine medication together.

[Proceed to enter Denial Text below]

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OPIOID-SOMA-BENZODIAZEPINE CONCURRENT USE** allows an approval for use of an opioid with Soma (carisoprodol) and a benzodiazepine medication together when one of the following criteria is met:

A. You are receiving palliative care (treatment for comfort from symptoms) or end-of-life care
B. You are enrolled in a hospice
C. You are a resident of a long-term care facility or intermediate care for intellectually disabled
D. Your doctor confirms that the use of an opioid with Soma (carisoprodol) and a benzodiazepine medication together is intended and clinically appropriate for you
E. You are being treated for cancer-related pain which includes: you are undergoing active cancer treatment, you are a cancer survivor with chronic (long-term) pain and have completed cancer treatment, you are in clinical remission (reduction or disappearance of the signs and symptoms of a disease), or you are under cancer surveillance (monitoring) only

Please consult your physician if you have any questions about this prescription pain medication and the requirements needed for you to obtain an approval for this agent.

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OPIOID-SOMA-BENZODIAZEPINE CONCURRENT USE

RATIONALE

To mitigate the risk of the overdose from dangerous combinations of CNS depressants while preserving patient access to drug regimens if deemed medically necessary.

The Opioid-Benzodiazepine-Soma Concurrent Use at POS edit will identify and deny concurrent use of opioids, benzodiazepines, and carisoprodol when there is an overlap in day supply (for at least one drug from each 'class'). This edit will reject the claim that creates the three-drug overlap.

The edit will have internal reject codes REJ- 433- 1204, and the following parameters:

1. Triple drug overlap = 1 day
2. Prescriber threshold = 1 prescriber
3. Exceptions =
   a) Cancer diagnosis (edit will lookback for presence of claims related to these diseases in the past 180 days to automatically exclude from the edit)
   b) Hospice or palliative care (edit will look for hospice attribute on claims to automatically exclude from the edit)
   c) Long Term Care residence (edit will look for patient residence code to automatically exclude from the edit)
   d) Cancer-related pain. Cancer-related pain includes those undergoing active cancer treatment, as well as cancer survivors with chronic pain who have completed cancer treatment, are in clinical remission, or are under cancer surveillance only

Please note that sickle cell disease will not be included in the exception criteria. Although opioids and benzodiazepines can be used in managing pain crises, treatment guidelines do not mention skeletal muscle relaxants such as carisoprodol as a typical treatment modality.

ORFORGLIPRON

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
ORFORGLIPRON CALCIUM	FOUNDAYO	51258		GPI-10 (6125206020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Are weight loss products (anti-obesity medications) a covered benefit?

   If yes, continue to #2.
   If no, guideline does not apply.

2. Is the request for weight loss OR weight management (ICD-10 Group E66) and the patient meets **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - There is physician attestation of active enrollment in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program
   - Foundayo will NOT be used concurrently with another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]) or a GLP-1/GIP receptor agonist (e.g., Zepbound [tirzepatide], Mounjaro [tirzepatide])

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

ORFORGLIPRON

INITIAL CRITERIA (CONTINUED)

3. Does the patient meet **ONE** of the following criteria prior to initiating weight loss therapy?
   - The patient has a body mass index (BMI) of at least 30 kg/m(2)
   - The patient is Asian and has a BMI of at least 27.5 kg/m(2)
   - The patient has a BMI of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non-alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)
   - The patient is Asian, has a BMI of at least 25 kg/m(2), AND has at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non- alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)

   If yes, **approve for 29 weeks by HICL or GPI-10.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **ORFORGLIPRON (Foundayo)** requires the following rule(s) be met for approval:
   A. The request is for weight loss or weight management
   B. You are 18 years of age or older
   C. You are actively enrolled in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program
   D. You will NOT use Foundayo concurrently (at the same time) with a GLP-1 receptor agonist (a type of medication such as Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]) or a GLP-1/GIP receptor agonist (a type of medication such as Zepbound [tirzepatide], Mounjaro [tirzepatide])

ORFORGLIPRON

RENEWAL CRITERIA

1. Is the request for weight loss OR weight management (ICD-10 Group E66) and the patient meets **ONE** of the following criteria prior to initiating weight loss therapy?
   - The patient has a body mass index (BMI) of at least 30 kg/m(2)
   - The patient is Asian and has a BMI of at least 27.5 kg/m(2)
   - The patient has a BMI of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non-alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)
   - The patient is Asian, has a BMI of at least 25 kg/m(2), AND has at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, dyslipidemia, cardiovascular disease, coronary artery disease, sleep apnea, knee-osteoarthritis, polycystic ovarian syndrome, non- alcoholic steatohepatitis/non-alcoholic fatty liver disease, asthma, and chronic obstructive pulmonary disease)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Does the patient meet **ALL** of the following criteria?
   - Foundayo will NOT be used concurrently with another GLP-1 receptor agonist (e.g., Victoza [liraglutide], Saxenda [liraglutide], Ozempic [semaglutide], Rybelsus [semaglutide], Byetta [exenatide], Bydureon [exenatide extended-release]) or a GLP-1/GIP receptor agonist (e.g., Zepbound [tirzepatide], Mounjaro [tirzepatide])
   - The patient has achieved or maintained at least a 5% weight loss of baseline body weight

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

OSILODROSTAT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OSILODROSTAT PHOSPHATE	ISTURISA	46396		GPI-10 (3002206060)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Cushing's syndrome (ICD-10 Group E24) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Surgery is not an option or has not been curative for the patient
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient had a trial of or contraindication to ONE of the following clinical standard of care agents: oral ketoconazole, cabergoline

   If yes, **approve for 6 months for all strengths by GPID or GPI-14 with the following quantity limits:**
   - **1mg: #8 per day.**
   - **5mg: #12 per day.**
   - **10mg: #6 per day.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OSILODROSTAT (Isturisa)** requires the following rule(s) be met for approval:
   A. You have Cushing's syndrome (a type of hormone disorder)
   B. You are 18 years of age or older
   C. Surgery is not an option or has not cured your condition
   D. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   E. You have tried or have a contraindication to (harmful for you to use) ONE of the following clinical standard of care medications: oral ketoconazole, cabergoline

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Cushing's syndrome (ICD-10 Group E24) and meet **ALL** the following criteria?
   - The patient continues to have improvement of Cushing's disease/Cushing's syndrome (e.g., clinically meaningful reduction in 24-hour urinary free cortisol and/or improvements in signs and symptoms of disease)
   - The patient maintains tolerability to Isturisa

   If yes, **approve for 12 months for all strengths by GPID or GPI-14 with the following quantity limits:**
   - **1mg: #8 per day.**
   - **5mg: #12 per day.**
   - **10mg: #6 per day.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OSILODROSTAT (Isturisa)** requires the following rule(s) be met for renewal:
   A. You have Cushing's syndrome (a type of hormone disorder)
   B. You continue to have improvement of Cushing's disease/Cushing's syndrome (such as clinically meaningful reduction in 24-hour urinary free cortisol and/or improvements in signs and symptoms of disease)
   C. You continue to tolerate treatment with Isturisa

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Isturisa.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

OSIMERTINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OSIMERTINIB MESYLATE	TAGRISSO	42803		GPI-10 (2136006820)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
- The patient is 18 years of age or older

If yes, continue to #2.
If no, continue to #6.

2. Will Tagrisso be used as adjuvant therapy after tumor resection **AND** the patient meets the following criterion?
   - The patient's tumor has epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R mutations, as detected by an FDA-approved test

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #3.

3. Is the cancer locally advanced and unresectable (stage III) and the patient meets **ALL** of the following criteria?
   - The patient's disease has NOT progressed during or following concurrent or sequential platinum-based (e.g., cisplatin, carboplatin) chemoradiation therapy
   - The patient's tumor has epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R mutations, as detected by an FDA-approved test

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #4.

4. Is the cancer metastatic and the patient meets **ONE** of the following criteria?
   - The patient's tumor has epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R mutations, as detected by an FDA-approved test
   - The patient's tumor has an epidermal growth factor receptor (EGFR) T790M mutation, as detected by an FDA-approved test, AND the patient's disease has progressed while on or after EGFR tyrosine kinase-inhibitor therapy (e.g., Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #5.

OSIMERTINIB

GUIDELINES FOR USE (CONTINUED)

5. Is the cancer locally advanced or metastatic and the patient meets **ALL** of the following criteria?
   - Tagrisso will be used in combination with pemetrexed and platinum-based chemotherapy (e.g., cisplatin, carboplatin)
   - The patient's tumor has epidermal growth factor receptor (EGFR) exon 19 deletions or exon 21 L858R mutations, as detected by an FDA-approved test

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Is the request for a currently approved US Food and Drug Administration (FDA) indication as listed in the recent manufacturer prescribing information document? (see FDA website for approved drugs indications: https://www.accessdata.fda.gov/scripts/cder/daf/index.cfm)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OSIMERTINIB (Tagrisso)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Non-small cell lung cancer (NSCLC: a type of lung cancer)
      2. A currently approved US Food and Drug Administration (FDA) indication as listed in the recent manufacturer prescribing information document

   B. If you have non-small cell lung cancer, approval also requires:
      1. You are 18 years of age or older
      2. You meet ONE of the following:
         a. Tagrisso will be used as adjuvant therapy (add-on treatment) after tumor resection (surgical removal of a tumor), and your tumor has epidermal growth factor receptor (EGFR: type of protein) exon 19 deletions or exon 21 L858R mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)- approved test

(Denial text continued on next page)

OSIMERTINIB

GUIDELINES FOR USE (CONTINUED)

b. Your cancer is locally advanced and unresectable (stage III) (cancer that has spread to nearby tissue or lymph nodes and cannot be surgically removed), and you meet ALL of the following:
   i. Your disease has NOT worsened during or following concurrent (at the same time) or sequential (one after the other) platinum-based (such as cisplatin, carboplatin) chemoradiation therapy (a type of treatment that combines chemotherapy and radiation)
   ii. Your tumor has epidermal growth factor receptor (EGFR: type of protein) exon 19 deletions or exon 21 L858R mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
c. Your cancer is metastatic (cancer that has spread to other parts of the body), and you meet ONE of the following:
   i. Your tumor has epidermal growth factor receptor (EGFR: type of protein) exon 19 deletions or exon 21 L858R mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test
   ii. Your tumor has an epidermal growth factor receptor (EGFR) T790M mutation (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test, AND your disease has worsened while on or after EGFR tyrosine kinase-inhibitor therapy (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])
d. Your cancer is locally advanced or metastatic (cancer that has spread from where it started to nearby tissue, lymph nodes, or other parts of the body), and you meet ALL of the following:
   i. Tagrisso will be used in combination with pemetrexed and platinum-based chemotherapy (such as cisplatin, carboplatin)
   ii. Your tumor has epidermal growth factor receptor (EGFR: type of protein) exon 19 deletions or exon 21 L858R mutations (abnormal changes in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

PRIOR AUTHORIZATION GUIDELINES

OTESECONAZOLE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OTESECONAZOLE	VIVJOA	47976		GPI-10 (1140805000)	

GUIDELINES FOR USE

1. Is the request for the reduction in the incidence of recurrent vulvovaginal candidiasis (RVVC) (ICD-10 B37.32) and the patient meets **ALL** of the following criteria?
   - The patient is female
   - The patient is NOT of reproductive potential (defined as a biological female who is postmenopausal or has another reason for permanent infertility [e.g., tubal ligation, hysterectomy, salpingo-oophorectomy])
   - The patient is NOT currently on ibrexafungerp for RVVC

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Has the patient previously received Vivjoa?

   If yes, continue to #4.
   If no, continue to #3.

3. Has the patient had 3 or more episodes of VVC in the past 12 months?

   If yes, **approve for 3 months by HICL or GPI-10 with a quantity limit of #18 per 12 weeks.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient meet **ALL** of the following criteria?
   - The patient has successfully completed a course of Vivjoa for prevention of RVVC
   - The patient is either being treated or has just completed treatment for a new recurrence of VVC

   If yes, **approve for 3 months by HICL or GPI-10 with a quantity limit of #18 per 12 weeks.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

OTESECONAZOLE

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OTESECONAZOLE (Vivjoa)** requires the following rule(s) be met for approval:

A. You have recurrent vulvovaginal candidiasis (RVVC: a repeating vaginal fungal infection)
B. You are female
C. You are not able to reproduce, which means you are a biological female and are postmenopausal (after menopause) or you have another reason for permanent infertility (such as tubal ligation [having tubes tied], hysterectomy [removal of the uterus], salpingo-oophorectomy [removal of an ovary and its fallopian tube])
D. You are NOT currently on ibrexafungerp for RVVC
E. If you have not previously received Vivjoa, approval also requires:
   1. You had 3 or more episodes of RVVC in the past 12 months
F. If you have previously received Vivjoa, approval also requires:
   1. You have successfully completed a course of Vivjoa for prevention of RVVC
   2. You are either being treated or have just completed treatment for a new recurrence of VVC

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Vivjoa.

OXYMETAZOLINE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OXYMETAZOLINE HCL/PF	UPNEEQ	46701		GPI-10 (8680223610)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of blepharoptosis (ICD-10 Groups H02.40, H02.41, H02.42, H02.43) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an ophthalmologist or optometrist
   - The patient has been evaluated for surgical intervention
   - The patient has experienced visual impairment due to blepharoptosis
   - The patient had a trial of TWO ophthalmic alpha-adrenergic agonists (e.g., apraclonidine, tetrahydrozoline, naphazoline)

   If yes, **approve for 3 months by HICL or GPI-10 with a quantity limit of #1 droperette per day.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **OXYMETAZOLINE (Upneeq)** requires the following rule(s) be met for approval:
   A. You have blepharoptosis (drooping of the upper eyelid)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with an ophthalmologist (a type of eye doctor) or optometrist (a type of eye doctor)
   D. You have been evaluated for surgical intervention
   E. You have experienced visual impairment (limited or blocked vision) due to blepharoptosis (drooping of the upper eyelid)
   F. You have tried TWO ophthalmic alpha-adrenergic agonists (such as apraclonidine, tetrahydrozoline, naphazoline)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

OZANIMOD

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
OZANIMOD HYDROCHLORIDE	ZEPOSIA	46431		GPI-10 (6240705020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of a relapsing form of multiple sclerosis (MS) (ICD-10 G35), to include clinically isolated syndrome, relapsing-remitting disease, or active secondary progressive disease, and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Zeposia will NOT be used concurrently with another systemic biologic (e.g., Tysabri [natalizumab]) or targeted small molecules (e.g., JAK inhibitor, PDE-4 inhibitor) for the treatment of a relapsing form of MS

   If yes, continue to #2.
   If no, continue to #3.

2. Does the patient have **ANY** of the following contraindications to Zeposia?
   - Within the last 6 months, experienced a myocardial infarction, unstable angina, stroke, transient ischemic attack, decompensated heart failure requiring hospitalization, or Class III or IV heart failure
   - A presence of Mobitz type II second-degree or third degree atrioventricular (AV) block, sick sinus syndrome, or sino-atrial block, unless the patient has a functioning pacemaker
   - Severe untreated sleep apnea
   - Concomitant use of a monoamine oxidase inhibitor (e.g., selegiline, phenelzine, linezolid)

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

   If no, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**

OZANIMOD

INITIAL CRITERIA (CONTINUED)

3. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a gastroenterologist
   - Zeposia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance programs do not qualify]

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

OZANIMOD

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OZANIMOD (Zeposia)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. A relapsing form of multiple sclerosis (MS: a type of nerve disorder), which includes clinically isolated syndrome (disease occurs once), relapsing-remitting disease (symptoms or disease returns and goes away), or active secondary progressive disease (advanced disease)
   2. Moderate to severe ulcerative colitis (UC: a type of digestive disorder)

B. If you have a relapsing form of multiple sclerosis, approval also requires:
   1. You are 18 years of age or older
   2. You will NOT use Zeposia concurrently (at the same time) with another systemic biologic (such as Tysabri [natalizumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor, PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of a relapsing form of multiple sclerosis (a type of nerve disorder)
   3. You do NOT have any of the following contraindications to (harmful for you to use) Zeposia:
      a. Within the last 6 months, experienced a myocardial infarction (heart attack), unstable angina (chest pain), stroke, transient ischemic attack (TIA: short stroke-like attack), decompensated heart failure (a type of heart condition) requiring hospitalization, or Class III or IV heart failure (a type of heart condition)
      b. A presence of Mobitz type II second-degree or third degree atrioventricular (AV) block, sick sinus syndrome, or sino-atrial block (types of irregular heartbeats), unless you have a functioning pacemaker (a small device that is placed [implanted] in your chest to help control your heartbeat)
      c. Severe untreated sleep apnea (a type of sleep condition with difficulty breathing)
      d. Concomitant use (using at the same time) of a monoamine oxidase inhibitor (a type of medication such as selegiline, phenelzine, linezolid)

C. If you have moderate to severe ulcerative colitis, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a gastroenterologist (a doctor who treats digestive conditions)
   3. You will NOT use Zeposia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)

(Initial denial text continued on next page)

OZANIMOD

INITIAL CRITERIA (CONTINUED)

4. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
   a. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
   b. Skyrizi (risankizumab-rzaa)
   c. Tremfya (guselkumab)
   d. Omvoh (mirikizumab-mrkz)
   e. Adalimumab-ryvk/adalimumab-aaty
   f. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
   g. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

OZANIMOD

RENEWAL CRITERIA

NOTE: For the diagnosis of multiple sclerosis, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of moderate to severe ulcerative colitis (UC) (ICD-10 Group K51) and meet **ALL** of the following criteria?
   - Zeposia will NOT be used concurrently with another systemic biologic (e.g., Humira [adalimumab]) or targeted small molecules (e.g., JAK inhibitor [e.g., Rinvoq (upadacitinib)], PDE-4 inhibitor) for the treatment of UC
   - The patient had a trial of or contraindication to TWO of the following preferred agents:
     - Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
     - Skyrizi (risankizumab-rzaa)
     - Tremfya (guselkumab)
     - Omvoh (mirikizumab-mrkz)
     - Adalimumab-ryvk/adalimumab-aaty
     - Xeljanz (tofacitinib IR or XR) (**NOTE:** Xeljanz requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])
     - Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response or intolerance to a TNF blocker [e.g., adalimumab-ryvk/adalimumab-aaty])

   [**NOTE:** Pharmaceutical samples acquired from the prescriber or manufacturer assistance programs do not qualify]

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

OZANIMOD

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **OZANIMOD (Zeposia)** requires the following rule(s) be met for renewal:

A. You have moderate to severe ulcerative colitis (UC: a type of digestive disorder)
B. You will NOT use Zeposia concurrently (at the same time) with another systemic biologic (such as Humira [adalimumab]) or targeted small molecules (such as JAK [Janus kinase] inhibitor [such as Rinvoq (upadacitinib)], PDE-4 [phosphodiesterase-4] inhibitor) for the treatment of ulcerative colitis (a type of digestive disorder)
C. You have tried or have a contraindication to (harmful for you to use) TWO of the following preferred medications:
    1. Yesintek (ustekinumab-kfce)/ustekinumab-aekn/Steqeyma (ustekinumab-stba)
    2. Skyrizi (risankizumab-rzaa)
    3. Tremfya (guselkumab)
    4. Omvoh (mirikizumab-mrkz)
    5. Adalimumab-ryvk/adalimumab-aaty
    6. Xeljanz (tofacitinib immediate-release or extended-release) (**NOTE:** Xeljanz requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])
    7. Rinvoq (upadacitinib) (**NOTE:** Rinvoq requires additional criteria of inadequate response [medication did not work] or intolerance [side effect] to a tumor necrosis factor [TNF] blocker [such as adalimumab-ryvk/adalimumab-aaty])

NOTE: The use of pharmaceutical samples (from the prescriber or manufacturer assistance program) will not be considered when evaluating the medical condition or prior prescription history for drugs that require prior authorization.

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic breast cancer?

   If yes, continue to #2.
   If no, continue to #3.

2. Has the patient previously tried a chemotherapy regimen containing an anthracycline (doxorubicin or epirubicin) or paclitaxel?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT: Please note that this drug has an important FDA safety warning. For more Information, please ask your doctor or pharmacist.

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient have a diagnosis of locally advanced or metastatic Non-Small Cell Lung Cancer (NSCLC) or Small Cell Lung Cancer (SCLC)?

   If yes, **approve for 12 months by HICL or GPI-10.**
   APPROVAL TEXT: Please note that this drug has an important FDA safety warning. For more Information, please ask your doctor or pharmacist.

   If no, continue to #4.

4. Does the patient have a diagnosis of metastatic adenocarcinoma of the pancreas?

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PACLITAXEL PROTEIN-BOUND (NSA)

GUIDELINES FOR USE (CONTINUED)

5. Is the requested medication being used in combination with gemcitabine?

If yes, **approve for 12 months by HICL or GPI-10.**
APPROVAL TEXT: Please note that this drug has an important FDA safety warning. For more Information, please ask your doctor or pharmacist.

If no, do not approve.
DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PACLITAXEL (Abraxane)** requires the following rule(s) be met for approval:

A. You have ONE of the following diagnoses:
   1. Metastatic breast cancer (breast cancer that has spread to other parts of the body)
   2. Locally advanced or metastatic Non-Small Cell Lung Cancer (NSCLC: cancer that is in the advanced stage or that has spread to other parts of the body)
   3. Small Cell Lung Cancer (SCLC)
   4. Metastatic adenocarcinoma of the pancreas (pancreas cancer that has spread to other parts of the body)

B. If you have metastatic breast cancer, approval also requires:
   1. You have tried a chemotherapy regimen (cancer-treating medications) containing an anthracycline (cancer drug such as doxorubicin or epirubicin) or paclitaxel

C. If you have metastatic adenocarcinoma of the pancreas, approval also requires:
   1. The requested medication will be used in combination with gemcitabine

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

PACRITINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PACRITINIB CITRATE	VONJO	47850		GPI-10 (2153755010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of intermediate- or high-risk primary or secondary (post-polycythemia vera or post-essential thrombocythemia) myelofibrosis (MF) (ICD-10 D47.1, D75.81) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a platelet count below 50,000/uL

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do no approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PACRITINIB (Vonjo)** requires the following rule(s) be met for approval:
   A. You have intermediate- or high-risk primary or secondary (post-polycythemia vera [a type of blood cell disorder] or post-essential thrombocythemia [a type of blood cell disorder]) myelofibrosis (MF: a type of blood cancer)
   B. You are 18 years of age or older
   C. You have a platelet count below 50,000/uL

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PACRITINIB

RENEWAL CRITERIA

1. Does the patient have a diagnosis of intermediate- or high-risk primary or secondary (post-polycythemia vera or post-essential thrombocythemia) myelofibrosis (MF) (ICD-10 D47.1, D75.81)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient shown symptom improvement by meeting **ONE** of the following criteria?
   - The patient has a spleen volume reduction of at least 35% from baseline
   - The patient has at least a 50% reduction in total symptom score (e.g., Myeloproliferative Neoplasm Symptom Assessment Form Total Symptom Score [MPN-SAF TSS], modified Myelofibrosis Symptom Assessment Form [MFSAF] v2.0)
   - The patient has at least a 50% reduction in palpable spleen length

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PACRITINIB (Vonjo)** requires the following rule(s) be met for renewal:
   A. You have intermediate- or high-risk primary or secondary (post-polycythemia vera [a type of blood cell disorder] or post-essential thrombocythemia [a type of blood cell disorder]) myelofibrosis (MF: a type of blood cancer)
   B. You have shown symptom improvement by meeting ONE of the following:
      1. You have a spleen volume reduction of at least 35% from baseline (before treatment)
      2. You have at least a 50% reduction in total symptom score (such as Myeloproliferative Neoplasm Symptom Assessment Form Total Symptom Score [MPN-SAF TSS], modified Myelofibrosis Symptom Assessment Form [MFSAF] v2.0)
      3. You have at least a 50% reduction in palpable (can be felt by external examination) spleen length

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

PALBOCICLIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PALBOCICLIB	IBRANCE	41725		GPI-10 (2153106000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer (ICD-10 Group C50)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient's cancer hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-negative?

   If yes, continue to #3.
   If no, continue to #6.

3. Will Ibrance be used in combination with an aromatase inhibitor (e.g., anastrozole, letrozole, exemestane) as initial endocrine-based therapy and the patient meets **ALL** of the following criteria?
   - The patient's cancer is advanced or metastatic
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Kisqali (ribociclib), Verzenio (abemaciclib)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #21 per 28 days.**
   If no, continue to #4.

4. Will Ibrance be used in combination with fulvestrant (Faslodex) and the patient meets **ALL** of the following criteria?
   - The patient's cancer is advanced or metastatic
   - The patient has experienced disease progression following endocrine therapy (e.g., anastrozole, letrozole, tamoxifen)
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Kisqali (ribociclib), Verzenio (abemaciclib)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #21 per 28 days.**
   If no, continue to #5.

PALBOCICLIB

GUIDELINES FOR USE (CONTINUED)

5. Will Ibrance be used in combination with Itovebi (inavolisib) and fulvestrant (Faslodex) and the patient meets **ALL** of the following criteria?
   - The patient's cancer is locally advanced or metastatic
   - The patient's tumor has a PIK3CA mutation, as detected by an FDA-approved test
   - The patient has experienced disease recurrence on or after completing an adjuvant endocrine therapy (e.g., anastrozole, letrozole, tamoxifen)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #21 per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Is the patient’s cancer hormone receptor (HR)-positive, human epidermal growth factor receptor 2 (HER2)-positive and the patient meets **ALL** of the following criteria?
   - The patient’s cancer is locally advanced or metastatic
   - Ibrance will be used in combination with trastuzumab (Herceptin or an FDA-approved biosimilar) and endocrine therapy (e.g., letrozole, anastrozole, exemestane, fulvestrant) following induction treatment

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #21 per 28 days.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PALBOCICLIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT:

Our guideline named **PALBOCICLIB (Ibrance)** requires the following rule(s) be met for approval:

A. You have breast cancer

B. If your cancer is hormone receptor (HR: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-negative, approval also requires ONE of the following:

1. Ibrance will be used in combination with an aromatase inhibitor (such as anastrozole, letrozole, exemestane) as initial endocrine (hormone)-based therapy; your cancer is advanced or metastatic (cancer that has progressed or has spread to other parts of the body); and you have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Kisqali (ribociclib), Verzenio (abemaciclib)
2. Ibrance will be used in combination with fulvestrant (Faslodex); your cancer is advanced or metastatic (cancer that has progressed or has spread to other parts of the body); your disease has worsened after endocrine (hormone) therapy (such as anastrozole, letrozole, tamoxifen); and you have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Kisqali (ribociclib), Verzenio (abemaciclib)
3. Ibrance will be used in combination with Itovebi (inavolisib) and fulvestrant (Faslodex); your cancer is locally advanced or metastatic (cancer that has spread from where it started to nearby tissue or lymph nodes or to other parts of the body); your tumor has a PIK3CA mutation (abnormal change in a type of gene), as detected by a Food and Drug Administration (FDA)-approved test; and you have experienced disease recurrence (disease has returned) on or after completing adjuvant (add-on) endocrine (hormone) therapy (such as anastrozole, letrozole, tamoxifen)

C. If your cancer is hormone receptor (HR: a type of protein)-positive, human epidermal growth factor receptor 2 (HER2: a type of protein)-positive, approval also requires:

1. Your cancer is locally advanced or metastatic (cancer that has spread from where it started to nearby tissue or lymph nodes or has spread to other parts of the body)
2. Ibrance will be used in combination with trastuzumab (Herceptin or a Food and Drug Administration [FDA]-approved biosimilar) and endocrine (hormone) therapy (such as letrozole, anastrozole, exemestane, fulvestrant) following induction (initial) treatment

RATIONALE

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PALIVIZUMAB (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PALIVIZUMAB	SYNAGIS	18564		GPI-10 (1950206000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Has the patient received Beyfortus (nirsevimab-alip) within this RSV season?

   If yes, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.
   If no, continue to #2.

2. Is the patient under 12 months of age?

   If yes, continue to #3.
   If no, continue to #10.

3. Does the patient have chronic lung disease of prematurity (previously called bronchopulmonary dysplasia [BPD]) as defined below?
   - Gestational age less than 32 weeks, and
   - Patient required greater than 21% supplemental oxygen for at least the first 28 days after birth (**Note:** This does not include respiratory distress in the newborn, wheezing, reactive airway disease (RAD), asthma, or cystic fibrosis. Current data does not support the routine use of palivizumab prophylaxis in patients with cystic fibrosis.)

   If yes, continue to #12.
   If no, continue to #4.

4. Does the patient meet **ONE** of the following?
   - The patient is profoundly immunocompromised during the RSV season
   - The patient has undergone solid-organ transplantation during the RSV season

   If yes, continue to #12.
   If no, continue to #5.

CONTINUED ON NEXT PAGE

PALIVIZUMAB (NSA)

INITIAL CRITERIA (CONTINUED)

5. Does the patient have **ONE** of the following congenital heart disease conditions?
   - Acyanotic heart disease requiring medication to control chronic heart failure (i.e., furosemide, epinephrine, dopamine, lidocaine, milrinone, atenolol, propranolol, amlodipine, clonidine) AND will require cardiac surgical procedures
   - Moderate or severe pulmonary hypertension
   - Cyanotic heart defect AND the requested medication is prescribed by or in consultation with a pediatric cardiologist
     (**Note:** This does not include patients with hemodynamically insignificant heart disease, infants with lesions adequately corrected by surgery, infants with mild cardiomyopathy who are not receiving medical therapy for the condition.)

   If yes, continue to #12.
   If no, continue to #6.

6. Was the patient born prematurely?

   If yes, continue to #8.
   If no, continue to #7.

7. Does the patient have congenital abnormalities of the airways (anatomic pulmonary abnormalities) or neuromuscular disease that compromises the handling of respiratory secretions?

   If yes, continue to #12.
   If no, continue to #8.

8. Was the patient born at less than 29 weeks gestational age?

   If yes, continue to #12.
   If no, continue to #9.

9. Does the patient meet **ONE** of the following?
   - The patient is an American Navajo infant
   - The patient is an American White Mountain Apache infant
   - The patient is an Alaska native infant

   If yes, continue to #12.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

CONTINUED ON NEXT PAGE

Copyright © 2023 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

PALIVIZUMAB (NSA)

INITIAL CRITERIA (CONTINUED)

10. Is the patient younger than 24 months of age?

    If yes, continue to #11.
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

11. Does the patient meet **ONE** of the following criteria?
    - The patient is profoundly immunocompromised during the RSV season
    - The patient has chronic lung disease of prematurity **AND** requires medical support (oxygen, bronchodilator [e.g., albuterol], diuretic [e.g., furosemide], or chronic steroid therapy [e.g., budesonide]) within 6 months prior to the start of the second RSV season
    - The patient has undergone solid-organ transplantation during RSV season

    If yes, continue to #12.
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

12. Approve by GPID or GPI-14, for all strengths, for 5 fills, as follows:

- **Start Date (Choose ONE):**
  - For requests with a start date of October 1st or further into the RSV season, enter the start date as requested.
    OR
  - For requests with a start date BEFORE October 1st, refer to the CDC website to verify whether RSV cases have started to increase in that region by confirming when the 'detections' (i.e., positive cases) begin to increase. If the detections have increased from baseline as of the date of the request, enter the start date as requested.
- **Approval Duration (Choose ONE):**
  - For requests that extend past April 30th, refer to the CDC website to verify when the RSV season for the specified region ends by confirming when the 'detections' (i.e., positive cases) returned to baseline in the previous years. If the detections returned to baseline after April 30th, enter a duration up to 5 months, but do not extend beyond the time when detections returned to baseline. (For example, if the request is received in February, and the CDC website shows that detection returned to baseline in that region in May of the previous year; then approve for 4 months).

    OR

  - Enter an approval duration up to April 30th.

NOTE: CDC website - https://www.cdc.gov/surveillance/nrevss/rsv/region.html

PALIVIZUMAB (NSA)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PALIVIZUMAB (Synagis)** requires the following rule(s) be met for approval:

A. You have not received Beyfortus (nirsevimab-alip) within this RSV (type of lung and respiratory tract infection) season
B. You are less than 12 months old or less than 24 months at the start of respiratory syncytial virus (RSV: type of lung and respiratory tract infection) season (mid-September to mid-May)
C. **If you are less than 12 months old, you must meet ONE of the following**:
   1. You have chronic lung disease of prematurity (a condition where you were born at less than 32 weeks and required more than 21% of additional oxygen for at least the first 28 days after birth)
   2. You are profoundly immunocompromised during RSV season (your body cannot fight off infections)
   3. You have received a solid-organ transplant during RSV season
   4. You have congenital (starting from birth) heart disease conditions at birth such as: acyanotic heart disease (blood from the left side to the right side of the heart due to a hole in the heart walls) where you need medication to control chronic heart failure and will require heart surgical procedures; moderate to severe pulmonary hypertension (high blood pressure in the lungs); or cyanotic heart defect (low blood oxygen level) and the requested medication is prescribed by or given in consultation with a pediatric cardiologist (a heart doctor for children)
   5. You have congenital (starting from birth) abnormalities of the lung airways or a neuromuscular (nerve-muscle) disorder that affects respiratory (lung/breathing) secretions
   6. You were born premature at less than 29 weeks (gestational age)
   7. You are an American Navajo, American White Mountain Apache, or Alaska Native infant born prematurely
D. If you are less than 24 months old, you must meet ONE of the following:
   1. You are profoundly immunocompromised during RSV season (a condition where your body cannot fight off infections)
   2. You have chronic lung disease of prematurity and need medical support within 6 months before the start of the second respiratory syncytial virus (RSV: type of lung and respiratory tract infection) season. Medical support includes oxygen, bronchodilator (drug that helps you breathe such as albuterol), diuretic (drug that makes you urinate such as furosemide), or chronic steroid therapy (such as budesonide)
   3. You have received a solid-organ transplant during RSV season

(Initial denial text continued on next page)

PALIVIZUMAB (NSA)

RENEWAL CRITERIA

1. Has the patient received Beyfortus (nirsevimab-alip) within this RSV season?

   If yes, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.
   If no, continue to #2.

2. Is the patient younger than 24 months of age?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

3. Did the patient undergo cardiopulmonary bypass surgery during their RSV prophylaxis season?

   If yes, **approve for 1 month by GPID or GPI-14 with a fill count of 2 (do not enter quantity limit on number of vials).**
   If no, continue to #4.

4. Is this a request for a second year of coverage (e.g., a previous approval in the previous RSV season)?

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

5. Does the patient have chronic lung disease of prematurity (previously called bronchopulmonary dysplasia [BPD]) and requires medical support (oxygen, bronchodilator [e.g., albuterol], diuretic [e.g., furosemide], or chronic steroid therapy [e.g., budesonide]) within 6 months prior to start of the second RSV season?
   (**Note:** This does not include respiratory distress in the newborn period, wheezing, reactive airway disease (RAD), asthma, or cystic fibrosis. Current data does not support the routine use of palivizumab prophylaxis in patients with cystic fibrosis.)

   If yes, continue to #6.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

PALOPEGTERIPARATIDE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PALOPEGTERIPARATIDE	YORVIPATH	49810		GPI-10 (3090516000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hypoparathyroidism (ICD-10 Group E20) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's hypoparathyroidism is NOT due to impaired responsiveness to parathyroid hormone or a history of disease that affects calcium metabolism or calcium-phosphate homeostasis
   - The patient had a trial of activated vitamin D (e.g., calcitriol) and calcium

   If yes, **approve all strengths for 6 months by GPID or GPI-14 with a quantity limit as follows:**
   - **168 mcg/0.56 mL: #1.12 mL per 28 days.**
   - **294 mcg/0.98 mL: #1.96 mL per 28 days.**
   - **420 mcg/1.4 mL: #2.8 mL per 28 days.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PALOPEGTERIPARATIDE (Yorvipath)** requires the following rule(s) be met for approval:
   A. You have hypoparathyroidism (low levels of parathyroid hormone)
   B. You are 18 years of age or older
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   D. Your hypoparathyroidism is NOT due to impaired responsiveness to parathyroid hormone or a history of disease that affects calcium metabolism or calcium-phosphate homeostasis (balance)
   E. You have tried activated vitamin D (such as calcitriol) and calcium

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PALOPEGTERIPARATIDE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hypoparathyroidism (ICD-10 Group E20) **AND** meet the following criterion?
   - The patient is independent of or managed on a lowered dose of vitamin D and calcium supplementation

   If yes, **approve all strengths for 12 months by GPID or GPI-14 with a quantity limit as follows:**
   - **168 mcg/0.56 mL: #1.12 mL per 28 days.**
   - **294 mcg/0.98 mL: #1.96 mL per 28 days.**
   - **420 mcg/1.4 mL: #2.8 mL per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PALOPEGTERIPARATIDE (Yorvipath)** requires the following rule(s) be met for renewal:
   A. You have hypoparathyroidism (low levels of parathyroid hormone)
   B. You are independent of or managed on a lowered dose of vitamin D and calcium supplements

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PALOVAROTENE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PALOVAROTENE	SOHONOS	49043		GPI-10 (7588606000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of fibrodysplasia ossificans progressiva (FOP) (ICD-10 Group M61.1) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a geneticist, orthopedist, rheumatologist, or a FOP specialty center

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the patient a male **AND** meets the following criterion?
   - The patient is 10 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Is the patient a female **AND** meets the following criterion?
   - The patient is 8 years of age or older

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

4. Is the patient of reproductive potential?

   If yes, continue to #5.
   If no, **approve for 12 months by HICL or GPI-10.**

5. Has the patient obtained a negative pregnancy test within 7 days prior to initiating Sohonos?

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

PALOVAROTENE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PALOVAROTENE (Sohonos)** requires the following rule(s) be met for approval:

A. You have fibrodysplasia ossificans progressiva (FOP: a type of rare genetic tissue disorder)
B. Therapy is prescribed by or in consultation with a geneticist (doctor who treats gene disorders), orthopedist (a type of doctor who specializes in bones, joints, muscles, ligaments, tendons and nerves), rheumatologist (a type of immune system doctor), or a fibrodysplasia ossificans progressiva (FOP: a type of rare genetic tissue disorder) specialty center
C. You meet ONE of the following:
    1. You are a female AND 8 years of age or older
    2. You are a male AND 10 years of age or older
D. If you are a female of reproductive potential, you must have obtained a negative pregnancy test within 7 days prior to starting Sohonos

PALTUSOTINE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PALTUSOTINE HCL	PALSONIFY	50910		GPI-10 (3017007310)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of acromegaly (ICD-10 E22.0) and meet **ALL** of the following criteria?
   - The patient had an inadequate response to surgery OR surgery is not an option for this patient
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's serum insulin-like growth factor 1 (IGF-1) level (adjusted for the patient's age) is elevated or unequivocal with inadequate suppression of growth hormone after a glucose load
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Mycapssa, Sandostatin LAR Depot (octreotide acetate ER)

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **20mg: #2 per day.**
   - **30mg: #4 per day.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PALTUSOTINE (Palsonify)** requires the following rule(s) be met for approval:
   A. You have acromegaly (a type of hormone disorder)
   B. You had an inadequate response (did not work) to surgery OR surgery is not an option for you
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   D. Your serum insulin-like growth factor 1 (IGF-1: a type of hormone) level (adjusted for your age) is elevated (higher than normal) or unequivocal with inadequate suppression (reduction) of growth hormone after a glucose load (a type of test used to diagnose acromegaly [a type of hormone disorder])
   E. You have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Mycapssa, Sandostatin LAR Depot (octreotide acetate ER)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PALTUSOTINE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of acromegaly (ICD-10 E22.0) and meet **ALL** of the following criteria?
   - The patient has had a reduction, normalization, or maintenance of IGF-1 levels based on age and gender
   - The patient has shown improvement or has sustained remission of clinical symptoms of acromegaly

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **20mg: #2 per day.**
   - **30mg: #4 per day.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PALTUSOTINE (Palsonify)** requires the following rule(s) be met for renewal:
   A. You have acromegaly (a type of hormone disorder)
   B. You have had a reduction, normalization, or maintenance of insulin-like growth factor 1 (IGF-1: a type of hormone) levels based on your age and gender
   C. You have shown improvement or have sustained remission (reduction or disappearance) of clinical symptoms of acromegaly (a type of hormone disorder)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

PANITUMUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PANITUMUMAB	VECTIBIX	34054		GPI-10 (2136007000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of metastatic colorectal cancer (mCRC) (ICD-10 C19) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patien'ts cancer wild-type RAS (defined as wild-type in both KRAS and NRAS), as determined by an FDA-approved test?

   If yes, continue to #3.
   If no, continue to #4.

3. Does the patient meet **ONE** of the following criteria?
   - Vectibix will be used in combination with FOLFOX (leucovorin calcium [folinic acid], fluorouracil, oxaliplatin)
   - Vectibix will be used as monotherapy AND the patient has disease progression after treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-containing chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Does the patient's cancer have a KRAS G12C-mutation, as determined by an FDA-approved test, and meet **ALL** of the following criteria?
   - Vectibix will be used in combination with Lumakras (sotorasib)
   - The patient has received previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PANITUMUMAB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PANITUMUMAB (Vectibix)** requires the following rule(s) be met for approval:

A. You have metastatic colorectal cancer (mCRC: a type of digestive cancer that has spread to other parts of the body)
B. You are 18 years of age or older
C. Your cancer is wild-type RAS (defined as wild-type in both KRAS and NRAS [types of genes without a specific mutation]), OR you have a KRAS G12C-mutation [type of abnormal change in a gene], as determined by a Food and Drug Administration (FDA)-approved test
D. If your cancer is wild-type RAS, approval also requires ONE of the following:
   1. Vectibix will be used in combination with FOLFOX (treatment regimen containing leucovorin calcium [folinic acid], fluorouracil, oxaliplatin)
   2. Vectibix will be used as monotherapy (one drug treatment) AND you have disease progression (worsening) after treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-containing chemotherapy (drugs used to treat cancer)
E. If your cancer has a KRAS G12C-mutation, approval also requires:
   1. Vectibix will be used in combination with Lumakras (sotorasib)
   2. You have received previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

PARATHYROID HORMONE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PARATHYROID HORMONE	NATPARA	34000		GPI-10 (3004405510)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of hypocalcemia (ICD-10 E83.51) secondary to hypoparathyroidism (ICD-10 Group E20) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient had a trial of activated vitamin D (calcitriol) and calcium
   - The patient's hypoparathyroidism is NOT due to a calcium sensing receptor (CSR) mutation
   - The patient's hypoparathyroidism is NOT considered acute post-surgical hypoparathyroidism (surgery in the past 30 days)

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #2 per 28 days.** If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline for **PARATHYROID HORMONE (Natpara)** requires the following rule(s) be met for approval:
   A. You have hypocalcemia secondary to hypoparathyroidism (low blood calcium due to low levels of a type of hormone)
   B. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)
   C. You have tried activated vitamin D (calcitriol) and calcium
   D. Your hypoparathyroidism (low levels of a type of hormone) is NOT due to a calcium sensing receptor (CSR) mutation (an abnormal change in a type of gene)
   E. Your hypoparathyroidism is NOT considered acute post-surgical hypoparathyroidism (low levels of a type of hormone due to surgery in the past 30 days)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PASIREOTIDE PAMOATE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of acromegaly (ICD-10 E22.0) and meet **ALL** of the following criteria?
   - The patient has had a reduction, normalization, or maintenance of IGF-1 levels based on age and gender
   - The patient has shown improvement or has sustained remission of clinical symptoms of acromegaly

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per 28 days.** If no, continue to #2.

2. Does the patient have a diagnosis of Cushing's disease (ICD-10 Group E24) and meet **ALL** of the following criteria?
   - The patient continues to have improvement of Cushing's disease (e.g., clinically meaningful reduction in 24-hour urinary free cortisol or improvements in signs and symptoms of disease)
   - The patient maintains tolerability to Signifor LAR

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per 28 days.** If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PASIREOTIDE PAMOATE (Signifor LAR)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Acromegaly (a type of hormone disorder)
      2. Cushing's disease (a type of hormone disorder)

   B. If you have acromegaly, renewal also requires:
      1. You have had a reduction, normalization, or maintenance of insulin-like growth factor 1 (IGF-1: a type of hormone) levels based on your age and gender
      2. You have shown improvement or have sustained remission (reduction or disappearance) of clinical symptoms of acromegaly (a type of hormone disorder)

   C. If you have Cushing's disease, renewal also requires:
      1. You continue to have improvement of Cushing's disease (such as clinically meaningful reduction in 24-hour urinary free cortisol and/or improvements in signs and symptoms of disease)
      2. You continue to tolerate Signifor LAR

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PATIROMER

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PATIROMER CALCIUM SORBITEX	VELTASSA	42767		GPI-10 (9945006020)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of hyperkalemia (ICD-10 E87.5) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a nephrologist or cardiologist
   - Veltassa is NOT being used as an emergency treatment for life-threatening hyperkalemia
   - The patient is NOT currently receiving dialysis
   - Veltassa will NOT be used concurrently with another potassium binder (e.g., Lokelma [sodium zirconium cyclosilicate], sodium polystyrene sulfonate)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Has the patient tried **ONE** of the following approaches to reduce the modifiable risks for hyperkalemia?
   - The patient is not taking both an angiotensin converting enzyme inhibitor (ACE-I; e.g., lisinopril, benazepril) and an angiotensin receptor blocker (ARB; e.g., valsartan, losartan) at the same time
   - The patient has reduced the dose of a renin-angiotensin-aldosterone system (RAAS) inhibitor (e.g., lisinopril, valsartan, spironolactone)

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient have an estimated glomerular filtration rate (eGFR) of less than 30mL/min/1.73m(2) **AND** meet the following criterion?
   - The patient has tried a loop diuretic (e.g., bumetanide, furosemide, torsemide)

   If yes, continue to #5.
   If no, continue to #4.

PATIROMER

GUIDELINES FOR USE (CONTINUED)

4. Does the patient have an estimated glomerular filtration rate (eGFR) of at least 30mL/min/1.73m(2) and meet **ONE** of the following criteria?
   - The patient has tried a loop diuretic (e.g., bumetanide, furosemide, torsemide)
   - The patient has tried a thiazide diuretic (e.g., chlorthalidone, hydrochlorothiazide, metolazone)

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

5. Does the patient meet **ONE** of the following criteria?
   - The patient is 12 to 17 years of age
   - The patient is 18 years of age or older AND had a trial of Lokelma (sodium zirconium cyclosilicate)

   If yes, **approve all strengths for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **1 gm: #12 per day.**
   - **8.4 gm: #1 per day.**
   - **16.8 gm: #1 per day.**
   - **25.2 gm: #1 per day.**

   If no, do not approve.
   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PATIROMER (Veltassa)** requires the following rule(s) be met for approval:
   A. You have hyperkalemia (high level of potassium in the blood)
   B. You are 12 years of age or older
   C. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor) or cardiologist (a type of heart doctor)
   D. Veltassa is NOT being used as an emergency treatment for life-threatening hyperkalemia (high level of potassium in the blood)
   E. You are NOT currently receiving dialysis (process of removing excess water, toxins from the blood)
   F. You will NOT use Veltassa concurrently (at the same time) with another potassium binder (such as Lokelma [sodium zirconium cyclosilicate], sodium polystyrene sulfonate)

   (Denial text continued on next page)

PATIROMER

GUIDELINES FOR USE (CONTINUED)

G. You have tried ONE of the following to lower the risks for hyperkalemia (high level of potassium in the blood):
   1. You are not taking both an angiotensin converting enzyme inhibitor (ACE-I, such as lisinopril, benazepril) and an angiotensin receptor blocker (ARB, such as valsartan, losartan) at the same time
   2. You have lowered the dose of a renin-angiotensin-aldosterone system (RAAS) inhibitor (such as lisinopril, valsartan, spironolactone)

H. You meet ONE of the following:
   1. Your estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) is less than 30mL/min/1.73m(2), AND you have tried a loop diuretic (such as bumetanide, furosemide, torsemide)
   2. Your estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) is at least 30 mL/min/1.73m(2), AND you have tried a loop diuretic (such as bumetanide, furosemide, torsemide) OR a thiazide diuretic (such as chlorthalidone, hydrochlorothiazide, metolazone)

I. If you are 18 years of age or older, you have tried Lokelma (sodium zirconium cyclosilicate)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PATISIRAN (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PATISIRAN SODIUM, LIPID COMPLEX	ONPATTRO	45155		GPI-10 (6270606010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN) (ICD-10 E85.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a neurologist, cardiologist, hATTR specialist, or medical geneticist
   - The patient is ambulatory (i.e., Familial Amyloid Polyneuropathy [FAP] stage 1 - 2 or Polyneuropathy Disability [PND] Stage I - IIIb polyneuropathy)
   - Onpattro will NOT be used concurrently with other hATTR-PN agents (e.g., Wainua [eplontersen], Tegsedi [inotersen], Amvuttra [vutrisiran])
   - The patient had a trial of or contraindication to the preferred agent: Amvuttra (vutrisiran)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the hATTR diagnosis confirmed by **ONE** of the following?
   - Biopsy of tissue/organ to confirm amyloid presence AND chemical typing to confirm the presence of TTR (transthyretin) protein
   - DNA genetic sequencing to confirm hATTR mutation

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #15mL per 21 days.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

PATISIRAN (NSA)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PATISIRAN (Onpattro)** requires the following rule(s) be met for approval:

A. You have hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN: a rare genetic disorder with widespread nerve pain/damage)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a neurologist (a type of brain and nerve doctor), cardiologist (a type of heart doctor), hATTR specialist, or medical geneticist (doctor who treats gene disorders)
D. You are ambulatory (able to walk) (you have Familial Amyloid Polyneuropathy [FAP: a tool used to evaluate disease severity] stage 1 to 2 or Polyneuropathy Disability [PND: a tool used to evaluate disease severity] Stage I to IIIb polyneuropathy)
E. You will NOT use Onpattro concurrently (at the same time) with other hATTR-PN medications (such as Wainua [eplontersen], Tegsedi [inotersen], Amvuttra [vutrisiran])
F. You have tried or have a contraindication to (harmful for you to use) the preferred medication: Amvuttra (vutrisiran)
G. Your diagnosis is confirmed by ONE of the following:
    1. Biopsy (removal of cells from the body for examination) of tissue/organ to confirm amyloid (a type of abnormal protein) presence AND chemical typing to confirm the presence of TTR (transthyretin) protein
    2. DNA genetic sequencing (a type of lab test) to confirm hATTR mutation (a type of abnormal gene)

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PATISIRAN (NSA)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN) (ICD-10 E85.1) and meet **ALL** of the following criteria?
   - The patient has NOT progressed to Familial Amyloid Polyneuropathy (FAP) stage 3 or Polyneuropathy Disability (PND) Stage IV polyneuropathy as evidenced by functional decline (e.g., wheelchair-bound, bedridden)
   - Onpattro will NOT be used concurrently with other hATTR-PN agents (e.g., Wainua [eplontersen], Tegsedi [inotersen], Amvuttra [vutrisiran])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 21 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PATISIRAN (Onpattro)** requires the following rule(s) be met for renewal:
   A. You have hereditary transthyretin-mediated amyloidosis with polyneuropathy (hATTR-PN: a rare genetic disorder with widespread nerve pain/damage)
   B. You have NOT progressed to Familial Amyloid Polyneuropathy (FAP: a tool used to evaluate disease severity) stage 3 OR Polyneuropathy Disability (PND: a tool used to evaluate disease severity) stage IV polyneuropathy as shown by functional decline (such as being wheelchair-bound or bedridden)
   C. You will NOT use Onpattro concurrently (at the same time) with other hATTR-PN medications (such as Wainua [eplontersen], Tegsedi [inotersen], Amvuttra [vutrisiran])

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PAZOPANIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PAZOPANIB HCL	VOTRIENT, PAZOPANIB HCL	36709		GPI-10 (2153304210)	

GUIDELINES FOR USE

1. Does the patient have **ONE** of the following diagnoses?
   - Adipocytic soft tissue sarcoma (STS)
   - Gastrointestinal stromal tumors (GIST) (ICD-10 Group C49.A)

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, continue to #2.

2. Does the patient have a diagnosis of advanced soft tissue sarcoma (STS) (ICD-10 Group C49, except Group C49.A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has received prior chemotherapy (e.g., doxorubicin, epirubicin)

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **200mg: #4 per day.**
   - **400mg: #2 per day.**

   If no, continue to #3.

3. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   - **200mg: #4 per day.**
   - **400mg: #2 per day.**

   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PAZOPANIB

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PAZOPANIB (Votrient)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Advanced soft tissue sarcoma (STS: a type of cancer that starts in soft tissues [muscle, tendons, fat, lymph vessels, blood vessels, nerves])
   2. Advanced renal cell carcinoma (RCC: a type of kidney cancer)

B. If you have advanced soft tissue sarcoma, approval also requires:
   1. You are 18 years of age or older
   2. You have received prior chemotherapy (a type of cancer therapy such as doxorubicin, epirubicin)
   3. You do NOT have adipocytic soft tissue sarcoma (STS: a type of fat cell cancer) or gastrointestinal stromal tumors (GIST: a type of digestive tumor)

C. If you have advanced renal cell carcinoma, approval also requires:
   1. You are 18 years of age or older

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PEANUT ALLERGEN POWDER-DNFP

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEANUT ALLERGEN POWDER-DNFP	PALFORZIA	46332		GPI-10 (2010004020)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of a peanut allergy (ICD-10 Z91.010) and meet **ALL** of the following criteria?
   - The patient is 1 to 17 years of age
   - Therapy is prescribed by or in consultation with an allergist or immunologist
   - The patient has a clinical history of an allergic reaction to peanuts
   - Palforzia will be used in conjunction with a peanut-avoidance diet
   - Palforzia will NOT be used concurrently with a peanut-specific immunotherapy (e.g., Viaskin Peanut)

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Has the patient completed a purposeful food challenge?

   If yes, continue to #3.
   If no, continue to #4.

3. Is the patient's diagnosis confirmed by **ONE** of the following criteria?
   - The patient tested positive on a skin prick test with a wheal diameter of at least 3 mm within the past 24 months
   - The patient has had a peanut-specific immunoglobulin E (IgE) level of at least 0.35 kUA/L within the past 24 months

   If yes, **approve all of the following for 12 months by GPID or GPI-14 as follows:**
   - **300 mg powder packet/sachet: #1 per day.**
   - **All other strengths: No quantity limit.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

PEANUT ALLERGEN POWDER-DNFP

INITIAL CRITERIA (CONTINUED)

4. Is the patient's diagnosis confirmed by **ONE** of the following criteria?
   - The patient tested positive on a skin prick test with a wheal diameter of at least 8 mm within the past 24 months
   - The patient has had a peanut-specific immunoglobulin E (IgE) level of at least 14 kUA/L within the past 24 months

   If yes, **approve all of the following for 12 months by GPID or GPI-14 as follows:**
   - **300 mg powder packet/sachet: #1 per day.**
   - **All other strengths: No quantity limit.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEANUT ALLERGEN POWDER-DNFP (Palforzia)** requires the following rule(s) be met for approval:
   A. You have an allergy to peanuts
   B. You are 1 to 17 years of age
   C. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor) or immunologist (a type of immune system doctor)
   D. You have a clinical history of an allergic reaction to peanuts
   E. Palforzia will be used together with a peanut-avoidance diet
   F. Palforzia will NOT be used concurrently (at the same time) with peanut-specific immunotherapy (such as Viaskin Peanut)
   G. Your diagnosis is confirmed by ONE of the following:
      1. If you have completed a purposeful food challenge (a type of test): you had a positive skin prick test (a skin test to check for peanut allergy) with a wheal diameter of at least 3 mm within the past 24 months, OR you have had a peanut-specific immunoglobulin E (IgE) (a blood test that indicates an allergy to peanuts) level of at least 0.35 kUA/L within the past 24 months
      2. If you have NOT completed a purposeful food challenge (a type of test): you had a positive skin prick test (a skin test to check for peanut allergy) with a wheal diameter of at least 8 mm within the past 24 months, OR you have had a peanut-specific immunoglobulin E (IgE) (a blood test that indicates an allergy to peanuts) level of at least 14 kUA/L within the past 24 months

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PEANUT ALLERGEN POWDER-DNFP

RENEWAL CRITERIA (CONTINUED)

RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PEANUT ALLERGEN POWDER-DNFP (Palforzia)** requires the following rule(s) be met for renewal:

A. You have an allergy to peanuts
B. Therapy is prescribed by or in consultation with an allergist (a type of allergy doctor) or immunologist (a type of immune system doctor)
C. Palforzia will be used together with a peanut-avoidance diet
D. Palforzia will NOT be used concurrently (at the same time) with peanut-specific immunotherapy (such as Viaskin Peanut)
E. You meet ONE of the following:
    1. If you have completed a purposeful food challenge (a type of test): you have a persistent peanut allergy based on a positive skin prick test (a skin test to check for peanut allergy) with a wheal diameter of at least 3 mm within the past 24 months, OR based on a peanut-specific immunoglobulin E (IgE) (a blood test that indicates an allergy to peanuts) level of at least 0.35 kUA/L within the past 24 months
    2. If you have NOT completed a purposeful food challenge (a type of test): you have a persistent peanut allergy based on a positive skin prick test (a skin test to check for peanut allergy) with a wheal diameter of at least 8 mm within the past 24 months, OR based on a peanut-specific immunoglobulin E (IgE) (a blood test that indicates an allergy to peanuts) level of at least 14 kUA/L within the past 24 months

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

PEGASPARGASE (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEGASPARGASE	ONCASPAR	08904		GPI-10 (2125006000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of acute lymphoblastic leukemia (ALL) **AND** meet the following criterion?
   - Oncaspar will be used as a component of a multi-agent chemotherapeutic regimen

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - Oncaspar will be used as a first-line therapy
   - The patient has a hypersensitivity to native forms of L-asparaginase

   If yes, **approve for 12 months by HICL or GPI-10 for #1 fill per 14 days.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGASPARGASE (Oncaspar)** requires the following rule(s) be met for approval:
   A. You have acute lymphoblastic leukemia (ALL: a type of blood cancer)
   B. Oncaspar will be used as a part of a chemotherapeutic treatment plan with multiple drugs
   C. You meet ONE of the following:
      1. Oncaspar will be used as a first-line therapy (drug used for initial treatment)
      2. You have a hypersensitivity to native forms of L-asparaginase (you are allergic to natural forms of a type of enzyme/protein)

   Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PEGCETACOPLAN - SQ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEGCETACOPLAN	EMPAVELI	47380		GPI-10 (8580406500)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a hematologist
   - The patient has flow cytometry demonstrating at least 2 different GPI-protein deficiencies (e.g., CD55, CD59) on at least 2 cell lineages (e.g., erythrocytes, granulocytes) AND a PNH granulocyte clone size of at least 10 percent
   - Empaveli will NOT be used concurrently with C5 complement inhibitor therapy (e.g., Ultomiris [ravulizumab-cwvz], Soliris [eculizumab], Piasky [crovalimab-akkz]), Factor B inhibitor therapy (e.g., Fabhalta [iptacopan]) or Factor D inhibitor therapy (e.g., Voydeya [danicopan])

   If yes, **approve for 4 months by HICL or GPI-10 with a quantity limit of #200mL per 30 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of complement 3 glomerulopathy (C3G) (ICD-10 N00.A, N01.A, N02.A, N03.A, N04.A, N05.A, N06.A, N07.A, N00.6, N01.6, N02.6, N03.6, N04.6, N05.6, N06.6, N07.6) or primary immune-complex membranoproliferative glomerulonephritis (IC-MPGN) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a nephrologist
   - The patient's diagnosis is confirmed by a renal biopsy
   - The patient has a urine-protein creatine ratio (UPCR) of at least 1 g/g
   - The patient has an eGFR of at least 30mL/min/1.73m(2)
   - The patient has tried an ACE inhibitor (e.g., benazepril, lisinopril) or an ARB (e.g., losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use, OR has a contraindication to both drug classes
   - Empaveli will NOT be used concurrently with another complement inhibitor (e.g., Fabhalta [iptacopan]) for the same indication

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #160mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

PEGCETACOPLAN - SQ

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PEGCETACOPLAN - SQ (Empaveli)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
   2. Complement 3 glomerulopathy (C3G: a type of kidney disease) or primary immune-complex membranoproliferative glomerulonephritis (IC-MPGN: a type of kidney disease)

B. If you have paroxysmal nocturnal hemoglobinuria, approval also requires:
   1. You are 18 years of age or older
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor)
   3. You have flow cytometry (a type of lab test) demonstrating at least 2 different GPI-protein deficiencies (you are missing a certain type of protein, such as CD55, CD59) on at least 2 cell lineages (types of cells, such as erythrocytes [red blood cells], granulocytes [a type of white blood cell]) AND a PNH granulocyte clone size of at least 10 percent
   4. You will NOT use Empaveli concurrently (at the same time) with C5 complement inhibitor therapy (such as Ultomiris [ravulizumab-cwvz], Soliris [eculizumab], Piasky [crovalimab-akkz]), Factor B inhibitor therapy (such as Fabhalta [iptacopan]) or Factor D inhibitor therapy (such as Voydeya [danicopan])

C. If you have complement 3 glomerulopathy or primary immune-complex membranoproliferative glomerulonephritis, approval also requires:
   1. You are 12 years of age or older
   2. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor)
   3. Your diagnosis is confirmed by a renal biopsy (removal of cells or tissue from the kidney for examination)
   4. You have a urine-protein creatine ratio (UPCR: a test that measures the amount of protein in urine) of at least 1g/g
   5. You have an estimated glomerular filtration rate (eGFR: a tool for evaluating kidney function) of at least 30mL/min/1.73m(2)
   6. You have tried an angiotensin converting enzyme inhibitor (ACE-I: a type of medication used to protect kidneys, such as benazepril, lisinopril) or an angiotensin receptor blocker (ARB: a type of medication used to protect kidneys, such as losartan, valsartan) for at least 3 months at a maximum tolerated dose and will continue use, OR you have a contraindication to (harmful for you to use) both of these medication classes
   7. You will NOT use Empaveli concurrently (at the same time) with another complement inhibitor (such as Fabhalta [iptacopan]) for the same indication

This is why your request is denied. Please work with your doctor to use a different medication or

PEGCETACOPLAN - SQ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of paroxysmal nocturnal hemoglobinuria (PNH) (ICD-10 D59.5) and meet **ALL** of the following criteria?
   - The patient has experienced a clinical benefit (e.g., reduction in number of blood transfusions, improvement/stabilization of lactate dehydrogenase [LDH] and hemoglobin levels) compared to baseline (baseline defined as patient condition post treatment with Soliris [eculizumab] or Ultomiris [ravulizumab-cwvz])
   - Empaveli will NOT be used concurrently with C5 complement inhibitor therapy (e.g., Ultomiris [ravulizumab-cwvz], Soliris [eculizumab], Piasky [crovalimab-akkz]), Factor B inhibitor therapy (e.g., Fabhalta [iptacopan]) or Factor D inhibitor therapy (e.g., Voydeya [danicopan])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #200mL per 30 days.**

   If no, continue to #2.

2. Does the patient have a diagnosis of complement 3 glomerulopathy (C3G) (ICD-10 N00.A, N01.A, N02.A, N03.A, N04.A, N05.A, N06.A, N07.A, N00.6, N01.6, N02.6, N03.6, N04.6, N05.6, N06.6, N07.6) or primary immune-complex membranoproliferative glomerulonephritis (IC-MPGN) and meet **ALL** of the following criteria?
   - The patient has had a reduction in proteinuria OR has improved or stable kidney function compared to baseline
   - Empaveli will NOT be used concurrently with another complement inhibitor (e.g., Fabhalta [iptacopan]) for the same indication

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #160mL per 28 days.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGCETACOPLAN - SQ (Empaveli)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Paroxysmal nocturnal hemoglobinuria (PNH: a rare blood disorder)
      2. Complement 3 glomerulopathy (C3G: a type of kidney disease) or primary immune-complex membranoproliferative glomerulonephritis (IC-MPGN: a type of kidney disease)

   (Renewal denial text continued on next page)

CONTINUED ON NEXT PAGE

Copyright © 2026 MedImpact Healthcare Systems, Inc. All rights reserved. This document is proprietary to MedImpact. MedImpact maintains the sole and exclusive ownership, right, title, and interest in and to this document.

RENEWAL CRITERIA (CONTINUED)

B. If you have paroxysmal nocturnal hemoglobinuria, renewal also requires:
1. You have experienced a clinical benefit (such as a reduction in the number of blood transfusions [adding blood to your body], improvement/stabilization of lactate dehydrogenase [LDH: a type of enzyme] levels and hemoglobin [Hgb: a type of protein in red blood cells] levels) compared to baseline (baseline is defined as your condition after treatment with Soliris [eculizumab] or Ultomiris [ravulizumab-cwvz])
2. You will NOT use Empaveli concurrently (at the same time) with C5 complement inhibitor therapy (such as Ultomiris [ravulizumab-cwvz], Soliris [eculizumab], Piasky [crovalimab-akkz]), Factor B inhibitor therapy (such as Fabhalta [iptacopan]) or Factor D inhibitor therapy (such as Voydeya [danicopan])

C. If you have complement 3 glomerulopathy or primary immune-complex membranoproliferative glomerulonephritis, renewal also requires:
1. You have had a reduction (decrease) in proteinuria (high levels of protein in the urine) OR you have improved or stable kidney function compared to baseline (before treatment)
2. You will NOT use Empaveli concurrently (at the same time) with another complement inhibitor (such as Fabhalta [iptacopan]) for the same indication

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

PEGFILGRASTIM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEGFILGRASTIM	NEULASTA, NEULASTA ONPRO	23255		GPI-10 (8240157000)	

GUIDELINES FOR USE

1. Is the patient receiving myelosuppressive anti-cancer drugs associated with a clinically significant incidence of febrile neutropenia and meets **ALL** of the following criteria?
   - The patient has a non-myeloid malignancy
   - Therapy is prescribed by or in consultation with a hematologist or oncologist

   If yes, continue to #3.
   If no, continue to #2.

2. Has the patient been acutely exposed to myelosuppressive doses of radiation (hematopoietic subsyndrome of acute radiation syndrome [H-ARS]) **AND** meets the following criterion?
   - Therapy is prescribed by or in consultation with a hematologist or oncologist

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Is the request for Neulasta **AND** the patient meets the following criterion?
   - The patient had a trial of or contraindication to ONE of the following the preferred agents: Ziextenzo (pegfilgrastim-bmez), Fulphila (pegfilgrastim-jmdb)

   If yes, **approve all strengths of Neulasta for 12 months by GPID or GPI-14.**
   If no, continue to #4.

4. Is the request for Neulasta Onpro **AND** the patient meets the following criterion?
   - The patient had a trial of or contraindication to the preferred agent: Udenyca Onbody (pegfilgrastim-cbqv)

   If yes, **approve Neulasta Onpro for 12 months by GPID or GPI-14.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PEGFILGRASTIM

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PEGFILGRASTIM (Neulasta, Neulasta Onpro)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. You are receiving myelosuppressive anti-cancer medications (medications that decrease bone marrow activity) associated with a clinically significant incidence of febrile neutropenia (a type of blood condition with fever)
   2. You have been acutely exposed to myelosuppressive doses (doses that decrease bone marrow activity) of radiation (hematopoietic subsyndrome of acute radiation syndrome [H-ARS]: an illness that happens after whole body radiation)

B. If you are receiving myelosuppressive anti-cancer medications associated with a clinically significant incidence of febrile neutropenia, approval also requires:
   1. You have a non-myeloid malignancy (cancer not affecting bone marrow)
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
   3. You meet ONE of the following:
      a. You are requesting Neulasta AND you have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Ziextenzo (pegfilgrastim-bmez), Fulphila (pegfilgrastim-jmdb)
      b. You are requesting Neulasta Onpro AND you have tried or have a contraindication to (harmful for you to use) the preferred medication: Udenyca Onbody (pegfilgrastim-cbqv)

C. If you have been acutely exposed to myelosuppressive doses of radiation, approval also requires:
   1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
   2. You meet ONE of the following:
      a. You are requesting Neulasta AND you have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Ziextenzo (pegfilgrastim-bmez), Fulphila (pegfilgrastim-jmdb)
      b. You are requesting Neulasta Onpro AND you have tried or have a contraindication to (harmful for you to use) the preferred medication: Udenyca Onbody (pegfilgrastim-cbqv)

PEGFILGRASTIM-CBQV

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PEGFILGRASTIM - CBQV (Udenyca, Udenyca Onbody)** requires the following rule(s) be met for approval:

A. You meet ONE of the following:
   1. You are receiving myelosuppressive anti-cancer medications (medications that decrease bone marrow activity) associated with a clinically significant incidence of febrile neutropenia (a type of blood condition with fever)
   2. You have been acutely exposed to myelosuppressive doses (doses that decrease bone marrow activity) of radiation (hematopoietic subsyndrome of acute radiation syndrome [H-ARS]: an illness that happens after whole body radiation)

B. If you are receiving myelosuppressive anti-cancer medications associated with a clinically significant incidence of febrile neutropenia, approval also requires:
   1. You have a non-myeloid malignancy (cancer not affecting bone marrow)
   2. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
   3. If you are requesting Udenyca, approval also requires you have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Ziextenzo (pegfilgrastim-bmez), Fulphila (pegfilgrastim-jmdb)

C. If you have been acutely exposed to myelosuppressive doses of radiation, approval also requires:
   1. Therapy is prescribed by or in consultation with a hematologist (a type of blood doctor) or oncologist (a type of cancer doctor)
   2. If you are requesting Udenyca, approval also requires you have tried or have a contraindication to (harmful for you to use) ONE of the following preferred medications: Ziextenzo (pegfilgrastim-bmez), Fulphila (pegfilgrastim-jmdb)

RATIONALE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEGFILGRASTIM-FPGK	STIMUFEND	48269		GPI-10 (8240157015)	

GUIDELINES FOR USE

1. Is the patient receiving myelosuppressive anti-cancer drugs associated with a clinically significant incidence of febrile neutropenia and meets **ALL** of the following criteria?
   - The patient has a non-myeloid malignancy
   - Therapy is prescribed by or in consultation with a hematologist or oncologist
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Ziextenzo (pegfilgrastim-bmez), Fulphila (pegfilgrastim-jmdb)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Has the patient been acutely exposed to myelosuppressive doses of radiation (hematopoietic subsyndrome of acute radiation syndrome [H-ARS]) and meets **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a hematologist or oncologist
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Ziextenzo (pegfilgrastim-bmez), Fulphila (pegfilgrastim-jmdb)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGFILGRASTIM-FPGK (Stimufend)** requires the following rule(s) be met for approval:
   A. You meet ONE of the following:
      1. You are receiving myelosuppressive anti-cancer medications (medications that decrease bone marrow activity) associated with a clinically significant incidence of febrile neutropenia (a type of blood condition with fever)
      2. You have been acutely exposed to myelosuppressive doses (doses that decrease bone marrow activity) of radiation (hematopoietic subsyndrome of acute radiation syndrome [H-ARS]: an illness that happens after whole body radiation)

PEGINTERFERON ALFA-2B	PEGINTRON		89387	GPI-10 (1235306010)	

GUIDELINES FOR USE

1. Is the request for the treatment of chronic hepatitis C virus infection (HCV) (ICD-10 B18.2)?

   If yes, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

   If no, continue to #2.

2. Is the request for Pegasys?

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

3. Does the patient have chronic hepatitis B (ICD-10 B18.0, B18.1) **AND** meet the following criterion?
   - Therapy is prescribed by or in consultation with a gastroenterologist, infectious disease specialist, a physician specializing in the treatment of hepatitis (e.g., a hepatologist), or a specially trained group such as ECHO (Extension for Community Healthcare Outcomes) model

   If yes, continue to #4.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

4. Is the patient 3 to 17 years of age and meet **ALL** of the following criteria?
   - The patient does NOT have cirrhosis
   - The patient has serum HBeAg-positive chronic hepatitis B
   - The patient has evidence of viral replication with elevated serum alanine aminotransferase (ALT)

   If yes, **approve for 48 weeks by HICL or GPI-10 with a quantity limit of #4 per 28 days.**
   If no, continue to #5.

PEGINTERFERON ALFA 2A OR 2B

GUIDELINES FOR USE (CONTINUED)

5. Is the patient 18 years of age or older and meet **ALL** of the following criteria?
   - The patient has serum HBeAg-positive or HBeAg-negative chronic hepatitis B
   - The patient has compensated liver disease with evidence of viral replication and liver inflammation

   If yes, **approve for 48 weeks by HICL or GPI-10 with a quantity limit of #4 per 28 days.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGINTERFERON ALFA-2A or 2B (Pegasys, PegIntron)** requires the following rule(s) be met for approval:
   A. You have chronic hepatitis B (a type of liver infection)
   B. Therapy is prescribed by or in consultation with a gastroenterologist (doctor who treats digestive condition), infectious disease specialist (a doctor who specializes in the treatment of infections), a doctor specializing in the treatment of hepatitis such as a hepatologist (liver doctor), or a specially trained group such as ECHO (Extension for Community Healthcare Outcomes) model
   C. If you are 3 to 17 years of age, approval also requires:
      1. You do NOT have cirrhosis (liver damage)
      2. Your blood test shows you have HBeAg (marker of active virus multiplying in the body)- positive chronic hepatitis B
      3. You have evidence of viral replication (virus is multiplying in the body) with elevated serum alanine aminotransferase (ALT: a type of liver enzyme test)
   D. If you are 18 years of age or older, approval also requires:
      1. Your blood test shows you have HBeAg (marker of active virus multiplying in the body)- positive or HBeAg-negative chronic hepatitis B
      2. You have compensated liver disease (a type of liver condition) with evidence of viral replication and liver inflammation

   Note: Pegasys and PegIntron will not be approved for the treatment of hepatitis C.

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PEGLOTICASE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEGLOTICASE	KRYSTEXXA	37154		GPI-10 (6800005000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of chronic gout (ICD-10 Group M1A) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's disease is refractory to conventional therapy
   - The patient has a baseline serum uric acid levels of at least 8 mg/dL while on conventional gout medications (e.g., allopurinol)
   - The patient does not have glucose-6-phosphate dehydrogenase (G6PD) deficiency
   - Krystexxa will NOT be used concurrently with other urate-lowering therapy (e.g., xanthine oxidase inhibitors, febuxostat, probenecid)
   - The patient had a trial of or contraindication to TWO conventional gout medications (e.g., allopurinol, probenecid) at a maximum tolerated dose for at least 3 months
   - Krystexxa will be co-administered with weekly oral methotrexate 15mg and folic acid, unless contraindicated

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient have symptomatic gout as evidenced by **ONE** of the following criteria?
   - At least 3 or more gout flares in the previous 18 months
   - History of at least 1 gout tophus
   - Gouty arthritis

   If yes, **approve the requested strength for 6 months by GPID or GPI-14 with the following quantity limits:**
   - **8mg/mL: #2mL per 28 days.**
   - **8mg/50mL: #100mL per 28 days.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

PEGLOTICASE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PEGLOTICASE (Krystexxa)** requires the following rules be met for approval:

A. You have chronic gout (a type of long-term joint condition)
B. You are 18 years of age or older
C. Your disease is refractory (did not respond) to conventional (standard) therapy
D. You had a baseline serum uric acid level (a type of lab test) of at least 8 mg/dL while on conventional (standard) gout medications (such as allopurinol)
E. You do not have glucose-6-phosphate dehydrogenase (G6PD) deficiency (a genetic disorder that affects red blood cells)
F. You will NOT use Krystexxa concurrently (at the same time) with other urate-lowering therapy (such as xanthine oxidase inhibitors, febuxostat, probenecid)
G. You have tried or have a contraindication to (harmful for you to use) TWO conventional (standard) gout medications (such as allopurinol, probenecid) at a maximum tolerated dose for at least 3 months
H. Krystexxa will be given with weekly oral methotrexate 15mg and folic acid, unless contraindicated (harmful for you to use)
I. You have symptomatic gout as shown by ONE of the following:
    1. At least 3 or more gout flares (episodes of pain or swelling associated with a type of joint condition) in the previous 18 months
    2. History of at least 1 gout tophus (uric acid crystallizes in joints like hands/feet)
    3. Gouty arthritis (severe pain and inflammation in joints due to gout)

This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PEGLOTICASE

RENEWAL CRITERIA

1. Does the patient have sustained serum uric acid levels below 6 mg/dL?

   If yes, **approve the requested strength for 12 months by GPID or GPI-14 with the following quantity limits:**
   8mg/mL: #2mL per 28 days.
   8mg/50mL: #100mL per 28 days.

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGLOTICASE (Krystexxa)** requires a sustained serum uric level (a type of lab test) below 6 mg/dL for renewal.

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Krystexxa.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PEGUNIGALSIDASE ALFA-IWXJ (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEGUNIGALSIDASE ALFA-IWXJ	ELFABRIO	48913		GPI-10 (3090366010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of Fabry disease (ICD-10 E75.21) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Therapy is prescribed by or in consultation with a nephrologist, cardiologist, or specialist physician in genetics or inherited metabolic disorders
   - The patient is symptomatic OR has evidence of injury to the kidney, heart, or central nervous system recognized by laboratory, histological, or imaging findings (e.g., decreased GFR for age, persistent albuminuria, cerebral white matter lesions on brain MRI, cardiac fibrosis on contrast cardiac MRI)
   - Elfabrio will NOT be used concurrently with another Fabry disease therapy (e.g., Fabrazyme [agalsidase beta], Galafold [migalastat])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Is the request for a female **AND** the patient meets the following criterion?
   - The patient has a galactosidase alpha (GLA) gene mutation via genetic testing

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, continue to #3.

3. Is the request for a male and the patient meets **ONE** of the following criteria?
   - The patient has an alpha galactosidase A (a-Gal-A) deficiency as indicated by an enzyme assay
   - The patient has a galactosidase alpha (GLA) gene mutation via genetic testing

   If yes, **approve for 6 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

PEGUNIGALSIDASE ALFA-IWXJ (NSA)

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PEGUNIGALSIDASE ALFA-IWXJ (Elfabrio)** requires the following rule(s) be met for approval:

A. You have Fabry disease (a rare genetic disease)
B. You are 18 years of age or older
C. Therapy is prescribed by or in consultation with a nephrologist (a type of kidney doctor), cardiologist (a type of heart doctor), or a doctor specializing in genetics or inherited metabolic disorders
D. You are symptomatic OR have evidence of injury to the kidney, heart, or central nervous system recognized by laboratory, histological (viewed by microscope), or imaging findings. Evidence of injury may include decreased glomerular filtration rate (GFR: a tool for evaluating kidney function) for age, persistent albuminuria (protein in urine), cerebral white matter lesions on brain MRI (magnetic resonance imaging: type of imaging lab), cardiac fibrosis (abnormal thickening of heart valves) on contrast cardiac MRI
E. You will NOT use Elfabrio concurrently (at the same time) with another Fabry disease medication (such as Fabrazyme [agalsidase beta], Galafold [migalastat])
F. If you are a female, approval also requires:
    1. You have a galactosidase alpha (GLA) gene mutation (abnormal change in a type of gene) as shown by genetic testing
G. If you are a male, approval also requires ONE of the following:
    1. You do NOT have enough alpha galactosidase A (a-Gal-A: a type of protein) as indicated by an enzyme assay (a type of lab test)
    2. You have a galactosidase alpha (GLA) gene mutation (abnormal change in a type of gene) as shown by genetic testing

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PEGUNIGALSIDASE ALFA-IWXJ (NSA)

RENEWAL CRITERIA

1. Does the patient have a diagnosis of Fabry disease (ICD-10 E75.21) **AND** meet the following criterion?
   - Elfabrio will NOT be used concurrently with another Fabry disease therapy (e.g., Fabrazyme [agalsidase beta], Galafold [migalastat])

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Has the patient demonstrated improvement, maintenance, or stabilization in **ONE** of the following while on therapy?
   - Symptoms (e.g., pain, hypohidrosis/anhidrosis, exercise intolerance, GI symptoms, angiokeratomas, abnormal cornea, tinnitus/hearing loss)
   - Imaging (e.g., brain/cardiac MRI, DEXA, renal ultrasound)
   - Laboratory or histological testing (e.g., GL-3 in plasma/urine, renal biopsy)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGUNIGALSIDASE ALFA-IWXJ (Elfabrio)** requires the following rule(s) be met for renewal:
   A. You have Fabry disease (a rare genetic disease)
   B. You will NOT use Elfabrio concurrently (at the same time) with another Fabry disease medication (such as Fabrazyme [agalsidase beta], Galafold [migalastat])
   C. You have demonstrated improvement, maintenance, or stabilization in ONE of the following while on therapy:
      1. Symptoms (such as pain, hypohidrosis [less sweating]/anhidrosis [no sweating], exercise intolerance, GI [gastrointestinal] symptoms, angiokeratomas [dark red-blue raised spots on the skin], abnormal cornea [a part of the eye], tinnitus [ringing in the ears]/hearing loss)
      2. Imaging such as brain/cardiac MRI [magnetic resonance imaging: type of imaging lab], DEXA [a type of bone scan], renal [kidney] ultrasound)
      3. Laboratory or histological (viewed by microscope) testing (such as GL-3 [globotriaosylceramide: a type of fat] in plasma/urine, renal biopsy [removal of cells or tissue from the body for examination])

PEGVALIASE-PQPZ

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEGVALIASE-PQPZ	PALYNZIQ	44944		GPI-10 (3090855040)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of phenylketonuria (PKU) (ICD-10 E70.0) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - Therapy is prescribed by or in consultation with a metabolic or genetic disease specialist
   - The patient follows a phenylalanine-restricted diet
   - The patient has uncontrolled blood phenylalanine (Phe) levels greater than 600 micromoles/L on existing management, as confirmed by a measurement in the last 30 days
   - Palynziq will NOT be used concurrently with another agent indicated for the treatment of phenylketonuria (PKU) (e.g., Kuvan [sapropterin], Sephience [sepiapterin])

   If yes, **approve for 6 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **2.5mg/0.5mL: #1mL per 7 days.**
   - **10mg/0.5mL: #0.5mL per day.**
   - **20mg/mL: #3mL per day.**

   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGVALIASE-PQPZ (Palynziq)** requires the following rule(s) be met for approval:
   A. You have phenylketonuria (PKU: a type of genetic metabolic disorder)
   B. You are 12 years of age or older
   C. Therapy is prescribed by or in consultation with a metabolic or genetic disease specialist (a doctor that treats metabolic or gene disorders)
   D. You follow a phenylalanine-restricted diet (a type of diet)
   E. You have uncontrolled blood phenylalanine (Phe) levels greater than 600 micromoles/L on your existing management, as confirmed by a measurement in the last 30 days
   F. You will NOT use Palynziq concurrently (at the same time) with another medication indicated for the treatment of phenylketonuria (PKU) (such as Kuvan [sapropterin], Sephience [sepiapterin])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PRIOR AUTHORIZATION GUIDELINES

PEGVALIASE-PQPZ

RENEWAL CRITERIA

1. Does the patient have a diagnosis of phenylketonuria (PKU) (ICD-10 E70.0) and meet **ALL** of the following criteria?
   - The patient has experienced a reduction in phenylalanine (Phe) levels by at least 20% compared to baseline or to a level below 600 micromoles/L
   - Palynziq will NOT be used concurrently with another agent indicated for the treatment of phenylketonuria (PKU) (e.g., Kuvan [sapropterin], Sephience [sepiapterin])

   If yes, **approve for 12 months by GPID or GPI-14 for all strengths with the following quantity limits:**
   - **2.5mg/0.5mL: #1mL per 7 days.**
   - **10mg/0.5mL: #0.5mL per day.**
   - **20mg/mL: #3mL per day.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGVALIASE-PQPZ (Palynziq)** requires the following rule(s) be met for renewal:
   A. You have phenylketonuria (PKU: a type of genetic metabolic disorder)
   B. Your phenylalanine (Phe) levels have decreased by at least 20% compared to baseline (before treatment) or to a level below 600 micromoles/L
   C. You will NOT use Palynziq concurrently (at the same time) with another medication indicated for the treatment of phenylketonuria (PKU) (such as Kuvan [sapropterin], Sephience [sepiapterin])

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PEGVISOMANT

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEGVISOMANT	SOMAVERT	25062		GPI-10 (3018006000)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of acromegaly (ICD-10 E22.0) and meet **ALL** of the following criteria?
   - The patient had an inadequate response to surgery or radiation OR surgery or radiation is not an option for this patient
   - Therapy is prescribed by or in consultation with an endocrinologist
   - The patient's serum insulin-like growth factor 1 (IGF-1) level (adjusted for the patient's age) is elevated or unequivocal with inadequate suppression of growth hormone after a glucose load

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

2. Does the patient meet **ONE** of the following criteria?
   - The patient had a trial of or contraindication to ONE of the following preferred agents: Mycapssa, Sandostatin LAR Depot (octreotide acetate ER)
   - Somavert will be used concurrently with a somatostatin analog (e.g., Mycapssa, Sandostatin LAR Depot [octreotide acetate ER])

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity of #1 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEGVISOMANT (Somavert)** requires the following rule(s) be met for approval:
   A. You have acromegaly (a type of hormone disorder)
   B. You had an inadequate response (did not work) to surgery or radiation, OR surgery or radiation is not an option for you
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor)

PEMBROLIZUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEMBROLIZUMAB	KEYTRUDA	41369		GPI-10 (2135795300)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) **AND** meet the following criterion?
   - Keytruda will NOT be used concurrently with a targeted therapy (i.e., BRAF inhibitors [e.g., Braftovi (encorafenib), Tafinlar (dabrafenib)], MEK inhibitors [e.g., Mekinist (trametinib)], and NTRK inhibitors [e.g., Vitrakvi (larotrectinib), Rozlytrek (entrectinib)])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of Stage IIB, IIC, or III melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient has undergone complete resection
   - Keytruda will be used as adjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of metastatic nonsquamous (e.g., adenocarcinoma, large cell carcinoma) non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - Keytruda will be used in combination with pemetrexed and platinum chemotherapy (e.g., cisplatin, carboplatin)
   - The patient does NOT have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

4. Does the patient have a diagnosis of metastatic squamous non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - Keytruda will be used in combination with carboplatin and either paclitaxel or paclitaxel protein-bound

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

5. Does the patient have a diagnosis of non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Tumor Proportion Score (TPS) of at least 1%] as determined by an FDA-approved test
   - The patient does NOT have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations

   If yes, continue to #6.
   If no, continue to #7.

6. Does the patient meet **ONE** of the following criteria?
   - The patient has stage III NSCLC AND is not a candidate for surgical resection or definitive chemoradiation
   - The patient has metastatic NSCLC

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

7. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Tumor Proportion Score (TPS) of at least 1%] as determined by an FDA-approved test
   - The patient has disease progression on or after treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

   If yes, continue to #8.
   If no, continue to #9.

8. Does the patient meet **ONE** of the following criteria?
   - The patient does NOT have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations
   - The patient has an anaplastic lymphoma kinase (ALK) genomic tumor aberration AND disease progression on or after ALK-directed therapy (e.g., Xalkori [crizotinib], Zykadia [ceritinib])
   - The patient has an epidermal growth factor receptor (EGFR) genomic tumor aberration AND disease progression on or after EGFR-directed therapy (e.g., Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

9. Does the patient have resectable (node positive or tumor is at least 4 cm) non-small cell lung cancer (NSCLC) (ICD-10 Group C34) **AND** meet the following criterion?
   - Keytruda will be used in combination with platinum-containing chemotherapy (e.g., cisplatin) as neoadjuvant treatment, OR as a single agent as adjuvant treatment after surgery following prior use in combination with platinum-containing chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #10.

10. Does the patient have a diagnosis of Stage IB (T2a is at least 4 cm), II, or IIIA non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be used as adjuvant treatment following resection and platinum-based chemotherapy (e.g., cisplatin, carboplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #11.

11. Does the patient have a diagnosis of unresectable advanced or metastatic malignant pleural mesothelioma (MPM) (ICD-10 C45.0) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be given in combination with pemetrexed and platinum chemotherapy (e.g., cisplatin, carboplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #12.

12. Does the patient have a diagnosis of head and neck squamous cell carcinoma (HNSCC) (ICD-10 Groups C44.42, C76.0, C00, C06, C09, C10, C32)?

    If yes, continue to #13.
    If no, continue to #17.

13. Is the cancer resectable and locally advanced, and the patient meets **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, continue to #14.
    If no, continue to #15.

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

14. Does the patient meet **ONE** of the following criteria?
    - Keytruda will be used as single-agent neoadjuvant treatment, and then continued as adjuvant treatment in combination with radiotherapy (RT)
    - Keytruda will be used as a single agent following its prior use both as single-agent neoadjuvant treatment and as adjuvant treatment in combination with RT

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

15. Is the cancer either metastatic or both unresectable and recurrent, and the patient meets **ONE** of the following criteria?
    - Keytruda will be given in combination with platinum and fluorouracil (FU)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #16.

16. Is the cancer recurrent or metastatic **AND** the patient meets the following criterion?
    - The patient has disease progression on or after treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

17. Does the patient have a diagnosis of classical Hodgkin lymphoma (cHL) (ICD-10 Group C81) and meet **ONE** of the following criteria?
    - The patient is 18 years of age or older AND has relapsed or refractory cHL
    - The patient has refractory cHL, or cHL that has relapsed after 2 or more prior lines of therapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #18.

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

18. Does the patient have a diagnosis of primary mediastinal large B-cell lymphoma (PMBCL) (ICD-10 Group C85.2) and meet **ONE** of the following criteria?
    - The patient has refractory PMBCL
    - The patient has relapsed after 2 or more prior lines of therapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #19.

19. Does the patient have a diagnosis of locally advanced or metastatic urothelial carcinoma (ICD-10 Groups C66, C67, C68) and meet **ONE** of the following criteria?
    - Keytruda will be used in combination with enfortumab vedotin (Padcev) AND the patient is 18 years of age or older
    - The patient is not eligible for any platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient has disease progression on or after treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient has disease progression within 12 months of neoadjuvant or adjuvant treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #20.

20. Does the patient have a diagnosis of bladder cancer (ICD-10 Group C67, D09.0)?

    If yes, continue to #21.
    If no, continue to #23.

21. Is the cancer muscle invasive (MIBC) and the patient meets **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be used in combination with enfortumab vedotin (Padcev) as neoadjuvant treatment, and then continued as adjuvant treatment after a cystectomy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #22.

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

22. Is the cancer non-muscle invasive (NMIBC) and the patient meets **ALL** of the following criteria?
    - The patient has Bacillus Calmette-Guerin (BCG)-unresponsive, high-risk cancer with carcinoma in situ (CIS)
    - The patient is ineligible for or has elected not to undergo a cystectomy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

23. Does the patient have a diagnosis of an unresectable or metastatic solid tumor and meet **ALL** of the following criteria?
    - The patient's tumor is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) as determined by an FDA-approved test
    - The patient has disease progression following prior treatment and has no satisfactory alternative treatment options

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #24.

24. Does the patient have a diagnosis of unresectable or metastatic colorectal cancer (CRC) (ICD-10 C19) **AND** meet the following criterion?
    - The patient's cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #25.

25. Does the patient have a diagnosis of locally advanced unresectable or metastatic gastric or gastroesophageal junction (GEJ) adenocarcinoma (ICD-10 Group C16) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1) as determined by an FDA-approved test

    If yes, continue to #26.
    If no, continue to #27.

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

26. Does the patient meet **ONE** of the following criteria?
    - The cancer is HER2-positive, AND Keytruda will be used in combination with trastuzumab, fluoropyrimidine- and platinum-containing chemotherapy
    - The cancer is HER2-negative, AND Keytruda will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

27. Does the patient have a diagnosis of locally advanced or metastatic esophageal or gastroesophageal junction (GEJ) (tumors with epicenter 1 to 5 centimeters above the GEJ) carcinoma (ICD-10 C16.0; Group C15) **AND** meet the following criterion?
    - The tumor is not amenable to surgical resection or definitive chemoradiation

    If yes, continue to #28.
    If no, continue to #29.

28. Does the patient meet **ONE** of the following criteria?
    - Keytruda will be used in combination with platinum- and fluoropyrimidine-based chemotherapy AND the patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1)
    - Keytruda will be used after one or more prior lines of systemic therapy AND the patient has a tumor of squamous cell histology that expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

29. Does the patient have a diagnosis of cervical cancer (ICD-10 Group C53)?

    If yes, continue to #30.
    If no, continue to #33.

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

30. Is the cancer locally advanced and the patient meets **ALL** of the following criteria?
    - The cancer is FIGO 2014 Stage III-IVA
    - The cancer involves the lower third of the vagina, hydronephrosis/a non-functioning kidney, or has spread to adjacent pelvic organs
    - Keytruda will be used in combination with chemoradiotherapy (CRT)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #31.

31. Is the cancer persistent, recurrent, or metastatic and the patient meets **ALL** of the following criteria?
    - Keytruda will be used in combination with chemotherapy (e.g., paclitaxel, cisplatin, carboplatin)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #32.

32. Is the cancer recurrent or metastatic and the patient meets **ALL** of the following criteria?
    - The patient has disease progression on or after chemotherapy
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

33. Does the patient have a diagnosis of hepatocellular carcinoma (HCC) (ICD-10 C22.0) and meet **ALL** of the following criteria?
    - The patient's cancer is secondary to hepatitis B
    - The patient has received prior systemic therapy (e.g., Nexavar [sorafenib], oxaliplatin) other than a PD-1/PD-L1-containing regimen (e.g., Opdivo [nivolumab])

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #34.

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

34. Does the patient have a diagnosis of locally advanced unresectable or metastatic biliary tract cancer (BTC) (ICD-10 Group C24) **AND** meet the following criterion?
    - Keytruda will be used in combination with gemcitabine and cisplatin

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #35.

35. Does the patient have a diagnosis of recurrent locally advanced or metastatic Merkel cell carcinoma (MCC) (ICD-10 Group C4A, C7B.1)?

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #36.

36. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be used in combination with Inlyta (axitinib) OR Lenvima (lenvatinib)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #37.

37. Does the patient have a diagnosis of renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
    - Keytruda will be used for adjuvant treatment
    - The patient is at intermediate-high or high risk of recurrence following a nephrectomy, or following a nephrectomy and resection of metastatic lesions

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #38.

38. Does the patient have a diagnosis of renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet ALL of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda will be used for adjuvant treatment
    - Keytruda will be used in combination with Welireg (belzutifan)
    - The patient has renal cell carcinoma with a clear cell component (ccRCC)
    - The patient is at intermediate-high or high risk of recurrence following a nephrectomy, or following a nephrectomy and resection of metastatic lesions

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #39.

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

39. Does the patient have a diagnosis of primary advanced or recurrent endometrial carcinoma (ICD-10 C54.1) **AND** meet the following criterion?
    - Keytruda will be used in combination with carboplatin and paclitaxel, OR as a single agent after prior use in combination with carboplatin and paclitaxel

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #40.

40. Does the patient have a diagnosis of advanced endometrial carcinoma (ICD-10 C54.1) and meet **ALL** of the following criteria?
    - The patient has experienced disease progression following prior systemic therapy
    - The patient is not a candidate for curative surgery or radiation

    If yes, continue to #41.
    If no, continue to #43.

41. Does the patient meet **ALL** of the following criteria?
    - Keytruda will be used in combination with lenvatinib (Lenvima)
    - The patient's cancer is mismatch repair proficient (pMMR) as determined by an FDA-approved test, OR is not microsatellite instability-high (MSI-H)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #42.

42. Is the patient's cancer microsatellite instability-high (MSI-H) OR mismatch repair deficient (dMMR) as determined by an FDA-approved test?

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

43. Does the patient have a diagnosis of unresectable or metastatic solid tumor and meet **ALL** of the following criteria?
    - The patient's tumor is tumor mutational burden-high (TMB-H) [at least 10 mutations/megabase (mut/Mb)] as determined by an FDA-approved test
    - The patient has disease progression following prior treatment and has no satisfactory alternative treatment options

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #44.

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

44. Does the patient have a diagnosis of recurrent or metastatic cutaneous squamous cell carcinoma (cSCC) or locally advanced cSCC (ICD-10 C44.02, C44.42, C44.82, C44.92; Groups C44.12, C44.22, C44.32, C44.52, C44.62, C44.72) **AND** meet the following criterion?
    - The disease is not curable by surgery or radiation

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #45.

45. Does the patient have a diagnosis of high-risk early-stage triple-negative breast cancer (TNBC) (ICD-10 Group C50) **AND** meet the following criterion?
    - Keytruda will be used in combination with chemotherapy (e.g., carboplatin, paclitaxel, doxorubicin) as neoadjuvant treatment, OR as a single agent as adjuvant treatment after surgery following prior use in combination with chemotherapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #46.

46. Does the patient have a diagnosis of unresectable locally advanced or metastatic triple-negative breast cancer (TNBC) (ICD-10 Group C50) and meet **ALL** of the following criteria?
    - Keytruda will be used in combination with Trodelvy (sacituzumab govitecan-hziy)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10), as determined by an FDA-authorized test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #47.

47. Does the patient have a diagnosis of locally recurrent unresectable or metastatic triple-negative breast cancer (TNBC) (ICD-10 Group C50) and meet **ALL** of the following criteria?
    - Keytruda will be used in combination with chemotherapy (e.g., paclitaxel, gemcitabine, carboplatin)
    - The tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #48.

GUIDELINES FOR USE (CONTINUED)

48. Does the patient have a diagnosis of epithelial ovarian, fallopian tube, or primary peritoneal carcinoma (ICD-10 Groups C56, C57.0, C48, C79.6) and meet **ALL** the following criteria?
    - The patient is 18 years of age or older
    - The patient has platinum-resistant cancer
    - Keytruda will be used in combination with paclitaxel
    - The tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1) as determined by an FDA-approved test
    - The patient has received one or more prior systemic treatment regimens

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.

    DENIAL TEXT: Our guideline named **PEMBROLIZUMAB (Keytruda)** requires the following rule(s) be met for approval:
    A. You have ONE of the following:
        1. Unresectable or metastatic melanoma (type of skin cancer that cannot be completely removed with surgery or has spread to other parts of the body)
        2. Stage IIB, IIC, or III melanoma (type of skin cancer)
        3. Non-small cell lung cancer (type of lung cancer)
        4. Unresectable advanced or metastatic malignant pleural mesothelioma (a tumor of the tissue lining the lungs and chest wall that cannot be removed by surgery or has spread to other parts of the body)
        5. Head and neck squamous cell carcinoma (type of neck cancer)
        6. Classical Hodgkin lymphoma (type of immune system cancer)
        7. Primary mediastinal large B-cell lymphoma (type of immune system cancer)
        8. Locally advanced or metastatic urothelial carcinoma (type of urinary system cancer that has spread to other parts of the body)
        9. Bladder cancer
        10. Unresectable or metastatic solid tumor (type of cancer that cannot be removed by surgery or has spread to other parts of the body)
        11. Unresectable or metastatic colorectal cancer (CRC: type of colon or rectal cancer that cannot be removed by surgery or has spread to other parts of the body)
        12. Locally advanced unresectable or metastatic gastric or gastroesophageal junction (GEJ) adenocarcinoma (a type of digestive system cancer that cannot be surgically removed, has spread to nearby tissue or has spread to other parts of the body)
        13. Locally advanced or metastatic esophageal or gastroesophageal junction (GEJ) (tumors with an epicenter of 1 to 5 centimeters above the GEJ) carcinoma (a type of digestive system cancer that has spread to nearby tissue or to other parts of the body)
        14. Cervical cancer
        15. Hepatocellular carcinoma (liver cancer)

(Denial text continued on next page)

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

16. Locally advanced unresectable or metastatic biliary tract cancer (BTC) (type of bile duct cancer that cannot be removed with surgery or has spread to other parts of the body)
17. Recurrent locally advanced or metastatic Merkel cell carcinoma (MCC: type of skin cancer that has returned or has spread to other parts of the body)
18. Renal cell carcinoma (kidney cancer)
19. Endometrial carcinoma (type of cancer that starts in the uterus)
20. Recurrent or metastatic OR locally advanced cutaneous squamous cell carcinoma (cSCC: a type of skin cancer that has returned, or has spread to other parts of the body or to nearby tissue or lymph nodes)
21. High-risk early-stage triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors)
22. Unresectable locally advanced or metastatic triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors and cannot be surgically removed and has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
23. Locally recurrent unresectable or metastatic triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors and cannot be removed with surgery or has spread to other parts of the body)
24. Epithelial ovarian, fallopian tube, or primary peritoneal carcinoma (types of reproductive system or abdomen cancers)

B. If you have unresectable or metastatic melanoma, approval also requires:
1. You will NOT use Keytruda concurrently (at the same time) with a targeted therapy (BRAF inhibitors [such as Braftovi (encorafenib), Tafinlar (dabrafenib)], MEK inhibitors [such as Mekinist (trametinib)], and NTRK inhibitors [such as Vitrakvi (larotrectinib), Rozlytrek (entrectinib)])

C. If you have Stage IIB, IIC, or III melanoma, approval also requires:
1. You are 12 years of age or older
2. You have undergone complete resection (completely removed by surgery)
3. Keytruda will be used as adjuvant (add-on) treatment

D. If you have metastatic nonsquamous non-small cell lung cancer, approval also requires:
1. Keytruda will be used in combination with pemetrexed and platinum chemotherapy (such as cisplatin, carboplatin)
2. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)

E. If you have metastatic squamous non-small cell lung cancer, approval also requires:
1. Keytruda will be used in combination with carboplatin and either paclitaxel or paclitaxel protein-bound

(Denial text continued on next page)

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

F. If you have non-small cell lung cancer, approval also requires:
1. Your tumor has programmed death-ligand 1 (PD-L1: a type of protein) [Tumor Proportion Score (TPS) of at least 1%] as determined by a Food and Drug Administration (FDA)-approved test
2. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)
3. You meet ONE of the following:
   a. You have stage III non-small cell lung cancer AND you are not a candidate for surgical resection (removal) or definitive chemoradiation (a type of treatment)
   b. You have metastatic non-small cell lung cancer (cancer that has spread to other parts of the body)

G. If you have metastatic non-small cell lung cancer, approval also requires:
1. Your tumor has programmed death-ligand 1 (PD-L1: a type of protein) [Tumor Proportion Score (TPS) of at least 1%] as determined by a Food and Drug Administration (FDA)-approved test
2. You experienced disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
3. You meet ONE of the following:
   a. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)
   b. You have an anaplastic lymphoma kinase (ALK) genomic tumor aberration (type of gene mutation) AND experienced disease progression (worsening) on or after ALK-directed therapy (such as Xalkori [crizotinib], Zykadia [ceritinib])
   c. You have an epidermal growth factor receptor (EGFR) genomic tumor aberration (type of gene mutation) AND experienced disease progression (worsening) on or after EGFR-directed therapy (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

H. If you have resectable (node positive or tumor is at least 4 cm) non-small cell lung cancer, approval also requires:
1. Keytruda will be used in combination with platinum-containing chemotherapy (such as cisplatin) as neoadjuvant treatment (given before main treatment), OR as a single agent (not given in combination with chemotherapy) as adjuvant (add-on) treatment after surgery following prior use in combination with platinum-containing chemotherapy

I. If you have Stage IB (T2a is at least 4 cm), II, or IIIA non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda will be used as adjuvant (add-on) treatment following resection (removed by surgery) and platinum-based chemotherapy (such as cisplatin, carboplatin)

(Denial text continued on next page)

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

J. If you have unresectable advanced or metastatic malignant pleural mesothelioma, approval also requires:
1. You are 18 years of age or older
2. Keytruda will be given in combination with pemetrexed and platinum chemotherapy (such as cisplatin, carboplatin)

K. If you have head and neck squamous cell carcinoma, approval also requires ONE of the following:
1. Your cancer is resectable (able to be removed by surgery) and locally advanced (cancer that has spread from where it started to nearby tissue or lymph nodes) and you meet ALL of the following:
   a. You are 18 years of age or older
   b. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
   c. Keytruda will be used as single-agent neoadjuvant treatment (given before main treatment) and then continued as adjuvant (add-on) treatment in combination with radiotherapy (RT: a type of cancer treatment), OR Keytruda will be used as a single agent following its prior use both as single-agent neoadjuvant treatment and as adjuvant treatment in combination with RT
2. Your cancer is either metastatic (has spread to other parts of the body) or both unresectable (unable to remove by surgery) and recurrent (has returned), and you meet ONE of the following:
   a. Keytruda will be given in combination with platinum and fluorouracil (FU)
   b. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
3. Your cancer is recurrent (has returned) or metastatic (has spread to other parts of the body); AND you experienced disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)

L. If you have classical Hodgkin lymphoma, approval also requires ONE of the following:
1. You are 18 years of age or older AND have relapsed (disease has returned) or refractory (disease is resistant to treatment) classical Hodgkin lymphoma
2. You have refractory (disease is resistant to treatment) classical Hodgkin lymphoma or classical Hodgkin lymphoma that has relapsed (disease has returned) after 2 or more prior lines of therapy

M. If you have primary mediastinal large B-cell lymphoma, approval also requires ONE of the following:
1. You have refractory primary mediastinal large B-cell lymphoma (type of immune system cancer that is resistant to treatment)
2. You have relapsed (disease has returned) after 2 or more prior lines of therapy

(Denial text continued on next page)

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

N. If you have locally advanced or metastatic urothelial carcinoma, approval also requires ONE of the following:
1. Keytruda will be used in combination with enfortumab vedotin (Padcev), AND you are 18 years of age or older
2. You are not eligible for any platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
3. You have disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
4. You have disease progression (worsening) within 12 months of neoadjuvant (given before main treatment) or adjuvant (add-on) treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)

O. If you have bladder cancer, approval also requires ONE of the following:
1. You have muscle invasive bladder cancer (MIBC: bladder cancer that has grown into the muscle wall); AND you are 18 years of age or older; AND Keytruda will be used in combination with enfortumab vedotin (Padcev) as neoadjuvant treatment (given before main treatment), and then continued as adjuvant (add-on) treatment after a cystectomy (surgery to remove part or all of the urinary bladder)
2. You have Bacillus Calmette-Guerin (BCG: a type of anti-cancer treatment)-unresponsive, high-risk, non-muscle invasive bladder cancer with carcinoma in situ (a type of early-stage bladder cancer); AND you are not eligible for or have chosen not to undergo a cystectomy (surgery to remove part or all of the urinary bladder)

P. If you have an unresectable or metastatic solid tumor, approval also requires:
1. You meet ONE of the following:
   a. Your tumor is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities), as determined by a Food and Drug Administration (FDA)-approved test
   b. Your tumor is tumor mutational burden-high (TMB-H: high number of changes found in the genes of the cancer cells) [at least 10 mutations/megabase], as determined by a Food and Drug Administration (FDA)-approved test
2. Your disease has progressed (worsened) following prior treatment, and you have no alternative treatment options

Q. If you have unresectable or metastatic colorectal cancer, approval also requires:
1. Your cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities) as determined by an FDA-approved test

(Denial text continued on next page)

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

R. If you have locally advanced unresectable or metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:
1. You are 18 years of age or older
2. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
3. You meet ONE of the following:
   a. Your cancer is human epidermal growth factor receptor 2 (HER2: type of protein that promotes cancer cells)-POSITIVE, and Keytruda will be used in combination with trastuzumab, fluoropyrimidine- and platinum-containing chemotherapy
   b. Your cancer is human epidermal growth factor receptor 2 (HER2: type of protein that promotes cancer cells)-NEGATIVE, and Keytruda will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy

S. If you have locally advanced or metastatic esophageal or gastroesophageal junction carcinoma, approval also requires:
1. Your tumor is not amenable (responsive) to surgical resection (removal) or definitive chemoradiation (a type of treatment)
2. You meet ONE of the following:
   a. Keytruda will be used in combination with platinum- and fluoropyrimidine-based chemotherapy; AND your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1)
   b. Keytruda will be used after one or more prior lines of systemic therapy; AND you have a tumor of squamous cell histology (cancer from flat surface-lining cells) that expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10) as determined by a Food and Drug Administration (FDA)-approved test

(Denial text continued on next page)

GUIDELINES FOR USE (CONTINUED)

T. If you have cervical cancer, approval also requires ONE of the following:
1. Your cancer is locally advanced, your cancer is FIGO 2014 Stage III-IVA (a way to classify the size and spread of the cancer) and involves the lower third of the vagina, hydronephrosis (swelling of kidney)/a non-functioning kidney, or has spread to adjacent (nearby) pelvic organs; AND Keytruda will be used in combination with chemoradiotherapy (CRT: a type of therapy to treat cancer)
2. You have persistent, recurrent, or metastatic cancer (cancer that does not go away, has returned, or has spread to other parts of the body); AND Keytruda will be used in combination with chemotherapy (such as paclitaxel, cisplatin, carboplatin); AND your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
3. You have recurrent or metastatic cancer (cancer that has returned or has spread to other parts of the body); AND you have experienced disease progression (worsening) on or after chemotherapy; AND your tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test

U. If you have hepatocellular carcinoma, approval also requires:
1. Your cancer is caused by hepatitis B (a type of liver infection)
2. You have received prior systemic therapy (such as Nexavar [sorafenib], oxaliplatin) other than a PD-1/PD-L1-containing regimen (such as Opdivo [nivolumab])

V. If you have locally advanced unresectable or metastatic biliary tract cancer, approval also requires:
1. Keytruda will be used in combination with gemcitabine and cisplatin

W. If you have renal cell carcinoma, approval also requires ONE of the following:
1. You have advanced renal cell carcinoma; you are 18 years of age or older; AND Keytruda will be used in combination with Inlyta (axitinib) OR Lenvima (lenvatinib)
2. Keytruda will be used as adjuvant (add-on) treatment; AND your cancer is at intermediate-high or high risk of recurrence (returning) following a nephrectomy (surgical removal of the kidney), or following a nephrectomy and resection (surgical removal) of metastatic lesions (abnormal area of tissue)
3. You are 18 years of age or older; AND Keytruda will be used in combination with Welireg (belzutifan), Keytruda will be used as adjuvant (add-on) treatment; AND you have renal cell carcinoma with a clear cell component (ccRCC: a type of kidney cancer), AND your cancer is at intermediate-high or high risk of recurrence (returning) following a nephrectomy (surgical removal of the kidney), or following a nephrectomy and resection (surgical removal) of metastatic lesions (abnormal area of tissue)

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

X. If you have primary advanced or recurrent endometrial carcinoma, approval also requires:
1. Keytruda will be used in combination with carboplatin and paclitaxel, OR as a single agent after previous use in combination with carboplatin and paclitaxel

Y. If you have advanced endometrial carcinoma, approval also requires:
1. You have experienced disease progression (worsening) following prior systemic therapy (treatment that affects the entire body)
2. You are not a candidate for curative surgery or radiation
3. You meet ONE of the following:
   a. You will use Keytruda in combination with lenvatinib (Lenvima), AND your cancer is mismatch repair proficient (pMMR) as determined by a Food and Drug Administration (FDA)-approved test OR is NOT microsatellite instability-high (MSI-H) (characteristics that help determine the type of cancer and what treatment options there are for it)
   b. Your cancer is microsatellite instability-high (MSI-H) OR mismatch repair deficient (dMMR) (types of genetic abnormalities), as determined by a Food and Drug Administration (FDA)-approved test

Z. If you have recurrent or metastatic OR locally advanced cutaneous squamous cell carcinoma, approval also requires:
1. Your disease is not curable by surgery or radiation

AA. **If you have high-risk early-stage triple-negative breast cancer, approval also requires:**
1. Keytruda will be used in combination with chemotherapy (such as carboplatin, paclitaxel, doxorubicin) as neoadjuvant treatment (given before main treatment), OR as a single agent as adjuvant (add-on) treatment after surgery following prior use in combination with chemotherapy

BB. **If you have unresectable locally advanced or metastatic triple-negative breast cancer, approval also requires:**
1. Keytruda will be used in combination with Trodelvy (sacituzumab govitecan-hziy)
2. The tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10) as determined by a Food and Drug Administration (FDA)-authorized test

CC. **If you have locally recurrent unresectable or metastatic triple-negative breast cancer, approval also requires:**
1. Keytruda will be used in combination with chemotherapy (such as paclitaxel, gemcitabine, carboplatin)
2. The tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10) as determined by a Food and Drug Administration (FDA)-approved test

(Denial text continued on next page)

PEMBROLIZUMAB

GUIDELINES FOR USE (CONTINUED)

DD. **If you have epithelial ovarian, fallopian tube, or primary peritoneal carcinoma, approval also requires:**
1. You are 18 years of age or older
2. You have platinum-resistant cancer (cancer that no longer responds to a type of treatment)
3. Keytruda will be used in combination with paclitaxel
4. The tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
5. You have received one or more prior systemic treatment regimens (treatment that affects the entire body)

PRIOR AUTHORIZATION GUIDELINES

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEMBROLIZUM-BERAHYALURON-PMPH	KEYTRUDA QLEX	50902		GPI-10 (2199000253)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable or metastatic melanoma (ICD-10 Group C43) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of Stage IIB, IIC, or III melanoma (ICD-10 Group C43) and meet **ALL** of the following criteria?
   - The patient is 12 years of age or older
   - The patient has undergone complete resection
   - Keytruda Qlex will be used as adjuvant treatment

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of metastatic nonsquamous non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Keytruda Qlex will be used in combination with pemetrexed and platinum chemotherapy (e.g., cisplatin, carboplatin)
   - The patient does NOT have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

4. Does the patient have a diagnosis of metastatic squamous non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Keytruda Qlex will be used in combination with carboplatin and either paclitaxel or paclitaxel protein-bound

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

5. Does the patient have a diagnosis of non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Tumor Proportion Score (TPS) of at least 1%] as determined by an FDA-approved test
   - The patient does NOT have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations

   If yes, continue to #6.
   If no, continue to #7.

6. Does the patient meet **ONE** of the following criteria?
   - The patient has stage III NSCLC AND is not a candidate for surgical resection or definitive chemoradiation
   - The patient has metastatic NSCLC

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

7. Does the patient have a diagnosis of metastatic non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Tumor Proportion Score (TPS) of at least 1%] as determined by an FDA-approved test
   - The patient has disease progression on or after treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

   If yes, continue to #8.
   If no, continue to #9.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

8. Does the patient meet **ONE** of the following criteria?
   - The patient does NOT have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations
   - The patient has an anaplastic lymphoma kinase (ALK) genomic tumor aberration AND disease progression on or after ALK-directed therapy (e.g., Xalkori [crizotinib], Zykadia [ceritinib])
   - The patient has an epidermal growth factor receptor (EGFR) genomic tumor aberration AND disease progression on or after EGFR-directed therapy (e.g., Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

9. Does the patient have resectable (node positive or tumor is at least 4 cm) non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - Keytruda Qlex will be used in combination with platinum-containing chemotherapy (e.g., cisplatin) as neoadjuvant treatment, OR as a single agent as adjuvant treatment after surgery following prior use in combination with platinum-containing chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #10.

10. Does the patient have a diagnosis of Stage IB (T2a is at least 4 cm), II, or IIIA non-small cell lung cancer (NSCLC) (ICD-10 Group C34) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used as adjuvant treatment following resection and platinum-based chemotherapy (e.g., cisplatin, carboplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #11.

11. Does the patient have a diagnosis of unresectable advanced or metastatic malignant pleural mesothelioma (MPM) (ICD-10 C45.0) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with pemetrexed and platinum chemotherapy (e.g., cisplatin, carboplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #12.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

12. Does the patient have a diagnosis of head and neck squamous cell carcinoma (HNSCC) (ICD-10 Groups C44.42, C76.0, C00, C06, C09, C10, C32) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #13.
    If no, continue to #17.

13. Is the cancer resectable and locally advanced **AND** the patient meets the following criterion?
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, continue to #14.
    If no, continue to #15.

14. Does the patient meet **ONE** of the following criteria?
    - Keytruda Qlex will be used as single-agent neoadjuvant treatment, and then continued as adjuvant treatment in combination with radiotherapy (RT)
    - Keytruda Qlex will be used as a single agent following its prior use both as single-agent neoadjuvant treatment and as adjuvant treatment in combination with RT

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

15. Is the cancer either metastatic or both unresectable and recurrent, and the patient meets **ONE** of the following criteria?
    - Keytruda Qlex will be used in combination with platinum and fluorouracil (FU)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #16.

16. Is the cancer recurrent or metastatic **AND** the patient meets the following criterion?
    - The patient has disease progression on or after treatment with platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

17. Does the patient have a diagnosis of locally advanced or metastatic urothelial carcinoma (ICD-10 Groups C66, C67, C68) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #18.
    If no, continue to #19.

18. Does the patient meet **ONE** of the following criteria?
    - Keytruda Qlex will be used in combination with enfortumab vedotin (Padcev)
    - The patient is not eligible for any platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient has disease progression on or following treatment with a platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)
    - The patient has disease progression within 12 months of neoadjuvant or adjuvant treatment with a platinum-containing chemotherapy (e.g., cisplatin, carboplatin, oxaliplatin)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

19. Does the patient have a diagnosis of bladder cancer (ICD-10 Group C67, D09.0) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #20.
    If no, continue to #22.

20. Is the cancer muscle invasive (MIBC) **AND** the patient meets the following criterion?
    - Keytruda Qlex will be used in combination with enfortumab vedotin (Padcev) as neoadjuvant treatment, and then continued as adjuvant treatment after a cystectomy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #21.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

21. Is the cancer non-muscle invasive (NMIBC) and the patient meets **ALL** of the following criteria?
    - The patient has Bacillus Calmette-Guerin (BCG)-unresponsive, high-risk cancer with carcinoma in situ (CIS)
    - The patient is ineligible for or has elected not to undergo a cystectomy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

22. Does the patient have a diagnosis of an unresectable or metastatic solid tumor and meet **ALL** of the following criteria?
    - The patient is 12 years of age or older
    - The patient's tumor is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) as determined by an FDA-approved test
    - The patient has disease progression following prior treatment and has no satisfactory alternative treatment options

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #23.

23. Does the patient have a diagnosis of unresectable or metastatic colorectal cancer (CRC) (ICD-10 C19) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #24.

24. Does the patient have a diagnosis of locally advanced unresectable or metastatic gastric or gastroesophageal junction (GEJ) adenocarcinoma (ICD-10 Group C16) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1) as determined by an FDA-approved test

    If yes, continue to #25.
    If no, continue to #26.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

25. Does the patient meet **ONE** of the following criteria?
    - The cancer is HER2-positive, AND Keytruda Qlex will be used in combination with trastuzumab, fluoropyrimidine- and platinum-containing chemotherapy
    - The cancer is HER2-negative, AND Keytruda Qlex will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

26. Does the patient have a diagnosis of locally advanced or metastatic esophageal or gastroesophageal junction (GEJ) (tumors with epicenter 1 to 5 centimeters above the GEJ) carcinoma (ICD-10 C16.0; Group C15) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The tumor is not amenable to surgical resection or definitive chemoradiation

    If yes, continue to #27.
    If no, continue to #28.

27. Does the patient meet **ONE** of the following criteria?
    - Keytruda Qlex will be used in combination with platinum- and fluoropyrimidine-based chemotherapy AND the patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1) as determined by an FDA-authorized test
    - Keytruda Qlex will be used after one or more prior lines of systemic therapy AND the patient has a tumor of squamous cell histology that expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10) as determined by an FDA-authorized test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

28. Does the patient have a diagnosis of cervical cancer (ICD-10 Group C53) **AND** meet the following criterion?
    - The patient is 18 years of age or older

    If yes, continue to #29.
    If no, continue to #32.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

29. Is the cancer locally advanced and the patient meets **ALL** of the following criteria?
    - Keytruda Qlex will be used in combination with chemoradiotherapy (CRT)
    - The cancer involves the lower third of the vagina, hydronephrosis/a non-functioning kidney, or has spread to adjacent pelvic organs (FIGO 2014 Stage III-IVA)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #30.

30. Is the cancer persistent, recurrent, or metastatic and the patient meets **ALL** of the following criteria?
    - Keytruda Qlex will be used in combination with chemotherapy (e.g., paclitaxel, cisplatin, carboplatin)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #31.

31. Is the cancer recurrent or metastatic and the patient meets **ALL** of the following criteria?
    - The patient has disease progression on or after chemotherapy
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) [Combined Positive Score (CPS) of at least 1] as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

32. Does the patient have a diagnosis of hepatocellular carcinoma (HCC) (ICD-10 C22.0) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient's cancer is secondary to hepatitis B
    - The patient has received prior systemic therapy (e.g., Nexavar [sorafenib], oxaliplatin) other than a PD-1/PD-L1-containing regimen (e.g., Opdivo [nivolumab])

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #33.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

33. Does the patient have a diagnosis of locally advanced unresectable or metastatic biliary tract cancer (BTC) (ICD-10 Group C24) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with gemcitabine and cisplatin

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #34.

34. Does the patient have a diagnosis of recurrent locally advanced or metastatic Merkel cell carcinoma (MCC) (ICD-10 Group C4A, C7B.1) **AND** meet the following criterion?
    - The patient is 12 years of age or older

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #35.

35. Does the patient have a diagnosis of advanced renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with Inlyta (axitinib) OR Lenvima (lenvatinib)

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #36.

36. Does the patient have a diagnosis of renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used for adjuvant treatment
    - The patient is at intermediate-high or high risk of recurrence following a nephrectomy, or following a nephrectomy and resection of metastatic lesions

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #37.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

37. Does the patient have a diagnosis of renal cell carcinoma (RCC) (ICD-10 Groups C64, C65) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used for adjuvant treatment
    - Keytruda Qlex will be used in combination with Welireg (belzutifan)
    - The patient has renal cell carcinoma with a clear cell component (ccRCC)
    - The patient is at intermediate-high or high risk of recurrence following a nephrectomy, or following a nephrectomy and resection of metastatic lesions

38. Does the patient have a diagnosis of primary advanced or recurrent endometrial carcinoma (ICD-10 C54.1) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with carboplatin and paclitaxel, OR as a single agent after prior use in combination with carboplatin and paclitaxel

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #39.

39. Does the patient have a diagnosis of advanced endometrial carcinoma (ICD-10 C54.1) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The patient has experienced disease progression following prior systemic therapy
    - The patient is not a candidate for curative surgery or radiation

    If yes, continue to #40.
    If no, continue to #42.

40. Does the patient meet **ALL** of the following criteria?
    - Keytruda Qlex will be used in combination with lenvatinib (Lenvima)
    - The patient's cancer is mismatch repair proficient (pMMR) OR not microsatellite instability-high (MSI-H) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #41.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

41. Is the patient's cancer microsatellite instability-high (MSI-H) OR mismatch repair deficient (dMMR) as determined by an FDA-approved test?

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

42. Does the patient have a diagnosis of unresectable or metastatic solid tumor and meet **ALL** of the following criteria?
    - The patient is 12 years of age or older
    - The patient's tumor is tumor mutational burden-high (TMB-H) [at least 10 mutations/megabase (mut/Mb)] as determined by an FDA-approved test
    - The patient has disease progression following prior treatment and has no satisfactory alternative treatment options

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #43.

43. Does the patient have a diagnosis of recurrent or metastatic cutaneous squamous cell carcinoma (cSCC) or locally advanced cSCC (ICD-10 C44.02, C44.42, C44.82, C44.92; Groups C44.12, C44.22, C44.32, C44.52, C44.62, C44.72) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - The disease is not curable by surgery or radiation

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #44.

44. Does the patient have a diagnosis of high-risk early-stage triple-negative breast cancer (TNBC) (ICD-10 Group C50) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with chemotherapy (e.g., carboplatin, paclitaxel, doxorubicin) as neoadjuvant treatment, OR as a single agent as adjuvant treatment after surgery following prior use in combination with chemotherapy

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #45.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

45. Does the patient have a diagnosis of unresectable locally advanced or metastatic triple-negative breast cancer (TNBC) (ICD-10 Group C50) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with Trodelvy (sacituzumab govitecan-hziy)
    - The patient's tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10), as determined by an FDA-authorized test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #46.

46. Does the patient have a diagnosis of locally recurrent unresectable or metastatic triple-negative breast cancer (TNBC) (ICD-10 Group C50) and meet **ALL** of the following criteria?
    - The patient is 18 years of age or older
    - Keytruda Qlex will be used in combination with chemotherapy (e.g., paclitaxel, gemcitabine, carboplatin)
    - The tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 10) as determined by an FDA-approved test

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, continue to #47.

47. Does the patient have a diagnosis of epithelial ovarian, fallopian tube, or primary peritoneal carcinoma (ICD-10 Groups C56, C57.0, C48, C79.6) and meet **ALL** the following criteria?
    - The patient is 18 years of age or older
    - The patient has platinum-resistant cancer
    - Keytruda Qlex will be used in combination with paclitaxel
    - The tumor expresses programmed death-ligand 1 (PD-L1) (Combined Positive Score [CPS] of at least 1) as determined by an FDA-approved test
    - The patient has received one or more prior systemic treatment regimens

    If yes, **approve for 12 months by HICL or GPI-10.**
    If no, do not approve.
    DENIAL TEXT: See the denial text at the end of the guideline.

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT:

Our guideline named **PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH (Keytruda Qlex)** requires the following rule(s) be met for approval:

A. You have ONE of the following:
   1. Unresectable or metastatic melanoma (type of skin cancer that cannot be completely removed with surgery or has spread to other parts of the body)
   2. Stage IIB, IIC, or III melanoma (type of skin cancer)
   3. Non-small cell lung cancer (type of lung cancer)
   4. Unresectable advanced or metastatic malignant pleural mesothelioma (a tumor of the tissue lining the lungs and chest wall that cannot be removed by surgery or has spread to other parts of the body)
   5. Head and neck squamous cell carcinoma (type of neck cancer)
   6. Locally advanced or metastatic urothelial carcinoma (type of urinary system cancer that has spread to other parts of the body)
   7. Bladder cancer
   8. Unresectable or metastatic solid tumor (type of cancer that cannot be removed by surgery or has spread to other parts of the body)
   9. Unresectable or metastatic colorectal cancer (CRC: type of colon or rectal cancer that cannot be removed by surgery or has spread to other parts of the body)
   10. Locally advanced unresectable or metastatic gastric or gastroesophageal junction (GEJ) adenocarcinoma (a type of digestive system cancer that cannot be surgically removed, has spread to nearby tissue or has spread to other parts of the body)
   11. Locally advanced or metastatic esophageal or gastroesophageal junction (GEJ) (tumors with an epicenter of 1 to 5 centimeters above the GEJ) carcinoma (a type of digestive system cancer that has spread to nearby tissue or to other parts of the body)
   12. Cervical cancer
   13. Hepatocellular carcinoma (liver cancer)
   14. Locally advanced unresectable or metastatic biliary tract cancer (BTC) (type of bile duct cancer that cannot be removed with surgery or has spread to other parts of the body)
   15. Recurrent locally advanced or metastatic Merkel cell carcinoma (MCC: type of skin cancer that has returned or has spread to other parts of the body)
   16. Renal cell carcinoma (kidney cancer)
   17. Endometrial carcinoma (type of cancer that starts in the uterus)
   18. Recurrent or metastatic OR locally advanced cutaneous squamous cell carcinoma (cSCC: a type of skin cancer that has returned, or has spread to other parts of the body or to nearby tissue or lymph nodes)

(Denial text continued on next page)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

19. High-risk early-stage triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors)
20. Unresectable locally advanced or metastatic triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors and cannot be surgically removed and has spread from where it started to nearby tissue or lymph nodes or to other parts of the body)
21. Locally recurrent unresectable or metastatic triple-negative breast cancer (TNBC) (type of breast cancer that does not have three receptors and cannot be removed with surgery or has spread to other parts of the body)
22. Epithelial ovarian, fallopian tube, or primary peritoneal carcinoma (types of reproductive system or abdomen cancers)

B. If you have unresectable or metastatic melanoma, approval also requires:
1. You are 18 years of age or older

C. If you have Stage IIB, IIC, or III melanoma, approval also requires:
1. You are 12 years of age or older
2. You have undergone complete resection (completely removed by surgery)
3. Keytruda Qlex will be used as adjuvant (add-on) treatment

D. If you have metastatic nonsquamous non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with pemetrexed and platinum chemotherapy (such as cisplatin, carboplatin)
3. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)

E. If you have metastatic squamous non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with carboplatin and either paclitaxel or paclitaxel protein-bound

F. If you have non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your tumor has programmed death-ligand 1 (PD-L1: a type of protein) [Tumor Proportion Score (TPS) of at least 1%] as determined by a Food and Drug Administration (FDA)- approved test
3. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)
4. You meet ONE of the following:
   a. You have stage III non-small cell lung cancer AND you are not a candidate for surgical resection (removal) or definitive chemoradiation (a type of treatment)
   b. You have metastatic non-small cell lung cancer (cancer that has spread to other parts of the body)

(Denial text continued on next page)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

G. If you have metastatic non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Your tumor has programmed death-ligand 1 (PD-L1: a type of protein) [Tumor Proportion Score (TPS) of at least 1%] as determined by a Food and Drug Administration (FDA)-approved test
3. You experienced disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
4. You meet ONE of the following:
   a. You do not have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations (types of gene mutations)
   b. You have an anaplastic lymphoma kinase (ALK) genomic tumor aberration (type of gene mutation) AND experienced disease progression (worsening) on or after ALK- directed therapy (such as Xalkori [crizotinib], Zykadia [ceritinib])
   c. You have an epidermal growth factor receptor (EGFR) genomic tumor aberration (type of gene mutation) AND experienced disease progression (worsening) on or after EGFR-directed therapy (such as Tarceva [erlotinib], Iressa [gefitinib], Gilotrif [afatinib])

H. If you have resectable (node positive or tumor is at least 4 cm) non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with platinum-containing chemotherapy (such as cisplatin) as neoadjuvant treatment (given before main treatment), OR as a single agent (not given in combination with chemotherapy) as adjuvant (add-on) treatment after surgery following prior use in combination with platinum-containing chemotherapy

I. If you have Stage IB (T2a is at least 4 cm), II, or IIIA non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used as adjuvant (add-on) treatment following resection (removed by surgery) and platinum-based chemotherapy (such as cisplatin, carboplatin)

J. If you have unresectable advanced or metastatic malignant pleural mesothelioma, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be given in combination with pemetrexed and platinum chemotherapy (such as cisplatin, carboplatin)

(Denial text continued on next page)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

K. If you have head and neck squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Your cancer is resectable (able to be removed by surgery) and locally advanced (cancer that has spread from where it started to nearby tissue or lymph nodes) and you meet ALL of the following:
      i. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
      ii. Keytruda Qlex will be used as single-agent neoadjuvant treatment (given before main treatment) and then continued as adjuvant (add-on) treatment in combination with radiotherapy (RT: a type of cancer treatment), OR Keytruda will be used as a single agent following its prior use both as single-agent neoadjuvant treatment and as adjuvant treatment in combination with RT
   b. Your cancer is either metastatic (has spread to other parts of the body) or both unresectable (unable to remove by surgery) and recurrent (has returned), and you meet ONE of the following:
      i. Keytruda Qlex will be used in combination with platinum and fluorouracil (FU)
      ii. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
   c. Your cancer is recurrent (has returned) or metastatic (has spread to other parts of the body); AND you experienced disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)

L. If you have locally advanced or metastatic urothelial carcinoma, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. Keytruda Qlex will be used in combination with enfortumab vedotin (Padcev)
   b. You are not eligible for any platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
   c. You have disease progression (worsening) on or after treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)
   d. You have disease progression (worsening) within 12 months of neoadjuvant (given before main treatment) or adjuvant (add-on) treatment with platinum-containing chemotherapy (such as cisplatin, carboplatin, oxaliplatin)

(Denial text continued on next page)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

M. If you have bladder cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You have muscle invasive bladder cancer (MIBC: bladder cancer that has grown into the muscle wall); AND Keytruda Qlex will be used in combination with enfortumab vedotin (Padcev) as neoadjuvant treatment (given before main treatment), and then continued as adjuvant (add-on) treatment after a cystectomy (surgery to remove part or all of the urinary bladder)
   b. You have Bacillus Calmette-Guerin (BCG: a type of anti-cancer treatment)-unresponsive, high-risk, non-muscle invasive bladder cancer with carcinoma in situ (a type of early-stage bladder cancer); AND you are not eligible for or have chosen not to undergo a cystectomy (surgery to remove part or all of the urinary bladder)

N. If you have an unresectable or metastatic solid tumor, approval also requires:
1. You are 12 years of age or older
2. You meet ONE of the following:
   a. Your tumor is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities), as determined by a Food and Drug Administration (FDA)-approved test
   b. Your tumor is tumor mutational burden-high (TMB-H: high number of changes found in the genes of the cancer cells) [at least 10 mutations/megabase], as determined by a Food and Drug Administration (FDA)-approved test
3. Your disease has progressed (worsened) following prior treatment, and you have no alternative treatment options

O. If you have unresectable or metastatic colorectal cancer, approval also requires:
1. You are 18 years of age or older
2. Your cancer is microsatellite instability-high (MSI-H) or mismatch repair deficient (dMMR) (types of genetic abnormalities) as determined by a Food and Drug Administration (FDA)-approved test

(Denial text continued on next page)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

P. If you have locally advanced unresectable or metastatic gastric or gastroesophageal junction adenocarcinoma, approval also requires:
1. You are 18 years of age or older
2. Your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
3. You meet ONE of the following:
   a. Your cancer is human epidermal growth factor receptor 2 (HER2: type of protein that promotes cancer cells)-POSITIVE, and Keytruda Qlex will be used in combination with trastuzumab, fluoropyrimidine- and platinum-containing chemotherapy
   b. Your cancer is human epidermal growth factor receptor 2 (HER2: type of protein that promotes cancer cells)-NEGATIVE, and Keytruda Qlex will be used in combination with fluoropyrimidine- and platinum-containing chemotherapy

Q. If you have locally advanced or metastatic esophageal or gastroesophageal junction carcinoma, approval also requires:
1. You are 18 years of age or older
2. Your tumor is not amenable (responsive) to surgical resection (removal) or definitive chemoradiation (a type of treatment)
3. You meet ONE of the following:
   a. Keytruda Qlex will be used in combination with platinum- and fluoropyrimidine-based chemotherapy; AND your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-authorized test
   b. Keytruda Qlex will be used after one or more prior lines of systemic therapy; AND you have a tumor of squamous cell histology (cancer from flat surface-lining cells) that expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10) as determined by a Food and Drug Administration (FDA)-authorized test

(Denial text continued on next page)

GUIDELINES FOR USE (CONTINUED)

R. If you have cervical cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following:
   a. You have locally advanced cancer (cancer that has spread from where it started to nearby tissue or lymph nodes); AND Keytruda Qlex will be used in combination with chemoradiotherapy (CRT: a type of therapy to treat cancer); AND your cancer involves the lower third of the vagina, hydronephrosis (swelling of kidney)/a non-functioning kidney, or has spread to adjacent (nearby) pelvic organs (FIGO 2014 Stage III-IVA: a way to classify the size and spread of the cancer)
   b. You have persistent, recurrent, or metastatic cancer (cancer that does not go away, has returned, or has spread to other parts of the body); AND Keytruda Qlex will be used in combination with chemotherapy (such as paclitaxel, cisplatin, carboplatin); AND your tumor expresses programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
   c. You have recurrent (has returned) or metastatic (has spread to other parts of the body) cancer; AND you have experienced disease progression (worsening) on or after chemotherapy; AND your tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test

S. If you have hepatocellular carcinoma, approval also requires:
1. You are 18 years of age or older
2. Your cancer is caused by hepatitis B (a type of liver infection)
3. You have received prior systemic therapy (such as Nexavar [sorafenib], oxaliplatin) other than a PD-1/PD-L1-containing regimen (such as Opdivo [nivolumab])

T. If you have locally advanced unresectable or metastatic biliary tract cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with gemcitabine and cisplatin

U. If you have recurrent locally advanced or metastatic Merkel cell carcinoma, approval also requires:
1. You are 12 years of age or older

(Denial text continued on next page)

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

V. If you have renal cell carcinoma, approval also requires ONE of the following:
1. You have advanced renal cell carcinoma; you are 18 years of age or older; AND Keytruda Qlex will be used in combination with Inlyta (axitinib) OR Lenvima (lenvatinib)
2. You are 18 years of age or older; Keytruda Qlex will be used as adjuvant (add-on) treatment; AND your cancer is at intermediate-high or high risk of recurrence (returning) following a nephrectomy (surgical removal of the kidney), or following a nephrectomy and resection (surgical removal) of metastatic lesions (abnormal area of tissue)
3. You are 18 years of age or older; AND Keytruda Qlex will be used in combination with Welireg (belzutifan), Keytruda Qlex will be used as adjuvant (add-on) treatment; AND you have renal cell carcinoma with a clear cell component (ccRCC: a type of kidney cancer), AND your cancer is at intermediate-high or high risk of recurrence (returning) following a nephrectomy (surgical removal of the kidney), or following a nephrectomy and resection (surgical removal) of metastatic lesions (abnormal area of tissue)

W. If you have primary advanced or recurrent endometrial carcinoma, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with carboplatin and paclitaxel, OR as a single agent after previous use in combination with carboplatin and paclitaxel

X. If you have advanced endometrial carcinoma, approval also requires:
1. You are 18 years of age or older
2. You have experienced disease progression (worsening) following prior systemic therapy (treatment that affects the entire body)
3. You are not a candidate for curative surgery or radiation
4. You meet ONE of the following:
   a. You will use Keytruda Qlex in combination with lenvatinib (Lenvima), AND your cancer is mismatch repair proficient (pMMR) OR not microsatellite instability-high (MSI-H) (characteristics that help determine the type of cancer and what treatment options there are for it) as determined by a Food and Drug Administration (FDA)- approved test
   b. Your cancer is microsatellite instability-high (MSI-H) OR mismatch repair deficient (dMMR) (types of genetic abnormalities) as determined by a Food and Drug Administration (FDA)-approved test

Y. If you have recurrent or metastatic OR locally advanced cutaneous squamous cell carcinoma, approval also requires:
1. You are 18 years of age or older
2. Your disease is not curable by surgery or radiation

PEMBROLIZUMAB-BERAHYALURONIDASE ALFA-PMPH

GUIDELINES FOR USE (CONTINUED)

Z. If you have high-risk early-stage triple-negative breast cancer, approval also requires:
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with chemotherapy (such as carboplatin, paclitaxel, doxorubicin) as neoadjuvant treatment (given before main treatment), OR as a single agent as adjuvant (add-on) treatment after surgery following prior use in combination with chemotherapy

AA. **If you have unresectable locally advanced or metastatic triple-negative breast cancer, approval also requires:**
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with Trodelvy (sacituzumab govitecan-hziy)
3. Your tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10), as determined by a Food and Drug (FDA)- authorized test

BB. **If you have locally recurrent unresectable or metastatic triple-negative breast cancer, approval also requires:**
1. You are 18 years of age or older
2. Keytruda Qlex will be used in combination with chemotherapy (such as paclitaxel, gemcitabine, carboplatin)
3. The tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 10) as determined by a Food and Drug Administration (FDA)-approved test

CC. **If you have epithelial ovarian, fallopian tube, or primary peritoneal carcinoma, approval also requires:**
1. You are 18 years of age or older
2. You have platinum-resistant cancer (cancer that no longer responds to a type of treatment)
3. Keytruda Qlex will be used in combination with paclitaxel
4. The tumor has programmed death-ligand 1 (PD-L1: a type of protein) (Combined Positive Score [CPS] of at least 1) as determined by a Food and Drug Administration (FDA)-approved test
5. You have received one or more prior systemic treatment regimens (treatment that affects the entire body)

RATIONALE

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PEMETREXED (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEMETREXED DISODIUM	ALIMTA, PEMETREXED DISODIUM, PEMRYDI RTU	25905		GPI-10 (2130005310)	
PEMETREXED	PEMFEXY, PEMETREXED	43305		GPI-10 (2130005300)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced or metastatic, non-squamous, non-small cell lung cancer (NSCLC) and meet **ONE** of the following criteria?
   - The requested medication will be used in combination with cisplatin
   - The requested medication will be used as a single agent, maintenance therapy, AND the patient's disease has not progressed after four cycles of platinum-based first-line chemotherapy (e.g., cisplatin, carboplatin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #2.

2. Does the patient have a diagnosis of metastatic, non-squamous, non-small cell lung cancer (NSCLC) and meet **ALL** of the following criteria?
   - The requested medication will be used in combination with pembrolizumab and platinum chemotherapy (e.g., cisplatin, carboplatin)
   - The patient does not have EGFR or ALK genomic tumor aberrations

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Does the patient have a diagnosis of recurrent, metastatic non-squamous, non-small cell lung cancer (NSCLC) and meet **ALL** of the following criteria?
   - The requested medication will be used as a single agent
   - The patient has received prior chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

4. Does the patient have a diagnosis of locally advanced or metastatic non-small cell lung cancer (NSCLC) **AND** meet the following criterion?
   - The patient is 18 years of age or older

   If yes, continue to #5.
   If no, continue to #6.

PEMETREXED (NSA)

GUIDELINES FOR USE (CONTINUED)

5. Does the patient meet **ONE** of the following criteria?
   - The requested medication will be used in combination with Tagrisso (osimertinib) and platinum-based chemotherapy (e.g., cisplatin, carboplatin)
   - The requested medication will be used in combination with Rybrevant (amivantamab-vmjw) and carboplatin

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

6. Does the patient have a diagnosis of malignant pleural mesothelioma and meet **ALL** of the following criteria?
   - The requested medication is being used in combination with cisplatin
   - The patient's disease is unresectable OR the patient is not a candidate for curative surgery

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #7.

7. Is the request for an FDA-approved indication **AND** the requested medication will be used in combination with another chemotherapy agent(s)?
   (NOTE:** Please check claims history, MRF, etc. for combination chemotherapy agent(s). In addition, please refer to the label of the combination chemotherapy agent(s) to ensure the indication is to be used with pemetrexed. Clinically appropriate to accept FDA approval in any of the combination chemotherapy agent(s) labels.**)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PEMETREXED (NSA)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PEMETREXED (Alimta, Pemfexy, Pemrydi RTU)** requires the following rule(s) be met for approval:

A. The request is for ONE of the following:
   1. Locally advanced or metastatic, non-squamous, non-small cell lung cancer (NSCLC) (a type of lung cancer that has spread to nearby tissue or lymph nodes or other parts of the body)
   2. Metastatic, non-squamous, non-small cell lung cancer (NSCLC) (a type of lung cancer that has spread to other parts of the body)
   3. Recurrent, metastatic non-squamous, non-small cell lung cancer (NSCLC) (a type of lung cancer that has returned and spread to other parts of the body)
   4. Locally advanced or metastatic non-small cell lung cancer (NSCLC) (a type of lung cancer that has spread from where it started to nearby tissue or lymph nodes or other parts of the body)
   5. Malignant pleural mesothelioma (a type of cancer)
   6. The requested medication is being used in combination with another chemotherapy agent(s) for a Food and Drug Administration (FDA)-approved indication

B. If you have locally advanced or metastatic, non-squamous, non-small cell lung cancer, approval also requires ONE of the following:
   1. The requested medication will be used in combination with cisplatin
   2. The requested medication will be used as a single agent, maintenance therapy AND your disease has not progressed (gotten worse) after four cycles of platinum-based first-line chemotherapy (a type of therapy to treat cancer such as cisplatin, carboplatin)

C. If you have metastatic, non-squamous, non-small cell lung cancer, approval also requires:
   1. The requested medication will be used in combination with pembrolizumab and platinum chemotherapy (a type of therapy to treat cancer such as cisplatin, carboplatin)
   2. You do NOT have EGFR (epidermal growth factor receptor) or ALK (anaplastic lymphoma kinase) genomic tumor aberrations (types of gene mutations)

D. If you have recurrent, metastatic non-squamous, non-small cell lung cancer, approval also requires:
   1. The requested medication will be used as a single agent
   2. You have received prior chemotherapy

(Denial text continued on next page)

PEMETREXED (NSA)

GUIDELINES FOR USE (CONTINUED)

E. If you have locally advanced or metastatic non-small cell lung cancer, approval also requires:
1. You are 18 years of age or older
2. You meet ONE of the following criteria:
   a. The requested medication will be used in combination with Tagrisso (osimertinib) and platinum-based chemotherapy (a type of therapy to treat cancer such as cisplatin, carboplatin)
   b. The requested medication will be used in combination with Rybrevant (amivantamab-vmjw) and carboplatin

F. If you have malignant pleural mesothelioma, approval also requires:
1. The requested medication will be used in combination with cisplatin
2. Your disease is unresectable (cannot be completely removed by surgery) OR you are not a candidate for curative surgery

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PEMETREXED DIPOTASSIUM

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEMETREXED DIPOTASSIUM	AXTLE, PEMETREXED DIPOTASSIUM	49734		GPI-10 (2130005308)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of non-squamous non-small cell lung cancer (NSCLC) (ICD-10 Group C34)?

   If yes, continue to #2.
   If no, continue to #5.

2. Is the patient's cancer metastatic and the patient meets **ALL** of the following criteria?
   - The requested medication will be used in combination with Keytruda (pembrolizumab) and platinum chemotherapy (e.g., cisplatin, carboplatin)
   - The patient's cancer does NOT have epidermal growth factor receptor (EGFR) or anaplastic lymphoma kinase (ALK) genomic tumor aberrations

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Is the patient's cancer locally advanced or metastatic and the patient meets **ONE** of the following criteria?
   - The requested medication will be used in combination with cisplatin
   - The requested medication will be used as a single agent AND the patient's disease has not progressed after four cycles of platinum-based first-line chemotherapy (e.g., cisplatin, carboplatin)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

4. Is the patient's cancer recurrent and metastatic **AND** the patient meets the following criterion?
   - The patient has received prior chemotherapy

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PRIOR AUTHORIZATION GUIDELINES

PEMIGATINIB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PEMIGATINIB	PEMAZYRE	46462		GPI-10 (2153226000)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of unresectable locally advanced or metastatic cholangiocarcinoma (ICD-10 C22.1, C24.0) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has been previously treated for unresectable locally advanced or metastatic cholangiocarcinoma
   - The patient has a fibroblast growth factor receptor 2 (FGFR2) fusion or other rearrangement, as detected by an FDA-approved test
   - The patient will complete a comprehensive ophthalmological examination, including optical coherence tomography (OCT), prior to initiation of therapy and at the recommended scheduled intervals

   If yes, **approve for 12 months by HICL or GPI-10 for #14 per 21 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of relapsed or refractory myeloid/lymphoid neoplasms (MLNs) (ICD-10 C96.9, C96.Z; Groups C94.8, C95.1) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - The patient has a fibroblast growth factor receptor 1 (FGFR1) rearrangement
   - The patient will complete a comprehensive ophthalmological examination, including optical coherence tomography (OCT), prior to initiation of therapy and at the recommended scheduled intervals

   If yes, **approve for 12 months by HICL or GPI-10 for #1 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEMIGATINIB (Pemazyre)** requires the following rule(s) be met for approval:
   A. You have ONE of the following:
      1. Unresectable locally advanced or metastatic cholangiocarcinoma (bile duct cancer that has spread to nearby tissue and lymph nodes and cannot be removed by surgery, or it has spread to other parts of the body)
      2. Relapsed or refractory myeloid/lymphoid neoplasms (a type of blood cancer that has returned or did not respond to treatment)

   - The patient is 12 years of age or older
   - The patient weighs at least 40 kg (88 lbs)
   - The patient is NOT currently infected with SARS-CoV-2 virus
   - The patient has NOT had a recent exposure to an individual infected with the SARS-CoV-2 virus
   - The patient is moderately-to-severely immunocompromised due to a medical condition (e.g., HIV, primary immunodeficiency disease, acute leukemia) OR immunosuppressive medication or treatment (e.g., sirolimus, mycophenolate, chemotherapy)
   - The patient is unlikely to have an adequate immune response to the COVID-19 vaccination

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #36 mL per 3 months.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEMIVIBART (Pemgarda)** requires the following rule(s) be met for approval:
   A. The request is for pre-exposure prophylaxis (to prevent infection) of coronavirus disease 2019 (COVID-19: a type of viral infection)
   B. You are 12 years of age or older
   C. You weigh at least 40 kilograms (88 pounds)
   D. You are NOT currently infected with the SARS-CoV-2 virus (a type of virus that causes COVID-19 illness)
   E. You have NOT been recently exposed to (come in contact with) an individual infected with the SARS-CoV-2 virus
   F. You are moderately-to-severely immunocompromised (low immune system) due to a medical condition (such as HIV [human immunodeficiency virus: an immune system disease caused by a virus], primary immunodeficiency disease [genetic disease where the immune system is weak], acute leukemia [a type of blood cancer]) OR immunosuppressive medication or treatment (such as sirolimus, mycophenolate, chemotherapy [a type of cancer treatment])

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PENICILLAMINE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PENICILLAMINE	CUPRIMINE, PENICILLAMINE		7091	GPI-14 (99200030000110)	
PENICILLAMINE	DEPEN, PENICILLAMINE		7100	GPI-14 (99200030000305)	
PENICILLAMINE	D-PENAMINE		7101	GPI-14 (99200030000302)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Is the request for D-Penamine and the patient has an active prior authorization approval for Depen? ***[Note: D-Penamine is temporarily available to address a critical drug shortage of Depen. Patients previously approved for Depen will be allowed access without additional criteria during this shortage.]***

If yes, **approve D-Penamine for 12 months by GPID or GPI-14 for the requested indication as follows:**
- **Wilson's Disease: #16 per day.**
- **Active Rheumatoid Arthritis: #12 per day.**
- **Cystinuria: #32 per day.**

If no, continue to #2.

2. Does the patient have a diagnosis of Wilson's disease (ICD-10 E83.01) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a hepatologist or gastroenterologist
   - The requested medication will be used with a dietary plan to maintain a copper intake of less than 0.9 mg/day

   If yes, continue to #3.
   If no, continue to #7.

3. Does the patient have genetic testing confirming an ATP7B mutation?

   If yes, continue to #5.
   If no, continue to #4.

PENICILLAMINE

INITIAL CRITERIA (CONTINUED)

4. Does the patient meet **ONE** of the following criteria?
   - The patient has a 24-hour urinary copper excretion (greater than 40 micrograms/24 hours)
   - The patient has a liver biopsy with copper dry weight greater than 75 micrograms/gram
   - The patient has a serum ceruloplasmin level of less than 20 mg/dL

   If yes, continue to #5.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

5. Is the request for Depen or D-Penamine?

   If yes, **approve for lifetime by GPID or GPI-14 for the requested medication as follows:**
   - **Depen: #8 per day.**
   - **D-Penamine: #16 per day.**

   If no, continue to #6.

6. Is the request for Cuprimine **AND** the patient had a trial of or contraindication to the preferred agent: penicillamine (Depen, D-Penamine)?

   If yes, **approve Cuprimine for lifetime by GPID or GPI-14 with a quantity limit of #8 per day.**

   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

7. Does the patient have a diagnosis of cystinuria (ICD-10 E72.01) and meet **ALL** of the following criteria?
   - Therapy is prescribed by or in consultation with a nephrologist or urologist
   - The patient has failed to respond to an adequate trial of or has a contraindication to conservative therapy which includes ALL of the following: increased fluid intake, reductions in sodium and protein intake, and urinary alkalinization

   If yes, continue to #8.
   If no, continue to #11.

PENICILLAMINE

INITIAL CRITERIA (CONTINUED)

8. Does the patient have nephrolithiasis (ICD-10 N20.0) and meet **ONE** of the following criteria?
   - The patient's stone analysis shows a presence of cystine
   - The patient's urinalysis shows pathognomonic hexagonal cystine crystals
   - The patient has a family history of cystinuria AND a positive cyanide-nitroprusside screening

   If yes, continue to #9.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

9. Is the request for Depen (penicillamine tablets) or D-Penamine **AND** the patient had a trial of or contraindication to the preferred agent: penicillamine capsules (Cuprimine)?

   If yes, **approve for 12 months by GPID or GPI-14 for all of the following as follows:**
   - **Depen: #16 per day.**
   - **D-Penamine: #32 per day.**

   If no, continue to #10.

10. Is the request for Cuprimine (penicillamine capsules)?

    If yes, **approve Cuprimine for 12 months by GPID or GPI-14 with a quantity of #16 per day.**
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

11. Does the patient have a diagnosis of active rheumatoid arthritis (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
    - Therapy is prescribed by or in consultation with a rheumatologist
    - The patient does not have a history or other evidence of renal insufficiency
    - The patient has failed to respond to an adequate trial of at least 3 months of conventional therapy including at least ONE of the following DMARD (disease-modifying antirheumatic drug) agents: methotrexate dose greater than or equal to 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, sulfasalazine

    If yes, continue to #12.
    If no, do not approve.
    DENIAL TEXT: See the initial denial text at the end of the guideline.

PENICILLAMINE

INITIAL CRITERIA (CONTINUED)

12. Is the request for Depen or D-Penamine?

    If yes, **approve for 12 months by GPID or GPI-14 for the requested medication as follows:**
    - **Depen: #6 per day.**
    - **D-Penamine: #12 per day.**

    If no, continue to #13.

13. Is the request for Cuprimine **AND** has the patient had a trial of or contraindication to the preferred agent: penicillamine (Depen, D-Penamine)?

    If yes, **approve Cuprimine for 12 months by GPID or GPI-14 with a quantity of #6 per day.** If no, do not approve.

    INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

    Our guideline named **PENICILLAMINE (Cuprimine, Depen, D-Penamine)** requires the following rule(s) be met for approval:
    A. You have ONE of the following:
        1. Wilson's disease (a type of genetic disorder)
        2. Cystinuria (a type of genetic disorder)
        3. Severe, active rheumatoid arthritis (a type of joint condition)

    (Initial denial text continued on next page)

PENICILLAMINE

INITIAL CRITERIA (CONTINUED)

B. If you have Wilson's disease, approval also requires:
1. Therapy is prescribed by or in consultation with a hepatologist (a type of liver doctor) or gastroenterologist (a type of digestive system doctor)
2. The requested medication will be used with a dietary plan to maintain a copper intake of less than 0.9 mg/day
3. You meet ONE of the following:
   a. You have genetic testing confirming an ATP7B mutation (an abnormal change in a type of gene)
   b. You meet ONE of the following:
      i. You have a 24-hour urinary copper excretion (a type of lab test) (greater than 40 micrograms/24 hours)
      ii. You have a liver biopsy (removal of cells or tissue from the liver for examination) with copper dry weight greater than 75 micrograms/gram
      iii. You have a serum ceruloplasmin (a type of lab test) level less than 20mg/dL
4. If you are requesting Cuprimine, you have tried or have a contraindication to (harmful for you to use) the preferred medication: penicillamine (Depen, D-Penamine)

C. If you have cystinuria, approval also requires:
1. Therapy is prescribed by or in consultation with a nephrologist (kidney doctor) or urologist (a type of doctor who treats conditions affecting the organs in the body that make and remove urine)
2. You have failed to respond to an adequate trial of or have a contraindication to (harmful for you to use) conservative therapy which includes ALL of the following:
   a. Increased fluid intake
   b. Reductions in sodium and protein intake
   c. Urinary alkalinization (a process that makes urine basic)
3. You have nephrolithiasis (kidney stones) and meet ONE of the following:
   a. Your kidney stone analysis shows that there is a presence of cystine (an amino acid)
   b. Your urine analysis shows that there are hexagonal cystine crystals in your urine that are pathognomonic (signs relating to the disease)
   c. You have a family history of cystinuria (a type of genetic disorder) AND tested positive for the cyanide-nitroprusside screen (a test to determine the amount of cysteine in your body)
4. If you are requesting Depen (penicillamine tablets) or D-Penamine, you have tried or have a contraindication to (harmful for you to use) the preferred medication: penicillamine capsules (Cuprimine)

(Initial denial text continued on next page)

PENICILLAMINE

INITIAL CRITERIA (CONTINUED)

D. If you have active rheumatoid arthritis, approval requires:
1. Therapy is prescribed by or in consultation with a rheumatologist (a type of immune system doctor)
2. You do not have a history or other evidence of renal insufficiency (kidney problems)
3. You have failed to respond to an adequate trial of at least 3 months of conventional therapy including at least ONE of the following DMARD (disease-modifying antirheumatic drug) agents: methotrexate dose greater than or equal to 20 mg per week or maximally tolerated dose, leflunomide, hydroxychloroquine, or sulfasalazine
4. If you are requesting Cuprimine, you have tried or have a contraindication to (harmful for you to use) the preferred medication: penicillamine (Depen, D-Penamine)

E. **If you have an active prior authorization approval for Depen, D-Penamine** will be approved without meeting additional criteria during the period of Depen shortage.

PENICILLAMINE

RENEWAL CRITERIA

NOTE: For the diagnosis of Wilson's disease, please refer to the Initial Criteria section.

1. Does the patient have a diagnosis of cystinuria (ICD-10 E72.01) **AND** meet the following criterion?
   - The patient has decreased urinary cysteine concentration

   If yes, **approve for lifetime by GPID or GPI-14 for all of the following as follows:**
   - **Depen: #16 per day.**
   - **D-Penamine: #32 per day.**
   - **Cuprimine: #16 per day.**

   If no, continue to #2.

2. Does the patient have a diagnosis of active rheumatoid arthritis (ICD-10 M05.9, M06.9; Groups M05.7, M05.8, M06.0, M06.8) and meet **ALL** of the following criteria?
   - The patient does not have a history of or other evidence of renal insufficiency
   - The patient has experienced or maintained improvement in tender joint count or swollen joint count while on therapy compared to baseline

   If yes, **approve for lifetime by GPID or GPI-14 for all of the following as follows:**
   - **Depen: #6 per day.**
   - **D-Penamine: #12 per day.**
   - **Cuprimine: #6 per day.**

   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PENICILLAMINE (Cuprimine, Depen, D-Penamine)** requires the following rule(s) be met for renewal:

   A. You have ONE of the following:
      1. Cystinuria (a type of genetic disorder)
      2. Active rheumatoid arthritis (a type of joint condition)

   B. If you have cystinuria, renewal also requires:
      1. You have decreased urinary cysteine concentration (a type of lab test for a type of protein building block)

   C. If you have active rheumatoid arthritis, renewal also requires:
      1. You do not have a history of or other evidence of renal insufficiency (kidney problems)
      2. You have experienced or maintained improvement in tender joint count or swollen joint count while on therapy compared to baseline

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PENTOSAN POLYSULFATE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PENTOSAN POLYSULFATE SODIUM	ELMIRON	08734		GPI-10 (5650006010)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Does the patient have a diagnosis of interstitial cystitis/bladder pain syndrome (ICD-10 Group N30.1) and meet **ALL** of the following criteria?
   - The patient has experienced ongoing symptoms for at least six weeks
   - Therapy is prescribed by or in consultation with a urologist
   - The patient had a retinal exam or a detailed ophthalmic history performed/collected prior to starting therapy
   - The patient had a trial of or contraindication to the following preferred agent: ONE guideline recommended alternative generic agent (e.g., amitriptyline, hydroxyzine, cimetidine)

   If yes, **approve for 6 months by HICL or GPI-10 with a quantity limit of #3 per day.**
   If no, do not approve.

   INITIAL DENIAL TEXT: ***Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.**

   Our guideline named **PENTOSAN POLYSULFATE (Elmiron)** requires the following rule(s) be met for approval:
   A. You have interstitial cystitis (painful bladder condition)/bladder pain syndrome
   B. You have experienced ongoing symptoms for at least six weeks
   C. Therapy is prescribed by or in consultation with a urologist (a type of doctor who treats conditions affecting the organs in the body that make and remove urine)
   D. You had a retinal (eye) exam or a detailed ophthalmic (eye) history performed/collected prior to starting therapy
   E. You have tried or have a contraindication to (harmful for you to use) the following preferred agent: ONE guideline recommended alternative generic medication (such as amitriptyline, hydroxyzine, cimetidine)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PENTOSAN POLYSULFATE

RENEWAL CRITERIA

1. Does the patient have a diagnosis of interstitial cystitis/bladder pain syndrome (ICD-10 Group N30.1) and meet **ALL** of the following criteria?
   - The patient has experienced clinical improvement from baseline secondary to treatment
   - The patient has NOT experienced any visual changes/adverse effects related to Elmiron

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #3 per day.**
   If no, do not approve.

   RENEWAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PENTOSAN POLYSULFATE (Elmiron)** requires the following rule(s) be met for renewal:
   A. You have interstitial cystitis (painful bladder condition)/bladder pain syndrome
   B. You have experienced clinical improvement (observable improvement) from baseline (before treatment) due to treatment
   C. You have NOT experienced any visual changes (change in how you see)/adverse effects (side effects) related to Elmiron

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

For further information, please refer to the Prescribing Information and/or Drug Monograph for Elmiron.

STANDARD COMMERCIAL DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PERTUZUMAB

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PERTUZUMAB	PERJETA	39102		GPI-10 (2117005400)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of breast cancer (ICD-10 Group C50) **AND** meet the following criterion?
   - The patient's breast cancer is HER2-positive

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

2. Is the patient's cancer metastatic and the patient meets **ALL** of the following criteria?
   - The patient has not received prior therapy with an anti-HER2 agent or chemotherapy for metastatic disease
   - Perjeta will be used in combination with trastuzumab (Herceptin or an FDA approved biosimilar) and docetaxel

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #3.

3. Is the patient's cancer locally advanced, inflammatory, or early stage (either greater than 2 cm in diameter or node positive) and the patient meets **ALL** of the following criteria?
   - Perjeta will be used in the neoadjuvant setting
   - Perjeta will be used in combination with trastuzumab (Herceptin or an FDA approved biosimilar) and chemotherapy (e.g., paclitaxel, carboplatin, cyclophosphamide) as part of a complete treatment regimen for early breast cancer

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #4.

4. Is the patient's disease early breast cancer (EBC) and the patient meets **ALL** of the following criteria?
   - The patient's breast cancer is at high risk of recurrence
   - Perjeta will be used in the adjuvant setting
   - Perjeta will be used in combination with trastuzumab (Herceptin or an FDA approved biosimilar) and chemotherapy (e.g., paclitaxel, carboplatin, cyclophosphamide)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, continue to #5.

PERTUZUMAB

GUIDELINES FOR USE (CONTINUED)

5. Is the patient's cancer unresectable or metastatic and the patient meets **ALL** of the following criteria?
   - The patient's cancer is IHC 3+ or ISH positive, as determined by an FDA-approved test
   - Perjeta will be used in combination with fam-trastuzumab deruxtecan-nxki (Enhertu)

   If yes, **approve for 12 months by HICL or GPI-10.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PERTUZUMAB (Perjeta)** requires the following rule(s) be met for approval:
   A. You have breast cancer
   B. Your breast cancer is human epidermal growth factor receptor 2 (HER2: a type of protein)-positive
   C. If you have metastatic breast cancer (cancer that has spread to other parts of the body), approval also requires:
      1. You have not received prior therapy with an anti-HER2 agent or chemotherapy for metastatic disease (treatment for cancer that has spread to other parts of the body)
      2. Perjeta will be used in combination with trastuzumab and docetaxel
   D. If you have locally advanced (cancer that has spread to nearby tissue or lymph nodes), inflammatory, or early stage breast cancer (defined as either tumor is greater than 2 cm in diameter or node positive), approval also requires:
      1. Perjeta will be used in the neoadjuvant setting (given before main treatment)
      2. Perjeta will be used in combination with trastuzumab and chemotherapy (such as paclitaxel, carboplatin, or cyclophosphamide) as part of a complete drug regimen for early breast cancer
   E. If you have early breast cancer, approval also requires:
      1. Your breast cancer is at high risk of recurrence (returning)
      2. Perjeta will be used in the adjuvant setting (given as add-on treatment)
      3. Perjeta will be used in combination with trastuzumab and chemotherapy (such as paclitaxel, carboplatin, or cyclophosphamide)
   F. If you have unresectable or metastatic breast cancer (cancer that cannot be removed by surgery or has spread to other parts of the body), approval also requires:
      1. Your breast cancer is IHC 3+ or ISH positive, as determined by a Food and Drug Administration (FDA)-approved test
      2. You will use Perjeta in combination with fam-trastuzumab deruxtecan-nxki (Enhertu)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

STANDARD NON-SELF-ADMINISTERED DRUG FORMULARY
PRIOR AUTHORIZATION GUIDELINES

PERTUZUMAB-TRASTUZUMAB-HY-ZZXF (NSA)

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PERTUZUMAB-TRASTUZUMAB-HY-ZZXF	PHESGO	46674		GPI-10 (2199000355)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of locally advanced, inflammatory, or early breast cancer (either greater than 2 cm in diameter or node positive) and meet **ALL** of the following criteria?
   - The patient's breast cancer is HER2-positive
   - The requested medication will be used in combination with chemotherapy as part of a complete treatment regimen for early breast cancer in the neoadjuvant setting

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 21 days.**
   If no, continue to #2.

2. Does the patient have a diagnosis of early breast cancer at high risk of recurrence and meet **ALL** of the following criteria?
   - The patient's breast cancer is HER2-positive
   - The requested medication will be used in combination with chemotherapy in the adjuvant setting

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 21 days.**
   If no, continue to #3.

3. Does the patient have a diagnosis of metastatic breast cancer and meet **ALL** of the following criteria?
   - The patient's breast cancer is HER2-positive
   - The patient has not received prior anti-HER2 therapy or chemotherapy for metastatic disease
   - The requested medication is being used in combination with docetaxel

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #15mL per 21 days.**
   If no, do not approve.
   DENIAL TEXT: See the denial text at the end of the guideline.

PERTUZUMAB-TRASTUZUMAB-HY-ZZXF (NSA)

GUIDELINES FOR USE (CONTINUED)

DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PERTUZUMAB-TRASTUZUMAB-HY-ZZXF (Phesgo)** requires the following rule(s) be met for approval:

A. You have ONE of the following diagnoses:
   1. Locally advanced, inflammatory, or early breast cancer (tumor is greater than 2 cm in diameter or node positive)
   2. Early breast cancer at high risk of recurrence (returning)
   3. Metastatic breast cancer (breast cancer has spread to other parts of the body)

B. If you have locally advanced, inflammatory or early breast cancer (tumor is greater than 2 cm in diameter or node positive), approval also requires:
   1. Your breast cancer is HER2-positive
   2. The requested medication will be used in combination with chemotherapy as part of a complete treatment regimen for early breast cancer in the neoadjuvant setting (given before surgery)

C. If you have early breast cancer at high risk of recurrence, approval also requires:
   1. Your breast cancer is HER2-positive
   2. The requested medication will be used in combination with chemotherapy in the adjuvant setting (given as add-on treatment)

D. If you have metastatic breast cancer, approval also requires:
   1. Your breast cancer is HER2-positive
   2. You have not previously received anti-HER2 therapy or chemotherapy for metastatic disease
   3. The requested medication is being used in combination with docetaxel

Your doctor told us [INSERT PT SPECIFIC INFO PROVIDED]. We do not have information showing you [INSERT UNMET CRITERIA]. This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

RATIONALE

PEXIDARTINIB HYDROCHLORIDE	TURALIO	45912		GPI-10 (2153304501)	

GUIDELINES FOR USE

1. Does the patient have a diagnosis of symptomatic tenosynovial giant cell tumor (TGCT) (ICD-10 D48.1; Group M12.2) and meet **ALL** of the following criteria?
   - The patient is 18 years of age or older
   - TGCT is associated with severe morbidity or functional limitations
   - TGCT is NOT amenable to improvement with surgery

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #4 per day.**
   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PEXIDARTINIB (Turalio)** requires the following rules be met for approval:
   A. You have symptomatic tenosynovial giant cell tumor (TGCT: a type of non-cancerous growth in the soft tissue around a joint)
   B. You are 18 years of age or older
   C. TGCT is associated with severe morbidity (disease) or functional limitations
   D. TGCT is NOT responsive to improvement with surgery

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PHENOXYBENZAMINE HCL	DIBENZYLINE, PHENOXYBENZA -MINE HCL	02098		GPI-10 (3630001010)	FDB: ROUTE = ORAL

GUIDELINES FOR USE

1. Does the patient have a diagnosis of pheochromocytoma (ICD-10 Groups D35.0, C74.1) and meet **ALL** of the following criteria?
   - The requested medication will be used prior to pheochromocytoma resection/removal
   - Therapy is prescribed by or in consultation with an endocrinologist, an endocrine surgeon, or a hematologist-oncologist
   - The patient had a trial of or contraindication to an alpha-1 selective adrenergic receptor blocker (e.g., doxazosin, terazosin, prazosin)

   If yes, **approve for 30 days by HICL or GPI-10 with a quantity limit of #168 per 14 days for 1 fill.**

   If no, do not approve.

   DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

   Our guideline named **PHENOXYBENZAMINE (Dibenzyline)** requires the following rules be met for approval:
   A. You have pheochromocytoma (a type of rare tumor)
   B. The requested medication will be used before surgery to remove the tumor
   C. Therapy is prescribed by or in consultation with an endocrinologist (a type of hormone doctor), an endocrine surgeon (surgeon specializing in removal of glands such as adrenal glands), or a hematologist-oncologist (a type of cancer doctor)
   D. You have tried or have a contraindication to (harmful for you to use) an alpha-1 selective adrenergic receptor blocker (such as doxazosin, terazosin, prazosin)

   This is why your request is denied. Please work with your doctor to use a different medication or get us more information if it will allow us to approve this request.

PHENTERMINE - TOPIRAMATE

Generic	Brand	HICL	GCN	Medi-Span	Exception/Other
PHENTERMINE/ TOPIRAMATE	QSYMIA, PHENTERMINE-TOPIRAMATE ER	39347		GPI-10 (6120990230)	

GUIDELINES FOR USE

INITIAL CRITERIA (NOTE: FOR RENEWAL CRITERIA SEE BELOW)

1. Are weight loss products (anti-obesity medications) a covered benefit?

   If yes, continue to #2.
   If no, guideline does not apply.

2. Is the request for weight loss OR weight management (ICD-10 Group E66) **AND** the patient meets the following criterion?
   - There is physician attestation of active enrollment in an exercise and caloric reduction program, which may include use of an optional weight loss/behavioral modification program

   If yes, continue to #3.
   If no, do not approve.
   DENIAL TEXT: See the initial denial text at the end of the guideline.

3. Is the patient 18 years of age or older and meets **ONE** of the following criteria prior to initiating weight loss therapy?
   - The patient has a body mass index (BMI) of at least 30 kg/m(2)
   - The patient is Asian and has a BMI of at least 27.5 kg/m(2)
   - The patient has a BMI of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, hyperlipidemia)
   - The patient is Asian, has a BMI of at least 25 kg/m(2), AND has at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, hyperlipidemia)

   If yes, **approve for 14 weeks by HICL or GPI-10 with a quantity limit of #1 per day**
   If no, continue to #4.

PHENTERMINE - TOPIRAMATE

INITIAL CRITERIA (CONTINUED)

4. Is the patient 12 to 17 years of age **AND** meets the following criterion?
   - The patient's initial body mass index (BMI) is in the 95th percentile or greater for age and sex (see table below)

95th Percentile BMI Value for Age and Sex

Age (in years)	Male	Female
	95th Percentile BMI Value	95th Percentile BMI Value
12	24.2	25.3
12.5	24.7	25.8
13	25.2	26.3
13.5	25.6	26.8
14	26.0	27.3
14.5	26.5	27.7
15	26.8	28.1
15.5	27.2	28.5
16	27.6	28.9
16.5	27.9	29.3
17	28.3	29.6
17.5	28.6	30.0

If yes, **approve for 14 weeks by HICL or GPI-10 with a quantity limit of #1 per day .**
If no, do not approve.
DENIAL TEXT: See the initial denial text at the end of the guideline.

PHENTERMINE - TOPIRAMATE

INITIAL CRITERIA (CONTINUED)

INITIAL DENIAL TEXT: *Some terms are already pre-defined in parenthesis. Please use these definitions if the particular text you need to use does not already have definition(s) in it.

Our guideline named **PHENTERMINE - TOPIRAMATE (Qsymia)** requires the following rule(s) be met for approval:

A. The request is for weight loss or weight management
B. You are 12 years of age or older
C. You are actively enrolled in an exercise and caloric reduction program which may include use of an optional weight loss/behavioral modification program
D. If you are 18 years of age or older, approval also requires:
    1. You meet ONE of the following before starting weight loss therapy:
        a. You have a body mass index (BMI: a tool for evaluating body fat) of at least 30 kg/m(2)
        b. You are Asian and have a body mass index (BMI: a tool for evaluating body fat) of at least 27.5 kg/m(2)
        c. You have a body mass index (BMI: a tool for evaluating body fat) of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], or hyperlipidemia [high cholesterol])
        d. You are Asian, have a body mass index (BMI: a tool for evaluating body fat) of at least 25 kg/m(2), AND have at least ONE weight-related comorbidity (disease) (such as hypertension [high blood pressure], type 2 diabetes mellitus [a disorder with high blood sugar], or hyperlipidemia [high cholesterol])
E. If you are 12 to 17 years of age, approval also requires:
    1. Your initial body mass index (BMI: a tool for evaluating body fat) is in the 95th percentile or greater for age and sex

PHENTERMINE - TOPIRAMATE

RENEWAL CRITERIA

1. Is the request for weight loss OR weight management (ICD-10 Group E66)?

   If yes, continue to #2.
   If no, do not approve.
   DENIAL TEXT: See the renewal denial text at the end of the guideline.

2. Is the patient 12 to 17 years of age **AND** meets the following criterion?
   - The patient has achieved or maintained at least a 3% to 5% weight loss of baseline BMI after 3 months of treatment

   If yes, **approve for 12 months by HICL or GPI-10 with a quantity limit of #1 per day.**
   If no, continue to #3.

3. Is the patient 18 years of age or older and meets **ONE** of the following criteria prior to initiating weight loss therapy?
   - The patient has a body mass index (BMI) of at least 30 kg/m(2)
   - The patient is Asian and has a BMI of at least 27.5 kg/m(2)
   - The patient has a BMI of at least 27 kg/m(2) AND at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, hyperlipidemia)
   - The patient is Asian, has a BMI of at least 25 kg/m(2), AND has at least ONE weight-related comorbidity (e.g., hypertension, type 2 diabetes mellitus, hyperlipidemia)

   If yes, continue to #4.
